PREFACE

TO

THE TWELFTH EDITION.

IN 1855, when the printing of the Seventh Edition of this Dictionary had begun, and Mr. Haydn's failing health prevented the continuance of his labours, I acceded to the request of the publisher to correct the press and supply the continuations of the articles. In doing so I soon perceived that the execution of the work was far from being equal to the merit of its conception; and after much consideration, I was eventually induced to undertake its gradual revision and completion, in order to render the book more worthy of its established reputation. During the last ten years the chronological tables have been examined and continued; a great number of articles have been rewritten, and new ones inserted, and much geographical, biographical, literary, and scientific information supplied, together with a Table of the Populations and Governments of the various countries of the world; and the Index has been greatly augmented by the insertion of dates relating to eminent persons of past and present times. With the present edition is given a table of Contemporary European Sovereigns since the Norman Conquest. To afford room for these additions, the size of the page and the bulk of the volume have been enlarged, and very many articles have been condensed. My aim has been throughout to make this book not a mere Dictionary of Dates, but a dated Encyclopædia, a digested summary of every department of human history brought down to the very eve of publication. The latest Additions and Corrections will be found at the end of the volume.

PREFACE TO THE FIRST EDITION.

THE design of the Author has been to attempt the compression of the greatest body of general information that has ever appeared in a single volume, and to produce a Book of Reference whose extensive usefulness may render its possession material to every individual—in the same manner that a London *Directory* is indispensable, on business affairs, to a London merchant.

He grounds his hope of the Public taking an interest in this work altogether upon its own intrinsic utility. Its articles are drawn principally from historians of the first rank, and the most authentic annalists; and the *DICTIONARY OF DATES* will, in almost every instance, save its possessor the trouble of turning over voluminous authors to refresh his memory, or to ascertain the date, order, and features of any particular occurrence.

The volume contains upwards of *FIFTEEN THOUSAND ARTICLES*, alphabetically arranged; and, from the selection of its materials, it must be important to every man in the British Empire, whether learned or unlearned, or whether connected with the professions or engaged in trade.

It would be difficult to name all the authors from whose works the Compiler of this volume has copiously extracted; but he may mention among the classics, Herodotus, Livy, Pliny, and Plutarch. He has chosen in general chronology, Petavius, Usher, Blair, Prideaux, and the Abbé Lenglet Dufresnoy. For the events embraced in foreign history, he has relied upon Hénault, Voltaire, La Combe, Rollin, Melchior Adam, the *Nouveau Dictionnaire*, and chief authors of their respective countries. On subjects of general literature, his authorities are Cave's *Historia Literaria*, Moreri, Bayle, Priestley, and others of equal repute. And English occurrences are drawn from Camden, Stow, Hall, Baker, Holinshed, Chamberlayne, Rapin, Hume, Gibbon, Goldsmith, &c. Besides these, the Compiler has freely used the various abridgments that have brought facts and dates more prominently forward; and he is largely indebted to

Chambers, Aspin, Beatson, Anderson, Beckmann, the *Cyclopædians*, *Annual Register*, *Statutes at Large*, and numerous other compilations. In almost every instance the authority is quoted for the extract made and date assigned, though inadvertence may have prevented, in some few cases, a due acknowledgment.

The leading events of every country, whether ancient or modern kingdoms, are to be found in the annals of each respectively, as in the cases, for instance, of GREECE, ROME, the EASTERN EMPIRE, ENGLAND, FRANCE, and GERMANY. But, independently of this plan of reference, when any historical occurrence claims, from its importance, more specific mention, it is made in a separate article, according to alphabetical arrangement. Thus, in the annals of England, the dates are given of the foundation of our universities, the institution of honorary orders, and signature of *Magna Charta*; we find, in those annals, the periods of our civil wars, and remarkable eras in our history, set down as they have occurred; but if more ample information be necessary to the Reader, and if he desire to know more than the mere date of any fact or incident, the particulars are supplied under a distinct head. In the same way, the pages of *Battles* supply the date of each, in the order of time; yet in all instances where the battle has any relation to our own country, or is memorable or momentous, the chief features of it are stated in another part of the volume.

The Compiler persuades himself that the DICTIONARY OF DATES will be received as a useful companion to all Biographical works, relating, as it does, to *things* as those do to *persons*, and affording information not included in the range or design of such publications.

LONDON, *May*, 1841.

JOSEPH HAYDN.

[Died *Jan.* 17, 1856.]

DICTIONARY OF DATES.

AAR

ABC

AARGAU (Switzerland,) formerly included in Berne, was formed into an independent canton in 1803, and finally settled as such in 1815. It was much disturbed by religious dissensions in 1841—44.

ABACUS, the capital of the Corinthian order of architecture, ascribed to Callimachus, about 540 B.C.—This name is also given to a frame traversed by stiff wires, on which beads or counters are strung, used by the Greeks, Romans, and Chinese. M. Lalanne published an **ABACUS** at Paris in 1845.—The multiplication table has been called the Pythagorean abacus.

ABATTOIRS, slaughter-houses for cattle. In 1810 Napoleon decreed that five should be erected near Paris; they were opened in 1818. An abattoir was erected at Edinburgh in 1851; and abattoirs form part of the new London metropolitan cattle-market, opened on June 13, 1855.

ABBASSIDES, descendants of Mahomet's uncle, Abbas-Ben-Abdul-Motalleb. Abul Abbas defeated Merwan II., the last caliph of the Omniades, in 750, and became the ruler of the faithful. The Abbasside colour was black. Thirty-seven caliphs of this race reigned from 750 to 1258.

ABBAYE, a military prison near St. Germain des Prés, Paris, where 164 prisoners were murdered by infuriated republicans led by Maillard, Sept. 2 and 3, 1792.

ABBEYS, monasteries for men or women. See *Monachism and Convents*. The first abbey founded in England was at Bangor in 560; in France, at Poitiers, about 360; in Ireland in the fifth century; in Scotland in the sixth century. 110 monasteries and priories were suppressed in England, 2 Henry V. 1414. *Salmon*. These institutions (containing then about 47,721 persons) were totally suppressed throughout the realm by Henry VIII., 1539.* Abbeys were suppressed in France in 1790; and in the kingdom of Italy in 1861.

ABBOT (from *Ab*, father), the head of an abbey. In England, mitred abbots were lords of parliament; there were twenty-seven abbots and two priors thus distinguished in 1329; but the number was reduced to twenty-five in 1396. *Coke*. The abbots of Reading, Glastonbury, and St. John's, Colchester, were hanged and quartered for denying the king's supremacy, and not surrendering their abbeys, 1539. See *Glastonbury*.

A BC CLUB. A name adopted by a number of republican enthusiasts in Paris, their object being to relieve the *abaissés* or depressed. They broke out into an insurrection on June 5, 1832, which was suppressed with bloodshed, after Paris had been put into a state of siege on June 6. These events are described by Victor Hugo in *Les Misérables*, published in 1862.

* Viz., 374 large monasteries (revenue 104,919*l.* 13*s.* 3*d.*), 186 less monasteries (revenue 33,479*l.* 13*s.* 7*d.*), and 48 houses of the knights hospitallers (revenue 2385*l.* 12*s.* 8*d.*): total, houses, 608; revenue, 140,784*l.* 19*s.* 6*d.*

ABECEDARIANS, followers of Stork, an Anabaptist in the sixteenth century, deriving their name from their rejection of all worldly knowledge, even of the alphabet.

ABELARD and HÉLOÏSE, celebrated for their passionate love, which commenced at Paris, 1118, when Héloïse (a canon's daughter) was under seventeen years of age. Abelard built the convent of the Paraclete and made her abbess in 1121. Here he taught what was condemned as heresy, 1122 and 1140. After suffering an ignominious injury, he became a monk of the abbey of St. Denis, and died of grief in 1142, at St. Marcel. Héloïse begged his body, buried it in the Paraclete, and was interred beside him in 1163. The ashes of both were carried to the Museum of French Monuments in 1800; and the museum having been subsequently broken up, they were finally removed to the burying-ground of Père La Chaise, in 1817. Their works and letters were published in one volume in 1616. Pope's imitations of the latter are well known.

ABENCERRAGES, a powerful Moorish tribe of Granada, opposed to that of the Zegris. From 1480 to 1492 their quarrels deluged Granada with blood and hastened the fall of the kingdom. They were exterminated by Boabdil (Abu Abdallah), the last king; who was dethroned by Ferdinand and Isabella in 1492; his dominions were annexed to Castile.

ABENSBERG. See *Eckmühl*.

ABERDEEN (N. Scotland), said to have been founded in the third century after Christ. Gregory the Great conferred peculiar privileges on Aberdeen, in 893. Old Aberdeen was made a royal burgh in 1154; it was burnt by the English in 1336; and soon after New Aberdeen was built. The university was founded by bishop William Elphinstone, who had a bull from the pope Alexander VI. in 1494. King's college was erected in 1500-6. Marischal college was founded by George Keith, earl marischal of Scotland, in 1593; rebuilt in 1837. In 1858 the universities and colleges were united.—Malcolm III. having gained a great victory over the Danes in the year 1010, resolved to found a new bishopric, in token of his gratitude for his success, and pitched upon Mortlach in Banffshire, where St. Beanus was first bishop, 1015. The see, removed to Aberdeen early in the twelfth century, was discontinued at the revolution, 1689, and is now a post-revolution bishopric, instituted in 1721. See *Bishops*.

ABERDEEN ADMINISTRATION, called the *Coalition Ministry*, as including Whigs, Radicals, and followers of Sir R. Peel. Formed in consequence of the resignation of the first Derby administration; sworn in Dec. 28, 1852; resigned Jan. 30, 1855; succeeded by the Palmerston administration, *which see*.

Earl of Aberdeen,* first lord of the treasury.
Lord Cranworth, lord chancellor.
Earl Granville, president of the council.
Duke of Argyll, lord privy seal.
Lord John Russell,† foreign.
Viscount Palmerston, home secretary.
Duke of Newcastle,‡ colonial and war secretary.
William Ewart Gladstone, chancellor of exchequer.

Sir James Graham, first lord of the admiralty.
Sir Charles Wood, president of the India board.
Edward Cardwell, president of board of trade.
Hon. Sidney Herbert, secretary-at-war.
Sir William Molesworth, chief commissioner of works.
Marquess of Lansdowne (without office).
Viscount Canning, Lord Stanley of Alderley, right hon. Edward Strutt, &c.

* Born in 1784; engaged in foreign diplomacy, 1813; became foreign secretary, Jan. 1828; joined the party of Sir R. Peel, 1846; died, Dec. 14, 1860.

† Lord John Russell was succeeded as foreign secretary by the earl of Clarendon, but continued a member of the cabinet, without office; he afterwards became president of the council, in the room of earl Granville, appointed to the duchy of Lancaster.

‡ On June 11, 1854, the offices were separated; the duke of Newcastle remained secretary of war, and Sir George Grey was made colonial secretary.

ABHORRERS, a political court-party in England, in the reign of Charles II. the opponents of the Addressers (afterwards *Whigs*), so called from their address to the king praying for the immediate assembly of the parliament which was delayed on account of its being adverse to the court. The first mentioned (afterwards *Tories*) expressed their abhorrence of those who endeavoured to encroach on the royal prerogative, 1680.* *Hume*.

ABINGDON LAW. In 1645, lord Essex and Waller held Abingdon, in Berks, against Charles I. The town was unsuccessfully attacked by sir Stephen Hawkins in 1644, and by prince Rupert in 1645. On these occasions the defenders put every Irish prisoner to death without trial; hence the term "Abingdon law."

'ABJURATION of certain doctrines of the church of Rome was enjoined by statute 25 Charles II. 1672. The oath of abjuration of the pope and the pretender was first administered by statute 13 William III. 1701; the form was changed in after reigns. By 21 & 22 Vict. c. 48 (1858) an alteration in this oath was authorised for Jews.

ABO, a port of Russia, founded prior to 1157, was till 1809 capital of Swedish Finland. It has suffered much by fire, especially in 1775 and 1827; was seized by the Russians in Feb., 1808; ceded to them in 1809; and rebuilt by them after the fire in 1827. A university was erected by Gustavus Adolphus and Christina, 1640, *et seq.*, and removed to Helsingfors in 1827. The peace of Abo, between Russia and Sweden, was signed in 1743.

ABORIGINES (from *ab origine*, without origin), a name given to the earliest known inhabitants of Italy (whence came the Latini); now applied to the original inhabitants of any country.—The Aborigines Protection Society was established in 1838. Reports on the condition of the aborigines in the British colonies were presented to parliament in 1834 and 1837.

ABOUKIR (Egypt), the ancient Canopus. The bay is famous for the defeat of the French fleet by Nelson, August 1, 1798. See *Nile*. A Turkish army of 15,000 was defeated here by 5000 French under Bonaparte, July 25, 1799. A British expedition to Egypt under general sir Ralph Abercromby landed here, and Aboukir surrendered to them after an obstinate and sanguinary conflict with the French, March 8, 1801. See *Alexandria*.

ABRAHAM, ERA OF, used by Eusebius; so called from the patriarch Abraham, who died B.C. 1821. It began October 1, 2016 B.C. To reduce this era to the Christian, subtract 2015 years and three months.

ABRAHAM, HEIGHTS OF, near Quebec, Lower Canada. The French were defeated here by general Wolfe, who fell in the moment of victory, Sept. 13, 1759. See *Quebec*.

ABRAHAMITES, a sect which adopted the errors of Paulus, and was suppressed by Cyriacus, the patriarch of Antioch. In the ninth century, there sprang up a community of monks under a like designation: it, too, was suppressed, or rather exterminated, for worshipping images. A mongrel sect of this name was banished from Bohemia by Joseph II. in 1783.

ABSALOM'S REBELLION, ending in his death (1024-3 B.C.) is described in 2 *Sam.* xv.—xix.

ABSENTEE TAX (four shillings in the pound) was first levied in Ireland in 1715 on the incomes and pensions of absentees (persons who derive their income from one country and spend it in another) but ceased in 1753. A tax of 2s. in the pound was vainly proposed by Mr. Flood in 1773 and by Mr. Molyneux in 1783.

ABSOLUTION, ECCLESIASTICAL. Till the third century, the consent of the congregation was necessary to absolution; but soon after the power was reserved to the bishop; and in the twelfth century the form "*I absolve thee*" had become general.

ABSTINENCE. It is said that St. Anthony lived to the age of 105 on twelve ounces of bread and water daily, and James the hermit to the age of 104. St. Epiphanius lived thus to 115; Simeon the Stylite to 112; and Kentigern, commonly called St. Mungo, to 185 years of age. *Spottiswood*. Ann Moore, the fasting woman of Tutbury, Staffordshire, was said to have lived twenty months without food; but her imposture was detected by Dr. A. Henderson, Nov. 1808. At Newry, in Ireland, a man named Cavanagh was reported to have lived two years without meat or drink, Aug. 1840. His imposture was afterwards discovered in England, where he was imprisoned as a cheat, Nov. 1841. See *Fasts*.

* The commons expelled several members for being Abhorrrers, among them sir Francis Withens (whom they sent to the Tower), and prayed his majesty to remove others from places of trust. They also resolved, "that it is the undoubted right of the subject to petition for the calling of a parliament, and that to traduce such petitions as tumultuous and seditious, is to contribute to the design of altering the constitution." Oct. 1682. *Salmon*.

ABSTINENTS, ascetics that wholly abstained from wine, flesh, and marriage, appeared in France and Spain in the third century.

ABYSSINIA, a large country in N. E. Africa. Its ancient history is very uncertain. The kingdom of Auxumitæ (from its chief town Auxume) flourished in the 1st and 2nd centuries after Christ. The religion of the Abyssinians is a corrupt form of Christianity introduced about 329 by Frumentius. About 960, Judith, a Jewish princess, murdered a great part of the royal family, and reigned forty years. The young king escaped : and the royal house was restored in 1268 in the person of his descendant Icon Amilac. In the middle ages it was said to be ruled by Prester John or Prete Janni. The Portuguese missions commenced in the 15th century, but were expelled about 1632 in consequence of the tyranny of Mendez and the Jesuits. The encroachments of the Gallas and intestine disorders soon after broke up the empire into petty governments. Missions were sent from England in 1829 and 1841. Much information respecting Abyssinia has been given by Bruce (1790), Salt (1805—9), Rüppell (1838), and Parkyns (1853).*

ABYSSINIAN ERA is reckoned from the creation, which the Abyssinians place in the 5493rd year before our era, on the 29th Aug. old style : and their dates consequently exceed ours by 5492 years and 125 days. To reduce Abyssinian time to the Julian year, subtract 5492 years and 125 days.

ACADEMIES. *Academia* was a shady grove without the walls of Athens (bequeathed to Academus for gymnastic exercises), where Plato first taught philosophy, and his followers took the title of Academies, 378 B.C. *Stanley*.—Rome had no academies.—Ptolemy Soter is said to have founded an academy at Alexandria, about 314 B.C. Abderahman I., caliph of Spain, founded academies about A.D. 773. Theodosius the Younger, Charlemagne, and Alfred are also named as founders of academies. Italy is celebrated for its academies ; and Jarekius mentions 550, of which 25 were in the city of Milan. The following are among the principal academies :—

* Abyssinia has long been in a state of anarchy. In 1855 the emperor Ras Ali was deposed by his son-in-law Theodore, the present ruler, who invited the European sovereigns to join him in a crusade against his neighbours the Turks. Our consul (Plowden) at Massowah imprudently joined this sovereign, and lost his life while opposing an insurrection ; and his successor (col. Cameron) and other persons are now imprisoned by Theodore, who is jealous of their favouring the Turks. The subject was discussed in parliament in July, 1865, and the consul was censured by government for having disregarded his instructions.

ACADIA. See *Nova Scotia*.

ACANTHUS, the foliage forming the volutes of the Corinthian capital, ascribed to Callimachus, about 540 B.C.

ACAPULCO, a Spanish galleon, from Acapulco, laden with gold and precious wares (estimated at above 1,000,000*l.* sterling), taken by lord Anson, who had previously acquired booty in his voyage amounting to 600,000*l.* He arrived at Spithead in the *Centurion*, after having circumnavigated the globe, June 15, 1744.

ACARNANIA, N. Greece. The people became prominent in the Peloponnesian war, having invited the help of the Athenians against the Ambracians, 432 B.C. The Acarnanians were subdued by the Lacedæmonians in 390; they took part with Macedon against the Romans in 200, by whom they were subjugated in 197; finally, in 145.

ACCENTS. The most ancient manuscripts are written without accents, and without any separation of words; nor was it until after the ninth century that the copyists began to leave spaces between the words. Michaelis, after Wetstein, ascribes the insertion of accents to Euthalius, bishop of Sulca, in Egypt, A.D. 458. Accents were first used by the French in the reign of Louis XIII. (about 1610).

ACCESSION, THE, *i.e.* that of the house of Hanover to the throne of England, in the person of George I., elector of Hanover, the son of Sophia, the daughter of Elizabeth, the daughter of James I. He succeeded to the crown, Aug. 1, 1714, by virtue of the act of settlement passed in the reign of William III., June 12, 1701, which limited the succession to his mother (as a protestant) in the event of queen Anne dying without issue.

ACCESSORIES TO CRIMES. The law respecting them consolidated and amended in 1861.

ACCIDENTS. See *Coal, Fires, Railways, &c.* For compensation for accidents, see *Campbell's Act and Passengers*.

ACCLIMATISATION OF ANIMALS. This has been prosecuted with great vigour since the establishment of the Zoological society of London in 1829, and of the Société d'Acclimatation in Paris. Numbers of European animals have been naturalised in Australia; the camel has been conveyed to Brazil (1859); alpacas are bred at Paris; and ostriches in Italy (1859). On Oct. 6, 1860, the Bois de Boulogne, near Paris, was opened as a zoological garden, containing only acclimatised animals. An English acclimatisation society was founded June 10, 1860, by hon. Grantley Berkeley, Mr. J. Crockford, Mr. F. Buckland, &c., and the prince of Wales became president in April, 1865. An acclimatising garden was established at Melbourne, Australia, in Feb. 1861, and efforts are being made to naturalise English birds, fishes, &c.

ACCORDION, a small wind-instrument with keys, introduced into England from Germany about 1828.

ACCOUNTANT-GENERAL IN CHANCERY. The office was appointed in 1726, and abolished in 1841; it was always held by a master in chancery. *Hardy*.

ACCUSERS. By the occult writers, such as Agrippa, accusers are the eighth order of devils, whose chief is called Asteroth, or Spy. In the Revelation, ch. xii. 10, the devil is called "the accuser of the brethren."—False accusers were to be hanged, by 24 Henry VI. 1446; and burnt in the face with an F, by 37 Henry VIII. 1545. *Stow*.

ACELDAMA, a field, said to have been the one bought with the thirty pieces of silver given to Judas Iscariot for betraying Christ, is still shown to travellers. It is covered with an arched roof, and retains the name Aceldama, that is "the field of blood," to this day. *Matthew* xxvii. 8; *Acts* i. 19.—This name was given to an estate purchased by judge Jeffreys after the "bloody assizes" in 1685.

ACETYLENE, a luminous hydrocarbon gas resembling coal gas, discovered by Berthelot, and made known in 1862.

ACHAIA (N. Peloponnesus), Greece; the capital was settled by Achæus, the son of Xuthus, about 1330 B.C. (?) The kingdom was united with Sicyon or subject to the Ætolians until about 284 B.C. The Achæi, descendants of Achæus, originally inhabited the neighbourhood of Argos; but when the Heraclidæ drove them thence, they retired among the Ionians, expelled the natives, and seized their thirteen cities, viz., Pellene, Egira, Ægium, Bura, Tritæa, Leontium, Rhyes, Cerynea, Olenos, Helice, Patre, Dyme, and Phare, forming the ACHEAN LEAGUE, which was broken up soon after the death of Alexander of Macedon, 323 B.C.

Achaia invaded by Epaminondas	B.C. 366	The Achæans overrun Messenia with fire & sword	182
The Achæan league revived by four cities about 280—		The Romans enter Achaia, and carry off numbers of the people, among whom is the celebrated Polybius	165
Aratus made prætor	245	Metellus enters Greece	147
The league joined by Corinth, Megara, &c. 243—	236	The Achæans defeated by Mummius at Leucopetra; the league dissolved by Mummius; Corinth taken; Greece subjected to Rome, and named the province of Achaia	146
Supported by Athens and Antigonus Doson	229	Achaia made a Latin principality, A.D. 1205; founded by William of Champlitte, 1205; obtained by Geoffrey Villehardouin, 1210; by Geoffrey II., 1218; by his brother William, 1246; who conquers the Moors, 1248; makes war with the emperor Michael, 1259, and gains three fortresses, 1262; succeeded by Isabella, 1277; who marries Florenz of Hainault, 1291; their daughter Maud, princess, 1311; thrice married; forcibly married to John de Gravina, and dies in prison; Achaia subject to the kings of Naples	1324
War with the Spartans; the Achæans defeated at Ladocea, by the Spartans under Cleomenes III., 226; but totally defeat them at Sellasia	221	Conquered by the Turks	about 1540
The Social war begun; battle of Caphyæ, in Arcadia; Aratus defeated	220		
The Peloponnesus ravaged by the Ætolians	219		
Aratus poisoned at Ægium	213		
Philopœmen, leader of the league, defeats the Spartan tyrant Machanidas	208		
Alliance of the league with the Romans	198		
Philopœmen defeated by Nabis in a naval battle	194		
Sparta joined to the league	191		
War with Messene: Philopœmen made prisoner and slain	183		

ACHONRY, SLIGO (N. Ireland); a bishopric founded by St. Finian, who erected the church of Achad, usually called Achonry, about 520, and conferred it on his disciple Nathy (Dathy, or David), the first bishop. The see, held with Killala since 1612, was united with Tuam in 1834.

ACHROMATIC TELESCOPES, in which colour is got rid of, were invented by John Dollond, and described in *Phil. Trans.* of the Royal Society, London, 1753-8.

ACIDS (now defined as salts of hydrogen) are generally soluble in water, redden organic blues, decompose carbonates, and destroy the properties of alkalies, forming alkaline salts. The number was increased by the Arabs; Geber (8th century) knew nitric acid and sulphuric acid. Theories of the constitution of acids were put forth by Becher (1669), Lemery (1675), and Stahl (1723). After the discovery of oxygen by Priestley, Aug. 1, 1774, Lavoisier (1778) concluded that oxygen was a constituent of all acids; but about 1810 Davy, Gay-Lussac, and others, proved the existence of acids free from oxygen. In 1816 Dulong proposed the binary or hydrogen theory of acids, and in 1837 Liebig applied the theories of Davy and Dulong to explain the constitution of several organic acids. Oxygen acids are now termed anhydrides. An innumerable number of acids have been discovered through the advance of organic chemistry. *Watts.*

ACOLYTES, an inferior order of clergy in the Latin church, unknown to the Greek church for four hundred years after Christ.

ACOUSTICS (from *akouë*, Greek, I hear), the science of sound, so named by Sauveur in the 17th century. The communication of sounds to the air by the vibrations of the atmosphere, strings, &c., was explained by Pythagoras about 500 B.C., and by Aristotle, 330 B.C.

<p>The speaking trumpet is said to have been used by Alexander the Great, 335 B.C. Galileo's discoveries, about A.D. 1600. His theorem of the harmonic curve demonstrated by Dr. Brook Taylor, in 1714; further perfected by D'Alembert, Euler, Bernouilli, and La Grange, at various periods of the eighteenth century. Hooke calculated the vibration of sounds by the striking of the teeth of brass wheels, 1681. Sauveur determined the number of vibrations belonging to a given note, about 1700.</p>	<p>Velocity of sound said to be 1473 feet in a second, by Gassendi; 1172 feet by Cassini, Römer and others; 968 by Newton, about 1700. Chladni (who raised acoustics to an independent science) published his important discoveries on the figures produced in layers of sand by harmonic chords, &c., in 1787, and since. Cagniard-Latour invented the <i>sirène</i> (which see) 1819. Biot, Savart, Wheatstone, Lissajous, Helmholtz, Tyndall, and others in the present century have greatly increased our knowledge of acoustics.</p>

ACRE. This measure was formerly of uncertain quantity, and differed in various parts of the realm, until made standard by statute 31 Edward I. 1303, and fixed at 40 poles or perches in length, and 4 in breadth—or 160 square poles, containing 4840 square yards, or 43,560 square feet. In certain counties and places the measure is larger. *Pardon.*

ACRE, Acca, anciently Ptolemais, in Syria, was taken by the Saracens in 638; by the crusaders under Baldwin I. in 1104; by Saladin in 1187; and again by Richard I. and other crusaders, July 12, 1191, after a siege of two years, with a loss of 6 archbishops, 12 bishops, 40 earls, 500 barons, and 300,000 soldiers. It was then named *St. Jean d'Acre*. It was retaken by the Saracens in 1291, when 60,000 Christians perished. This capture was rendered memorable by the murder of the nuns, who had mangled their faces to repress the

lust of the infidels.—Acre, gallantly defended by Djezzar Raeha against Bonaparte in July, 1798, was relieved by Sir Sidney Smith, who resisted twelve attempts by the French, between March 16 and May 20, 1799, when Bonaparte retreated.—St Jean d'Acre, as a pachalic subject to the Porte, was seized July 2, 1832, by Ibrahim Pacha, who had revolted. On Nov. 3, 1840, it was stormed by the British fleet under sir Robert Stopford, and taken after a bombardment of a few hours, the Egyptians losing upwards of 2000 in killed and wounded, and 3000 prisoners, while the British had but twelve killed and 42 wounded. See *Syria* and *Turkey*.

ACROPOLIS, the citadel of Athens, was built on a rock, and accessible only on one side; Minerva had a temple at the bottom. The roof of this vast pile, which had stood above 2000 years, was destroyed by the Venetians who took Athens in 1687.

ACS (Hungary). The Hungarians under Görgey were defeated here by the Austrians and Russians, on July 10, 1849.

ACT OF SETTLEMENT, &c. See *Accession, Succession, Supremacy, and Uniformity Acts*.

ACTA SANCTORUM (acts of the saints), a work commenced by the Jesuits in the seventeenth century. The first volume appeared in 1643: the publication was interrupted in 1734, when the fifty-third volume was published, but was resumed in 1846, and is still in progress: having advanced in the order of the months as far as October. From one of the first editors, Bolland, the writers have been named *Bollandists*.

ACTINOMETER, an instrument to measure the power of the solar rays, invented by sir J. F. Herschel, about 1825. See *Sun*.

ACTIUM, a promontory of Acarnania, W. Greece, near which was fought, on Sept. 2, 31 B.C., the battle between the fleets of Octavianus Cæsar on the one side, and of Marc Antony and Cleopatra on the other, which decided the fate of Antony; 300 of his galleys going over to Cæsar. This victory made Octavianus master of the world, and the Roman empire is commonly dated Jan. 1, 30 B.C. (the *Actium Era*). The conqueror built Nicopolis (the city of victory), and instituted the Actian games. *Blair*.

ACTRESSES appear to have been unknown to the ancients; men or eunuchs performing the female parts. Charles II. is said to have first encouraged the public appearance of women on the stage in England, in 1662; but the queen of James I. had previously performed in a theatre at court. *Theat. Biog.* Mrs Colman was the first actress on the stage; she performed the part of *Ianthe* in Davenant's "Siege of Rhodes," in 1656. *Victor*.

ACTS OF PARLIAMENT, or STATUTES. See *Parliament*. The following are among the most celebrated early statutes:—

Statutes of Clarendon, to restrain the power of the clergy, enacted in 10 Hen. II. 1164. Provisions of Merton, 1235-6. Statute of Marlborough, 1267. Of Bigamy, 1275-6. Of Gloucester, the earliest statute of which any record exists, 6 Edw. I., 1278. Of Mortmain, 1279. Quo Warranto, Oct. 1280. Statutes of Wales, 1284. Of Winchester, Oct. 1284. Of Westminster, 1285. Statute forbidding the levying of taxes without the consent of parliament, 1297. Magna Charta, 1297. Of Præmunire, 1306.

Between 1823 and 1829, 1126 acts were wholly repealed, and 443 repealed in part, chiefly arising out of the consolidation of the laws by Mr. (afterwards sir Robert) Peel; of these acts, 1344 related to the kingdom at large, and 225 to Ireland solely; and in 1856 many obsolete statutes (enacted between 1285 and 1777) were repealed.

By the Statute Law Revision Act of 1861, 770 acts were wholly repealed, and a great many partially. By the similar Act of 1863, a great number of enactments were repealed, commencing with the Provisions of Merton, 20 Henry III. (1236), and ending with 1 James II. (1685).

The greatest number of acts passed in any one year

since 1800, was 570, in 1846 (the railway year); 402 were local and personal, 51 private, and 117 public acts. In 1841, only 13 were passed (the lowest number), of which two were private. In three instances only, the annual number was under a hundred. The average number of the first ten years of the present century was 132 public acts. In the ten years ending 1850, the average number of acts, of public interest, was 112. The number of public general acts passed in 1851 was 106; in 1852, 88; in 1853, 137; in 1854, 125; in 1855, 134; in 1856, 120; in 1857, 86; in 1858, 109; in 1859, 101; in 1860, 154; in 1861, 134; in 1862, 114; in 1863, 125; in 1864, 121.

In 1850, 13 Vict. c. 183, was passed to curtail *Repetitions* in statutes.

Statutes first printed in the reign of Richard III., 1483.

Statutes of the Realm, from Magna Charta to George I., printed from the original records and MSS. in 12 vols. folio, under the direction of commissioners appointed in 1801, 1811—28.

The statutes passed during each session are now printed annually in 4to. and 8vo. Abstracts are given in the *Cabinet Lawyer*.

ACTS, in dramatic poetry, first employed by the Romans. *Five* acts are mentioned by Horace (*Art of Poetry*) as the rule (about B.C. 8).

ACTUARY, ACTUARIUS, the Roman accountant. The Institute of Actuaries founded in 1848, publishes its proceedings in the "Assurance Magazine."

ADAM AND EVE, ERA OF, set down by most Christian writers as being 4004 B.C. There have been as many as one hundred and forty opinions on the distance of time between the creation of the world and the birth of the Redeemer : some make it 3616 years, and some as great as 6484 years. See *Creation*.

ADAMITES, a sect said to have existed about 130, and to have assembled quite naked in their places of worship, asserting that if Adam had not sinned there would have been no marriages. Their chief was named Prodicus ; they deified the elements, rejected prayer, and said it was not necessary to confess Christ. *Eusebius*. A similar sect arose at Antwerp in the twelfth century, under Tandemus, or Tanchelm, whose followers, 3000 soldiers and others, committed many crimes under spiritual names. The sect became extinct soon after the death of its chief ; but another of the same kind, named Turlupius, appeared shortly after in Savoy and Dauphiny. A Fleming named Picard, revived this sect in Bohemia, about 1415 ; it was suppressed by Ziska.

ADDINGTON ADMINISTRATION. Mr. Pitt, having engaged to procure Roman Catholic emancipation to secure the union with Ireland, and being unable to do so *as a minister*, resigned Feb. 3, 1801. A new ministry was formed by Mr. Addington, March 1801 ; after various changes it terminated May 11, 1804.

Henry Addington,* first lord of the treasury and
chancellor of the exchequer.

Lord Eldon, lord chancellor.

Duke of Portland, lord president.

Earl of Westmorland, lord privy seal.

Lord Pelham, home secretary.

Lord Hawkesbury, foreign secretary.

Lord Hobart, colonial secretary.

Earl St. Vincent, admiralty.

Earl of Chatham, ordnance.

Charles Yorke, secretary-at-war.

Viscount Lewisham, Lord Auckland, &c.

ADDISCOMBE COLLEGE, near Croydon, Surrey, established by the East India company, in 1809, for the education of candidates for the scientific branches of the Indian army, was closed in 1861.

ADDLED PARLIAMENT. See *Parliament*, 1614.

ADDRESSERS. See *Abhorrrers*.

ADELAIDE, the capital of South Australia, was founded in 1836. It contained 14,000 inhabitants in 1850, and 18,259 in 1855. It was made a bishopric in 1847.

ADELPHI (Greek for brothers), a series of streets on the south side of the Strand, London, erected about 1768 by the brothers, John, Robert, James, and William Adam, after whom the streets are named. *Adelphi Theatre*, see under *Theatres*.

ADEN, a free port on the S. W. corner of Arabia, where in 1837 a British ship was wrecked and plundered. The sultan promised compensation, and agreed to cede the place to the English. The sultan's son refusing to fulfil this agreement to captain Haynes, a naval and military force, under captain H. Smith, of the *Volage*, was dispatched to Aden, which captured it, Jan. 19, 1839. It is now a coal depôt for Indian steamers, &c.

ADIGE, a river in N. Italy, near which the Austrians defeated the French on March 26, 30, and April 5, 1799.

ADMINISTRATIONS OF ENGLAND, AND OF GREAT BRITAIN.† For a fuller account of each, since 1700, see separate articles headed with the name of the PREMIER.

* Born 1757; became viscount Sidmouth in 1805; held various offices afterwards, and died in 1844. His *circular* to the lords lieutenants, dated March 27, 1817, directing them to adopt severe measures against the authors of blasphemous and seditious pamphlets, was greatly censured, and not carried into effect.

† Until the Restoration, there was not in fact anything that could be exclusively called a Cabinet. The sovereign latterly governed by a collection of privy councillors, sometimes of larger, sometimes of smaller number, the men and offices being frequently changed. The separation of the Cabinet from the Privy Council became greater during the reign of William III., and the control of the chief, now termed the "premier," was established in the reign of Anne. "The era of ministries may most properly be reckoned from the day of the meeting of the parliament after the general election of 1698."—*Lord Macaulay*. "In Walpole's time there was an interior council, of Walpole, the chancellor, and secretaries of state, who, in the first instance, consulted together on the more confidential points."—*Croker's Memoirs of Lord Hervey*. Till 1850 the cabinet council usually consisted of the following twelve members :—First lord of the treasury ; lord chancellor ; lord president of the council ; chancellor of the exchequer ; lord privy seal ; home, foreign, and colonial secretaries ; first lord of the admiralty ; president of the board of trade ; president of the board of control ; chancellor of the duchy of Lancaster. In 1850, the number was fifteen, and included the secretary-at-war, the postmaster-general, and the chief secretary for Ireland. In the Palmerston-Russell cabinet (*which see*), the president of the poor-law-board replaced the secretary for Ireland. The average duration of a ministry has been set down at four, five, and six years ; but instances have occurred of the duration of a ministry for much longer periods : sir Robert Walpole was minister from 1721 to 1742 (21 years) ; Mr. Pitt, 1783 to 1801 (18 years) ; and Lord Liverpool, 1812 to 1827 (15 years). Several ministries have not endured beyond a few months, as the *Coalition Ministry* in 1783, and the "Talents" Ministry in 1806. The "Short-lived" Administration lasted Feb. 10 to 12, 1746.

Feb. 26 "

[The Derby administration, in consequence of a vote of want of confidence in it being carried by a majority of 13, June 10, 1859, resigned the next day. Earl Granville attempted to form an administration in vain; and lord Palmerston and lord John Russell came into office.]

PALMERSTON-RUSSELL administration—viscount Palmerston; lord John (since earl) Russell, &c.

June 18, 1859

ADMINISTRATIVE REFORM ASSOCIATION derived its origin from a general opinion that the disasters which occurred to the army in the Crimea in 1854-5 were attributable to the inefficient and irresponsible management of the various departments of the state. The association was organised in London, May 5, 1855. A meeting was held in Drury-lane theatre, on June 13, and Mr. Layard's motion on the subject in parliament was negatived June 18 following. The association was reorganised in 1856, Mr. Roebuck, M.P., becoming chairman, but soon became unimportant. See *Civil Service.*

ADMIRAL. This distinction does not appear to have been adopted in these realms until about the year 1300, but the title was in use some time previously in France. *Sir Harris Nicolas.* Alfred, Athelstan, Edgar, Harold, and other kings, had been previously the commanders of their own fleets. The first French admiral is said to have been appointed 1284. The rank of *admiral of the English seas* was one of great distinction, and was first given to William de Leybourne by Edward I. in 1297. *Spelman; Rymer.* The first LORD HIGH ADMIRAL in England was created by Richard II. in 1385; there had been previously high admirals of *districts*—the north, west, and south. This office has seldom been entrusted to single hands, the duties being generally executed by lords commissioners. A similar dignity existed in *Scotland* from the reign of Robert III.: in 1673, the king bestowed it upon his natural son Charles Lennox, afterwards duke of Richmond, then an infant, who resigned the office to the crown in 1703; after the union it was discontinued.—The dignity of lord high admiral of *Ireland* (of brief existence) was conferred upon James Butler by Henry VIII., in May, 1534. The *Admiral of the Fleet* is the highest rank in the Royal Navy, corresponding to that of marshal in the army. We have now three admirals of the fleet, twenty-one admirals, and twenty-seven vice-admirals (1865). See *Navy.*

ADMIRALTY, COURT OF, said to have been erected by Edward III., in 1357; a civil court for the trial of causes relating to maritime affairs. It was enacted in the reign of Henry VIII., that criminal causes should be tried by witnesses and a jury, some of the judges at Westminster (or, as now, at the Old Bailey) assisting. The judgeship of the admiralty was constituted in 1514, and was filled by two or more functionaries until the Revolution, when it was restricted to one. *Beaton.* The judge has usually been an eminent doctor of the civil law. In 1844 the criminal jurisdiction of this court was removed, and by 20 & 21 Vic. c. 77 (1857) the judge of the Probate court was to be also judge of the Admiralty court. Sir John Dodson, the last admiralty judge, died in 1858. The jurisdiction of this court was extended in 1861.

ADMIRALTY OFFICE dates from 1512, when Henry VIII. appointed commissioners to inspect his ships of war, &c. In 1662 the admiralty was first put into commission, the great officers of state being the commissioners. During the commonwealth the admiralty affairs were managed by a committee of the parliament; and at the restoration in 1660, James, duke of York, became lord high admiral. See succeeding changes *below.* In 1688-9, the admiralty was put into commission, and the board appears to have assembled at admiral Herbert's lodgings, in Channel-row, Westminster, he being at that time first lord. In 1830, 1832, and 1836 various changes were made in the civil departments, several offices being abolished or consolidated with others. In March, 1861, a royal commission recommended the abolition of the board of admiralty and the appointment of a minister of the navy department.

 1859. Edward, duke of Somerset, the PRESENT First Lord (1865).

ADMIRALTY, Whitehall. "At the south end of Duke-street, Westminster, was seated a large house, made use of for the admiralty office, until the business was removed to Greenwich, and thence to Wallingford-house, against Whitehall." It was rebuilt by Ripley about 1726; the screen was erected, to conceal the ugliness of the building, by the brothers Adam, in 1776.—Lord Nelson lay in state in one of the apartments on Jan. 8, 1806; and on the next day was buried at St. Paul's.

"ADMONITION TO THE PARLIAMENT," condemning all religious ceremonies but those commanded in the New Testament, was published by certain Puritans in 1571. It was answered by abp. Whitgift. Its presumed authors, Field and Wilcox, were imprisoned.

ADRIAN'S WALL (to prevent the irruptions of the Scots and Picts into the northern counties of England, then under the Roman government) extended from the Tyne to Solway firth, and was eighty miles long, twelve feet high, and eight in thickness, with watch-towers; built 121. It was named after its second founder, the emperor Adrian, and was repaired by Severus, 208.

ADRIANOPLE, in Turkey, so named after its restorer the emperor Adrian (who died July 10, 138). Near here was fought the battle by which Constantine gained the empire, July 3, 323; also, near here the emperor Valens was defeated and slain by the Goths, Aug. 9, 378. Adrianople was taken by the Turks under Amurath in 1361, and was the seat of their empire till the capture of Constantinople in 1453. Mahomet II. was born here in 1430. *Priestley*.—Adrianople was taken by the Russians on Aug. 20, 1829; but was restored at the close of the war, Sept. 14, same year. See *Turkey*.

ADRIATIC. The ceremony of the doge of Venice wedding the Adriatic sea (instituted about 1173), took place annually on Ascension-day. The doge dropped a ring into the sea from his bucentaur, or state barge, being attended by his nobility and foreign ambassadors. The ceremony was first omitted in 1797.

ADULTERATION OF FOOD was the subject of legislation in England in 1267. Much attention was drawn to it in 1822, through Mr. Accum's book, popularly called "Death in the Pot," and in 1855 through Dr. Hassall's book, "Food and its Adulterations." By an act for preventing the adulteration of food, passed in 1860, parochial chemical analysts may be appointed.

ADULTERY, by the law of Moses (1490 B.C.) was punished with death, *Lev. xx. 10.*—Lycurgus (884 B.C.) punished the offender as he did a parricide, and the Locrians and Spartans tore out the offender's eyes. The early Saxons burnt the adulteress, and erected a gibbet over her ashes, whereon they hanged the adulterer. The ears and nose were cut off under Canute, 1031. Ordained to be punished capitally under Cromwell, May 14, 1650: but there is no record of this law taking effect. In New England a law was ordained whereby adultery was made capital to both parties, even though the man were unmarried; and several suffered under it, 1662. *Hardie.* Till 1857 the legal redress against the male offender was by civil action for a money compensation; the female being liable to divorce. By 20 & 21 Vic. c. 85 (1857) the "action for criminal conversation" was abolished and the "Court for Divorce and Matrimonial Causes" was established, with power to grant divorces for adultery and ill usage. See *Divorce*.

ADVENT (*adveniens*, coming). The season includes four Sundays, previous to Christmas, the first being the nearest Sunday to St. Andrew's day (Nov. 30), before or after. Homilies respecting Advent are mentioned prior to 378. Advent Sunday, 1865, Dec. 3; 1866, Dec. 2; 1867, Dec. 1.

ADVENTURE BAY, at the S.E. end of Van Diemen's Land, discovered in 1773 by capt. Furneaux in his first voyage to the Pacific, and named from his ship *Adventure*. It was visited by captain Bligh in 1788.

ADVENTURERS, MERCHANT, a celebrated company of enterprising merchants, originally formed for the discovery of territories, and the extension of commerce, by John, duke of Brabant, in 1296, was transferred to England in the reign of Edward III. Elizabeth formed it into an English corporation in 1564. *Anderson.*

ADVERTISEMENTS IN NEWSPAPERS, as now published, were not general in England till the beginning of the eighteenth century. A penalty of 50*l.* was inflicted on persons advertising a reward with "No questions to be asked" for the return of things stolen, and on the printer, 25 Geo. II. 1754. *Statutes.* The *advertisement duty* was formerly charged according to the number of lines; it was afterwards fixed, in England, at 3*s.* 6*d.*, and in Ireland at 2*s.* 6*d.* each advertisement. The duty was further reduced, in England, to 1*s.* 6*d.* and in Ireland to 1*s.* each, in 1833, and was altogether abolished in the United Kingdom, by 16 & 17 Vic. c. 63 (Aug. 4, 1853).^{*} **ADVERTISING VANS**, a great nuisance, were prohibited by 16 & 17 Vic. c. 33 (1853).

ADVOCATE, THE KING'S. This office was instituted about the beginning of the sixteenth century; and the advocate (always a doctor of the civil law) was empowered to prosecute at his own instance certain crimes, 1597. The LORD ADVOCATE in Scotland is the same as the attorney-general in England.—It was decided in the parliament of Paris, in 1685, that the king's advocate of France might at the same time be a judge; so in like manner it was allowed in Scotland, where sir John Nesbit and sir William Oliphant were lord advocates and lords of session at the same time. *Beatson.*—The Advocates' library in Edinburgh was established by sir G. Mackenzie in 1682.

ÆDILES, magistrates of Rome, first created 492 B.C. There were three degrees of these officers, with functions similar to those of our justices of the peace. The plebeian ædiles presided over the more minute affairs of the state, the maintenance of order, the reparation of the streets, the supply of provisions, &c. *Varro.*

ÆGATES ISLES, W. of Sicily: near these, during the first Punic war, the Roman consul Lutatius Catulus gained a decisive victory over the Carthaginian fleet under Hanno, March 10, 241 B.C. Peace ensued, the Romans obtaining Sicily and a tribute of 3200 talents.

ÆGINA, a Greek island, a rival of Athens, was humbled by Themistocles, B.C. 485; and taken 455. Its inhabitants, expelled 431, were restored by the Spartans, 404: they renewed war with Athens 388, and made peace, 387.

ÆGOSPOTAMOS, the Goat-river, in the Chersonesus, where Lysander, the Lacedæmonian, defeated the Athenian fleet, 405 B.C., and ended the Peloponnesian war.

ÆLIA CAPITOLINA, built on the ruins of Jerusalem by the emperor Adrian, 131.

^{*} On Oct. 16, 1860, the whole of the libretto of MacFarren's opera, *Robin Hood*, was inserted as an advertisement in the *Times* (4½ columns).

ÆMILIA, the name given to the provinces of Parma, Modena, and the Romagna, united to Sardinia in 1860; and now part of the kingdom of Italy.

ÆNEID, the great Latin epic poem, relating the adventures of Æneas, written about 24 B.C. by Virgil, who died Sept. 22, 19 B.C., before he had finally corrected the poem. It was first printed in 1469, at Rome.

ÆNIGMA. Samson's riddle (about 1141 B.C.; *Judges* xiv. 12) is the earliest on record. The ancient oracles frequently gave responses admitting of perfectly contrary interpretations. Gale attributes ænigmatical speeches to the Egyptians. In Nero's time, the Romans were often obliged to have recourse to this method of concealing truth under obscure language. The following epitaph on Fair Rosamond (mistress of our Henry II. about 1173) is a mediæval specimen:—"Hic jacet in tombâ Rosa mundi, non Rosa munda; Non redolet, sed olet, quæ redolere solet."

ÆOLIA, in Asia Minor, was colonised by a principal branch of the Hellenic race; beginning about 1124 B.C. The Æolians built several large cities both on the mainland and the neighbouring islands; Mitylene, in Lesbos, was considered the capital.

ÆOLIAN HARP. Its invention is ascribed to Kircher, 1653, but it was known before.

ÆOLOPILE, a hollow ball with an orifice in which a tube might be screwed, was used in the 17th century as a boiler for experimental steam-engines.

ÆQUI, an ancient Italian race, were subdued by the Romans, and their lands annexed after a conflict, 471-302 B.C.

ÆRAS. See *Eras*.

ÆRATED WATERS. Apparatus for combining gases with water have been patented by Thomson in 1807; Bakewell in 1832 and 1847; Tylor in 1840, and by several other persons. Aerated bread is made by processes patented by Dr. Daughlish, 1856-7.

ÆRIANS, followers of Aerius, a presbyter, in the 4th century, who held that there was no distinction between a bishop and a presbyter; that there was no Pasch to be observed by Christians; that the Lent and other fasts should not be observed; and that prayers should not be offered for the dead. *Epiphanius*.

AERONAUTICS, AND AEROSTATICS. See *Flying*, and *Balloons*.

ÆSOP'S FABLES, said to have been written about 619, 571, or 565 B.C. They are, no doubt, a compilation from various sources. Phædrus's Latin paraphrases in lambics (about A.D. 8) are very elegant.

ÆSTHETICS (from the Greek *aisthesis*, perception), the science of the beautiful (especially in art); a term invented by Baumgarten, a German philosopher, whose work "*Æsthetica*" was published in 1750.

ÆTHIOPIA. See *Ethiopia*.

ÆTNA. See *Etna*.

ÆTOLIA, in Greece, a country named after Ætolus of Elis, who, having accidentally killed a son of Phoroneus, king of Argos, left the Peloponnesus, and settled here. After the ruin of Athens and Sparta, the Ætolians became the rivals of the Achæans, and alternately allies and enemies of Rome.

AFFINITY. Marriage within certain degrees of kindred was prohibited in almost every age and country, but has yet taken place to a considerable extent. See *Leviticus*, chap. xviii. (1490 B.C.). In England, a table restricting marriage within certain near degrees was set forth by authority, 1563. Prohibited marriages were adjudged to be incestuous and unlawful by the 99th canon, in 1603. All marriages within the forbidden degrees are declared to be absolutely void by statute 5 & 6 Will. IV. c. 54, 1835. See *Marriage (of deceased Wife's Sister)*.

AFFIRMATION. See *Quakers*. The affirmation was altered in 1702, 1721, 1837, and in April, 1859.—The indulgence was granted to persons who were formerly Quakers, but who had seceded from that sect, 2 Vic. 1838; and extended to other dissenters by 9 Geo. IV. c. 32 (1828), and 18 & 19 Vic. c. 2 (1855).

AFGHANISTAN, a large country in central Asia, formerly part of the Persian and Greek empires, was conquered by the Tartars about 997.

The Mahomedan dynasty, the Ghaznevdes, said to have ruled from 1186 to 1206.

They were conquered by Genghis Khan about 1221, and by Tamerlane, 1398.

Baber conquered Caubul in 1523.

On his death Afghanistan divided between Persia and Hindostan.

The Afghans revolt in 1720; invade Persia and take Ispahan; repulsed by Nadir Shah in 1728, who subdues the whole of the country, 1737.

On his assassination, one of his officers, Ahmed Shah, an Afghan, forms Afghanistan into an independent kingdom, and reigns prosperously, 1747-73.

His son and successor, Timour, died in 1793; whose son, Zemaun, was dethroned and blinded after reigning ten years. Since then the history is a series of broils, crimes, and murders.

Runjeet Sing, the Sikh chief of Lahore, conquers a large part of the country in 1818.

Dost Mohammed becomes ruler, 1829.

[For the Afghan war with England, see *India*, 1838.]

Dost Mohammed takes Herat, May 26; dies, after designating his eldest son, Shir-Ali, his successor, May 29, 1863; a war of succession ensues.

The English remain neutral, June, &c. 1863.

Treachery and anarchy prevailing, June, 1865.

AFRICA, called *Libya* by the Greeks, one of the three parts of the ancient world, and the greatest peninsula of the universe; said to have been first peopled by Ham. For its history see *Egypt, Carthage, Cyrene, Abyssinia, Algiers, Morocco, &c.*

Carthage subdued by the Romans 146 B.C.; other provinces gained by Pompey, 82.

N. Africa conquered by the Vandals under Genseric, A.D. 429-35, reconquered by Belisarius, 533-5.

The Saracens subdue the north of Africa 637-709.

Portuguese settlements begun 1450.

Cape of Good Hope discovered by Diaz, 1487.

English merchants visit Guinea in 1550; and Elizabeth granted a patent to an African company in 1588.

Dutch colony at the Cape founded, 1650.

Capt. Stubbs sailed up the Gambia, 1723.

Bruce commenced his travels in 1768.

Sierra Leone settled by the English 1787.

Mungo Park, who made his first voyage to Africa, May 22, 1795; and his second voyage, January 30, 1804, but from which he never returned (see *Park*).

Visited by Salt in 1805 and 1809; Burckhardt in 1812; Hornemann in 1816; Denham and Clapperton in 1822; the brothers Lander in 1830.

The great Niger expedition (for which parliament voted 61,000*l.*), consisting of the *Albert*, *Wilberforce*, and *Soudan* steam-ships, commenced the ascent of the Niger, Aug. 20, 1841; but when they reached Iddah, fever broke out among the crews, and they were successively obliged to return, the *Albert* having ascended the river to Egga, 320 miles from the sea, Sept. 28. The expedition was, in the end, relinquished owing to disease, heat, and hardships, and all the vessels had cast anchor at Clarence Cove, Fernando Po, Oct. 17, 1841.

James Richardson explored the great Sahara in 1845-6, and in 1849 (by direction of the Foreign Office) he left England to explore central Africa, accompanied by Drs. Barth and Overweg. Richardson died, March 4, 1851; and Overweg, Sept. 27, 1852.

Dr. Vogel sent out with reinforcements to Dr. Barth, Feb. 20, 1853; in April, 1857, said to have been assassinated.

Dr. Barth returned to England, and received the Royal Geographical Society's medal, May 16, 1856. His travels were published in 5 vols. in 1858.

Dr. David Livingstone, a missionary traveller, returned to England in Dec. 1856, after an absence of 16 years, during which he traversed a large part of the heart of S. Africa, and walked about 11,000 miles, principally over country hitherto

unexplored. His book was published in Nov. 1857. In Feb. 1858, he was appointed British consul for the Portuguese possessions in Africa, and left England shortly after.

The publication of M. du Chaillu's travels in central Africa created much controversy and excitement in 1861.

Second expedition of Dr. Livingstone, March, 1858.

Captains Speke and Grant announce the discovery of the source of the Nile in Lake Nyanza Victoria, Feb. 23, 1863.

[Capt. Speke was accidentally shot by his own gun while alone near Bath, Sept. 15, 1864.]

Some Dutch ladies unsuccessfully explore the White Nile, and undergo many privations, July, 1863-1864.

Oxford mission. Bishop Mackenzie sent out; dies 1863.

Du Chaillu starts on a fresh expedition, 6 Aug. 1863.

Dr. Livingstone returns July 23, 1864.

Death of Dr. W. B. Baikie, at Sierra Leone, Nov. 30, 1864.

[He was sent as special envoy to the Negro tribes near the Niger by the Foreign Office about 1854.

He opened commercial relations with Central Africa.]

Mr. Samuel Baker discovered a lake, supposed to be another source of the Nile, which he named Lake Nyanza Albert, March, 1864.

Dr. Livingstone appointed British consul for Inner Africa, March 24, 1865.

AFRICAN ASSOCIATION, for promoting the exploration of Central Africa, was formed in June, 1788, principally by Sir Joseph Banks; and under its auspices many additions were made to African geography by Ledyard, Park, Burckhardt, Hornemann, &c. It merged into the Royal Geographical Society in 1831.

AFRICAN COMPANY (merchants trading to Africa), arose out of an association in Exeter, formed in 1588. A charter was granted to a joint-stock company in 1618; a third company was created in 1631; a fourth corporation in 1662; another was formed by letters patent in 1672; remodelled in 1695. In 1821 the company was abolished.

AFRICAN INSTITUTION, founded in London in 1807, for the abolition of the slave trade, and the civilisation of Africa. Many schools have been established with success, particularly at Sierra Leone.

AGAPÆ (*agapē*, Greek for love, charity), "feasts of charity," referred to *Jude* 12, and described by Tertullian, of which the first Christians of all ranks partook, in memory of the

last time when Christ ate with his disciples. In consequence of disorders creeping in, these feasts were forbidden to be celebrated in churches by the councils of Laodicea (366), and Carthage (390). These feasts are still recognised by the Greek church, and are held in their original form weekly by the Sandemanians, and also in some measure by the Moravians and Wesleyans.

AGAPEMONIANS, a sect which originated with Henry James Prince, an ex-clergyman of the church of England, who claimed the attributes of omnipotence, and thereby obtained great influence over his wealthy dupes in 1845. They professed to live in a state of brotherly love, delivering themselves up to innocent amusements, not vexing themselves with the cares of ordinary mortals. Various disclosures did not at all confirm these statements. They resided in a building called "Agapémone" (Greek for "the abode of love"), near Bridgewater, in Somersetshire.*

AGE. Chronologers have commonly divided the time between the creation and the birth of Christ into periods called ages. Hesiod (about 850 B.C.) described the Golden, Silver, Brazen, and Iron Ages. See *Dark Ages*.

	B.C.		B.C.
FIRST AGE (from the Creation to the Deluge)	4004—2349	FOURTH AGE (to the founding of Solomon's Temple)	1490—1014
SECOND AGE (to the coming of Abraham into Canaan)	2348—1922	FIFTH AGE (to the capture of Jerusalem)	1014—588
THIRD AGE (to the Exodus from Egypt)	1921—1491	SIXTH AGE (to the birth of Christ)	588—4
		SEVENTH AGE (to the present time)	B.C. 4—A.D. 1865

AGE, OF. Varied in different countries. In Greece and Rome twenty-five was full age for both sexes, but a greater age was requisite for the holding certain offices: e.g. thirty for tribunes; forty-three for consuls. In England the minority of a male terminates at twenty-one, and of a female in some cases, as that of a queen, at eighteen. In 1547, the majority of Edward VI. was, by the will of his father, fixed at eighteen years; previously to completing which age, Henry VIII. had himself assumed the reins of government, in 1509.—A male of twelve may take the oath of allegiance; at fourteen he may consent to a marriage, or choose a guardian; at seventeen he may be an executor, and at twenty-one he is of age; but according to the statute of wills, 7 Will. IV. and 1 Vict. c. 26, 1837, no will made by any person under the age of twenty-one years shall be valid. A female at twelve may consent to a marriage; at fourteen she may choose a guardian, and at twenty-one she is of age.

AGINCOURT (N. France), a village, where Henry V. of England, with about 9000 men, defeated about 60,000 French on St. Crispin's day, Oct. 25, 1415. Of the French, whose leaders acted with little judgment, there were according to some accounts 10,000 killed, including the dukes of Alençon, Brabant, and Bar, the archbishop of Sens, one marshal, thirteen earls, ninety-two barons, and 1500 knights; and 14,000 prisoners, among whom were the dukes of Orleans and Bourbon, and 7000 barons, knights, and gentlemen. The English lost the duke of York, the earl of Suffolk, and about 20 others. St. Rémy asserts with more probability that the English lost 1600 men. Henry V. soon after obtained the kingdom of France.

AGITATORS (or Adjutators), officers appointed by the English army in 1647, to take care of its interests: each troop or company had two. The protector Cromwell was eventually obliged to repress their seditious power. At a review he seized the ringleaders of a mutiny, shot one instantly, in the presence of his companions and the forces on the ground, and thus restored discipline. *Hume*.—Daniel O'Connell, called the *agitator of Ireland*, was born in 1775. He began to agitate at the elections in 1826; was elected for Clare, July 5, 1828; the election being declared void, he was re-elected July 30, 1829. After the passing of the Catholic emancipation bill, he agitated in vain for the repeal of the union, 1834 to 1843. He died May 15, 1847.—Richard Cobden and John Bright were the chief *Anti-corn-law agitators*, 1841-45.

* On May 22, 1850, Thomas Robinson sought to recover the possession of his child from the care of its mother (from whom Thomas had separated); the application was refused by the vice-chancellor, on the ground that the father would instil the doctrines of this sect into the child in educating it, and the court held it a duty to "save it from the pollution of the parent's teaching." Several suicides have been committed by the deluded females of this sect.—On Aug. 21, 1858, Miss Louisa Jane Nottidge died, having transferred her property to Mr. H. J. Prince. Her brother, Mr. Nottidge, by an action, recovered from Prince £7281., as having been fraudulently obtained. Extraordinary disclosures were made during the trial, July 25, 1860. In the autumn of 1860, the Rev. Mr. Price, after several vain attempts, succeeded in rescuing his wife from the Agapemone. They had both been early supporters of it.

AGNADELLO (N. E. Italy). Here Louis XII. of France gained a great victory over the Venetians, some of whose troops were accused of cowardice and treachery; May 14, 1509. The conflict is also termed the battle of the Rivolta.

AGNOITÆ (from *agnoia*, Greek, *ignorance*). 1. a sect founded by Theophrastus of Cappadocia about 370: said to have doubted the omniscience of God. 2. the followers of Themistius of Alexandria about 530, who held peculiar views as to the body of Christ, and doubted his divinity.

AGONISTICI (from *agon*, Greek, *a conflict*), also termed *circutores*, a branch of the Donatists (*which see*). They preached their heretical doctrines with great boldness in public places, and hence incurred the severe persecution of the emperors in the 4th and 5th centuries.

AGRA (N. W. India), founded by Akbar in 1566, was the capital of the great mogul. See *Mansoleums*. In 1658 Aurungzebe removed to Delhi.—The fortress of Agra, termed the key of Hindostan, in the war with the Mahrattas, surrendered to the British forces, under general Lake, Oct. 17, 1803, after one day's siege: 162 pieces of ordnance and 240,000*l.* were captured.—In June, 1857, the city was abandoned to the mutineers by the Europeans, who took refuge in the fort, from which they were rescued by major Montgomery and colonel Greathed.—Allahabad was made capital of the N. W. provinces of India, instead of Agra, in 1861.

AGRARIAN LAW (*Agraria lex*) decreed an equal division among the Roman people of all the lands acquired by conquest, limiting the acres which each person should enjoy. It was first proposed by the consul Spurius Cassius, 486 B.C., and occasioned his judicial murder when he went out of office in 485. It was re-introduced by the tribune Licinius Stolo, 376, and by the tribune Tiberius Gracchus, 132 B.C. The law at last proved fatal to the freedom of Rome under Julius Cæsar, 60 B.C. *Livy; Vossius*. In modern times the term has been misinterpreted to signify a division of the lands of the rich among the poor, frequently proposed by demagogues, such as *Gracchus Babeuf*,* editor of the *Tribun du Peuple*, in 1794.

AGRICOLA'S WALL. See *Roman Walls*.

AGRICULTURE. "Abel was a keeper of sheep, but Cain was a tiller of the ground," *Genesis* iv. 2. The Athenians asserted that the art of sowing corn began with them; and the Cretans, Sicilians, and Egyptians made the same claim.

Cato the Censor (died 149 B.C.) and Varro (died 28 B.C.) were eminent Roman writers on agriculture. It was brought into England by the Romans about A.D. 27.

Fitzherbert's "Book of Husbandry," printed in 1524.

Tusser's "Five Hundred Points of Husbandry," 1524.

Blythe's "Improver," 1649.

Hartlib's "Legacy," 1650.

Jethro Tull's "Horse-hoeing Husbandry," 1701.

About the end of the 18th century fallowing was gradually superseded by turnips and other green crops.

AGRICULTURAL SOCIETIES.—The earliest mentioned in the British Isles was the Society of Improvers of Agriculture in Scotland, instituted in 1723. The Dublin Agricultural Society (1749) gave a stimulus to agriculture in Ireland; its origin is attributed to Mr. Prior of Rathdowney, Queen's County, in 1731. The Bath and West of England Society established, 1777; and the Highland Society of Scotland, 1793. County Agricultural Societies are now numerous.

London Board of Agriculture established by act of parliament, 1793.

Francis, duke of Bedford, a great promoter of agriculture, died, March 2, 1802.

Royal Agricultural Society of England established in 1838, by noblemen and gentlemen, the chief landed proprietors in the kingdom, and incorporated by royal charter, 1840. It holds two

meetings annually, one in London the other in the country; the first country meeting at Oxford, in 1839. It awards prizes, and publishes a valuable journal. The London meeting at Battersea in June, 1862, was highly successful.

"Chambers of Agriculture" were established in France in 1851.

The Royal Agricultural College at Cirencester organised, 1842; chartered, 1845.

AGRICULTURAL CHEMISTRY.—Sir Humphry Davy delivered lectures on this subject (afterwards published), at the instance of the Board of Agriculture, in 1812; but it excited little attention till the publication of Liebig's work in 1840, which made a powerful impression. Boussingault's "Economie Rurale," an equally important work, appeared in 1844. The immoderate expectations from this study having been somewhat disappointed, a partial reaction took place. Liebig's "Letters on Agriculture" appeared in 1859.

AGRICULTURAL HALL, Islington, N. London, chiefly for the meetings of the Smithfield Club. The foundation stone was laid by the president, lord Berners, Nov. 5, 1861. A remarkable exhibition of dogs was opened here on June 24, 1862; and of horses and of donkeys, in July, 1864, 1865.

In Aug. 1855, a committee presented a report on the best mode of obtaining accurate Agricultural Statistics, which has not been acted on. There were, in 1831, 1,055,982 agricultural labourers in Great Britain, and in Ireland, 1,131,715.

* In 1796 he conspired against the directory with the view of obtaining a division of property, and was executed.

AGRICULTURE, *continued.*

The following Table, drawn up by Mr. William Couling, C.E., in 1827,* is extracted from the Third Report of the Emigration Committee:—

Countries.	Cultivated.	Wastes capable of Improvement.	Unprofitable.	Total.
	ACRES.	ACRES.	ACRES.	ACRES.
England	25,632,000	3,454,000	3,256,400	32,342,400

AGRIGENTUM (now *Girgenti*), a celebrated city of Sicily, built about 582 B.C. It was governed by tyrants from 566 to 470; among these were Phalaris (see *Brazen Bull*); Alcamanes; Theron who, with his step-father Gelon, defeated the Carthaginians at Himera; and Thrasydeus, his son, expelled in 470; when a republic was established and Agrigentum became opulent and luxurious. It was taken by the Carthaginians in 405 B.C., and held, except during short intervals, till wrested from them by the Romans in 262 B.C. From A.D. 825 till 1086 it was held by the Saracens.

AHMEDNUGGUR (W. India), once capital of a state founded by Ahmed Shah, about 1494, which after having fallen into the hands of the Moguls and the Mahrattas, was taken from the latter by Arthur Wellesley, Aug. 12, 1803, and finally annexed to the British dominions in 1817.

AIR, OR ATMOSPHERE. Anaximenes of Miletus (530 B.C.) declared air to be a self-existent deity, and the first cause of everything created. Posidonius (about 79 B.C.) calculated the height of the atmosphere to be 800 stadia. The pressure of air, about 15 lbs. to the square inch, was discovered by Torricelli A.D. 1645, and was found by Pascal, in 1647, to vary with the height. Halley, Newton, and others, up to the present time have illustrated the agency and influences of this great power by various experiments, and numerous inventions have followed; among others the **AIR-GUN** of Guter of Nuremberg about 1656; the **AIR-PUMP**, invented by Otto von Guericke of Magdeburg about 1650; improved by the illustrious Boyle in 1657; and the **AIR-PIPE**, invented by Mr. Sutton, a brewer of London, about 1756. The density and elasticity of air were determined by Boyle; and its relation to light and sound by Hooke, Newton, and Derham. The extension of our atmosphere above the surface of the earth, long considered as about 45 miles, was thought by admiral FitzRoy to be only about 9 or 10 miles (1862).—Its composition, about 77 parts of nitrogen, 21 of oxygen, and 2 of other matters (such as carbonic acid, watery vapour, a trace of ammonia, &c.), was gradually ascertained by Priestley (who discovered oxygen gas in 1774), Scheele (1775), Lavoisier, and Cavendish; and its laws of refraction were investigated by Dr. Bradley, 1737. Dr. Stenhouse's *Air-filters* (in which powdered charcoal is used) were first set up at the Mansion-house, London, in 1854. In 1858, Dr. R. Angus Smith made known a chemical method of ascertaining the amount of organic matter in the air. The researches of Dr. Schönbein, a German chemist of Basel, between 1840 and 1859, led to the discovery of two states of the oxygen in the air, which he calls *ozone* and *antozone*. See *Oxygen*, *Nitrogen*, *Ozone*, *Atmospheric Railway*, and *Pneumatic Despatch*.—The force of compressed air has been employed in boring the Cenis tunnel, *which see*.

* At that period it was computed that the soil of the United Kingdom was annually cropped in the following proportions:—

	ACRES.		ACRES.
Wheat	7,000,000	Nursery-grounds	21,210,000
Barley and rye	1,950,000	Inclosed fruit, flower, kitchen, and other gardens	20,000
Potatoes, oats, and beans	6,500,000	Pleasure-grounds	110,000
Turnips, cabbages, and other vegetables	1,150,000	Land depastured by cattle	21,000,000
Clover, rye-grass, &c.	1,750,000	Hedge-rows, copses, and woods	2,000,000
Fallow	2,800,000	Ways, water, &c.	2,100,000
Hop-grounds	60,000		
Forward	21,210,000	Cultivated land	46,540,000

It was reckoned by the Agricultural Committee, that the cultivation of waste lands would yield above 20,000,000*l.* a year. It was calculated in 1854 that there were in England 32,160,000 acres in cultivation, of the annual value of 37,412,000*l.* Since that time much land has been brought into cultivation. See *Wheat*.

AIX-LA-CHAPELLE (AACHEN), a Roman city, now in Rhenish Prussia. Here Charlemagne was born 742, and died 814; having built the minster (796-804), and conferred many privileges on the city, in which fifty-five emperors have since been crowned. The city was taken by the French in 1792; retaken by the Austrians, 1793; by the French, 1794; reverted to Prussia, 1814.—The first *Treaty of peace* signed here was between France and Spain, when France yielded Franche Comté, but retained her conquests in the Netherlands, May 2, 1668.—The second, or celebrated treaty, was between Great Britain, France, Holland, Germany, Spain, and Genoa. (By it the treaties of Westphalia in 1648, of Nimeguen in 1678 and 1679, of Ryswick in 1697, of Utrecht in 1713, of Baden in 1714, of the Triple Alliance in 1717, of the Quadruple Alliance in 1718, and of Vienna in 1738, were renewed and confirmed.) Signed on the part of England by John, earl of Sandwich, and sir Thomas Robinson, Oct. 7, 1748.—A *Congress* of the sovereigns of Austria, Russia, and Prussia, assisted by ministers from England and France, was held at Aix-la-Chapelle, and a convention signed, Oct. 9, 1818. The sum then due from France to the allies was settled at 265,000,000 of francs.

AJACCIO. See *Corsica*.

AJNADIN (Syria). Here the Mahometans defeated the army of the emperor Heraclius, in July, 633. They took Damascus in 634.

AKERMAN (Bessarabia). After being several times taken, it was ceded to Russia in 1812. Here the celebrated treaty between Russia and Turkey was concluded in 1826, which secured for the former the navigation of the Black Sea, recognised the Danubian principalities, &c.

ALABAMA, a Southern slave state, originally part of Georgia, N. America; made an independent state in 1819: commercial metropolis, Mobile. It seceded from the Union by an ordinance passed Jan. 11, 1861, and was reunited in 1865.*

ALAND ISLES (Gulf of Bothnia), taken from Sweden by Russians, 1809. See *Bomarsund*.

ALANI, a Tartar race, invaded Parthia, 75. They joined the Huns in invading the Roman empire, were defeated by Theodosius, 379-382. They were subdued by the Visigoths, 452; and were eventually incorporated with them.

ALARCOS (Central Spain). Here the Spaniards under Alfonso IX., king of Castile, were totally defeated by the Moors, July 19, 1195.

ALBA LONGA, an ancient city of Italy, said to have been founded by Ascanius, son of Æneas, 1152 B.C. Its history is of doubtful authenticity.

Ascanius, son of Æneas, 1152 B.C.; Sylvius Posthumus, 1143; Æneas Sylvius	B.C.	1114	Agrippa; Romulus Silvius, 864; Aventinus, 845; Procas, 808; Numitor	B.C.	795

ALBANIA, a province in European Turkey, formerly part of the ancient Epirus. The Albanians became independent during the decline of the Greek empire. They were successfully attacked by the Turks in 1388. About 1443, under George Castriot (Scanderbeg), they baffled the efforts of Mahomed II. to subdue them till the siege of Scutari in 1478, when they partially submitted. Albania became independent under Ali Pacha, of Janina, in 1812, who defeated the Turkish pachas, and governed ably, but cruelly and despotically, till Feb. 1822, when he and his two sons were slain, after surrendering under a solemn promise of safety. A revolt in Albania was suppressed in 1843.

* The "Alabama," a steam-vessel belonging to the Southern States of North America, was built at Birkenhead, and sailed under a false name from the Mersey, July 28, 1862. Under the command of captain Semmes it made much havoc in the Federal trading vessels. The "Alabama" was attacked and sunk by the Federal iron-clad "Kearsage" near Cherbourg, on Sunday morning, June 19, 1864. Part of the crew were saved by Mr. John Lancaster in an English yacht.

† Early traditions state, that when Amulius dethroned his brother, he condemned Ilia, the daughter of Numitor, to a life of celibacy, by obliging her to take the vows and office of a vestal, thereby to assure his safety in the usurpation. His object was, however, frustrated; violence was offered to Ilia, and she became the mother of twins, for which Amulius ordered her to be burned alive, and her offspring to be thrown into the Tiber, 770 B.C. But the little bark in which the infants were sent adrift stopped near mount Aventine, and was brought ashore by Faustulus, the king's chief shepherd, who reared the children as his own, and called them Romulus and Remus. His wife, Acca-Laurentia, was surnamed *Lupa*; whence arose the fable that Romulus and his brother were suckled by a she-wolf. At sixteen years of age, Romulus avenged the wrongs of Ilia and Numitor, 754 B.C., and the next year founded Rome. Varro.

ALBAN'S, ST. (Hertfordshire), near the Roman Verulam, derived its present name from Alban, the British protomartyr, said to have been beheaded during the persecution by Diocletian, June 23, 286. A stately monastery to his memory was erected by Offa, king of Mercia, about 793, who granted it many privileges. Its superior sat as premier abbot in parliament till the dissolution in 1539. It was taken from Cassivelaunus by Julius Cæsar, 54 B.C., and retaken with much slaughter by Boadicea or Boudicca, queen of the Iceni, A.D. 61. On May 22 or 23, 1455, was fought the *first battle of St. Alban's*, when the Lancastrians were defeated, their leader, Edmund duke of Somerset slain, and king Henry VI. taken prisoner, by the duke of York and his partisans. In the *second battle*, on Shrove Tuesday, Feb. 17, 1461, queen Margaret totally defeated the Yorkists under the earl of Warwick and rescued the king. There was much blood shed in these desperate conflicts. St. Alban's was incorporated by Edward VI. in 1553, and disfranchised for bribery, June 17, 1852. *St. Alban's raid*, see *United States*, 1804.

ALBANY (OR ALBAINN), the ancient name of the Scottish Highlands. The brother of Robert III. of Scotland was made duke of Albany in 1398. Frederick, son of George III., was duke of York and Albany. He died Jan. 5, 1827.

ALBERT MEMORIAL. The Prince Consort died on Dec. 14, 1861, deeply lamented by the whole civilised world. A meeting to organise a method of receiving contributions for a great national memorial was held at the Mansion-house, Jan. 14, 1862; and a large sum was quickly subscribed. 36,000*l.* had been received on March 1, and 50,220*l.* on June 11, 1862. The nature of the memorial was referred to the queen herself. In a letter to the lord mayor, dated Feb. 19, 1862, sir Charles Grey says, on behalf of her majesty, "It would be more in accordance with her own feelings, and she believes with those of the country in general, that the monument should be directly personal to its object. After giving the subject her maturest consideration, her majesty has come to the conclusion, that nothing would be more appropriate, provided it is on a scale of sufficient grandeur, than an obelisk to be erected in Hyde-park on the site of the Great Exhibition of 1851, or on some spot immediately contiguous to it. Nor would any proposal that could be made be more gratifying to the queen herself personally, for she can never forget that the prince himself had highly approved of the idea of a memorial of this character being raised on the same spot in remembrance of the Great Exhibition." In a second letter the queen expressed her intention of personally contributing towards erecting the memorial, that "it might be recorded in future ages as raised by the queen and people of a grateful country to the memory of its benefactor." Shortly after a committee was appointed to fulfil her majesty's desire. As a suitable block of granite could not be obtained, the proposal for an obelisk was given up. On April 22, 1863, the queen approved of the design of Mr. Gilbert G. Scott for an Eleanor Cross, with a spire 150 feet high, accompanied by statues, &c.; and on April 23, parliament voted 50,000*l.*, in addition to the 60,000*l.* received by voluntary contributions. The sculptors employed are M'Dowell, Foley, Theed, John Bell, and Armistead: material, Sicilian marble. (Jan. 1865.) Many memorials of the prince have been set up throughout the empire.*

ALBIGENSES, a name given to various bodies of persons who opposed the doctrines and corruptions of the church of Rome, living at Albige, in Languedoc, and at Toulouse in the 12th century. They were persecuted as Manichæans, 1163, and a crusade (proclaimed by pope Innocent III.) commenced against them in 1207. Simon de Montfort (to whom Toulouse was given) commanded, and at Bezières he and the pope's legate put friends and foes to the sword, saying, "God will find his own!" At Minerbe he burnt 150 of the Albigenses alive; and at La Vaur he hanged the governor, and beheaded the chief people, drowning the governor's wife, and murdering other women. He next defeated the count of Toulouse, but was himself killed in 1218. Louis VIII. and IX., kings of France, patronised the crusade; count Raymond was subdued in 1229; and the heretics were given up to the Inquisition. See *Waldenses*.

ALBION (probably derived from *albus* or *alp*, white). Britain is said to have been so called by Julius Cæsar and others, on account of the chalky cliffs upon its coast.

ALBUERA (OR ALBUHERA), Estremadura, Spain, where a battle was fought between the French, commanded by marshal Soult, and the British and Anglo-Spanish army, under marshal, afterwards lord Beresford, May 16, 1811. The allies obtained the victory, one of

* *Inscription on the "Memorial Cairn"* on a high mountain overlooking Balmoral palace:—"To the beloved memory of ALBERT the great and good Prince Consort, erected by his broken-hearted widow, VICTORIA R., 21st Aug. 1862." Upon another dressed slab, a few inches below the above, is this quotation:—"He being made perfect in a short time, fulfilled a long time: for his soul pleased the Lord, therefore basted he to take him away from among the wicked."—*Wisdom of Solomon*, chap. iv. 13, 14.

the most brilliant achievements of the war. The French loss exceeded 8000 men previously to their retreat ; but the allies lost a large number. The chief brunt of the action fell on the British ; colonel Inglis, 22 officers, and more than 400 men, out of 570 who had mounted a hill, fell,—out of the 57th regiment alone ; the other regiments were scarcely better off, not one-third being left standing ; “ 1500 unwounded men, the remnant of 6000 unconquerable British soldiers, stood triumphant on this fatal hill.” *Napier*.

ALBUFERA (Spain, East Central), a lagoon, near which the French marshal Suchet (afterwards duke of Albufera) defeated the Spaniards under Blake, Jan. 4, 1812 : this led to his capture of Valencia on Jan. 9.

ALCANTARA, an illustrious Spanish military order of knighthood, established in 1156. The sovereign of Spain has been grand master since 1495.

ALCAZAR-QUIVER, near Fez, N. W. Africa, where the Moors totally defeated the Portuguese, whose gallant king Sebastian was slain, Aug. 4, 1578. The Portuguese disbelieved his death and anxiously expected his return ; this led to the successive appearance of five impostors.

ALCHEMY, the forerunner of the science of chemistry : its chief objects being the discovery of the philosopher's stone (which was to effect the transmutation of metals into gold), an alkahest or universal menstruum, and the elixir of life. Alchemy is said to be as old as the Flood ; yet few writers, from Homer till 400 years after Christ, mention any such thing. The alchemists assert that their founder was Hermes *Trismegistus* (thrice greatest), an ancient Egyptian king.—Pliny says, the emperor Caligula was the first who prepared natural arsenic, in order to make gold of it, but left it off, because the charge exceeded the profit. Others say, the Egyptians knew the secret. Zosimus wrote on the subject about 410. The Arabians are said to have invented this art, wherein they were vainly followed (in the 13th century) by Roger Bacon, Albertus Magnus, Aquinas, and Raymond Lullius, by Basil Valentine (born 1394), and by Paracelsus (died 1541), and others.—In 1404 the craft of multiplying gold and silver was made felony by 5 Hen. IV. c. 4, which act was repealed in 1689. A licence for practising alchemy with all kinds of metals and minerals was granted to one Richard Carter, 1476. *Rymer's Fœd.* Dr. Price, of Guildford, in 1782 published an account of his experiments in this way, and pretended to success : he brought his specimens of gold to the king, affirming that they were made by means of a red and white powder. Being a fellow of the Royal Society, he was required, upon pain of expulsion, to repeat his experiments before Messrs. Kirwan and Wolfe (some say Higgins) ; but after much equivocation and delay he took poison and died, Aug. 1783.

ALCOHOL. Pure spirit of wine or hydrated alcohol was obtained by the distillation of fermented liquors by Abucasis in the 12th century ; and the dehydration of this liquor was first partially effected by Raymond Lullius in the 13th century by carbonate of potassium. Alcohol has never been reduced to the solid state, but becomes viscid at very low temperatures. In 1820, Faraday and Hennell obtained traces of alcohol by passing olefiant gas (bi-carburetted hydrogen) through sulphuric acid ; and in 1862 this process was examined and confirmed by Berthelot. See *Distillation, Spirits, Brandy, Gin, Rum*.

AL-CORAN. See *Koran, Mahometanism, &c.*

ALDERMAN. The Saxon *ealdorman* was next to the king and frequently a viceroy : but after the settlement of the Danes the title was gradually displaced by that of *carl*. Aldermen are now next in dignity to the mayor. They were appointed in London (where there are twenty-six) in 1242 ; and in Dublin (where there are twenty-four) in 1323. Aldermen chosen for life, instead of annually, 17 Richard II. 1394. Present mode of election established 11 Geo. I. 1725. Aldermen made justices of the peace 15 Geo. II. 1741.

ALDERNEY (English Channel), with Jersey, &c., was incorporated with the kingdom by William the Conqueror, 1066. The “ Race ” is celebrated for two fatal occurrences ; William of Normandy, son of Henry I. of England, and many young nobles (140 youths of the principal families of France and Britain), were overtaken by a storm, and all lost, Nov. 25, 1120. The British man-of-war *Victory*, of 100 guns and 1160 men, was wrecked here, Oct. 5, 1744 ; the admiral, sir John Balchan, and all his crew perished. Through this strait the French escaped after their defeat at La Hogue by admiral Rooke, May, 1692.

ALDRESHOT CAMP, a moor near Farnham, about 35 miles from London. In April, 1854, the War office, having obtained a grant of 100,000*l.*, purchased 4000 acres of land for a permanent camp for 20,000 men. Additional land was purchased in 1856. Barracks

have been since erected for 4000 infantry, 1500 cavalry, and several batteries of artillery. Great improvements in military cookery were introduced here under the superintendence of captain John Grant in 1857. See *Cookery*.—It was visited by the queen April 19, 1856; and on July 7 the queen reviewed the troops returned from the Crimea; and again on the 16th, in the presence of both houses of parliament. In 1859, about 15,000 men were stationed here. (Cost, up to Feb. 1860, said to be 1,291,531*l*.) An industrial and fine art exhibition, furnished by officers and men and their wives, was opened here June 29, and closed July 14, 1864.

ALDINE PRESS, that of Aldus Manutius, at Venice, where were printed many of the first editions of the Greek, Latin, and Italian classics, commencing in 1494 with *Museus*.

ALE, BEER (and Wine) are said to have been invented by Bacchus; the first in Egypt, where the soil was considered unable to produce grapes. Ale was known as a beverage at least in 404 B.C. Herodotus ascribes the first discovery of the art of brewing barley-wine to Isis, the wife of Osiris.—A beverage of this kind is mentioned by Xenophon, 401 B.C. The Romans and Germans very early learned from the Egyptians the process of preparing a liquor from corn by means of fermentation. *Tacitus*. Ale-houses are made mention of in the laws of Ina, king of Wessex (A.D. 688). Booths were set up in England 728, when laws were passed for their regulation. Ale-houses were subjected to regulation by 5 & 6 Edw. VI. c. 25 (1551). By 1 James I. c. 9 (1603), one full quart of the best, and two quarts of small ale were to be sold for one penny. Excise duty on ale and beer was imposed by the parliament in 1643, and continued by Charles II. (1660). See *Beer*, *Porter*, *Wine*.

ALEMANNI, OR ALL MEN (*i.e.* men of all nations), hence *Allemand*, German. A body of Suevi, who took this name, were defeated by Caracalla, 214. After several repulses, they invaded the empire under Aurelian, who subdued them in three battles, 270. They were again vanquished by Julian, 356, 357. They were defeated and subjugated by Clovis at Tolbiac (or Zulpich), 496. The Suabians are their descendants.

ALENÇON (N. France) gave title to a count and duke.

1268. Peter made count by his father king Louis IX.
1293. Charles I., of Valois, made count by his brother king Philip the Fair.
1325. Charles II., his son, killed at Crecy.
1346. Charles III. (his son), became a priest.
1361. Peter, his brother.

1404. John (his son), made DUKE in 1414, killed at Agincourt, 1415.
1415. John II. (his son), intrigued against the king.
1476. Charles IV. fled after the battle of Pavia in 1525, and died shortly after of chagrin. The duchy was absorbed by the crown.

ALEPPO (anciently Bercea), a large town, N. Syria, so named by Seleucus Nicator about 299 B.C. The pachalic of Aleppo is one of the five governments of Syria. It was taken by the Turks, A.D. 638, who restored its ancient name Haleb or Chaleb; by Saladin, 1193; and sacked by Timour, 1400. Its depopulation by the plague has been frequent; 60,000 persons were computed to have perished by it in 1797. It suffered by the plague in 1827, and the cholera in 1832. Aleppo suffered severely from the terrible earthquakes in 1822 and 1830; and has often been the scene of fanatical massacres. On Oct. 16, 1850, the Mahometans attacked the Christian inhabitants. They burnt everything in their way; three churches were destroyed, five others were plundered, thousands of persons were slain, and the total loss of property amounted to about a million sterling; no interference was attempted by the pacha or the Turkish soldiers.

ALESSANDRIA, a city of Piedmont, built in 1168 under the name of Cesarea by the Milanese and Cremonese, to defend the Tanaro against the emperor, and named Alessandria after pope Alexander III. It has been frequently besieged and taken. The French took Alessandria in 1798, but were driven out July 21, 1799. They recovered it after the battle of Marengo, in 1800. Alessandria was strongly fortified by Napoleon. Its works were destroyed at the peace in 1814, but a European subscription was commenced in 1856, to restore them.

ALEXANDER, ERA OF, dated from the death of Alexander the Great, Nov. 12, 323 B.C. In the computation of this era, the period of the Creation was considered to be 5502 years before the birth of Christ, and, in consequence, the year 1 A.D. was equal to 5503. This computation continued to the year A.D. 284, which was called 5786. In the next year (A.D. 285), which should have been 5787, ten years were discarded, and the date became 5777. This is still used in the Abyssinian era, *which see*. The date is reduced to the Christian era by subtracting 5502 until the year 5786, and after that time by subtracting 5492.

"ALEXANDRA CASE." See *Trials*, 1862—64.

ALEXANDRA PARK, Muswell Hill, London, N., purchased by a company, and named after the Princess of Wales, was opened with a flower show, July 23, 1863. A portion of the Exhibition of 1862 is to be erected within it. The work, which rapidly proceeded in 1864, is now suspended (1865).

ALEXANDRIA (Egypt), the walls whereof were six miles in circuit, was built by Alexander the Great, 332 B.C., who was buried here, 322. It became the residence of the Greek sovereigns of Egypt, the Ptolemies.

ALEXANDRIAN CODEX, a MS. of the Bible in Greek, said to have been written by a lady named Thecla, in the 6th century, and to have belonged to the patriarch of Alexandria in 1098. It was presented to Charles I. of England in 1628 by Cyrillus Lascaris, patriarch of Constantinople, and was placed in the British Museum in 1753. It was printed in facsimile, 1786-1821.

ALEXANDRIAN SCHOOLS OF PHILOSOPHY. The first school arose soon after the foundation of Alexandria, 332 B.C. It flourished under the patronage of the Ptolemies till about 100 B.C. It included Euclid (300), Archimedes (287—212), Apollonius (250), Hipparchus (150), and Hero (150). The second school arose about A.D. 140, and lasted till about 400. Its most eminent members were Ptolemy, the author of the Ptolemaic system (150), Diophantus, the arithmetician (200), and Pappus, the geometer (350).

ALEXANDRINES, verses of twelve syllables, first written by Alexander of Paris, about 1164, and since called after him. The last line of the Spenserian stanza is an Alexandrine. In Pope's *Essay on Criticism*, this verse is thus happily exemplified:—

"A needless Alexandrine ends the song,
That, like a wounded snake, drags its slow length along"

The longest English poem wholly in Alexandrine verse is Drayton's *Polyolbion*, published in 1612. Chapman's *Homer's Iliad* (1598) is in this measure.

ALFORD (N. Scotland), BATTLE OF. General Baillie, with a large body of Covenanters, was defeated by the marquess of Montrose, July 2, 1645.

ALGEBRA: Diophantus, said to be the inventor, first wrote upon it, probably about 200. It was much cultivated in the 9th century by the Arabs, who brought it into Spain. Among its votaries in Italy was Leonardo Bonaccio of Pisa, in 1220. In 1494 Luca Paciolo published the first printed book on algebra in Europe. *Serret*. Some of the algebraic signs were introduced either by Christophe Rudolph (1522-6) or Michael Stifelius of Nuremberg, 1544, and others by Francis Vieta, in 1590, when algebra came into general use. *Moreri*. Descartes applied algebra to geometry about 1637. The binomial theorem of Newton, the basis of the doctrine of fluxions, and the new analysis, 1668. Dean Peacock's "*Algebra*" is a first-class work.

ALGERIA. See *Algiers*.

* The celebrated saying of Omar—"That if the books agreed with the book of God, they were useless; if they disagreed, they were pernicious"—is denied by Mahometans. It is also attributed to Theophilus, archbishop of Alexandria (390), and to cardinal Ximenes (1500).

ALGESIRAS, OR OLD GIBRALTAR (S. Spain). By this city, the Moors entered Spain in 710, and held it till 1343.—Two engagements took place here between the English fleet under sir James Saumarez and the united French and Spanish fleets, July 6 and 12, 1801. In the first the enemy was victorious, the English losing the *Pompey*; but their honour was redeemed in the latter conflict, the *San Antonio*, 74 guns, being captured. By an unfortunate error, two Spanish ships fired on each other and took fire; of 2000 men on board, 250 were saved by the English. *Alison*.

ALGIERS, now ALGERIA, N. W. Africa; part of the Ancient Mauritania, which was conquered by the Romans, 46 B.C.; by the Vandals, 439 A.D.; recovered for the empire by Belisarius, 534; and subdued by the Arabs about 690.

ALHAMBRA, a Moorish palace and fortress near Granada, S. Spain, founded by Mohammed I. of Granada about 1253. It surrendered to the Christians Jan. 6, 1496. The remains have been described in a magnificent work by Owen Jones and Jules Goury, published 1842-5. There is a fac-simile of a part of this palace in the Crystal Palace at Sydenham. The Panopticon (*which see*) was opened as a circus, &c., under this name, in March 1858. The Alhambra Palace Company, incorporated in July 1863, applied for dissolution in Jan. 1865.

ALI, SECT OF, founded by Ali (who married Mahomet's daughter Fatima), about 632. He became Mahomet's vizir, 613; and caliph, 655. Ali was called by the prophet, "the lion of God, always victorious;" and the Persians follow the interpretation of the Koran according to Ali, while other Mahometans adhere to that of Abubeker and Omar. Ali was assassinated in 660.†—This sect is called Shiites and Fatimites.

ALIENS, OR FOREIGNERS, were banished in 1155, being thought too numerous. In 1343 they were excluded from enjoying ecclesiastical benefices. By 2 Rich. II. st. 1, 1378, they were much relieved. When they were to be tried criminally, the juries were to be half foreigners, if they so desired, 1430. They were restrained from exercising any trade or handicraft by retail, 1483, a prohibition which was relaxed in 1663. The celebrated

He was removed to the castle of Amboise, near Tours, Nov. 2, 1848, and released from his confinement by Louis Napoleon, Oct. 16, 1852, after swearing on the Koran never to disturb Africa again; he was to reside henceforward at Broussa, in Asia Minor; but in consequence of the earthquake at that place Feb. 28, 1855, he removed to Constantinople. In July, 1860, Abd-el-Kader held the citadel of Damascus, and there protected many of the Christians whom he had rescued from the massacres then in perpetration by the Turks. He received honours from the English, French, and Sardinian sovereigns.

‡ The first four successors of Mahomet—Abubeker, Omar, Othman, and Ali, his chief agents in establishing his religion and extirpating unbelievers, and whom on that account he styled the "cutting swords of God," all died violent deaths; and his family was wholly extirpated within thirty years after his own decease.

Alien Bill passed, Jan. 1793. Act to register aliens, 1795.—The celebrated baron Geramb, a conspicuous and fashionable foreigner, known at court, was ordered out of England, April 6, 1812.—Bill to abolish their naturalisation by the holding of stock in the banks of Scotland, June, 1820. New registration act, 7 Geo. IV. 1826. This last act was repealed and another statute passed, 6 Will. IV. 1836. The rigour of the alien laws was much mitigated by 7 & 8 Vict. c. 66 (1844).—ALIEN PRIORIES were suppressed in England in 1414.*

ALI WAL, a village in N. W. India, the site of a battle on Jan. 28, 1846, between the Sikh army under sirdar Runjoor Singh Majeetha, 19,000 strong, supported by 68 pieces of cannon, and the British under sir H. Smith, 7000 men, with 32 guns. The contest was obstinate, but ended in the defeat of the Sikhs, who lost nearly 6000 killed or drowned in attempting to recross the Sutlej.

ALKALIES (from *kali*, the Arabic name for the plant from which an alkaline substance was first procured) are ammonia, potash, soda, and lithia. Black discovered the nature of the difference between caustic and mild alkalies in 1736.

The fixed alkalies, potash and soda, decomposed by Humphry Davy at the Royal Institution, London, 1808. Dr. Ure invented an alkalimeter, 1816.

The manufacture of alkalies, very extensive in Lancashire and Cheshire, are based on the decomposition of common salt (chloride of sodium), by a process invented by a Frenchman named Le Blanc, about 1792.

Mr. Losh obtained crystals of soda from brine about 1814. Various modifications of these processes are now in use.

"Alkali works" are defined as works for the manufacture of alkali, sulphates of soda, sulphate of potash, and in which muriatic gas is evolved.

Mr. Wm. Gossage's process for condensing muriatic acid gas patented in 1836.

In consequence of the serious injury to vegetation produced by the numerous alkali works in Lancashire and Cheshire, the Alkali act "for the more effectual condensation [of 95 per cent.] of muriatic acid gas" (or hydrochloric acid) was passed, July 28, 1863, to come into operation Jan. 1, 1864.

ALKMAER. See *Bergen*.

ALLAHABAD (N. W. Hindostan), the "holy city" of the Indian Mahometans, situated at the junction of the rivers Jumna and Ganges. The province of Allahabad was successively subject to the kings of Delhi and Oude, but in 1803 was wholly incorporated with the British possessions. By treaty here, Bengal, &c., was ceded to the English in 1765.—During the sepoy mutiny several regiments of the East India company rose and massacred their officers, June 4, 1857; colonel Neil marched promptly from Benares and suppressed the insurrection. In Nov. 1861, lord Canning made this city the capital of the N. W. provinces.

ALLEGIANCE. See *Oaths*.

ALLEGORY is as old as language, and abounds in the Scriptures and Homer: see Jacob's blessing upon his sons, *Genesis* xlix. (B.C. 1689), *Psalms* lxxx., and all the prophets. Spenser's *Fairie Queene* (1590) and Bunyan's *Pilgrim's Progress* (1678) are allegories throughout; Addison's writings in the *Spectator* (1711) abound in allegories.

ALLIA (Italy), a small river flowing into the Tiber, where Brennus and the Gauls defeated the Romans, July 16, 390 B.C. The Gauls sacked Rome and committed so much injury that the day was thereafter held to be unlucky (*nefas*), and no public business was permitted to be done thereon.

ALL SAINTS' DAY (Nov. 1), or All-Hallows, a festival said to have been begun by pope Boniface IV. about 607, and celebrated in the Pantheon at Rome, and established by pope Gregory IV. (about 830) for the commemoration of all those saints and martyrs in whose

honour no particular day is assigned. The reformers of the English church, 1549, struck out of their calendar altogether a great number of anniversaries, leaving only those which at *their time* were connected with popular feeling or tradition.

ALL SOULS' DAY (Nov. 2), a festival of the Roman Catholic church to commemorate the souls that are in purgatory, instituted, it is said, at Cluny about 993 or 1000.

ALMA, a river in the Crimea, near which was fought a great battle on Sept. 20, 1854. See *Russo-Turkish War and Crimea*. The English, French, and Turkish army (about 57,000 men) moved out of their first encampment in the Crimea on Sept. 19, and bivouacked for the night on the left bank of the Bulganac. The Russians (commanded by Prince Menschikoff), mustering 40,000 infantry, had 180 field-pieces on the heights, and on the morning of Sept. 20th were joined by 6000 cavalry from Theodosia (or Kaffa). The English forces, under lord Raglan, consisted of 26,000 men; the French of 24,000, under marshal St. Arnaud. At 12 o'clock the signal to advance was made; the river Alma was crossed, while prince Napoleon took possession of the village under the fire of the Russian batteries. At 4, after a sanguinary fight, the allies were completely victorious. The enemy, utterly routed, threw away their arms and knapsacks in their flight, having lost about 5000 men, of whom 900 were made prisoners, mostly wounded. The loss of the British was 26 officers and 327 men killed, and 73 officers and 1539 men wounded (chiefly from the 23rd, 7th, and 33rd regiments); that of the French, 3 officers and 233 men killed, and 54 officers and 1033 men wounded. Total loss of allies, about 3300.

ALMACK'S ASSEMBLY-ROOMS, King-street, St. James's, London, at first very exclusive, were erected by a Scotchman named Almack, and opened Feb. 12, 1765.

ALMANACS (from the Arabic *al manah*, to count).* The Egyptians computed time by instruments. The Alexandrians had almanacs. Log calendars were anciently in use. In the British Museum and universities are curious specimens of early almanacs. Michael Nostradamus, the celebrated astrologer, wrote an almanac in the style of Merlin, 1556. *Dufresnoy*. Professor Augustus De Morgan's valuable "*Book of Almanacs*, with an index of reference, by which the almanac may be found for every year," was published in March, 1851. Among the earlier and more remarkable almanacs were

ALMANZA (S. E. Spain). Here, on April 25 (O. S. 14), 1714, the English, Dutch, and Portuguese forces under the earl of Galway, were totally defeated by the French and Spanish commanded by James Fitzjames, duke of Berwick (illegitimate son of James II.). Most of the English were killed or made prisoners, having been abandoned by the Portuguese at the first charge.

ALMEIDA (Portugal), a frontier town, captured by Massena, Aug. 27, 1810. The French crossed into Spain, leaving a garrison at Almeida, blockaded by the English, April 6, 1811. Almeida was retaken by Wellington (May 10), who eventually compelled Massena to retire from Portugal, his route being tracked by horrid desolation.

ALMENARA, a village, N. E. Spain, where, on July 28, 1710, an English and German army defeated the Spanish army supporting Philip V., the grandson of Louis XIV. of France. Stanhope, the English general, killed the Spanish general, Amezaga, in single conflict, an act almost unexampled in modern warfare.

* Of Moore's (under the management of Henry Andrews, the able computer of the *Nautical Ephemeris*) at one time upwards of 430,000 copies were annually sold. He died in 1820. The Stationers' company claimed the exclusive right of publishing almanacs in virtue of letters patent from James I., granting the privilege to them and the two universities; but the monopoly was broken up by a decision of the Court of Common Pleas in 1775. A bill to renew the privilege was lost in 1779. The stamp duty on English almanacs, first imposed in 1710, was abolished in August, 1834: since when almanacs have become innumerable, being issued by tradesmen with their goods. Of *Foreign Almanacs*, the principal are the "*Almanach de France*," first published in 1699, and the "*Almanach de Gotha*," 1764.

ALMOHADES, Mahometan partisans, followers of El-Moh-di in Africa, about 1120. They subdued Morocco, 1145; entered Spain and took Seville, Cordova, and Granada, 1146-56; ruled Spain till 1232, and Africa till 1248.

ALMONER, an office of uncertain origin, anciently allotted to a dignified clergyman, who had the privilege of giving the first dish from the royal table to the poor, or instead thereof an alms in money. By an ancient canon all bishops were required to keep almoners. The grand almoner of France (*le grand aumônier*) was the highest ecclesiastical dignity in that kingdom before the revolution, 1789. Queen Victoria's almoner (now the bishop of Oxford) or his sub-almoner distributes the queen's gifts on *Mauindy Thursday* (which see).

ALMORAVIDES, Mahometan partisans in Africa, rose about 1050; entered Spain by invitation, 1086; were overcome by the Almohades in 1145.

ALMSHOUSES for aged and infirm persons have been erected by very many public companies and benevolent individuals, particularly since the destruction of religious houses at the time of the Reformation in the 16th century. A list of them, with useful information, will be found in "Low's Charities of London," ed. 1862.

ALNEY. A combat is asserted to have taken place between Edmund Ironside and Canute the Great, on Alney, an island on the Severn, Gloucestershire, in sight of their armies; when the latter was wounded, he proposed a division of the kingdom, the south part falling to Edmund. Edmund was murdered at Oxford shortly after the treaty, according to some by the treachery of Ædric Streon, and Canute obtained possession of the whole kingdom, 1016.

ALNWICK (Saxon *Ealnwic*), on the river Alne in Northumberland, was given at the conquest to Ivo de Vesco. It has belonged to the Percies since 1310. Malcolm, king of Scotland, besieged Alnwick in 1093, when he and his sons were killed. It was taken by David I. in 1136, and attempted in 1174 by William the Lion, who was defeated and taken prisoner. It was burnt by king John in 1215, and by the Scots in 1448. Since 1854 the castle has been repaired and enlarged with great taste and at unsparing expense.

ALPACA (or *Paco*), a species of the S. American quadruped the Llama, the soft hairy wool of which is now largely employed in the fabrication of cloths. It was introduced into this country about 1836, by the earl of Derby. An alpaca factory, &c. (covering 11 acres), was erected at Saltaire, near Shipley, Yorkshire, by Mr. Titus Salt in 1852.

ALPHABET. Athotes, son of Menes, is said to have been the author of hieroglyphics, and to have written thus the history of the Egyptians, 2122 B.C. *Blair*. But Josephus affirms that he had seen inscriptions by Seth, the son of Adam; this is deemed fabulous.

The Egyptian alphabet is ascribed to Memnon, 1822 B.C.

The first letter of the Phœnician and Hebrew alphabet was *aleph*, called by the Greeks *alpha*, and abbreviated by the moderns to A. The Hebrew is supposed to be derived from the Phœnician.

Cadmus the founder of Cadmea, 1493 B.C., is said to have brought the Phœnician letters (fifteen in number) into Greece, viz. :—A, B, Γ, Δ, I, K, Λ, M, N, O, Π, P, Σ, Γ, T. These letters were originally either Hebrew, Phœnician, or Assyrian characters, and changed gradually in form till

they became the ground of the Roman letters, now used all over Europe. Palamedes of Argos invented the double characters, Θ, X, Φ, Ξ, about 1224 B.C.; and Simonides added, Ζ, Ψ, Η, Ω, about 489 B.C. *Arundelian Marbles*.—When the E was introduced is not precisely known. The Greek alphabet consisted of 16 letters till 399 (or 403) B.C., when the Ionic of 24 characters was introduced. The small letters, for the convenience of writing, are of later invention. The alphabets of the different nations contain the following number of letters :—

English	26	German	26
French	25	Slavonic	42
Italian	20	Russian	35
Spanish	27	Latin	22

Greek	24	Turkish	28
Hebrew	22	Sanscrit	44
Arabic	28	Chinese radical characters	214
Persian	32		

ALPHONSINE TABLES, astronomical tables, composed by Spanish and Arab astronomers, and collected in 1253 under the direction of Alphonsus X. of Castile, surnamed the

Wise, who is said to have expended upwards of 400,000 crowns in completing the work ; he himself wrote the preface. The Spanish government ordered the work to be reprinted from the best MSS. ; three volumes have appeared, 1863-5.

ALPS, a European range of mountains. Those between France and Italy were passed by Hannibal 218 B.C., by the Romans 154 B.C., and by Napoleon I. in A.D. 1800. Roads over Mont Cenis and the Simplon, connecting France and Italy, were constructed by order of Napoleon, between 1801-6. See *Simplon*. A sub-alpine tunnel through Mont Cenis to connect Savoy and Piedmont has been in progress since 1857.* In 1859 the "Alpine Club," which consists of British travellers in the Alps, published their first work, "Peaks, Passes, and Glaciers."

ALSACE (N. E. France), formerly part of the kingdom of Austrasia, now the departments of the Upper and Lower Rhine. It was incorporated into the German empire in the 10th century. A portion was restored to France, 1648, and the whole, including Strasburg, in 1697. The precinct of Whitefriars, London, called Alsatia, is described in Scott's "Fortunes of Nigel." Its privilege of sanctuary was abolished in 1696.

ALTAR. One was built by Noah, 2348 B.C. (*Gen.* viii. 20) ; others by Abraham, 1921 (*Gen.* xii. 8). Directions for making an altar are given *Ezod.* xx. 24, 1491 B.C. Altars were raised to Jupiter, in Greece, by Cecrops, 1556 B.C. He introduced among the Greeks the worship of the deities of Egypt. *Herodotus*. The term "altar" was applied to the Lord's table for the first three centuries after Christ (*Hcb.* xiii. 10). Christian altars in churches were instituted by pope Sixtus I., A.D. 135 ; and were first consecrated by pope Sylvester. The first Christian altar in Britain was in 634. *Stow*. The church of England terms the table on which the elements are placed an altar. Since the time of Elizabeth there has been much controversy on the subject, and the Puritans in the civil war destroyed many of the ancient stone altars, substituting wooden tables. In 1845 it was decided in the Arches Court that stone altars were not to be erected in English churches.

ALTER EGO (*another or second I*), a term applied to Spanish viceroys when exercising regal power ; used at Naples when the crown prince was appointed vicar-general during an insurrection in July, 1820.

ALT-RANSTADT (Prussia), where the treaty of peace dictated by Charles XII. of Sweden, to Frederick Augustus of Poland, was signed, Sept. 24, 1706. Frederick, deposed in 1704, regained the throne of Poland after the defeat of Charles XII., in 1709.

ALUM is said to have been first discovered at Rocha, in Syria, about 1300 ; it was found in Tuscany about 1470 ; was brought to perfection in England by sir T. Challoner, who established large alum works near Whitby in 1608 ; was discovered in Ireland in 1757 ; and in Anglesey in 1790. Alum is a salt used as a mordant in dyeing ; and also to harden tallow, to whiten bread, and in the paper manufacture. It may be made of pure clay exposed to vapours of sulphuric acid, and sulphate of potash added to the ley ; but is usually obtained by means of ore called alum slate.

ALUMBAGH, a fort near Lucknow, Oude, India, seized and heroically defended by the British under sir James Outram during the mutiny in 1857. He defeated an attack of 30,000 sepoys on Jan. 12, 1858, and of 20,000 on Feb. 21. He was relieved by sir Colin Campbell in March.

ALUMINIUM, a metal, the base of the earth alumina (*clay*), which was shown to be a distinct earth by Marggraff in 1754, having been previously confounded with lime. Oerstedt in 1826 obtained the chloride of aluminium ; and in 1827 the metal itself was first obtained by F. Wöhler, but was for some time merely a scientific curiosity, the process being expensive. The mode of production was afterwards simplified by Bunsen and others, more especially by H. Ste.-Claire Deville, who in 1856 succeeded in procuring considerable quantities of this metal. It is very light (sp. g. 2.25), malleable, and sonorous ; when pure does not rust, and is not acted on by sulphur or any acid except hydrochloric. These qualities will render it very useful when improved processes render it cheaper. In March, 1856, it was 3*l.* the ounce ; in June, 1857, 11*s.* or 12*s.*, and it is now much cheaper (1865). The eagles of the French colours have been made of it, and many other ornamental and useful articles. Deville's work, "*De l'Aluminium*," was published in 1859. An aluminium manufactory was established at Newcastle in 1860, by Messrs. Bell. They obtain the metal from a

* At first the boring was effected by ordinary machinery ; in 1860 steam power was employed ; but afterwards compressed air was used as a motive power with great success. It is confidently expected that the tunnel will be completed in 1870. In 1865 Messrs. Brassey proposed laying down a line of steeply inclined railway for 47 miles, to be used till the tunnel is completed.

French mineral, bauxite. Their aluminium bronze, an alloy of copper and aluminium, invented by Dr. John Percy, F.R.S., came into use for watch-cases, &c., manufactured by Messrs. Reid of Newcastle, in 1862.

AMADIS OF GAUL, a Spanish or Portuguese romance, stated to have been written about 1342 by Vasco de Lobeiro. It was translated and enlarged by De Montalvo, about 1485.

AMALEKITES (descendants of Amalek, grandson of Esau or Edom, the brother of Jacob) attacked the Israelites 1491 B.C., when perpetual war was denounced by God against them. They were subdued by Saul about 1079; by David, 1058 and 1056; and by the Simeonites about 715 B.C.

AMALFI, a city on the gulf of Salerno, Naples, in the 8th century became the seat of a republic, and flourished by its commerce till 1075, when it was taken by Roger Guiscard. It eventually was incorporated into the kingdom of Naples. The Pisans, in their sack of the town in 1135, are said to have found a copy of the Pandects of Justinian, and thus to have induced the revival of the study of Roman law in Western Europe. Flavio Gioia, a native of Amalfi, is the reputed discoverer of the mariner's compass, about 1302.

AMAZON, West India mail steam ship, left Southampton on her first voyage, Friday, Jan. 2, 1852, and on Sunday morning, Jan. 4, was destroyed by fire at sea, about 110 miles W.S.W. of Scilly (ascribed to the spontaneous ignition of combustible matter placed near the engine-room). Out of 161 persons on board, 102 persons must have perished by fire or drowning. 21 persons were saved by the life-boat of the ship; 25 more were carried into Brest harbour by a Dutch vessel passing by; and 13 others were picked up in the bay of Biscay, also by a Dutch galliot. Eliot Warburton, a distinguished writer in general literature, was among those lost.

AMAZONIA (S. America) was discovered by Francisco Orellana, in 1540. Coming from Peru, he sailed down the river Amazon to the Atlantic, and observing companies of women in arms on its bank, he called the country Amazonia, and gave the name of Amazon to the river, which had previously been called Maranon.

AMAZONS. Three nations of Amazons have been mentioned—the Asiatic, Scythian, and African. They are said to have been the descendants of Scythians inhabiting Cappadocia, where their husbands, having made incursions, were all slain, being surprised in ambuscades by their enemies. Their widows resolved to form a female state, and having firmly established themselves, they decreed that matrimony was a shameful servitude. *Quintus Curtius*. They were said to have been conquered by Theseus, about 1231 B.C. The Amazons were constantly employed in wars; and that they might throw the javelin with more force, their right breasts were burned off, whence their name from the Greek, *a*, no, *mazos*, breast. Others derive the name from *maza*, the moon, whom they are supposed to have worshipped. About 330 B.C. their queen, Thalestris, visited Alexander the Great, while he was pursuing his conquests in Asia; three hundred females were in her train. *Herodotus*.

AMBASSADORS. Accredited agents, and representatives from one court to another, are referred to early ages. In most countries they have great privileges; and in England, they and their servants are secured against arrest. England usually has twenty-five ambassadors or envoys extraordinary, and about thirty-six chief consuls, resident at foreign courts, exclusive of inferior agents; the ambassadors and other chief agents from abroad at the court of London in 1865 were 47.

The Russian ambassador's being imprisoned for debt by a lace-merchant, July 27, 1708, led to the passing the statute of 8 Anne, for the protection of ambassadors, 1709.

Two men, convicted of arresting the servant of an ambassador, were sentenced to be conducted to the house of the ambassador, with a label on their

breasts, to ask his pardon, and then one of them to be imprisoned three months, and the other fined, May 12, 1780.

The first ambassador from the United States of America to England, John Adams, presented to the king, June 2, 1785; the first from Great Britain to America was Mr. Hammond, in 1791.

AMBER, a carbonaceous mineral,* principally found in the northern parts of Europe, of great repute in the world from the earliest time; esteemed as a medicine before the Christian era: Theophrastus wrote upon it; 300 B.C. Upwards of 150 tons of amber have been found in one year on the sands of the shore near Pillau. *Phillips*.

* Much diversity of opinion still prevails among naturalists and chemists, respecting the origin of amber, some referring it to the vegetable, others to the mineral, and some to the animal kingdom; its natural history and chemical analysis affording something in favour of each opinion. It is considered by Berzelius to have been a resin dissolved in volatile oil. It often contains delicately-formed insects. Sir D. Brewster concludes it to be indurated vegetable juice. When rubbed it becomes electrical, and from its Greek name, *electron*, the term Electricity is derived.

AMBOISE (C. France). A conspiracy of the Huguenots against Francis II., Catherine de Medicis, and the Guises, was suppressed at this place in Jan. 1560. On March 19, 1563, the Pacification of Amboise was published, whereby toleration was granted to the Huguenots. The civil war was however soon renewed.

AMBOYNA, one of the Molucca isles, discovered about 1512 by the Portuguese, but not wholly occupied by them till 1580. It was taken by the Dutch in 1605. The English factors at this settlement were cruelly tortured and put to death, Feb. 17, 1623-4, by the Dutch, on an accusation of a conspiracy to expel them from the island, where the two nations resided and jointly shared in the pepper trade of Java. Cromwell compelled the Dutch to give a sum of money to the descendants of the sufferers. Amboyna was seized by the English, Feb. 16, 1796, but was restored by the treaty of Amiens, in 1802. It was again seized by the British, Feb. 17-19, 1810; and again restored at the peace of 1814.

AMBROSIAN CHANT. See *Chant*.

AMEN, an ancient Hebrew word meaning *true, faithful, certain*. At the end of a prayer, it implies *so be it*; at the termination of a creed, *so it is*. It is used in the Jewish and Christian assemblies, at the conclusion of prayer. See *1 Cor. xiv. 16* (A.D. 59).

AMENDE HONORABLE, in France, in the 9th century, was an infamous punishment inflicted on traitors and sacrilegious persons: the offender was delivered into the hands of the hangman: his shirt was stripped off, a rope put about his neck, and a taper in his hand; he was then led into court, and was obliged to beg pardon of God and the country. Death or banishment sometimes followed.

AMERCEMENT, IN LAW, a fine assessed for an offence done, or pecuniary punishment at the *mercy* of the court: thus differing from a fine directed and fixed by a statute. By Magna Charta a freeman cannot be amerced for a small fault, but in proportion to the offence he has committed, 9 Henry III. 1225.

AMERICA,* the great Western Continent, is about 9000 miles long, with an area of about 13,668,000 square miles. It is now believed to have been visited by the Norsemen or Vikings in the 10th and 11th centuries; but the modern discovery is due to the sagacity and courage of the Genoese navigator, Christopher Columbus,† who, after having his scheme long contemptuously rejected, sailed on his first expedition from Palos in Andalusia on Friday, Aug. 3, 1492, with vessels supplied by the sovereigns of Spain.

Columbus lands on Guanahani, one of the Bahamas; takes possession of it in the name of Ferdinand and Isabella of Castile, and names it San Salvador . . . Friday, Oct. 12, 1492
He discovers Cuba, Oct. 28; and Hispaniola (now Hayti), where he builds a fort, La Navidad . . . Dec. 6, "
He returns to Spain, March 15; sails from Cadiz on his second expedition, Sept. 25; discovers the Caribbee isles,—Dominica, Nov. 3; Guadalupe, Nov. 4; Antigua, Nov. 10; founds Isabella in Hispaniola, the first Christian city in the New World . . . Dec., 1493
He discovers Jamaica, May 3; and Evangelista (now Isle of Pines), June 13; war with the natives of Hispaniola . . . 1494

He visits the various isles; and explores their coasts . . . 1495-6
Returns to Spain to meet the charges of his enemies . . . June 11, 1496
Cabot (sent out by Henry VII. of England) discovers Labrador on the coast of North America [he is erroneously said to have discovered Florida, and also Newfoundland, and to have named it Prima Vista] June 24, 1497
Columbus sails on his third voyage, May 30; discovers Trinidad, July 31; lands on Terra Firma, without knowing it to be the new continent, naming it Isla Santa . . . Aug. 1, 1498
Ojeda discovers Suinam, June; and the gulf of Venezuela . . . 1499

* The name is derived from Amerigo Vespucci, a Florentine merchant, who died in 1512. He accompanied Ojeda in his voyage on the eastern coasts in 1498; and described the country in letters sent to his friends in Italy. He is charged with presumptuously inserting "Tierra de Amerigo" in his maps. Irving discusses the question in the Appendix to the Life of Columbus, but comes to no conclusion. Humboldt asserts that the name was given to the continent in the popular works of Waldseemüller, a German geographer, without the knowledge of Vespucci. To America we are indebted, among other things, for maize, the turkey, the potato, Peruvian bark, and tobacco.

† Christ-foro Colombo was born about 1445; first went to sea about 1460; settled at Lisbon in 1470, where he married Felipa, the daughter of Perestrelo, an Italian navigator; whereby he obtained much geographical knowledge. He is said to have laid the plans of his voyage of discovery before the republic of Genoa, in 1485, and other powers, and finally before the court of Spain, where at length the queen Isabella became his patron. After undergoing much ingratitude and cruel persecution from his own followers and the Spanish court, he died on May 20, 1506; and was buried with much pomp at Valladolid. His remains were transferred, in 1513, to Seville; in 1536 to San Domingo; and in Jan. 1796 to the Havanna, Cuba. The original inscription on his tomb is said to have been: "A Castilla y á Leon Nuevo Mundo dió Colon." "To Castile and Leon Colon gave a New World." Humboldt says beautifully, that the success of Columbus was "a conquest of reflection!"

AMERICA, BRITISH. See *British America*.

AMERICA, CENTRAL, including the states of Guatemala, San Salvador, Honduras, Nicaragua, and Costa Rica, *which see*, declared their independence Sept. 21, 1821, and separated from the Mexican confederation, July 21, 1823. The states made a treaty of union between themselves March 21, 1847. There has been among them since much anarchy and bloodshed, aggravated greatly by the irruption of American filibusters under Kenny and Walker, 1854-5. In Jan. 1863, a war began between Guatemala (afterwards joined by Nicaragua) and San Salvador (afterwards supported by Honduras). The latter were defeated at Santa Rosa June 16, and San Salvador was taken Oct. 26; the president of San Salvador, Barrios, fled; and Carrera, the dictator of Guatemala became predominant over the confederacy.—Population, 1859, about 2,355,000. See *Nicaragua, Darien*, and *Panama*.

AMERICA, SOUTH. See *Brazil, Argentine, Peru, Paraguay, Uruguay, &c.*

"AMERICA," an American yacht, schooner-built, 171 tons burthen. On Aug. 22, 1851, at Cowes regatta, in a match round the Isle of Wight for a cup worth 100*l.*, open to all nations, she came in first by 8 miles, due to her superior construction on the wave principle.

AMERICANISMS: a useful dictionary of these expressions was compiled by John R. Bartlett, and first published in 1848.

AMETHYST, the ninth stone upon the breastplate of the Jewish high priest ; and on it was engraved the name *Issachar*. It is of a rich violet colour. One worth 200 rix-dollars, having been rendered colourless, equalled a diamond in lustre, valued at 18,000 gold crowns. *De Boot, Hist. Gemmarum*.—Amethysts discovered at Kerry, in Ireland, in 1775.

AMIENS, an ancient city in Picardy (N. France) : the cathedral was built in 1220. It was taken by the Spanish and English Sept. 25, 1597. The preliminary articles of the memorable peace between Great Britain, Holland, France, and Spain, fifteen in number, were signed in London by lord Hawkesbury and M. Otto, on the part of England and France, Oct. 1, 1801 ; and the definitive treaty was subscribed at Amiens, on March 27, 1802, by the marquess of Cornwallis for England, Joseph Bonaparte for France, Azara for Spain, and Schimmelpenninck for Holland.—War was declared again in 1803.

AMMONIA, the volatile alkali, mainly produced by the decomposition of organic substances. Its name is ascribed to its having been procured from heated camel's dung near the temple of Jupiter Ammon in Libya. The discovery of its being a compound of nitrogen and hydrogen is ascribed to Joseph Priestley in 1774. By the recent labours of chemists the oxide of the once hypothetical metal ammonium, and ammonium amalgam, have been formed ; and specimens of each were shown at the Royal Institution in 1856 by Dr. A. W. Hofmann, who has done very much for the chemical history of ammonia.

AMMONITES, descended from Ben-Ammi, the son of Lot (1897 B.C.). They invaded the land of Canaan and made the Israelites tributaries, but they were defeated by Jephthah, 1143 B.C. They again invaded Canaan in the reign of Saul, with an intention to put out the right eye of all those they subdued ; but Saul overthrew them, 1095 B.C. They were afterwards many times vanquished ; and Antiochus the Great took Rabbah their capital, and destroyed all the walls, 198 B.C. *Josephus*.

AMNESTY (a general pardon after political disturbances, &c.) was granted by Thrasybulus, the Athenian patriot, after expelling the thirty tyrants with the assistance of only thirty friends, 403 B.C. Acts of amnesty were passed after the civil war in 1651, and after the two rebellions in England in 1715 and 1745.—After his victorious campaign in Italy, Napoleon III. of France granted an amnesty to all political offenders, Aug. 17, 1859. An amnesty, with certain exemptions, was granted to the vanquished southern states of North America by president Johnson, May 29, 1865.

AMPHICTYONIC COUNCIL, asserted traditionally to have been established at Thermopylae by Amphictyon, for the management of all affairs relative to Greece. This celebrated council, composed of twelve of the wisest and most virtuous men of various cities of Greece, began 1498 [1113, *Clinton*] B.C. Other cities in time sent also chosen citizens to the council of the Amphictyons, and in the age of Antoninus Pius, they were increased to the number of thirty. *Suidas*. Its immediate office was to attend to the temples and oracles of Delphi. Its interference caused the Sacred wars, 595—586, and 356—346.

AMPHION, a British frigate, of 38 guns, blown up while riding at anchor in Plymouth Sound, and the whole of her crew then on board, consisting of more than two hundred and fifty persons, officers and men, perished Sept. 22, 1796. *Butler*.

AMPHITHEATRES, said to have been first constructed by Curio, 76 B.C., and Julius Cæsar 46 B.C. In the Roman amphitheatres, which were vast round or oval buildings, the people assembled to see the combats of gladiators, of wild beasts, and other exhibitions. They were generally built of wood, but Statilius Taurus made one of stone, under Augustus Cæsar. See *Coliseum*. The amphitheatre of Vespasian (capable of holding 87,000 persons) was built between A.D. 75 and 80 ; and is said to have been a regular fortress in 1312. The amphitheatre at Verona was next in size, and then that of Nismes.

AMPHITRITE, THE SHIP. See *Wrecks*, Aug. 30, 1833.

AMPUTATION, in surgery, was greatly aided by the invention of the tourniquet by Morel, a French surgeon in 1674 ; and of the flap-method by Lowdham of Exeter in 1679.

AMSTERDAM (Holland). The castle of Amstel was commenced in 1100 ; the building of the city in 1203. Its commerce was greatly increased by the decay of that of Antwerp after 1609. The exchange was built in 1634 ; and the noble stadthouse in 1648 ; the latter cost three millions of guilders, then a large sum. It is built upon 13,659 piles. Amsterdam surrendered to the king of Prussia, when that prince invaded Holland, in favour of the stadtholder, in 1787. The French were admitted without resistance, Jan. 18, 1795. The Dutch government was restored in December, 1813. The crystal palace for an industrial exhibition was opened by prince Frederick of the Netherlands Aug. 16, 1864.

AMULETS, or CHARMS, employed from the earliest times. Amulets were made of the wood of the true cross, about 328. They have been sanctioned in modern times by medical men—witness the anodyne necklace, &c.

AMYLENE, a colourless, very mobile liquid, first procured by M. Balard of Paris in 1844, by distilling fousel oil (potato-spirit) with chloride of zinc. The vapour was employed instead of chloroform first by Dr. Snow in 1856. It has since been tried in many hospitals here, and in France. The odour is more unpleasant than chloroform, and more vapour must be used. It is, however, thought less dangerous.

ANABAPTISTS. The sect arose about 1521, and was known in England before 1549. John of Leyden, Muncer, Storck, and other German enthusiasts, about the time of the Reformation, taught that infant baptism was a contrivance of the devil, that there is no original sin, that men have a free will in spiritual things, and other doctrines still more wild and absurd. They committed many violences, and in 1534 seized Münster, calling it Mount Zion, and declared one Mathias, a baker, to be the king of Zion. Their enthusiasm led them to the maddest practices, and they at length rose in arms under pretence of gospel liberty. Münster was taken June 24, 1535, and the chiefs of the Anabaptists were put to death.—On Jan. 6, 1661, about 80 anabaptists in London appeared in arms, headed by their preacher, Thomas Venner, a wine-cooper. They fought desperately, and killed many of the soldiers brought against them. Their leader and sixteen others were executed, Jan. 19 and 21. *Annals of England.*—For the modern Anabaptists see *Baptists*.

ANACREONTIC VERSE, commonly of the jovial or bacchanalian strain, named after Anacreon of Teos, the Greek lyric poet, whose odes are much prized. He is said to have been choked by a grape-stone in his eighty-fifth year, about 514 B.C. His odes have been frequently translated; Thomas Moore's celebrated version was published in 1800.

ANÆSTHETICS. See *Chloroform*, *Ether*, *Amylene*, *Kerosolene*. Intense cold is also employed in deadening pain.

ANADOLIA (Asia Minor), comprises the ancient Lycia, Caria, Lydia, Mysia, Bithynia, Paphlagonia and Phrygia, *which see*.

ANAGRAMS, formed by the transposition of the letters of a name or sentence : as *army* from *Mary*, are said to have been made by ancient Jews, Greeks, &c. On the question put by Pilate to Our Saviour, "*Quid est veritas?*" (what is truth?) we have the remarkable anagram, "*Est vir qui adest*" (the man who is here). Another good one is "*Horatio Nelson*," and "*Honor est a Nilo*" ("there is Honour from the Nile").—The French are said to have introduced the art as now practised, about the year 1560, in the reign of Charles IX. *Hénault*.

ANAM. See *Annam*.

ANASTATIC PRINTING. See *Printing*, 1841.

ANATHEMA, among the Jews, was the devoting some person or thing to destruction, as in the case of Jericho (*Joshua* vi. 17). The word occurs *1 Cor.* xvi. 22. Anathemas were used by the primitive churches, 387. See *Excommunication*.

ANATOMY (Greek, cutting up). The study of the human body was part of the philosophical investigations of Plato, Xenophon, and Aristotle; and it became a branch of medical art under Hippocrates, about 420 B.C. Erasistratus and Herophilus may be regarded as the fathers of anatomy; they were the first to dissect the human form, as anatomical research had been previously confined to animals: it is mentioned that they practised upon the bodies of living criminals, about 300 and 293 B.C. Galen, who died A.D. 193, was a great anatomist. In England, the schools were supplied with subjects unlawfully exhumed from graves; and until lately, the bodies of executed criminals were ordered for dissection.* Pope Boniface VIII. forbade the dissection of dead bodies, 1297. The first anatomical plates, designed by Titian, were employed by Vesalius, about 1538. Leonardo da Vinci, Raphael, and Michael Angelo, studied anatomy. The great discoveries of Harvey were

* By 32 Henry VIII., c. 42 (1540), surgeons were granted four bodies of executed malefactors for "*anatomies*," which privilege was extended in following reigns: but in consequence of the crimes committed by resurrection-men in order to supply the surgical schools (robbing churchyards and even committing murder, see *Barking*), a new statute was passed in 1832, which abated the ignominy of dissection by prohibiting that of executed murderers, and made provision for the wants of surgeons by permitting, under certain regulations, the dissection of persons dying in workhouses, &c. The act also appointed inspectors of anatomy, regulated the schools, and required persons practising anatomy to obtain a licence. It repeated the clause of the act of 1828, which directed the dissection of the body of an executed murderer.

made in 1616. William and John Hunter were great anatomists; they died in 1783 and 1793. Quain's and Wilson's large anatomical plates were published in 1842. Comparative anatomy has been treated systematically by Cuvier, Owen, Müller, Huxley, and others. The anatomy of plants has been studied since 1680. See *Botany*.

ANCHORITES. See *Monachism*.

ANCHORS are of ancient use, and the invention belongs to the Tuscans. *Pliny*. The second tooth, or fluke, was added by Anacharsis, the Scythian (592 B.C.) *Strabo*. Anchors were first forged in England A.D. 578. Those of a first-rate ship of war (four) will weigh 99 cwt. each, costing 450*l*. *Phillips*. The Admiralty anchor was introduced about 1841. Improved anchors were made by Pering and Rodgers about 1831; by Porter 1846; by Costell 1848; by Trotman 1853; and by several other persons. Trotman's is attached to the Queen's yacht the *Fairy*. The anchors of the *Great Eastern* are of enormous size. An act for the proving and sale of chain cables and anchors, was passed in 1864.

ANCIENT HISTORY commences in the Holy Scriptures, and in the history of Herodotus about 1687 B.C. It is considered as ending with the destruction of the Roman empire in Italy, A.D. 476. Modern history begins with Mahomet (A.D. 622), or Charlemagne (768).

ANCIENTS. See *Councils*.

ANCONA, an ancient Roman port on the Adriatic. The mole was built by Trajan, A.D. 107. After many changes of rulers Ancona was finally annexed to the papal states in 1532. In 1798 it was taken by the French; but was retaken by the Austrians in 1799. It was occupied by the French in 1832; evacuated in 1838; after an insurrection it was bombarded and captured by the Austrians, June 18, 1849. The Marches (comprising this city) rebelled against the Papal government in Sept. 1860. Lamoricière, the papal general, fled to Ancona after his defeat at Castelfidardo, but was compelled to surrender himself, the city, and the garrison, on Sept. 29. The king of Sardinia entered soon after.

ANCYRA, in ancient Galatia, now Angora or Engour, Asia Minor. A council was held here in 314. Near this city, on July 28, 1402, Timour or Tamerlane defeated and took prisoner the sultan Bajazet, and is said to have conveyed him to Samarcand in a cage.

ANDALUSIA (S. Spain), a province forming part of the ancient Lusitania and Bætica. The name is a corruption of Vandalitia, acquired in consequence of its having been held by the Vandals from 419 to 421, when it was acquired by the Visigoths. The latter were expelled by the Moors in 711, who established in it the kingdom of Cordova, which they retained till their final overthrow in 1492.

ANDERNACH, Rhenish Prussia, once an imperial city. Near here, the emperor Charles the First, while attempting to deprive his nephews of their inheritance, was totally defeated by one of them, Louis of Saxony, Oct. 8, 876.

ANDORRA, a small republic in the Pyrenees, bearing the title of "the valleys and sovereignties of Andorra," was made independent by Charlemagne about 778, certain rights being reserved to the bishop of Urgel. The feudal sovereignty, which long appertained to the counts of Foix, reverted to the French king, Henry IV., in 1589; but was given up in 1790. On March 27, 1806, an imperial decree restored the old relations between Andorra and France. The republic is now governed by a council elected for life; but the magistrates are appointed alternately by the French government and the Spanish bishop of Urgel. The population was about 18,000, in 1850. *Guibert*.

ANDRÉ'S EXECUTION. See *United States*, 1780.

ANDREW, ST., said to have been martyred by crucifixion, Nov. 30, 69, at Patre, in Achaia. The festival was instituted about 359. Andrew is the titular saint of Scotland, owing to Hungus, the Pictish prince, having dreamed that the saint was to be his friend in a pending battle with the Northumbrians. St. Andrew's cross (x) appeared in the air during the fight, and Hungus conquered. The collar of an order of knighthood, founded on this legend, is formed of thistles (not to be touched) and of rue (an antidote against poison); the motto is *Nemo me impune lacessit* (*No one assails me with impunity*). The institution of the order is attributed to Achaia about 809; its revival is due to king James V. in 1540, and to James II. of England in 1687. See *Thistle*. The Russian order of St. Andrew was instituted in 1698 by Peter I.

ANDREW'S, ST. (E. Scotland). Here Robert Bruce held his first parliament in 1309; and here Wishart was burnt by archbishop Beaton, who himself was murdered here in

1546. The university was founded in 1411 by bishop Wardlaw. The bishopric originated with the establishment of Christianity in Scotland. Sir R. Sibbald's list of the bishops of St. Andrew's commences with Killach, 872. The see became archiepiscopal in 1470, and ceased soon after the Revolution, 1689. St. Andrew's is now a post-revolution bishopric, re-instituted in 1844. See *Bishops*.

ANDRUSSOV, PEACE OF (Jan. 20. 1667), between Russia and Poland, by which the latter lost the greater part of her conquests among the Cossacks.

ANEMOMETER (Greek, *anemos*, the wind), a measurer of the strength and velocity of the wind, was invented by Wolfius, in 1709. The extreme velocity was found by Dr. Lind to be 93 miles per hour. Osler's and Whewell's anemometers were highly approved of in 1844.

ANEROID. See *Barometer*.

ANGEL, an ancient gold coin, weighing four pennyweights, was valued at 6s. 8d. in the reign of Henry VI., and at 10s. in the reign of Elizabeth, 1562. The *angelot*, a gold coin, value half an angel, was struck at Paris when held by the English, in 1431. Wood.

ANGELIC KNIGHTS OF ST. GEORGE. This order is said to have been instituted in Greece, 456. The *Angelici* were instituted by the emperor Angelus Comnenus, 1191. —The *Angelica*, an order of nuns, was founded at Milan by Louisa Torelli, 1534.

ANGERS (W. Central France), formerly the Roman city Juliomagus, possessing an amphitheatre; afterwards Andegarum, the capital of the county of Anjou, *which see*. It was frequently besieged, and many councils were held in it between 453 and 1448, relating to ecclesiastical discipline.

ANGERSTEIN GALLERY. See *National Gallery*.

ANGLESEY, called by the Romans Mona (N. Wales), the seat of the Druids, who were massacred in great numbers, when Suetonius Paulinus took the isle, 61. It was conquered by Agricola, in 78; occupied by the Normans, 1090; and with the rest of Wales was annexed by Edward I. in 1284. He built the fortress of Beaumaris in 1295. The Menai suspension bridge was erected 1818-25, and the Britannia tubular bridge 1849-50.

ANGLICAN CHURCH. See *Church of England*.

ANGLING. Its origin is uncertain; allusion is made to it by the Greeks and Romans, and in the Bible; *Amos*, iv. 2 (787 B.C.)

Oppian wrote his "Halieutics," a Greek epic poem on Fishes and Fishing, probably about A.D. 198.

In the book on "*Horwylng and Huntwylng*," by Juliana Berners or Barnes, prioress of Sopwith, near St.

Albans, "emprinted at Westmestre by Wyukyn de Worde," in 1496, is "*The Treatise of fysshylng with an Angle*."

Izaak Walton's "*Compleat Angler*" was first published in 1653.

ANGLO-SAXONS, OR ANGLES, derive their name from a village near Sleswick, called *Anglen*, whose population (called *Angli* by Tacitus,) joined the first Saxon freebooters. East Anglia was a kingdom of the heptarchy, founded by the Angles, one of whose chiefs, Ulla, assumed the title of king, 571; the kingdom ceased in 792. See *Britain*. Cædmon paraphrased part of the Bible in Anglo-Saxon about 680; a translation of the gospels was made by abbot Egbert, of Iona, 721; of Boethius, Orosius, &c., by Alfred, 888. The Anglo-Saxon laws were printed by order of government, in 1840.

ANGOLA (S. W. Africa), settled by the Portuguese soon after the discovery, by Diego Cam, about 1486. Loanda, their capital, was built 1578. Their authority over the interior is very limited.

ANGORA. See *Ancyra*.

ANGOULEME, capital of the old province of Angoumois, Central France, W., was a bishopric in 260. After sharing the fortunes of the country, Angouleme became an independent county about 856. It was united to the French crown in 1308. It was held by the English, 1360 to 1372, in the reign of Edward III. The count of Angouleme became king of France as Francis I. in 1515.

ANGRIA'S FORT. See *India*, 1756.

ANHALT, HOUSE OF, in Germany, deduces its origin from Berenthobaldus, who made war upon the Thuringians in the sixth century. In 1606, the principality was divided among the four sons of Joachim Ernest, by the eldest, John George. Thus began the four

branches—Anhalt-Dessau (descended from John-George); Bernbourg,* extinct, 1863; Plotsgau or Coethen, extinct, 1847; and Zerbst, extinct, 1793. The princes of Anhalt became dukes in 1809.

DUKE OF ANHALT (*Subjects* 181,824). Leopold (born Oct. 1, 1794), became duke of Anhalt-Dessau, 1817, and of Anhalt-Bernbourg 1863.

Heir, his son, prince Frederic, born April 29, 1831.

ANHOLT, ISLAND OF, Denmark, was taken possession of by England, May 18, 1809, in the French war, on account of Danish cruisers injuring British commerce. The Danes made an attempt to regain it with a force which exceeded 1000 men, but were gallantly repulsed by the British force not amounting to more than 150, March 27, 1811.

ANILINE, a basic oily body discovered in 1826 by Unverdorben among the products of distillation of indigo. Bechamp, in 1856, obtained it from benzole by the successive treatment of this substance with concentrated nitric acid and reducing agents. The scientific relations of aniline have been carefully examined by several chemists, more especially by Dr. A. W. Hofmann. It was long known to yield a series of coloured compounds, but it was only in 1856 that Mr. W. A. Perkin showed how a violet oxidation-product (mauve) could be applied in dyeing. Aniline is now manufactured upon a large scale for the commercial production of "Mauve" and "Magenta" (rosaniline), and several other colouring matters.

ANIMALCULÆ. Leeuwenhoek's researches in 1677 produced the most astonishing revelations. His *Arcana Naturæ* was published at Leyden in 1696. The great works of Ehrenberg of Berlin, on the Infusorial Animalculæ, &c., were issued 1838-57. Pritchard's *Infusoria*, ed. 1860, is a valuable summary of our present knowledge of animalculæ.

ANIMAL MAGNETISM was introduced by father Hehl, a Jesuit, at Vienna, about 1774; and had its dupes in France and England in about 1788-89.† See *Mesmerism*.

ANIMALS, CRUELTY TO. The late Mr. Martin, M.P., as a senator, zealously laboured to repress this odious offence; and a society in London, which was established in 1824, effects much good this way. See *Cruelty to Animals Society*. Mr. Martin's act passed 3 Geo. IV. (1822). Similar acts were passed in 1827, 1835, 1837, 1849, and 1854. Dogs were forbidden to be used for draught by 2 & 3 Vict. c. 47 (1839).

ANJOU, a province in France, was inherited by Henry II. of England from his father Geoffrey Plantagenet, count of Anjou, who married the empress Matilda in 1127. It was taken from his son John by Philip of France in 1205; was reconquered by Edward III., but relinquished by him in 1360; and was given by Charles V. to his brother Louis with the title of duke. It afterwards became an appanage of the French crown. The university was formed in 1349.

DUKES OF ANJOU.

1360. Louis I. invested by the pope with the dominions of Joanna of Naples, 1381; his invading army destroyed by the plague, 1383; he dies, 1384.

1384. Louis II., his son, receives the same grant, but is also unsuccessful.

Louis III., adopted by Joanna as heir; dies 1434.

1434. Regnier or Renée (a prisoner) declared king

of Naples, 1435; his daughter, Margaret, married Henry VI. of England, 1445; he was expelled from Anjou by Louis XI., 1474, and his estates confiscated.

Francis, duke of Alençon, brother to Henry III. of France, became duke of Anjou; at one time he favoured the protestants, and vainly offered marriage to Elizabeth of England, 1581-82; died 1584.

ANJOU, OR BEAUGÉ, BATTLE OF, between the English and French; the latter commanded by the dauphin of France, March 22, 1421. The English were defeated: the duke of Clarence was slain by sir Allan Swinton, a Scotch knight, and 1500 men perished on the field; the earls of Somerset, Dorset, and Huntingdon were taken prisoners. Beaugé was the first battle that turned the tide of success against the English.

ANNAM, OR ANAM, an empire of Asia, to the east of India, comprising Tonquin, Cochin China, part of Cambodia, and various islands in the Chinese Sea; said to have been conquered by the Chinese 234 B.C., and held by them till A.D. 263. In 1406 they recon-

* Alexander, the last duke of Anhalt-Bernbourg, (born March 2, 1805; duke, March 24, 1834;) died without issue, Aug. 22, 1863, when his duchy reverted to the duke of Anhalt-Dessau.

† It was a pretended mode of curing all manner of diseases by means of *sympathetic affection* between the sick person and the operator. The effect on the patient was supposed to depend on certain motions of the fingers and features of the operator, he placing himself immediately before the patient, whose eyes were to be fixed on his. After playing in this manner on the imagination and enfeebled mind of the sick, and performing a number of distortions and grimaces, the cure was said to be completed. Hehl, for a short time associated with Mesmer, but they soon quarrelled. — Mr. Perkins (who died in 1799) invented "Metallic Tractors for collecting, condensing, and applying animal magnetism;" but Drs. Falconer and Haygarth put an end to his pretensions by performing many wonders with a pair of wooden tractors. *Brande*.

quered it, but abandoned it in 1428. After much anarchy, bishop Adran, a French missionary, obtained the friendship of Louis XVI. for his pupil Gia-long, the son of the nominally reigning monarch, and with the aid of a few of his countrymen established Gia-long on the throne, who reigned till his death in 1821, when his son became king. In 1859 war broke out with the French, who defeated the army of Annam, 10,000 strong, about April 22, when 500 were killed. On June 3, 1862, peace was made; three provinces were ceded to the French, and toleration of the Christians granted. An insurrection in these provinces against the French, begun about Dec. 17, 1862, was suppressed in Feb. 1863. Ambassadors sent from Annam with the view of regaining the ceded provinces arrived at Paris in Sept. 1863, had no success. A new treaty with France was concluded July 26, 1864, which established a French protectorate, toleration for Christian missionaries, &c.

ANNATES. See *First Fruits*.

ANNO DOMINI, A.D., the year of Our Lord, of Grace, of the Incarnation, of the Circumcision, and of the Crucifixion (Trabeationis). The Christian era commenced Jan. 1, in the middle of the 4th year of the 194th Olympiad, the 753rd year of the building of Rome, and in 4714 of the Julian period. It is now held that Christ was born Friday, April 5, 4 B.C. This era was invented by a monk, Dionysius Exiguus, about 532. It was introduced into Italy in the 6th century, and ordered to be used by bishops by the council of Chelsea, in 816, but not generally employed for several centuries. Charles III. of Germany was the first who added "in the year of our Lord" to his reign, in 879.

"**ANNOYANCE JURIES**," of Westminster, chosen from the householders in conformity with 27 Eliz. c. 17 (1585), were abolished in 1861.

ANNUAL REGISTER, a summary of the history of each year (beginning with 1758, and continued to the present time), was commenced by R. & J. Dodsley. (Edmund Burke at first wrote the whole work, but afterwards became only an occasional contributor. *Prior*.) The somewhat similar but more elaborate work, the "*Annuaire des Deux Mondes*," began in Paris in 1850.

ANNUALS, the name given to richly bound volumes, containing poetry, tales, and essays, by eminent authors, illustrated by engravings, published annually. They were imitations of similar books in Germany, and first appeared in London in 1823. The duration of the chief of these publications is here given :

Forget-me not (Ackerman's)	1823-48	Amulet	1827-34
Friendship's Offering	1824-44	Keepsake	1828-56
Literary Souvenir (first as "the Graces")	1824-34	Hood's Comic Annual	1830-38

ANNUITIES, OR PENSIONS, were first granted in 1512, when 20*l.* were given to a lady of the court for services done; and 6*l.* 13*s.* 4*d.* for the maintenance of a gentleman, 1536. 13*l.* 6*s.* 8*d.* deemed competent to support a gentleman in the study of the law, 1554. An act was passed empowering the government to borrow one million sterling upon an annuity of fourteen *per cent.*, 4-6 Will. & Mary, 1691-3. This mode of borrowing soon afterwards became general among civilised governments. An annuity of 1*l.* 2*s.* 11*d.* *per annum*, accumulating at 10 *per cent.*, compound interest, amounts in 100 years to 20,000*l.* The Government Annuities and Life Assurances Act was passed in 1864, for the benefit of the working classes; since it enables the government to grant deferred annuities on condition that the sum required may be payable in small instalments.

ANNUITY TAX: a tax levied to provide stipends for ministers in Edinburgh and Montrose, and which caused much disaffection, was abolished in 1860, and other provisions made for the purpose. These, however, have proved equally unpalatable.

ANNUNCIATION OF THE VIRGIN MARY, the 25th of March, Lady-day (*which see*). A festival commemorating the tidings brought to Mary by the angel Gabriel (*Luke i.* 26): its origin is referred variously by ecclesiastical writers to the fourth and seventh century. The *religious order* of the Annunciation was instituted in 1232, and the *military order*, in Savoy, by Amadeus, count of Savoy in memory of Amadeus I., who had bravely defended Rhodes against the Turks, 1355.

ANOINTING, an ancient ceremony observed at the inauguration of kings, bishops, and other eminent personages. Aaron was anointed as high priest, B.C. 1491; and Saul, as king, B.C. 1095. Alfred the Great is said to have been the first English king anointed, A.D. 871; and Edgar of Scotland, 1098.—The *religious* rite is derived from the epistle of *James*, ch. v. 14, about A.D. 60. Some authors assert that in 550, dying persons, and persons in extreme danger of death, were anointed with consecrated oil, and that this was the origin of Extreme Unction (one of the sacraments of the Roman Catholic church).

ANONYMOUS LETTERS. The sending of anonymous letters denouncing persons, or demanding money, or using threats to obtain money, was made felony by the Black Act, 9 Geo. I. (1722). See *Threatening Letters*.

ANTALCIDAS, PEACE OF. In 387 B.C. Antalcidas the Lacedæmonian made peace with Artaxerxes of Persia, strongly in favour of Sparta, and generally in favour of Greece, but giving up the cities of Ionia to the king.

ANTARCTIC POLE, the opposite to the north or *arctic* pole. See *Southern Continent*.

ANTEDILUVIANS. According to the tables of Mr. Whiston, the number of people in the ancient world, as it existed previous to the Flood, reached to the enormous amount of 549,755 millions in the year of the world 1482.*

ANTHEMS, OR HYMNS (see *Hymns*). Hilary, bishop of Poitiers, and St. Ambrose were the first who composed them, about the middle of the fourth century. *Leaglet*. They were introduced into the church service in 386. *Baker*. Ignatius is said to have introduced them into the Greek, and St. Ambrose into the Western Church. They were introduced into the Reformed churches in queen Elizabeth's reign, about 1565.

ANTHROPOPHAGI (eaters of human flesh) have existed in all ages of the world. Homer says that the Cyclops and Lestrygonæ were such; and the Essedonian Scythians were so, according to Herodotus. Diogenes asserted that we might as well eat the flesh of men as that of other animals; and the practice still exists in Africa and the South Sea Islands. The annals of Milan assert that a Milanese woman, named Elizabeth, had an invincible inclination to human flesh; she enticed children to her house, and killed and salted them; and on a discovery being made, she was broken on the wheel and burnt, in 1519. Cannibals were detected in Perthshire about 1339.

ANTHROPOLOGICAL SOCIETY (*anthrōpos*, Greek, man) for promoting the science of man and mankind, held its first meeting on Feb. 24, 1863. Dr. James Hunt, president, in the chair. The "Anthropological Review" first came out in May, 1863.

ANTICHRIST (opponent of Christ), the name given by St. John (1 Ep. ii. 18) to him whom St. Paul calls the *Man of Sin* (2 Thess. ii. 3), who, as some assert, at the latter end of the world, is to appear very remarkably in opposition to Christianity.†

ANTI-CORN-LAW LEAGUE, an association formed for the purpose of procuring the repeal of the laws charging duty on the importation of foreign corn. See *Corn-Laws*. It sprang from various metropolitan and provincial associations (1834-8), headed by Messrs. C. Villiers, R. Cobden, J. Bright, &c. See *Protectionists*.

* Burnet has supposed that the first human pair might have left, at the end of the first century, ten married couples; and from these, allowing them to multiply in the same decuple proportion as the first pair did, would rise, in 1500 years, a greater number of persons than the earth was capable of holding. He therefore suggests a quadruple multiplication only; and then exhibits the following table of increase during the first sixteen centuries that preceded the Flood (at least ten times the present number of mankind):—

I.	10	V.	2,560	IX.	655,360	XIII.	167,172,160
II.	40	VI.	10,240	X.	2,621,440	XIV.	671,088,640
III.	160	VII.	40,960	XI.	10,485,760	XV.	2,684,354,560
IIII.	640	VIII.	163,840	XII.	41,943,040	XVI.	10,737,418,240

† His reign, it is supposed, will continue three years and a half, during which time there will be a persecution. This is the opinion of the Roman Catholics; but the Protestants, as they differ from them, so they differ among themselves. Grotius and Dr. Hammond suppose the time to be past, and the characters to be furnished in the persons of Caligula, Simon Magus, and the Gnostics. Some have believed the pope to be the true Antichrist, as at the council held at Gap, in 1603. Many consider that the kingdom of Antichrist comprehends all who are opposed to Christ, openly or secretly.

ANTIETAM CREEK, near Sharpsburg, Maryland, U. S. Here was fought a terrible battle on Sept. 17, 1862, between the Federals under general M'Clellan and the Confederates under Lee. The latter after his victory at Bull Run or Manassas, Aug. 30, having invaded Maryland, was immediately followed by M'Clellan. On the 16th Lee was joined by Jackson, and at five o'clock next morning the conflict began. About 100,000 men were engaged, and the conflict raged with great fury from daylight to dark. The Federals were repeatedly repulsed; but eventually the Confederates retreated and repassed the Potomac on Sept. 18 and 19. The loss of the Federals was estimated at 12,469; of the Confederates, 14,000.

ANTIGUA, a West India Island, discovered by Columbus in Nov. 1493; settled by the English in 1632; made a bishopric, 1842. Population in 1861, 36,412.

ANTILLES, an early name of the West Indies, *which see*.

ANTIMONY, a white brittle metal. Compounds of this mineral were early known, and applied. It was used as paint to blacken both men's and women's eyes, as appears from 2 *Kings* ix. 30, and *Jeremiah* iv. 30, and in eastern countries it is used to this day. When mixed with lead it forms printing type metal. Basil Valentine wrote on antimony about 1410. *Priestley*.

ANTINOMIANS (from the Greek *anti*, against, and *nomos*, law), a name given by Luther (in 1538) to John Agricola, who is said to have held "that it mattered not how wicked a man was if he had but faith." (Opposed to *Rom.* iii. 28, and v. 1, 2). He retracted in 1540. These doctrines were condemned by the British parliament, 1648.

ANTIOCH, Syria, built by Seleucus, 300 B.C., after the battle of Ipsus, in such grandeur as to acquire the name "Queen of the East." Here the disciples were first called Christians, A.D. 42 (*Acts* xi. 26). Antioch was taken by the Persians, 540; by the Saracens about 638; recovered for the Eastern emperor, 966; lost again in 1086; retaken by the Crusaders in 1098, and held by them till 1268, when it was captured by the Sultan of Egypt. It was taken from the Turks in the Syrian war, Aug. 1, 1832, by Ibrahim Pacha, but restored at the peace.—The ERA of Antioch is much used by the early Christian writers of Antioch and Alexandria; it placed the Creation 5492 years B.C.

ANTIPODES. Plato is said to be the first who thought it possible that antipodes existed (about 368 B.C.). Boniface, archbishop of Mentz, legate of pope Zachary, is said to have denounced a bishop as a heretic for maintaining this doctrine, A.D. 741. The antipodes of England lie to the south-east of New Zealand, near Antipodes Island. *Brookes*.

ANTI-POPES, rival popes elected at various times, especially by the French and Italian factions, from 1305 to 1439. In the article *Popes*, the Anti-popes are printed in *italics*.

ANTIQUARIES. A college of antiquaries is said to have existed in Ireland 700 years B.C.

A society was founded by archbishop Parker, Camden, Stow, and others in 1572. *Spreman*. Application was made in 1589 to Elizabeth for a charter, but her death ensued, and her successor, James I., was far from favouring the design. The Society of Antiquaries revived, 1707; received its charter of incorporation from George II., 1751; and apartments in Somerset-house granted to it in 1777. Its Memoirs, entitled *Archæologia*, first published in 1770; present president, earl Stanhope, elected, 1846.

British Archaeological Association founded Dec. 1843; the Archaeological Institute of Great Britain was formed by a seceding part of the Association, 1845. Journals are published by both societies. Society of Antiquaries of Edinburgh founded in 1780. Since 1845 many county archaeological societies have been formed in the United Kingdom. The Society of Antiquaries of France (1814) began in 1805 as the Celtic Academy.

ANTI-TRINITARIANS. Theodotus of Byzantium is supposed to have been the first who advocated the simple humanity of Jesus, at the close of the second century. This doctrine, advocated by Arius about 318, spread widely after the Reformation, when it was adopted by Lælius and Faustus Socinus. *Bayle*. See *Arians*, *Socinians*, *Unitarians*.

ANTIUM, maritime city of Latium, now Porto d'Anzio, near Rome, after a long struggle for independence, became a Roman colony, at the end of the great Latin war, 340-338 B.C. It was mentioned by Horace, and was a favourite retreat of the emperors and wealthy Romans, who erected many villas in its vicinity. The treasures deposited in the temple of Fortune here were taken by Octavius Cæsar during his war with Antony, 41 B.C.

ANTWERP, the principal sea-port of Belgium, is mentioned in history in A.D. 517. It

was a small republic in the eleventh century. It was the first commercial city in Europe till the wars of the 16th and 17th centuries.

APATITE, mineral phosphate of lime. About 1856 it began to be largely employed as manure. It is abundant in Norway, and in Sombbrero, a small West India island.

APOCALYPSE, OR REVELATION, written by St. John in the isle of Patmos about 95. *Ireneus*. Some ascribe the authorship to Cerinthus, the heretic, and others to John, the presbyter, of Ephesus. In the first centuries many churches disowned it, and in the fourth century it was excluded from the sacred canon by the council of Laodicea, but was again received by other councils, and confirmed by that of Trent, held in 1545, *et seq.* Although the book has been rejected by Luther, Michaelis, and others, and its authority questioned in all ages, from the time of Justin Martyr (who wrote his first Apology for the Christians in A.D. 139), yet its canonical authority is still almost universally acknowledged.

APOCRYPHA. In the preface to the Apocrypha it is said, "These books are neyther found in the Hebrue nor in the Chaldee." *Bible*, 1539. The history of the Apocrypha ends 135 B.C. The books were not in the Jewish canon, were rejected at the council of Laodicea about A.D. 366, but were received as canonical by the Roman Catholic church, at the council of Trent on April 8, 1546. Parts of the Apocrypha are read as *lessons* by the Anglican church.

There are also Apocryphal writings in connection with the New Testament.

APOLLINARISTS, followers of Apollinaris, a reader in the church of Laodicea, who taught (366) that the divinity of Christ was instead of a soul to him; that his flesh was pre-existent to his appearance upon earth, and that it was sent down from heaven, and conveyed through the Virgin, as through a channel; that there were two sons, one born of God, the other of the Virgin, &c. These opinions were condemned by the council of Constantinople, 381.

APOLLO, the god of the fine arts, medicine, music, poetry, and eloquence, had many temples and statues erected to him, particularly in Egypt, Greece, and Italy. His most splendid temple was at Delphi, built 1263 B.C. See *Delphi*. His temple at Daphne, built 434 B.C., during a period in which pestilence raged, was burnt A.D. 362, and the Christians were accused of the crime. *Lenglet*. The statue of Apollo Belvedere, discovered in the remains of Antium, in Italy, in 1503, was purchased by pope Julius II., who placed it in the Vatican.

APOOLNICON, an elaborate musical instrument, constructed on the principle of the organ, was invented by Messrs. Flight and Robson, of St. Martin's lane, Westminster, and exhibited by them first in 1817. *Timbs*.

APOSTLES (Greek *apostolos*, one sent forth). Twelve were appointed by Christ, 31; viz. Simon Peter and Andrew (brothers), James and John (sons of Zebedee), Philip, Nathanael (or Bartholomew), Matthew (Levi), Thomas, James the Less (son of Alphæus), Simon the Canaanite and Jude or Thaddæus (brothers), and Judas Iscariot. Matthias was elected in the room of Judas Iscariot, 33 (*Acts* i.); and Paul and Barnabas were appointed by the Holy Spirit, A.D. 45 (*Acts* xiii. 2).

APOSTLES' CREED, a summary of the Christian faith, attributed to the apostles, is mentioned by Rufinus, 390, and is generally believed to have been gradually composed a great while after their time. Irenæus, bishop of Lyons (A.D. 177), gives a similar creed. Its repetition in public worship was ordained in the Greek church at Antioch, and in the Roman church in the 11th century, whence it passed to the Church of England.

APOSTOLICI, a sect which arose at the end of the 2nd century; they renounced marriage, wine, flesh, meats, &c. A second sect was founded by Segarelli about 1261. They wandered about, clothed in white, with long beards, dishevelled hair, and bare heads, accompanied by women whom they called their spiritual sisters, preaching against the growing corruption of the church of Rome, and predicting its downfall. They renounced baptism, the mass, purgatory, &c., and by their enemies are accused of gross licentiousness. Segarelli was burnt alive at Parma in 1300 during a crusade against his followers, who were all dispersed in 1307.

APOTHECARY (literally a keeper of a store-house). On Oct. 10, 1345, Edward III. settled six pence *per diem* for life on Coursus de Gangeland, "*Apothecarius London*," for taking care of him during his severe illness in Scotland. *Rymcr's Fœdera*. Apothecaries were exempted from serving on juries or other civil offices in 1712. The London Apothecaries' Company was separated from the Grocers' and incorporated 1617. Their hall was built in 1670; and their practice regulated and their authority extended over all England, by 55 Geo. III. c. 19 (1815), amended by 6 Geo. IV. c. 133 (1825). The Botanical Garden at Chelsea was left by sir Hans Sloane to the company of Apothecaries, Jan. 1753, on condition of their introducing every year fifty new plants, until their number should amount to 2000. The Dublin guild was incorporated, 1745. See *Pharmacy*.

APOTHEOSIS, a ceremony of the ancient nations of the world, by which they raised their kings and heroes to the rank of deities. The deifying a deceased emperor was begun at Rome by Augustus, in favour of Julius Cæsar, B.C. 13. *Tillemont*.

APPEAL, OR ASSIZE OF BATTLE. By the old law of England, a man charged with murder might fight with the appellant, thereby to make proof of his guilt or innocence. In 1817, a young maid, Mary Ashford, was believed to have been violated and murdered by Abraham Thornton, who, in an appeal, claimed his right by his wager of battle, which the court allowed; but the appellant (the brother of the maid) refused the challenge, and the accused escaped, April 16, 1818. This law was immediately afterwards struck from off the statute-book, by 59 Geo. III. (1819).

APPEALS. In the time of Alfred (A.D. 869-901), appeals lay from courts of justice to the king in council; but being soon overwhelmed with appeals from all parts of England, he framed the body of laws which long served as the basis of English jurisprudence. The house of lords is the highest court of appeal in civil causes. Courts of appeal at the Exchequer Chamber, in error from the judgments of the King's Bench, Common Pleas, and Exchequer, were regulated by statutes in 1830 and 1831. Appeals from English tribunals to the pope were first introduced about 1151; were long vainly opposed, and were finally abolished by Henry VIII. in 1534. See *Privy Council*.

APPENZELL, a Swiss canton, threw off the feudal supremacy of the abbots of St. Gall early in the 15th century, and became the thirteenth member of the Swiss confederation in 1513.

APPIAN WAY, an ancient Roman road, made by Appius Claudius Cæcus, while censor, 312 B.C.

APPLES. Several kinds are indigenous to England; but those in general use have been brought at various times from the continent. Richard Harris, fruiterer to Henry VIII., is said to have planted a great number of the orchards in Kent, and Lord Scudamore, ambassador to France in the reign of Charles I., planted many of those in Herefordshire. Ray reckons 78 varieties of apples in his day (1688).

APPRAISERS. The valuation of goods for another was an early business in England; and so early as 1283, by the statute of merchants, "it was enacted that if they valued the goods of parties too high, the appraisers should take them at such price as they have limited." In 1845 their annual licence was raised from 10s. to 40s.

APPRENTICES. Those of London were obliged to wear blue cloaks in summer, and blue gowns in winter, in the reign of queen Elizabeth, 1558. Ten pounds was then a great apprentice fee. From twenty to one hundred pounds were given in the reign of James I. *Stow's Survey*. The apprentice tax, enacted 43 Geo. III. 1802. An act for the protection

of apprentices, &c., was passed in 1851. The term of seven years, not to expire till the apprentice was 24 years old, required by the statute of Elizabeth (1563), was abolished in 1814. The apprentices of London have been at times very riotous; they rose into insurrection against foreigners on *Evil May-day*, which see.

APPROPRIATION CLAUSE, or the Irish Tithe Bill of 1835, brought forward by lord John Russell, whereby any surplus revenue that might accrue by the working of the act was to be appropriated for the education of all classes of the people. The clause was adopted by the commons but rejected by the lords in 1835 and 1836, whereupon it was totally abandoned.

APPROPRIATIONS (property taken from the church), began in the time of William I., the parochial clergy being then commonly Saxons, and the bishops and higher clergy Normans. These impoverished the inferior clergy to enrich monasteries, which were generally possessed by the conqueror's friends. Where the churches and tithes were so appropriated, the vicar had only such a competency as the bishop or superior thought fit to allow. Pope Alexander IV. complained of this as the bane of religion, the destruction of the church, and a poison that had infected the whole nation. *Pardon.*

APRICOT, *Prunus Armeniaca*, first planted in England about 1540, by the gardener of Henry VIII. It originally came from Asia Minor.

APRIL, the fourth month of our year, the second of the ancient Romans.

APTERYX (wingless), a bird, a native of New Zealand, first brought to this country in 1813, and deposited in the collection of the earl of Derby. Fossil specimens of a gigantic species of this bird (named *Dinornis*) were discovered in New Zealand by Mr. Walter Mantell in 1843, and since.

APULIA, a province in S. E. Italy, conquered by the Normans, whose leader Guiscard received the title of duke of Apulia from pope Nicholas II. in 1059. After many changes of masters, it was absorbed into the kingdom of Naples, in 1265.

AQUARI, a sect said to have been founded by Tatian in the 2nd century, who forbore the use of wine even in the sacrament, and used nothing but water, during persecution when they met secretly in the night, for fear of discovery. For this they were censured by Cyprian (martyred 258).

AQUARIUM OR **AQUAVIVARIUM**, a vessel containing water (marine or fresh) in which animals and plants may co-exist, mutually supporting each other; snails being introduced as *scavengers*. In 1849, Mr. N. B. Ward succeeded in growing sea-weeds in artificial sea-water; in 1850, Mr. R. Warington demonstrated the conditions necessary for the growth of animals and plants in jars of water; and in 1853 the glass tanks in the Zoological Gardens, Regent's Park, were set up under the skilful direction of Mr. D. Mitchell. In 1854, Mr. Gosse published "The Aquarium." Mr. W. Alford Lloyd, late of Portland-road, London, by his enterprise in collecting specimens did much to increase the value and interest of aquaria. The great aquarium (50 yards long and 12 wide) at the Jardin d'Acclimatation at Paris, was constructed under his direction in 1860.

AQUATINT. See *Engraving*.

AQUEDUCT, an artificial watercourse on an inclined plane. No remains of Greek aqueducts exist. Appius Claudius advised and constructed the first Roman aqueduct, as well as the *Appian way*, about 312 B.C. Aqueducts of every kind were among the wonders of Rome. *Livy*. There are now some remarkable aqueducts in Europe: that at Lisbon is of great extent and beauty; that at Segovia has 129 arches; and that at Versailles is three miles long, and of immense height, with 242 arches in three stories. The stupendous aqueduct on the Ellesmere canal, in England, is 1007 feet in length, and 126 feet high; it was completed by T. Telford, and opened Dec. 26, 1805. The Lisbon aqueduct was completed in 1738, and the Croton aqueduct, near New York, was constructed between 1837 and 1842. The aqueduct to supply Marseilles with water was commenced in 1830.

AQUILEIA (Istria), made a Roman colony about 180 B.C., and fortified A.D. 168. Constantine II. was slain in a battle with Constans, fought at Aquileia towards the close of March 340. Maximus defeated and slain by Theodosius, near Aquileia July 28, 388. Theodosius defeated Eugenius and Arbogastes, the Gaul, near Aquileia, and remained sole emperor, Sept. 6, 394. Eugenius was put to death, and Arbogastes died by his own hand, mortified by his overthrow. St. Ambrose held a synod here in 381. In 452 Aquileia was almost totally destroyed by Attila the Hun, and near it in 489 Theodoric and the Ostrogoths totally defeated Odoacer, the king of Italy.

AQUITAINE, a province (S.W. France). Subdued by the Visigoths, 418, and taken from them by Clovis in 507. Henry II. of England inherited it from his mother, 1152. It was erected into a principality for Edward the Black Prince in 1362; but was annexed to France in 1370. The title of duke of Aquitaine was taken by the crown of England on the conquest of this duchy by Henry V. in 1418. The province was lost in the reign of Henry VI.

ARABIA (W. Asia). The terms *Petra* (stony), *Feliv* (happy), and *Deserta* are said to have been applied to its divisions by Ptolemy, about A.D. 140. The Arabs claim descent from Ishmael, the eldest son of Abraham, born 1910 B.C., *Gen.* xvi. The country was unsuccessfully invaded by Gallus, the Roman governor of Egypt, 24 B.C. In A.D. 622, the Arabians under the name of Saracens, followers of Mahomet (born at Mecca, 570), their general and prophet, commenced their course of conquest. See *Mahometanism*. The Arabs greatly favoured literature and the sciences, especially mathematics, astronomy, and chemistry. To them we owe our ordinary numerals and arithmetical notation. The Koran was written in Arabic (622-632). The Bible was printed in Arabic in 1671.

ARABIAN NIGHTS' ENTERTAINMENTS (or 1001 Tales) were translated into French by Galland, and published in 1704; but their authenticity was not acknowledged till many years after. The best English translation from the Arabic is that of Mr. E. W. Lane, published in 1839, with valuable notes and beautiful illustrations.

ARABICI, a sect which sprung up in Arabia, whose distinguishing tenet was, that the soul died with the body, and rose again with it, 207.

ARAGON, part of the Roman Tarraconensis, a kingdom, N. E. Spain. It was conquered by the Carthaginians, who were expelled by the Romans about 200 B.C. It partook of the fortunes of the country, but became an independent monarchy in 1035. See under *Spain*.

ARAM, the ancient name of Syria, *which see*.

ARANJUEZ (Central Spain), contains a fine royal palace, at which several important treaties were concluded. On March 17, 1808, an insurrection broke out here against Charles IV. and his favourite, Godoy, the prince of peace. The former was compelled to abdicate in favour of his son, Ferdinand VII.

ARBELA. The third and decisive battle between Alexander the Great and Darius Codomanus decided the fate of Persia, Oct. 1, 331 B.C., on a plain in Assyria, between Arbela and Gaugamela. The army of Darius consisted of 1,000,000 foot and 40,000 horse; the Macedonian army amounted to only 40,000 foot and 7000 horse. *Arrian*. The gold and silver found in the cities of Susa, Persepolis, and Babylon, which fell to Alexander from this victory, amounted to thirty millions sterling; and the jewels and other precious spoil, belonging to Darius, sufficed to load 20,000 mules and 5000 camels. *Plutarch*.

ARBITRATION. Submission to arbitration was authorised and made equivalent in force to the decision of a jury, by 9 & 10 Will. III. (1698). Submissions to arbitration may be made rules of any court of law or equity, and arbitrators may compel the attendance of witnesses, 3 & 4 Will. IV. c. 42 (1833). See *Ouzel Galley*. The Common Law Procedure Act (1854) authorises the judges of superior courts to order compulsory arbitration; and, by an act passed in 1859, railway companies may settle disputes with each other by arbitration.

ARBUTUS. The *Arbutus Andrachne*, oriental strawberry-tree, was brought to England from the Levant about 1724.

ARCADES, OR WALKS ARCHED OVER. The principal in London are the Burlington-arcade, opened in March, 1819; and the Lowther-arcade, Strand, opened at the period of the Strand improvements. See *Strand*. Exeter Change, London, was rebuilt and opened in 1845. See *Exeter Change*. The Royal-arcade, Dublin, opened June, 1820, was burnt to the ground, April 25, 1837.

ARCADIA, in the centre of the Peloponnesus, Greece. The Arcadians regarded their nation as the most ancient of Greece, and older than the moon (*Proselēni*, which word Döderlein conjectures to mean Pre-Hellenic). They were more simple in their manners and moderate in their desires than the other Greeks, from whom they were separated by mountains. Pelasgus is said to have taught them to feed on acorns, as being more nutritious than herbs, their former food; for which they honoured him as a god, 1521 B.C. Arcadia had twenty-five kings, whose history is altogether fabulous.

ARCH. It appears in early Egyptian and Assyrian architecture. The oldest arch in Europe is probably in the Cloaca Maxima, at Rome, constructed under the early kings, about 588 B.C. The Chinese bridges, which are very ancient, are of great magnitude, and are built with stone arches similar to those that have been considered a Roman invention.* The TRIUMPHAL arches of the Romans formed a leading feature in their architecture. The arch of Titus (A.D. 80), that of Trajan (114), and that of Constantine (312), were magnificent. The arches in our parks in London were erected about 1828. The Marble Arch, which formerly stood before Buckingham Palace (whence it was removed to Cumberland-gate, Hyde Park, in 1851) was modelled from the arch of Constantine. See *Hyde Park*.

ARCHANGEL (N. Russia), a city, is thus named from a monastery founded here, and dedicated to St. Michael in 1584. The passage to Archangel was discovered by the English navigator Richard Chancellor in 1553, and it was the only seaport of Russia till the formation of the docks at Cronstadt, and foundation of St. Petersburg in 1703. The dreadful fire here by which the cathedral and upwards of 3000 houses were destroyed, occurred in June, 1793.

ARCHBISHOP (Greek *archiepiscopos*), a title given in the 4th and 5th centuries to the bishops of chief cities, such as Rome, Alexandria, Antioch, and Constantinople, who presided over the other metropolitans and bishops in the districts attached to those places. The word is first found in the Apology against the Arians by Athanasius, who died 373. The Eastern archbishops have since been styled *patriarchs*.† *Riddle*.

ARCH-CHAMBERLAIN. The elector of Brandenburg was appointed the hereditary arch-chamberlain of the German Empire by the golden bull of Charles IV. in 1356, and in that quality he bore the sceptre before the emperor.

ARCH-CHANCELLORS were appointed under the two first races of the kings of France (418—986), and when their territories were divided, the archbishops of Mentz, Cologne, and Treves became arch-chancellors of Germany, Italy, and Arles.

ARCHDEACON. The name was early given to the first or eldest deacon, who attended on the bishop without any power; but since the council of Nice, his function is become a dignity, and set above that of priest, though anciently it was quite otherwise. The appointment in these countries is referred to 1075. There are seventy-one archdeacons in England (1865), and thirty-three in Ireland. The archdeacon's court is the lowest in ecclesiastical polity: an appeal lies from it to the consistorial court, by 24 Henry VIII. (1532).

* The new bridge of Chester, whose span is 200 feet, was commenced in 1829. The central arch of London Bridge is 152 feet; and the three cast iron arches of Southwark bridge, which rest on massive stone piers and abutments are, the two side ones 210 feet each, and the centre 240 feet: thus the centre arch exceeds the admired bridge of Sunderland by four feet in the span, and the long-famed Rialto at Venice, by 167 feet. See *Bridges*.

† In these realms the dignity is nearly coeval with the establishment of Christianity. Before the Saxons came into England there were three sees: London, York, and Caerleon-upon-Usk; but soon after the arrival of St. Austin he settled the metropolitan see at Canterbury, 602. See *Canterbury*. York continued archiepiscopal; but London and Caerleon lost the dignity. Caerleon was found, previously, to be too near the dominions of the Saxons; and in the time of King Arthur the archbishopric was transferred to St. David's, of which St. Sampson was the 26th and last Welsh archbishop. See *St. David's*. The bishoprics in Scotland were under the jurisdiction of the archbishop of York until the erection of the archiepiscopal sees of St. Andrew's and Glasgow, in 1470 and 1491; these last were discontinued at the Revolution. See *Glasgow* and *St. Andrew's*. The bishop of Moray, &c., is now (1865) styled *Primus*. The rank of archbishop was of early institution in Ireland. See *Ferns*. Four archbishoprics were constituted in Ireland, 1151, namely, Armagh, Cashel, Dublin, and Tuam; until then the archbishop of Canterbury had jurisdiction over the Irish as well as English bishops, in like manner as the archbishop of York had jurisdiction over those of Scotland. Of these four archbishoprics two were reduced to bishoprics, namely, Cashel, and Tuam, conformably with the statute 3 & 4 Will. IV. 1833, by which also the number of sees in Ireland was to be reduced (as the incumbents of ten of them respectively died) from twenty-two to twelve, the present number. See *Bishops, Cashel, Tuam; Pallium, &c.*

ARCHERY. Plato ascribes the invention to Apollo, by whom it was communicated to the Cretans. Ishmael "became an archer" (*Gen.* xxi. 20), 1892 B.C. The Philistine archers overcame Saul (1 *Sam.* xxxi. 3), 1055 B.C. David commanded the use of the bow to be taught (2 *Sam.* i. 18). Aster of Amphipolis, having been slighted by Philip, king of Macedon, at the siege of Methone, 353 B.C., shot an arrow, on which was written "Aimed at Philip's right eye," which struck it and put it out; Philip threw back the arrow with these words: "If Philip take the town, Aster shall be hanged." The conqueror kept his word.

Archery introduced into England previously to Harold and his two brothers were killed by arrows shot from the cross-bows of the Norman soldiers at the battle of Hastings in 1066 Richard I. revived archery in England in 1190, and was himself killed by an arrow in 1199 The victories of Crecy (1346), Poitiers (1356), and Agincourt (1415), were won chiefly by archers.* Four thousand archers surrounded the houses

of parliament, ready to shoot the king and the members, 21 Richard II. (*Stow.*) 1397 The citizens of London formed into companies of archers in the reign of Edward III.; and into a corporate body by the style of "The Fraternity of St. George," 29 Henry VIII. 1538 Roger Ascham's "*Toxophilus, the School of Shooting,*" published in 1571 See *Artillery Company, Toxophilites, &c.*

ARCHES, COURT OF, the most ancient consistory court, chiefly a court of appeal from inferior jurisdictions within the province of Canterbury; it derives its name from the church of St. Mary-le-Bow (*Sancta Maria de Arcubus*), London, where it was held; and whose top is raised on stone pillars built archwise. *Cowell.* Appeals from this court lie to the judicial committee of the privy council, by statute, 1832.

ARCHITECTURE (from the Greek *archi-tekton*, chief artificer), ornamental building. The five great orders of architecture are,—the Doric, Ionic, and Corinthian (*Greek*);—the Tuscan and Composite (*Roman*). The Gothic began to prevail in the ninth century. See *the Orders respectively and Gothic.*

An Architectural Club was formed in 1791. An Architectural Society existed in London in 1808. The ROYAL INSTITUTE OF BRITISH ARCHITECTS was founded in 1834—Earl de Grey, president, 1835-61. The Architectural Society, established in 1831, was united to the Institute in 1842. The Architectural Association began about 1846.

ARCHONS. When royalty was abolished at Athens, in memory of king Codrus, killed in battle, 1044 B.C. (or 1070), the executive government was vested in elective magistrates called archons, whose office continued for life. Medon, eldest son of Codrus, was the first archon. The office was limited to ten years, 752 B.C., and to one year 683 B.C.

ARCOLA (Lombardy), the site of battles between the French under Bonaparte, and the Austrians under field-marshal Alvinizi, fought Nov. 15—17, 1796. The result was the loss on the part of the Austrians of 18,000 men in killed, wounded, and prisoners, four flags, and eighteen guns. The loss of the French was estimated at 15,000. They became masters of Italy. In one of the contests Bonaparte was in most imminent danger, and was only rescued by the impetuosity of his troops.

* The *long-bow* was six feet long, and the arrow three feet; the usual range from 300 to 500 yards. Robin Hood is said to have shot from 600 to 800 yards. A Persian hero, Arish, is stated to have shot over between 400 and 500 miles, as related by Ferdousi! The cross-bow was fixed to a stock, and discharged with a trigger.

ARCOT (East Indies). This city (founded 1716) was taken by colonel Clive, Aug. 31, 1751; was retaken, but again surrendered to colonel Coote, Feb. 10, 1760. Besieged by Hyder Ali, when the British under colonel Baillie suffered severe defeats, Sept. 10 and Oct. 31, 1780. Arcot has been subject to Great Britain since 1801. See *India*.

ARCTIC EXPEDITIONS. See *North-West Passage* and *Franklin's Expedition*.

ARDAGH, an ancient prelacy in Ireland, founded by St. Patrick, who made his nephew, Mell, the first bishop, previously to 454. This prelacy was formerly held with Kilmore; but since 1742 it has been held *in commendam* with Tuam (*which see*). It was united with Kilmore in 1839, and with Elphin in 1841.

ARDFERT AND **AGHADOE**, bishopricks in Ireland long united; the former was called the bishoprick of Kerry; Ert presided in the 5th century. William Fuller appointed in 1663, became bishop of Limerick in 1667, since when Ardfert and Aghadoe have been united to that prelacy. Near the cathedral an anchorite tower, 120 feet high, the loftiest and finest in the kingdom, suddenly fell, 1770.

ARDOCH. See *Grampians*.

AREIOPAGUS OR **AREOPAGUS**, a venerable Greek tribunal, said to have heard causes in the dark, because the judges should be blind to all but facts, instituted at Athens about 1507 B.C. *Arund. Marbles*. The name is derived from the Greek *Arivos pagos*, the hill of Mars, through the tradition that Mars was the first who was tried there for the murder of Italirrhottus, who had violated his daughter Alcippe. The powers of this court were enlarged by Solon, about 594 B.C., but diminished by the jealousy of Pericles, 461 B.C. Paul preached on Mars' hill, A.D. 52 (*Acts xvii.*).

AREZZO, near the ancient Arretium, or Aretinum, an Etrurian city, which made peace with Rome for 30 years, 308 B.C., was besieged by the Galli Senones, about 283 B.C., who defeated the Roman army Metellus sent to its relief—a disgrace avenged signally by Dolabella. Arezzo was an ancient bishopric: the cathedral was founded in 1277. It is renowned as the birthplace of Mæcenas, Petrarch, Vasari, and other eminent men. Michael Angelo was born in the vicinity.

ARGAUM, in the Deccan, India, where sir A. Wellesley, on Nov. 29, 1803, thoroughly defeated the rajah of Berar and the Mahratta chief Scindiah, who became in consequence quite subservient to the British.

ARGENTARIA, Alsace (now COLMAR, N. E. France), where the Roman emperor Gratian totally defeated the Alemanni, and secured the peace of Gaul, 378.

ARGENTINE (OR **LA PLATA**) **CONFEDERATION**, S. America, 14 provinces. This country was discovered by the Spaniards in 1515; settled by them in 1553, and formed part of the great vice-royalty of Peru till 1778, when it became that of Rio de la Plata. It joined the insurrection in 1811, and became independent in 1816. It was at war with Brazil from 1826 to 1828, for the possession of Uruguay, which became independent as Monte-Video, and at war with France from 1838-40. Buenos Ayres seceded in 1853, and was reunited in 1859. An insurrection began in San Juan, in Nov. 1860, and was suppressed in Jan. 1861. J. Urquiza, elected president, Nov. 20, 1853, was succeeded by Dr. S. Derqui, Feb. 8, 1860. Gen. B. Mitre, elected for six years, assumed the president's office, Oct. 12, 1862. In April, 1865, Lopez, president of Paraguay, made an alliance with Buenos Ayres, declared war against Mitre, and invaded the Argentine territories, May. Mitre made an alliance with Brazil. Population in 1859, about 1,171,800. See *Buenos Ayres* for the disputes with that state.

ARGINUSÆ ISLES, between Lesbos and Asia Minor; near these Conon and the Athenian fleet defeated the Spartan admiral Callieratidas, 406 B.C.

ARGONAUTIC EXPEDITION, 1263 B.C. (1225, *Clinton*), undertaken by Jason to avenge the death of his kinsman Phryxus, and recover his treasures seized by his murderer, Æetes, king of Colchis. The ship in which Phryxus had sailed to Colchis having been adorned with the figure of a ram, it induced the poets to pretend that the journey of Jason was for the recovery of the golden fleece. This is the first naval expedition on record. Many kings and heroes accompanied Jason, whose ship was called *Argo*, from its builder. *Dufresnoy*.

ARGOS, the most ancient city of Greece, said to have been founded either by Inachus, 1856 B.C., or his son, Phoroneus, 1807, received its name from Argus, the fourth of the Inachide, 1711 B.C.

ARGYLE (W. Scotland), BISHOPRIC OF, founded about 1200, Evaldus being the first bishop; the diocese was previously part of the see of Dunkeld; it ended with the abolition of episcopacy in Scotland, 1688. Argyle and the Isles is a post-revolution bishopric, 1847. *See Bishopsrics.*

ARIAN, OR ARYAN (in Sanskrit signifying noble, warlike), a term now frequently applied to the hypothetical Indo-Germanic family of nations.

ARIANS, the followers of Arius of Alexandria, who preached against the divinity of Christ, about 315, and died in 336. The controversy was taken up by Constantine, who presided at the council of Nice, 325, when the Arians were condemned; but their doctrine prevailed for a time in the East. It was favoured by Constantius II. 341; and carried into Africa under the Vandals in the 5th century, and into Asia under the Goths. Servetus published his treatise against the Trinity, 1531, and was burnt, 1553. *See Athanasian Creed.* Leggatt, an Arian, was burnt at Smithfield in 1614.

ARISTOTELIAN PHILOSOPHY : the most comprehensive system ever devised by man. Aristotle was born at Stagyræ (hence termed the Stagyræite), 384 B.C.; was a pupil of Plato from 364 to 347; became preceptor of Alexander, son of Philip of Macedon, in 342; and died in 322. He divided the circle of knowledge into Metaphysics and Logic, Physics, including part of the science of mind, and Ethics. His philosophy was too much exalted by the schoolmen during the middle ages, and too much depreciated after the Reformation. His works on natural science contain a vast collection of facts and an extraordinary mixture of sound and chimerical opinions. To him is attributed the assertion that nature abhors a vacuum, an opinion now maintained by some eminent modern philosophers.

ARITHMETIC is said to have been introduced from Egypt into Greece by Thales, about 600 B.C. The Chinese used the abacus at an early period. It is asserted that the ancient Hindus adopted a system having ten as a basis.

The oldest treatise upon arithmetic is by Euclid (7th, 8th, and 9th books of his *Elements*), about B.C. 300
 The sexagesimal arithmetic of Ptolemy was used A.D. 130
 Diophantus, of Alexandria, was the author of thirteen books of arithmetical questions (of which six are now extant) about 156
 Notation by nine digits and zero, known at least as early as the sixth century in Hindostan—introduced from thence into Arabia, about 900—into Europe, about 980—into France, by Gerbert, 991—into Spain, 1050—into England 1253

ARIZONA, a territory of the United States, originally part of New Mexico, was organised Feb. 24, 1863; capital, Tucson.

ARK. Mount Ararat is venerated by the Armenians, from a belief of its being the place on which Noah's ark rested, after the universal deluge, 2347 B.C. But Apamea, in Phrygia, claims to be the spot; and medals have been struck there with a chest on the waters, and the letters NOE, and two doves: this place is 300 miles west of Ararat. The ark was 300 cubits in length, fifty in breadth, and thirty high; but most interpreters suppose this cubit to be about a foot and a-half, and not the geometrical one of six.

ARKANSAS, originally part of Louisiana, purchased from France by the United States in 1803, was admitted into the Union, 1836, and seceded from it May 6, 1861. Several battles were fought in this state in 1862. Capital, Little Rock.

ARKLOW (in Wicklow), where a battle was fought between the insurgent Irish, amounting to 31,000, and a small regular force of British, which signally defeated them, June 10, 1798. The town was nearly destroyed by the insurgents in May previous.—Native gold was discovered in Arklow, in Sept. 1795. *Phil. Trans.* vol. 86.

ARLES, an ancient town in France, in 879 the capital of the kingdom of Arles or Lower Burgundy. Here are the remains of a Roman amphitheatre, capable of holding between 20,000 and 30,000 persons. English bishops are said to have been present at the council held here against the Donatists, 314.

ARMADA, THE INVINCIBLE. The famous Spanish armament, so called, consisted of 130 ships of war, besides transports, &c., 2650 great guns, 20,000 soldiers, 11,000 sailors, and 2000 volunteers, under the duke of Medina Sidonia, and 180 priests and monks. It sailed from the Tagus, May 28-30, 1588, and arrived in the channel, July 19, 1588, and was defeated the next day by Drake and Howard. Ten fire-ships having been sent into the enemies' fleet, they cut their cables, put to sea and endeavoured to return to their rendezvous between Calais and Gravelines: the English fell upon them, took many ships, and admiral Howard maintained a running fight from the 21st July to the 28th, obliging the shattered fleet to bear away for Scotland and Ireland, where a storm dispersed them, and the remainder of the armament returned by the North Sea to Spain. The Spaniards lost fifteen capital ships in the engagement, and 5000 men; seventeen ships were lost or taken on the coast of Ireland, and upwards of 5000 men were drowned, killed, or taken prisoners. The English lost but one ship. About one-third of the armament returned to Spain.

ARMAGH, in N. Ireland, of which it was the metropolis from the 5th to the 9th century, was the first ecclesiastical dignity in Ireland, founded by St. Patrick, its first bishop, about 444, who is said to have built the first cathedral 450. Six saints of the Roman calendar have been bishops of this see. In the king's books, by an extent taken 15 James I., it is valued at 400*l.* sterling a year; and until lately, was estimated at 15,000*l.* per annum. The see was re-constituted (see *Pallium*) in 1151. *Beatson.* Armagh was ravaged by the Danes on Easter-day, 852, and by O'Neil in 1564.

ARMAGNACS, a political party in France, followers of the duke of Orleans, derived their name from his father-in-law, the count of Armagnac. About 3500 of this party were massacred at Paris in May, 1418, by their opponents, the followers of the duke of Burgundy.

ARMED NEUTRALITY, the confederacy of the northern powers against England, formed by the empress of Russia in 1780; ended in 1781. The confederacy was renewed, and a treaty ratified in order to cause their flags to be respected by the belligerent powers, Dec. 16, 1800. The principle that neutral flags protect neutral bottoms being contrary to the maritime system of England, the British cabinet remonstrated, war ensued, and Nelson and Parker destroyed the fleet of Denmark before Copenhagen, April 2, 1801. This event and the murder of the emperor Paul of Russia led to the dissolution of the Armed Neutrality.

ARMENIA, Asia Minor. Here Noah is said to have resided when he left the ark, 2347 B.C. Armenia, after forming part of the Assyrian, Median, and Persian empires, became subject to the Greek kings of Syria, after the defeat of Antiochus the Great, 190 B.C.; the Romans established the kingdoms of Armenia Major and Minor, but their influence over them was frequently interrupted by the aggressions of the Parthians. The modern Christian kingdom of Armenia arose about 1080 in the rebellion of Philaretus Brachancius against the Greek emperor. It lasted amid many struggles till the 14th century. In all their political troubles the Armenians have maintained the profession of Christianity. Their church is governed by patriarchs, not subject to Rome. Since 1715 an Armenian convent has existed at Venice, where books on all subjects are printed in the Armenian language.

ARMENIAN ERA, commenced on the 9th of July, 552; the ecclesiastical year on the 11th August. To reduce this last to our time, add 551 years, and 221 days; and in leap years subtract one day from March 1 to August 10. The Armenians used the old Julian style and months in their correspondence with Europeans.

ARMILLARY SPHERE, an instrument devised to give an idea of the motions of the heavenly bodies. It is commonly made of brass, and disposed in such a manner that the greater and lesser circles of the sphere are seen in their natural position and motion; the whole being comprised in a frame. It is said to have been invented by Eratosthenes, about 255 B.C.; and was employed by Tycho Brahe and other astronomers.

ARMINIANS (OR REMONSTRANTS) derive their former name from James Arminius (or Harmensen), a Protestant divine, of Leyden, Holland (died, 1609); the latter name from his followers having presented a *Remonstrance* to the States-General in 1610. They separated from the Calvinists, considering Calvin's views of grace and predestination in opposition to free will too severe. A fierce controversy raged to 1625, when the Arminians, who had been exiled, returned to their homes. Their doctrines were condemned in 1619, at the synod of Dort (*which see*). The Calvinists were then sometimes styled Gomarists, from Gomar, the chief opponent to Arminius. James I. and Charles I. favoured the doctrines of the Arminians, which still prevail largely in Holland and elsewhere.

ARMORIAL BEARINGS became hereditary in families at the close of the 12th century. They took their rise from the knights painting their banners with different figures, and were employed by the crusaders, in order at first to distinguish noblemen in battle, 1100. The lines to denote colours in arms, by their direction or intersection, were invented by Columbiere in 1639. Armorial bearings were taxed in 1798, and again in 1808. The armorial bearings of the English sovereigns are given under the article *England*.

ARMORICA, now Brittany, N. France, was conquered by Julius Cæsar, 56 B.C. Many Gauls retired there and preserved the Celtic tongue, A.D. 584. See *Brittany*.

ARMOUR. That of Goliath is described (about 1063 B.C.) 1 *Sam.* xvii. 5. The warlike Europeans at first despised any other defence than the shield. Skins and padded hides were first used; and brass and iron armour, in plates or scales, followed. The first body armour of the Britons was skins of wild beasts, exchanged, after the Roman conquest, for the well-tanned leathern cuirass. *Tacitus*. This latter continued till the Anglo-Saxon era. Hengist is said to have had scale armour, A.D. 449. The Norman armour formed breeches and jacket, 1066. The hauberk had its hood of the same piece, 1100. John wore a surtout over a hauberk of rings set edgewise, 1199. The heavy cavalry were covered with a coat of mail, Henry III. 1210. Some horsemen had vizors, and scull-caps, same reign. Armour became exceedingly splendid about 1350. The armour of plate commenced 1407. Black armour, used not only for battle, but for mourning, Henry V. 1413. The armour of Henry VII. consisted of a cuirass of steel, in the form of a pair of stays, about 1500. Armour ceased to reach below the knees, Charles I. 1625. In the reign of Charles II. officers wore no other

armour than a large gorget, which is commemorated in the diminutive ornament known at the present day. *Meyrick*.

ARMS. The club was the first offensive weapon ; then followed the mace, battle-axe, pike, spear, javelin, sword and dagger, bows and arrows. Pliny ascribes the invention of the sling to the Phœnicians. See *articles on the various weapons throughout the volume*.

ARMS. See *Armorial bearings* and *Heraldry*.

ARMS' BILL, for the repression of crime and insurrection in Ireland, was passed Oct. 15, 1831. It was a revival of the expired statutes of George III. The guns registered under this act throughout the kingdom at the close of the first year scarcely amounted to 3000, and the number was equally small of all other kinds of arms. The new Arms' bill passed Aug. 22, 1843. It has been since renewed, but has not been rigidly enforced.

ARMY. Ninus and Semiramis had armies amounting to nearly two millions of fighting men, 2017 B.C. The first guards and regular troops as a standing army were formed by Saul, 1093 B.C. *Eusebius*. The army of Xerxes invading Greece is said to have been 1,700,000 foot and 80,000 horse : 480 B.C. One of the first standing armies of which we have any account, is that of Philip of Macedon. The army which Darius opposed to Alexander the Great (332 B.C.) is set down as between 750,000 and a million. The first standing army which existed as such, in modern times, was maintained in France by Charles VII. in 1445. The chief European nations have had in their service the following armies : Spain, 150,000 men ; Great Britain, 310,000 ; Prussia, 350,000 ; Turkey, 450,000 ; Austria, 500,000 ; Russia, 560,000 ; and France, 680,000. Estimated number in Europe in 1863, 6,000,000 soldiers, 1,000,000 horses, 11,000 guns.

ARMY, BRITISH, mainly arose in the reign of Charles II. in 1661, in consequence of the extinction of feudal tenures. The first five regiments of British infantry were established between 1633 and 1680. James II. established several regiments of dragoon guards (1685-8). In 1685 the army consisted of 7000 foot and 1700 cavalry. Standing armies were introduced by Charles I. in 1638 ; they were declared illegal in England, 31 Charles II. 1679 ; but one was then gradually forming, which was maintained by William III. 1689, when the Mutiny Act was passed. See *Regiments*. Grose's "History of the British Army" was published in 1801. The effective rank-and-file of the army actually serving in the pay of Great Britain on the 24th Dec. 1800, amounted to 168,082 ; and the estimates of the whole army in that year were 17,973,000*l*. The militia, volunteer, and other auxiliary forces were of immense amount at some periods of the war ending in 1815. The strength of the volunteer corps was greatest between the years 1798 and 1804, in which latter year this species of force amounted to 410,000 men, of whom 70,000 were Irish ; and the militia had increased to 130,000 men, previously to the regular regiments being recruited from its ranks in 1809. The following are statements of the effective military strength of the United Kingdom at the periods mentioned, and of the sums voted for military expenditure :

ARMY OF OCCUPATION. The allied powers, Austria, Russia, and Prussia, by the treaty signed Nov. 20, 1815, established the boundaries of France, and stipulated for the occupation of certain fortresses by foreign troops for three years, to the intense disgust of the natives.

AROMATICS. Acon of Agrigentum is said to have been the first who caused great fires to be made, and aromatics to be thrown into them, to purify the air, by which means he put a stop to the plague at Athens, 473 B.C. *Nouv. Dict.*

ARPINUM (S. Italy), celebrated as the birthplace of Cicero, Jan. 3, 106 B.C.; many remains still bear his name.

ARQUEBUS. See *Fire Arms*.

ARQUES (N. France). Near here the League army, commanded by the duc de Mayenne, was defeated by Henry IV. Sept. 21, 1589.

ARRACAN, a province of N.E. India. Arracan, the capital, was taken by the Burmese, 1783; and taken from them by general Morrison, April 1, 1825. The subjugation of the whole province soon followed.

ARRAIGNMENT consists in reading the indictment by the officer of the court, and calling upon the prisoner to say whether he is guilty or not guilty. Formerly, persons who refused to plead in cases of felony were pressed to death by weights placed upon the breast. A person standing mute was declared convicted by an act passed 1772; but in 1827, the court was directed to enter a plea of "not guilty" in such cases. See *Mute*.

ARRAS (N.E. of France), the ancient Atrebatas, the seat of a bishop since 390. Here a treaty was concluded between the king of France and duke of Burgundy, when the latter abandoned his alliance with England, Sept. 22, 1435. Another treaty was concluded by Maximilian of Austria with Louis XI. of France, whereby the counties of Burgundy and Artois were given to the dauphin as a marriage portion; this latter was entered into in 1482. *Velly*. Arras was held by the Austrians from 1493 till 1640, when it was taken by Louis XIII.

ARRAY. On Dec. 23, 1324, Edward II. directed the bishop of Durham to make "arraier" his men-of-arms, horse and foot, and cause them to proceed to Portsmouth; thence to proceed to the war in Gascony. *Rymers's Fodera*. Hallam says that this was the earliest commission of array that he could find, and that the latest was dated 1557. The

attempt of Charles I. to revive commissions of array in 1642, founded on a statute of Henry IV., was strenuously opposed as illegal.

ARREST FOR DEBT. The persons of peers, members of parliament, &c., are protected from arrest. See *Ambassadors*; *Ferrars' Arrest*.

Clergymen performing divine service privileged, 50 Edw. III. 137
 Seamen privileged from debts under 20*l.* by 30 Geo. II. 1756
 Barristers privileged from arrest while going to, attending upon, and returning from court, on the business of their clients.
 By statute 29 Charles II. no arrest can be made, nor process served, upon a Sunday. This law was extended by William III.
 Vexatious arrests prevented by act, May, 1733.
 Prohibited for less than 10*l.* on process, 1779; and for less than 20*l.* July, 1827
 Arrests for less than 20*l.* were prohibited on mesne process in Ireland, in June 1829

Statute abolishing arrest for debt on mesne process, except in cases wherein there is ground to show that the defendant designs to leave the country, 2 Vict., Aug. 1838
 By 7 & 8 Vict. c. 96, the power of imprisonment even upon final process, that is judgment debts, is abolished if the sum does not exceed 20*l.* exclusive of costs, 1844; and by 9 & 10 Vict. c. 95, the judge has no power to punish, except in case of fraud or contempt of court 1846
 By the Absconding Debtors' Arrest Act, absconding debtors owing 20*l.* and upwards are liable to arrest 1851

ARRETINUM. See *Arezzo*.

ARSENAL, a great military or naval repository. The largest in this country is at Woolwich, *which see*.

ARSENIC, a steel-gray coloured brittle metal, extremely poisonous, known in early times. Brandt, in 1733, made the first accurate experiments on its chemical nature. The heinous crimes committed by means of this mineral obliged the legislature to enact regulations for its sale, 14 Vict. cap. 13, June 5, 1851. The sale of all colourless preparations of arsenic is regulated by this act. In 1858 Dr. A. S. Taylor asserted that green paper-hangings prepared from arsenic were injurious to health; which appears to be true, although doubted by some chemists. See *Cacodyl*.

ARSENITE SCHISM. See *Eastern Church*, 1255.

ARSON was punished with death by the Saxons, and remained a capital crime on the consolidation of the laws in 1827, 1837, and 1861. If any house be fired, persons being therein, or if any vessel be fired, with a view to murder or plunder, it shall be death, statute 1 Vict., July, 1837.

ARSOUF (Syria), BATTLE OF, in which Richard I. of England, commanding the Christian forces, reduced to 30,000, defeated Saladin's army of 300,000 Saracens and other infidels, on Sept. 3 or 7, 1191. Ascalon surrendered. Richard marched to Jerusalem, 1192.

ARTEMISIUM, a promontory in Eubœa, near which indecisive conflicts took place between the Greek and Persian fleets for three days; 480 B.C. The former retired on hearing of the battle of Thermopylæ.

ARTESIAN WELLS (from *Artesia*, now Artois, in France, where they frequently occur) are formed by boring through the upper soil to strata containing water, which has percolated from a higher level, and which rises to that level through the boring tube. The fountains in Trafalgar square and government offices near have been supplied since 1844 by two of these wells (393 feet deep). At Paris the Grenelle well (1798 feet deep), was completed in 1841, after eight years of exertion, by M. Mulot at an expense of about 12,000*l.*, and the well at Passy, which it is said will supply sufficient water for nearly 500,000 persons, was begun in 1855, and completed in 1860 by M. Kind. Messrs. Amos and Easton completed an artesian well for the Horticultural Society's garden in 1862. It yielded 880,000 gallons of water, at the temperature of 81° Fahr., in twenty-four hours. The well at Kissingen was completed in 1850. Artesian wells are now becoming common.

ARTICHOKES are said to have been introduced from the East into Western Europe in the 15th century, and to have reached England about 1502.

ARTICLES OF RELIGION. In June 8, 1536, after much disputing, the English clergy in convocation published "Articles decreed by the king's highness" Henry VIII., who published in 1539 the "Statute of Six Articles," viz. transubstantiation, communion in one kind, vows of chastity, private masses, celibacy of the clergy, and auricular confession. In 1551 forty-two were published without the consent of parliament. These forty-two were modified and reduced to THIRTY-NINE in Jan. 1563; and they received the royal authority and the authority of parliament in 1571. The *Lambeth Articles*, of a more Calvinistic character, attempted to be imposed by archbishop Whitgift, were withdrawn in consequence

of the displeasure of queen Elizabeth, 1595. One hundred and four articles were drawn up for Ireland by archbishop Usher in 1614. On the union of the churches, the Irish adopted the English articles. See *Perth Articles*.

ARTICLES OF WAR were decreed in the time of Richard I. and John. Those made by Richard II. in 1485 appear in Grose's "Military Antiquities." The Articles of War now in force are based upon an act, passed by William III. in 1689, to regulate the army about to engage in his continental warfare.

ARTIFICERS AND MANUFACTURERS. Their affairs were severely regulated by the statutes of 1349, 1351, 1360, 1562. They were prohibited from leaving England, and those abroad were outlawed, if they did not return within six months after the notice given them. A fine of 100*l.*, and imprisonment for three months, were the penalties for seducing them from these realms, by 9 Geo. II. (1736) and other statutes, which were repealed in 1824.

ARTILLERY, a term including properly all missiles: now applies to *cannon*. The first piece was a small one, contrived by Schwartz, a German cordelier, soon after the invention of gunpowder, in 1330. Artillery was used, it is said, by the Moors of Algeiras, in Spain, in the siege of 1343; it was used, according to our historians, at the battle of Crecy, in 1346, when Edward III. had four pieces of cannon, which gained him the battle. We had artillery at the siege of Calais, 1347. The Venetians first employed artillery against the Genoese at sea, 1377. *Voltaire*. Said to have been used by the English at Calais in 1383. Cast in England, together with mortars for bomb-shells, by Flemish artists, in Sussex, 1543. *Rymer's Fœdera*. Made of brass 1635; improvements by Browne, 1728.—See *Cannon*, *Bombs*, *Carronades* (under *Carron*), *Mortars*, *Howitzers*, *Petard*, *Rockets*, *Fire-arms*. The Royal Artillery regiment was established in the reign of Anne.

ARTILLERY COMPANY OF LONDON, HONOURABLE, instituted in 1585, having ceased, was revived in 1610. It met for military exercise at the Artillery ground, Finsbury, where the London Archers had met since 1498. (See *Archery*.) In the civil war, 1641-8, the company took the side of the parliament, and greatly contributed towards its success. The company numbered 1200 in 1803 and 800 in 1861. Since 1842 the officers have been appointed by the Queen. On the decease of the duke of Sussex in 1843, the Prince Consort became colonel and captain-general. He died Dec. 14, 1861, and the Prince of Wales was appointed his successor Aug. 24, 1863.

ARTISTS' FUND was established in 1810 to provide allowances for sick, and annuities for incapacitated members.

ARTS. In the 8th century, the whole circle of sciences was composed of seven liberal arts—grammar, rhetoric, logic, arithmetic, music, geometry, and astronomy. *Harris*. The Royal Society of England (*which see*) obtained its charter April 2, 1663. The Society of Arts, to promote the polite arts, commerce, manufactures, and mechanics, was instituted in 1754; it originated in the patriotic zeal of Mr. Shipley, and of its first president, lord Folkestone.—**FINE ARTS.** The first public exhibition by the artists of the British metropolis took place in 1760, at the rooms of the Society of Arts, and was repeated there for several years, till, in process of time, the Royal Academy was founded. See *Royal Academy*. The Society of British Artists was instituted May 21, 1823; and their first exhibition was opened April 19, 1824. The Society for the Encouragement of the Fine Arts was founded in Dec. 1858. See *British Institution*; *National Gallery*.

ART-UNIONS began in France and Germany early in the present century. The first in Britain was established at Edinburgh; that in London was founded in 1836, and chartered in 1846, when these unions were legalised. Every subscriber is entitled to prints, and has the chance of drawing prizes.

ARUNDEL CASTLE (Sussex), built by the Saxons about 800. The duke of Norfolk enjoys the earldom of Arundel, as a feudal honour, by inheritance and possession of the castle, without any other creation. Philip Howard, son of the attainted duke of Norfolk, was made earl of Arundel, by summons, as possessor of this castle, 1580. It was thoroughly repaired by a late duke at a vast expense.

ARUNDELIAN MARBLES, called also Oxford Marbles; one containing the chronology of ancient history from 1582 to 355 B.C., and said to have been sculptured 264 B.C. They consist of 37 statues, 128 busts, and 250 inscriptions, and were found in the isle of Paros, in the reign of James I., about 1610. They were collected by Mr. W. Petty, purchased by lord Arundel, and given by his grandson Henry Howard, afterwards duke of Norfolk, to the university of Oxford in 1607; and are therefore called also OXFORD MARBLES. The

characters of the inscriptions are Greek. There are two translations : by *Selden*, 1628 : by *Prideaux*, 1676. A variorum edition of the inscriptions, by *Maittaire*, appeared in 1732, and a fine one by *Chandler* in 1763. See *Kidd's Tracts* ; and *Porson's Treatise*, 1789.

ARUSPICES. See *Haruspices*.

AS, a Roman weight and coin : when considered as a weight, it was a pound ; when a coin, it had different weights, but always the same value. In the reign of *Servius*, the *as* weighed a pound of brass ; in the first Punic war, it weighed two ounces, 264 B.C. ; in the second Punic war, one ounce, 218 B.C. ; and afterwards half an ounce ; its value was about three farthings sterling.

ASAPH, ST. (N. Wales), a bishopric founded by *Kentigern*, bishop of Glasgow. On returning into Scotland about 560, he left a holy man, St. Asaph, his successor, from whom the see takes its name. It is valued in the king's books at 187*l.* 11*s.* 6*d.* By an order in council, 1838, the sees of St. Asaph and Bangor were to have been united on the next vacancy in either ; and the bishopric of Manchester was to have been then created. This order was annulled in 1846, and the two sees still exist. Present income, 4200*l.* See *Manchester*.

RECENT BISHOPS OF ST. ASAPH.

1802. Samuel Horsley, died Oct. 4, 1806.
1806. William Cleaver, died May 15, 1815.
1815. John Luxmoore, died Jan. 21, 1830.

1830. William Carey, died Sept. 13, 1846.
1846. Thomas Fowler Short (PRESENT bishop, 1865).

ASBESTOS, a native fossil stone, which may be split into threads and filaments, and which is endued with the property of remaining unconsumed in fire. Cloth was made of it by the Egyptians (*Herodotus*), and napkins in the time of *Pliny*, 74 ; and also paper. The spinning of asbestos known at Venice, about 1500. *Porta*.

ASCALON (Syria), a city of the Philistines, shared the fate of Phœnicia and Judea. The Egyptian army was defeated here by the Crusaders, under Godfrey of Bouillon, Aug. 12, 1099. Ascalon was besieged by the latter in 1148, taken in 1153 ; and again in 1191. Its fortifications were destroyed for fear of the Crusaders by the Sultan in 1270.

ASCENSION, an island in the Atlantic ocean, 800 miles N. W. of St. Helena, discovered by the Portuguese in 1501 ; and taken possession of by the English in 1815.

ASCENSION DAY, also called Holy Thursday, when the church celebrates the ascension of our Saviour, the fortieth day after his resurrection from the dead, May 14, 33 ; first commemorated, it is said, 68. Ascension day, 1866, May 10 ; 1867, May 30 ; 1868, May 21.

ASCULUM, now Ascoli, a city of the Picentes, Central Italy, E. Near it, Pyrrhus of Epirus defeated the Romans, 279 B.C. In 268 B.C., the whole country of the Picentes was subdued by the consul Sempronius. In 1190 A.D. Andrea, the general of the emperor Henry VI., who was endeavouring to wrest the crown of Naples from Tancred, was defeated and slain.

ASHANTEES, a warlike tribe of negroes of West Africa. In 1807 they conquered Fantee, in which the British settlement Cape Coast Castle is situated. On the death of the king, who had been friendly to the English, hostilities began ; and on Jan. 21, 1824, the Ashantees defeated about 1000 British under sir Charles McCarthy at Accra, and brought away his skull with others as trophies. They were totally defeated, Aug. 27, 1826, by col. Purdon. The governor of Cape Coast Castle began a war with the Ashantees in spring of 1863. The British troops suffered much through disease ; and the war was suspended by the government in May, 1864.

ASHBURTON TREATY, concluded at Washington, Aug. 9, 1842, by Alexander, lord Ashburton, and John Tyler, president of the United States : it defined the boundaries of the respective countries between Canada and the state of Maine, settled the extradition of criminals, &c.

ASHDOD, or Azotus, the seat of the worship of the Phœnician god Dagon, which fell down before the ark of the Lord : captured by the Philistines from the Israelites, about 1141 B.C. (1 *Sam.* v.).

ASHDOWN, or Assendune, now thought to be Aston, Berks, where Ethelred and his brother Alfred defeated the Danes in 871.

ASHMOLEAN LIBRARY (books, manuscripts, coins, &c.), was presented to the university of Oxford by Elias Ashmole, the herald and antiquary, about 1682. It included

the collections of the Tradescants, to whom he was executor. He died at Lambeth in 1692. The Ashmolean Society, Oxford (scientific), was established in 1828.

ASHTAROTH, a Phœnician goddess, occasionally worshipped by the Israelites (see *Judges* ii. 13) about 1406 B.C., and even by Solomon, about 984 B.C. (1 *Kings* xi. 5).

ASH-WEDNESDAY, the first day of Lent, which in early times began on the Sunday now called the first in Lent. Pope Felix III., in 487, first added the four days preceding the old Lent Sunday, to raise the number of fasting days to forty; Gregory the Great (pope, 590) introduced the sprinkling of ashes on the first of the four additional days, and hence the name of *Dies Cinerum*, or Ash-Wednesday. At the Reformation this practice was abolished, "as being a mere shadow, or vain show."

ASIA, the largest division of the globe, so called by the Greeks, from the nymph Asia, the daughter of Oceanus and Tethys, the wife of Japhet. Asia was the first quarter of the world peopled: here the law of God was first promulgated; here many of the greatest monarchies of the earth had their rise; and hence most of the arts and sciences have been derived. Its early history is derived from Herodotus, who relates the wars of Cæsus, Cyrus, and others. See *China, India, Persia, and the other countries*.

ASIA MINOR (now Anatolia), comprised the Ionian colonies on the coast, the early seats of Greek civilisation, and the countries Mysia, Phrygia, Lycia, Bithynia, Caria, Lydia, Cappadocia, Galatia, &c., with the cities Troy, Ephesus, Smyrna (*all which see*). From the time of the rise of the Assyrian monarchy, about 2000 B.C., to that of the Turks under Osman, Asia Minor was the battle-field of the conquerors of the world.

ASIATIC SOCIETIES. The "Asiatic Society of Bengal," at Calcutta, was established by sir William Jones in 1784, "the bounds of its investigation to be the geographical limits of Asia." The "Royal Asiatic Society," which has several branches in India, was founded in 1823. It established the "Oriental Translation Fund" in 1828, which has published 83 volumes of Eastern literature (1865).

ASKESIAN SOCIETY (from the Greek *askēsis*, exercise), instituted in March, 1796, by a number of young men for discussing philosophical subjects. Its founders were the afterwards celebrated Wm. Allen, Wm. Phillips, Alex. Tilloch, Luke Howard, W. H. Pepsy, and others. In 1806 it merged into the Geological Society.

ASPERNE AND ENSLING, near the Danube and Vienna, where a series of desperate conflicts took place between the Austrian army under the archduke Charles, and the French under Napoleon, Massena, &c., on May 21-22, 1809, ending in the defeat of Napoleon; the severest check that he had yet received. The loss of the former exceeded 20,000 men, and of the latter 30,000. The daring marshal Lannes was killed; the bridge of the Danube was destroyed, and Napoleon's retreat endangered; but the success of the Austrians had no beneficial effect on the subsequent prosecution of the war.

ASPHALT, a solid bituminous substance, which in nature probably derived its origin from decayed vegetable matter. The artificial asphalt obtained from gas-works began to be used as pavement about 1838. Claridge's patent asphalt was laid down in Trafalgar-square, Jan. 1864.

ASPROMONTE, Naples. Here Garibaldi was defeated, wounded, and taken prisoner Aug. 29, 1862, having injudiciously risen against the French occupation of Rome.

ASSAM (N. E. India) came under British dominion in 1825, and was surrendered by the king of Ava in 1826. The tea-plant was discovered here by Mr. Bruce in 1823. A superintendent of the tea-forests was appointed in 1836, the cultivation of the plant having been recommended by lord William Bentinck, in 1834. The Assam Tea Company was established in 1839. The tea was much in use in England in 1841. Chinese labour has been introduced, and the growth of tea is enormously increasing.

ASSASSINATION PLOT, said to have been formed by the earl of Aylesbury and others to assassinate William III., near Richmond, Surrey, and restore James II. Its object would have been attained, Feb. 14, 1695-6, but for its timely discovery by Prendergast.

ASSASSINS, OR ASSASSINIANS, a band of fanatical Mahometans, collected by Hassan-ben-Sabah, and settled in Persia about 1090. In Syria they possessed a large tract of land among the mountains of Lebanon. They murdered the marquis of Montferrat in 1192; Lewis of Bavaria in 1213; and the khan of Tartary in 1254. They were conquered by the Tartars in 1257; and were extirpated in 1272. The chief or king of the corps assumed the title of "*Ancient of the Mountain*," and "*Old Man of the Mountain*."* They trained up young people to assassinate such persons as their chief had devoted to destruction. *Hénaull*. From this fraternity the word *assassin* has been derived.

ASSAY OF GOLD AND SILVER originated with the bishop of Salisbury, a royal treasurer in the reign of Henry I. *Du Cange*. But certainly some species of assay was practised as early as the Roman conquest. Assay was established in England 1354; regulated 13 Will. III. 1700, and 4 Anne, 1705. Assay masters appointed at Sheffield and Birmingham, 1773. The alloy of gold is silver and copper, that of silver is copper. Standard gold is 2 carats of alloy to 22 of fine gold. Standard silver is 18 dwts. of copper to 11 ozs. 2 dwts. of fine silver. See *Goldsmiths' Company*.

ASSAYE (E. Indies), BATTLE OF. The British army, under general Arthur Wellesley (afterwards duke of Wellington), entered the Mahratta states on the south; took the fort of Ahmednuggur, Aug. 12; and defeated Scindiah and the rajah of Berar at Assaye, Sept. 23, 1803. This was Wellington's first great battle, in which he opposed a force full more than ten times greater than his own (only 4500 men). The enemy retired in great disorder, leaving behind the whole of their artillery, ammunition, and stores.

ASSEMBLY OF DIVINES held at Westminster, July 1, 1643, convoked by order of parliament, to consider the liturgy, government, and doctrines of the church. Two members were elected for each county. They adopted the Scottish covenant, and drew up the directory for public worship, a confession, and the catechisms now used by the church of Scotland. The last (1163rd) meeting was on Feb. 22, 1649. See *Church of Scotland*.

ASSENT. See *Royal Assent*.

ASSESSED TAXES. The date of their introduction has been as variously stated as the taxes coming under this head have been defined—all things have been assessed, from lands and houses to dogs and hair-powder. By some the date is referred to the reign of Ethelbert, in 991; by others to that of Henry VIII. 1522; and by more, to the reign of William III. 1689, when a land-tax was imposed. See *Land Tax*. The assessed taxes yielded in 1815 (the last year of the war), exclusively of the land-tax, 6,524,766*l.*, their highest amount. These imposts have varied in their nature and amount, according to the exigencies of the state, and the contingencies of war and peace. They were considerably advanced in 1797 and 1801, *et seq.*, but considerably reduced in 1816, and in subsequent years. The last act for the repeal of certain assessed taxes was passed 16 & 17 Vict. cap. 90, Aug. 20, 1853, which was explained and amended by 17 & 18 Vict. cap. 1, Feb. 17, 1854.—Acts for the better securing and accounting for the Assessed and Income Taxes, Aug. 10, 1854. See *Taxes and Income Tax*.

ASSIENTO, a contract between the king of Spain and other powers, for furnishing the Spanish dominions in America with negro slaves, began with the Flemings. By the treaty of Utrecht in 1713, the British government engaged to furnish 4800 negroes annually to Spanish America for thirty years. The contract was vested in the South Sea Company; but this infamous contract was given up in 1750. See *Guinea*.

ASSIGNATS, a paper currency, ordered by the National Assembly of France to support public credit during the revolution, April, 1790. At one period, eight milliards, or nearly 350 millions of pounds sterling, of this paper were in circulation in France and its dependencies. *Atison*. Assignats were superseded by mandats in 1796.

ASSIZE OF BATTLE. See *Appeal*.

ASSIZE OF BREAD, &c. See *Bread and Wood*.

ASSIZE COURTS (from *assideo, I sit*) are of very ancient institution in England, and in old law books are defined to be an assembly of knights and other substantial men, with the justice, to meet at a certain time and place: regulated by Magna Charta, 1215. The present justices of assize and *Nisi Prius* are derived from the statute of Westminster, 13 Edw. I. 1284. *Coke; Blackstone*. "The king doth will that no lord, or other of the

country, shall sit upon the bench with the justices to take assize in their sessions in the counties of England, upon great forfeiture to the king," 20 Rich. II. 1396. *Statutes, Brough Act*. Assizes are general or special; general when the judges go their circuits, and special when a commission is issued to take cognisance of one or more causes. See *Bloody Assize*.

ASSOCIATIONS. See *National Associations*.

ASSUMPTION, FEAST OF THE, Aug. 15. It is observed by the church of Rome in honour of the Virgin Mary, who is said to have been taken up to heaven in her corporeal form, body and spirit, on this day, 45, in her 75th year. The festival was instituted in the 7th century, and enjoined by the council of Mentz, 813.

ASSURANCE. See *Insurance*.

ASSYRIA, an Asiatic country between Mesopotamia and Media, was the seat of the earliest recorded monarchy. Its history is mainly derived from Ctesias, an early Greek historian of doubtful authenticity, Herodotus, and the Holy Scriptures. The discovery of the very interesting Ninevite antiquities, now in the British Museum, by Mr. Layard, and the deciphering of many ancient cuneiform inscriptions, by Grotefend, sir H. Rawlinson, and other scholars, have drawn much attention to the Assyrians. The chronologers, Blair, Usher, Hales, and Clinton, differ much in the dates they assign to events in Assyrian history, of which a large portion is now considered fabulous by modern writers.

ASTLEY'S AMPHITHEATRE. See under *Theatres*.

ASTORGA (N. W. Spain), the ancient Asturica Augusta, was taken by the French in 1810, and treated with great severity.

ASTRACAN (S. E. Russia), a province acquired from the Mogul's empire in 1554; visited and settled by Peter the Great in 1722.

ASTROLOGY. Judicial astrology was invented by the Chaldeans, and hence was transmitted to the Egyptians, Greeks, and Romans. It was much in vogue in Italy and France in the time of Catherine de Medicis (married to Francis I. of France, 1533). *Hénault*. The early history of astrology in England is very little known. It is said that Bede, 673—735, was addicted to it; and Roger Bacon, 1214—1292. Lord Burleigh calculated the nativity of Elizabeth, and she, and all the European princes, were the humble servants of Dee, the astrologer and conjuror; but the period of the Stuarts was the acme of astrology amongst us. It is stated that Lilly was consulted by Charles I. respecting his projected escape from Carisbrook castle in 1647. *Ferguson*. Astrological almanacs are still published in London.

ASTRONOMY. The earliest astronomical observations were made at Babylon about 2234 B.C. The study of astronomy was much advanced in Chaldaea under Nabonassar; it was known to the Chinese about 1100 B.C.; some say many centuries before. See *Eclipses, Planets, Comets*.

ASTURIAS (N. W. Spain), an ancient principality, the cradle of the present monarchy. Here Pelago collected the Gothic fugitives, about 713, and founded a new kingdom, and by his victories permanently checked the progress of Moorish conquest. For a list of his successors, see the article *Spain*. The heir-apparent of the monarchy has borne the title "prince of Asturias" since 1388, when it was assumed by Henry, son of John I. king of Leon, on his marriage with a descendant of Peter of Castile. In 1808, the junta of Asturias began the organised resistance to the French usurpation.

ASYLUMS, OR PRIVILEGED PLACES, at first were places of refuge for those who by accident or necessity had done things that rendered them obnoxious to the law. God commanded the Jews to build certain cities for this purpose, 1451 B.C., *Numbers* xxv.—The posterity of Hercules are said to have built one at Athens, to protect themselves against such as their father had irritated. Cadmus built one at Thebes, 1490 B.C., and Romulus one at Mount Palatine, 751 B.C. See *Sanctuaries*.

ATELIERS NATIONAUX (National Workshops) were established by the French provisional government in Feb. 1848. They interfered greatly with private trade, and about 100,000 workmen threw themselves upon the government for labour and payment. The breaking-up of the system led to the fearful conflicts in June following. The system was abolished in July.

ATHANASIAN CREED. Athanasius, of Alexandria, was elected bishop, 326. He firmly opposed the doctrines of Arius (who denied Christ's divinity); was several times exiled;

and died in 373. The creed which goes by his name is supposed by many authorities to have been written about 340; by others to be the compilation of Vigilius Tapsensis, an African bishop in the 5th century. It was first commented on by Venatius Fortunatus, bishop of Poitiers in 570. Dr. Waterland's History of this creed (1723) is exhaustive. See *Arians*.

ATHEISM (from the Greek *a*, without, *Theos*, God, see *Psalms* xiv. 1). This doctrine has had its votaries and martyrs. Spinoza was the defender of a similar doctrine (1632—1677). Lucilio Vanini publicly taught atheism in France, and was condemned to be burnt at Toulouse in 1619. Mathias Knutzen, of Holstein, openly professed atheism, and had upwards of a thousand disciples in Germany about 1674; he travelled to make proselytes, and his followers were called *Conscienciaries*, because they held that there is no other deity than conscience. Many eminent men have professed atheism. "Though a small draught of philosophy may lead a man into atheism, a deep draught will certainly bring him back again to the belief of a God." *Lord Bacon*.

ATHENÆA were great festivals celebrated at Athens in honour of Minerva. One was called Panathenæa, the other Chalea; they are said to have been instituted by Erechtheus or Orpheus, 1397 or 1495 B.C.; and Theseus afterwards renewed them, and caused them to be observed by all the Athenians, the first every fifth year, 1234 B.C. *Plutarch*.

ATHENÆUM, a place at Athens, sacred to Minerva, where the poets and philosophers recited their compositions. The most celebrated Athenæa were at Athens, Rome, and Lyons: that of Rome, of great beauty, was erected by the emperor Adrian, 125.—The **ATHENÆUM CLUB** of London was formed in 1823, for the association of persons of scientific and literary attainments, artists, noblemen and gentlemen, patrons of learning, &c., by the earl of Aberdeen, marquess of Lansdowne, Dr. T. Young, Moore, Davy, Scott, Mackintosh, Croker, Chantrey, Faraday, Lawrence, and others; the clubhouse was erected in 1829-30 on the site of the late Carlton-palace; it is of Grecian architecture, and the frieze is an exact copy of the Panathenæic procession which formed the frieze of the Parthenon.—The Liverpool Athenæum was opened Jan. 1, 1799.—At Manchester, Bristol, and many other places, buildings under this name, and for a like purpose, have been founded.—The *Athenæum*, a weekly literary journal, first appeared in 1828.

ATHENS, the capital of ancient Attica, and of the modern kingdom of Greece. The first sovereign mentioned is Ogyges, who reigned in Beotia, and was master of Attica, then called Ionia. In his reign (about 1764 B.C.) a deluge took place (by some supposed to be the universal deluge), that laid waste the country, in which state it remained two hundred years, until the arrival of the Egyptian Cecrops and a colony, by whom the land was re-peopled, and twelve cities founded, 1556 B.C. The city is said to have been first called Cecropia; the name having been changed to Athens in honour of Minerva (Athenē), her worship having been introduced by Erechtheus 1383 B.C. Athens was ruled by seventeen successive kings (487 years), by thirteen *perpetual* archons (316 years), seven *decennial* archons (70 years), and lastly by *annual* archons (760 years). It attained great power, and perhaps no other city in the world can boast, in such a short space of time, of so great a number of citizens illustrious for wisdom, genius, and valour. The ancients, to distinguish Athens in a more peculiar manner, called it *Asta*, the city, by eminence, and one of the eyes of Greece. See *Greece*.

ATHLONE, Roscommon, Ireland, formerly a place of great strength and beauty, was burnt during the civil war in 1641. After the battle of the Boyne, colonel R. Grace held Athlone for James II. against a besieging army, but fell when it was taken by assault by Ginckel, June 30, 1691. *See Aughrin.*

ATMOLYSIS, a method of separating the constituent gases of a compound gas (such as atmospheric air) by causing it to pass through a vessel of porous material (such as graphite); first made known in Aug., 1863, by the discoverer, professor T. Graham, F.R.S., Master of the Mint.

ATOSPHERIC RAILWAYS. The idea of producing motion by atmospheric pressure was conceived by Papin, the French engineer, about 1680. Experiments were made on a line of rail, laid down across Wormwood Scrubs, London, between Shepherd's Bush and the Great Western railroad, to test the efficacy of atmospheric tubes, the working of the air-pump, and speed of carriages upon this new principle on railroads in June, 1840, and then tried on a line between Croydon and London; 1845. An atmospheric railway was commenced between Dalkey and Killiney, in the vicinity of Dublin, in Sept. 1843; opened March 29, 1844; discontinued

in 1855. A similar railway was proposed to be laid down in the streets of London by Mr. T. W. Rammell in 1857. Mr. Rammell's Pneumatic Railway was put in action successfully at the Crystal Palace on Aug. 27, 1864, and following days. An act for a pneumatic railway between the Waterloo railway station and Whitehall was passed in July, 1865.

ATOMIC THEORY, in chemistry, deals with the indivisible particles of all substances. The somewhat incoherent labours of his predecessors (such as Wenzel in 1777) were reduced by John Dalton to four laws of combining proportion, which have received the name of "Atomic Theory." His "Chemical Philosophy," containing the exposition of his views, appeared in 1808. Dr. C. Daubeny's work on the Atomic Theory was published in 1850. In his standard of *Atomic weights* Dalton takes hydrogen as 1. Berzelius, who commenced his elaborate researches on the subject in 1848, adopts oxygen as 100. The former standard is used in this country, the latter on the continent.

ATTAINDER, ACTS OF, whereby a person not only forfeited his land, but his blood was attainted, have been numerous. Two witnesses in cases of high treason are necessary where corruption of blood is incurred, unless the party accused shall confess, or stand mute, 7 & 8 Will. III. 1694-5. *Blackstone*. In 1814 and 1833 the severity of attainders was mitigated. The attainder of lord Russell, who was beheaded in Lincoln's-inn-fields, July 21, 1683, was reversed under William, in 1689. The rolls and records of the acts of attainder passed in the reign of James II. were cancelled and publicly burnt, Oct. 2, 1695. Amongst the last acts reversed was the attainder of the children of lord Edward Fitzgerald (who was implicated in the rebellion in Ireland of 1798), July 1, 1819.

ATTICA. See *Athens*.

ATTILA, surnamed the "*Scourge of God*," and thus distinguished for his conquests and his crimes, having ravaged the eastern empire from 445 to 450, when he made peace with Theodosius. He invaded the western empire, 450, and was defeated by Aëtius at Châlons, 451; he then retired into Pannonia, where he died through the bursting of a bloodvessel on the night of his nuptials with a beautiful virgin named Ildico, 453.

ATTORNEY (from *tour*, turn), a person qualified to act for others at law. The number in Edward III.'s reign was under 400 for the whole kingdom. In the 32nd of Henry VI. 1454, a law reduced the practitioners in Norfolk, Norwich, and Suffolk, from eighty to fourteen, and restricted their increase. The number of attorneys now practising in England, or registered, or retired, is said to be about 13,000. The number in Ireland is stated at 2000. The qualifications of practice of attorneys and solicitors are now regulated by acts passed in 1843 and 1861.

ATTORNEY-GENERAL, a law officer of the crown, appointed by letters patent. He has to exhibit informations and prosecute for the king in matters criminal; and to file bills in exchequer, for any claims concerning the crown in inheritance or profit. Others may bring bills against the king's attorney. The first attorney-general was William de Gisilham, 7 Edward I. 1278. *Beaton*.

ATTRACTION is described by Copernicus, about 1520, as an appetence or appetite which the Creator impressed upon all parts of matter. It was described by Kepler to be a corporeal affection tending to union, 1605. In 1687, sir I. Newton published his "*Principia*," containing his important researches on this subject. There are the attractions of *Gravitation*, *Magnetism*, and *Electricity*, which see.

AUBAINE, a right of the French kings, which existed from the beginning of the monarchy, whereby they claimed the property of every stranger who died in their country, without having been naturalised, was abolished by the national assembly in 1790; re-established by Napoleon; and finally annulled July 14, 1819.

AUCKLAND, capital of New Zealand (north island), was founded in 1840. The population of the district, in 1857, was estimated at 15,000 Europeans, and 35,000 natives.

AUCTION, a kind of sale known to the Romans, mentioned by Petronius Arbitr (about 66). The first in Britain was about 1700, by Elisha Yale, a governor of Fort George in the East Indies, who thus sold the goods he had brought home. Auction and sales' tax began, 1779. Various acts of parliament have regulated auctions and imposed duties, in some cases as high as five per cent. By 8 Vict. c. 15 (1845), the duties were repealed, and a charge imposed "on the licence to be taken out by all auctioneers in the United Kingdom, of 10*l.*" In 1858 there were 4358 licences granted, producing 43,580*l.* Certain sales are now exempt from being conducted by a licensed auctioneer, such as goods and chattels under a distress for rent, and sales under the provisions of the Small Debts' acts for Scotland and Ireland.

AUDIANI, followers of Audens of Mesopotamia, who had been expelled from the Syrian church on account of his severely reproofing the vices of the clergy, about 338, formed a sect and became its bishop. He was banished to Scythia, where he is said to have made many converts. His followers celebrated Easter at the time of the Jewish passover, attributed the human figure to the Deity, and had other peculiar tenets.

AUDIT-OFFICE, Somerset House. Commissioners for auditing the public accounts were appointed in 1785. Many statutes regulating their duties have since been enacted.

AUERSTADT (Prussia). Here and at Jena, on Oct. 14, 1806, the French signally defeated the Prussians. See *Jena*.

AUGHRIM, near Athlone, in Ireland, where, on July 12, 1691, a battle was fought between the Irish, headed by the French general St. Ruth, and the English under general Ginckel. The former were defeated and lost 7000 men; the latter lost only 600 killed and 960 wounded. St. Ruth was slain. This engagement proved decisively fatal to the interests of James II. in Ireland. Ginckel was immediately after created earl of Athlone. The ball by which St. Ruth was killed is still suspended in the choir of St. Patrick's cathedral, Dublin.

AUGMENTATION OF POOR LIVINGS' OFFICE, was established in 1704. 5597 poor clerical livings, not exceeding 50*l.* *per annum*, were found by the commissioners under the act of Anne capable of augmentation, by means of the bounty then established by parliament.

AUGMENTATIONS COURT was established in 1535 by 27 Henry VIII. c. 27, in relation to the working of cap. 28 of the same session, which gave to the king the property of all monasteries having 200*l.* a year. The court was abolished by Mary in 1553, and restored by Elizabeth in 1558.

AUGSBURG (Bavaria), originally a colony settled by Augustus, about 12 B.C.; became a free city, and flourished during the middle ages. Here many important diets of the empire have been held. In A.D. 952, a council confirmed the order for the celibacy of the priesthood; and on Sept. 25, 1555, the celebrated treaty of Nassau was signed, by which religious liberty was secured to Germany. *League of Augsburg.* A treaty between Holland and other European powers, to cause the treaties of Munster and Nimeguen to be respected, signed 1686. See *Munster* and *Nimeguen*. Augsburg has suffered much by war, having been frequently taken by siege, 788, 1703, 1704, and, last, by the French, Oct. 10, 1805, who restored it to Bavaria in March, 1806.

AUGSBURG CONFESSION (Articles of Faith, drawn up by Luther, Melancthon, and other reformers, and presented to the emperor Charles V. June 25, 1530), was directly opposed to the abuses of the church of Rome. It was signed by the elector of Saxony, and other princes of Germany, and was delivered to the emperor in the palace of the bishop of Augsburg. See *Interim*.

AUGURY. Husbandry was in part regulated by the coming or going of birds, long before the time of Hesiod. Three augurs, at Rome, with vestals and several orders of the priesthood, were formally constituted by Numa, 710 B.C. The number had increased, and was fifteen at the time of Sylla, 81 B.C., and the college of augurs was abolished by Theodosius about A.D. 391.

AUGUST, the eighth Roman month of the year (previously called *Sextilis*, or the sixth from March), by a decree of the senate received its present name in honour of Augustus Cæsar, in the year 8, or 27, or 30 B.C., because in this month he was created consul, had thrice triumphed in Rome, added Egypt to the Roman empire, and made an end of the civil wars. He added one day to the month, making it 31 days.

AUGUSTINS, a religious mendicant order, which ascribes its origin to St. Augustin, bishop of Hippo, who died 430. These monks (termed Austin friars) first appeared about the 11th century, and the order was constituted by pope Alexander IV., in 1256. The rule requires strict poverty, humility, and chastity. Martin Luther was an Augustin monk. The Augustins held the doctrine of free grace, and were rivals of the Dominicans. The order appeared in England soon after the conquest. One of their churches, at Austin Friars, London, erected in 1354, and since the Reformation used by Dutch protestants, was partially destroyed by fire, Nov. 22, 1862. A religious house of the order, dedicated to S. Monica, mother of Augustin, was founded in Hoxton-square, London, 1864.

AULIC COUNCIL, a sovereign court in Germany, established by the emperor Maximilian I., in 1506, being one of the two courts, the first called the Imperial Chamber, formerly held at Spire, and afterwards at Wetzlar, and the other the Aulic council at Vienna. These courts, having concurrent jurisdiction, were instituted for appeals in particular cases from the courts of the Germanic states.

AURAY (N.W. France). Here, on Sept. 29, 1364, the English, under John Chandos, totally defeated the French and captured their heroic leader Du Guesclin. Charles of Blois, made duke of Brittany by the king of France, was slain, and a peace was made in April, 1365.

AURICULAR CONFESSION. The confession of sin at the ear (Latin *auris*) of the priest must have been an early practice, since it is said to have been forbidden in the 4th century by Nectarius, archbishop of Constantinople. It was enjoined by the council of Lateran, in 1215, and by the council of Trent in 1551. It was one of the six articles of faith enacted by our Henry VIII. in 1539, but was abolished in England at the Reformation. Its revival here has been attempted by the church party called Puseyites or Tractarians; but without much success.*

AURIFLAMMA, OR ORIFLAMME, the national golden banner mentioned in French history, belonging to the abbey of St. Denis, and suspended over the tomb of that saint, 1140. Louis le Gros was the first king who took this standard from the abbey to battle, 1124. *Hénault*. It appeared for the last time at Agincourt, 1415. *Tillet*.

AURORA FRIGATE, sailed from Britain in 1771, to the East Indies, and was never again heard of.

* The rev. Alfred Poole, one of the curates of St. Barnabas, Knightsbridge, was suspended from his office for practising auricular confession in June, 1858, by the bishop of London. On appeal, the suspension was confirmed in January, 1859. Much excitement was created by a similar attempt by the rev. Temple West at Boyne Hill, in September, 1858.

AURORÆ BOREALES AND AUSTRALES (Northern and Southern Polar Lights), though rarely seen in central Europe, are frequent in the arctic and antarctic regions. In March, 1716, an aurora borealis extended from the west of Ireland to the confines of Russia. The whole horizon in the lat. of 57° N. overspread with continuous haze of a dismal red during the whole night, by which many people were much terrified, Nov. 1765.—Mr. Foster, the companion of captain Cook, saw the aurora in lat. 58° S. Its appearance in the southern hemisphere had been previously doubted.*

AUSCULTATION. See *Stethoscope*.

AUSTERLITZ (Moravia), where a battle was fought between the French and the allied Austrian and Russian armies, Dec. 2, 1805. Three emperors commanded: Alexander of Russia, Francis of Austria, and Napoleon of France. The killed and wounded exceeded 30,000 on the side of the allies, who lost forty standards, 150 pieces of cannon, and thousands of prisoners. The decisive victory of the French led to the treaty of Presburg, signed Dec. 26, 1805. See *Presburg*.

AUSTRALASIA, the fifth great division of the world. This name, originally given it by De Brosse, includes Australia, Van Diemen's Land, New Guinea, New Britain, New Caledonia, &c., mostly discovered within two centuries. Accidental discoveries were made by the Spaniards as early as 1526; but the first accurate knowledge of these southern lands is due to the Dutch, who in 1605 explored a part of the coast of New Guinea. Torres, a Spaniard, passed through the straits which now bear his name, between that island and Australia, and gave the first correct report of the latter, 1606. The Dutch continued their discoveries. Between 1642 and 1644, Tasman completed a discovery of a great part of the Australian coast, together with the island of Van Diemen's Land (also called Tasmania). Wm. Dampier, an Englishman, between 1684 and 1690, explored a part of the W. and N. W. coasts. Between 1763 and 1766, Wallis and Carteret followed in the track of Dampier, and added to his discoveries; and in 1770, Cook first made known the East coast of Australia. Furneaux, in 1773, Bligh in 1789, Edwards in 1791, Bligh (a second time) in 1792, Portlock same year, Brampton and Alt in 1793, and Bass and Flinders explored the coasts and islands in 1798-9 and discovered Bass's Straits. Grant in 1800, and Flinders again (1801-5) completed the survey. *M'Culloch*.

AUSTRALIA (formerly New Holland), the largest island and smallest continent; with an estimated area of about three million square miles, including five provinces—New South Wales, Victoria (formerly Port Phillip), South Australia, West Australia (or Swan River), and Queensland (*which see*). Population, with Tasmania and New Zealand, in 1863, about 1,366,956.

* The aurora is now attributed by many philosophers to the passage of electric light through the rarefied air of the polar regions. In August and September, 1859, when brilliant aurora were very frequent, the electric telegraph wires were seriously affected, and communications interrupted. Auroræ were seen at Rome and Basel, and also in Australia.

AUSTRASIA, *Österreich* (Eastern Kingdom), also called Metz, a French kingdom which lasted from the 6th to the 8th century. It began with the division of the territories of Clovis by his sons, 511, and ended by Carloman becoming a monk and surrendering his power to his brother Pepin, who thus became sole king of France, 747.

AUSTRIA, a Hamburg company's steamship, sailed from Southampton for New York Sept. 4, 1858, with 538 persons on board. On Sept. 13, in lat. 45° N., long. 41° 30' W., it caught fire through the carelessness of some one in burning some tar to fumigate the steerage. Only 67 persons were saved—upwards of 60 by the *Maurice*, a French barque; the rest by a Norwegian barque. A heartrending account was given in the *Times*, Oct. 11, 1858, by Mr. Charles Brews, an English survivor.

AUSTRIA, *Österreich* (Eastern Kingdom), anciently Noricum and part of Pannonia, was annexed to the Roman empire about 33; was overrun by the Huns, Avars, &c., during the 5th and 6th centuries, and taken from them by Charlemagne, 791-796. He divided the government of the country, establishing margraves of Eastern Bavaria and Austria. Louis

* GOLD DISCOVERY.—Mr. Edward Hargraves went to California in search of gold, and was struck with the similarity between the rocks and strata of California and those of his own district of Conobolas, some thirty miles west of Bathurst. On his return home, he examined the soil, and after one or two months' digging, found a quantity of gold, Feb. 12, 1851. He applied to the colonial government for a reward, which he readily obtained, with an appointment as commissioner of crown lands. The excitement became intense throughout the colony of New South Wales, rapidly spread to that of Victoria and other places; and in the first week of July, 1851, an aboriginal inhabitant, formerly attached to the Wellington mission, and then in the service of Dr. Kerr, of Wallawa, discovered, while tending his sheep, a mass of gold among a heap of quartz. Three blocks of quartz (from two to three hundred weight), found in the Murroo Creek, fifty miles to the north of Bathurst, contained 112 lb. of pure gold, valued at 4000*l.* The "Victoria nugget," a magnificent mass of virgin gold, weighing 340 ounces, was brought to England from the Bendigo diggings; and a piece of pure gold of 106 lb. weight was also found. From the gold fields of Mount Alexander and Ballarat, in the district of Victoria, up to Oct. 1852, there were found 2,532,422 ounces, or 105 tons 10 cwt. of gold; and the gold exported up to the same date represented 8,863,477*l.* sterling. In Nov. 1856, the "James Baines" and "Lightning" brought gold from Melbourne valued at 1,200,000*l.* The "Welcome nugget" weighed 2019½ ounces; value, 8376*l.* 10*s.* 10*d.*; found at Baker's Hill, Ballarat, June 11, 1858. Between May 1851, and May 1861, gold to the value of 96,000,000*l.* had been brought to England from New South Wales and Victoria.

the German, son of Louis le Débonnaire, about 817, subjugated Radbod, margrave of Austria; but in 883 the descendants of the latter raised a civil war in Bavaria against the emperor Charles the Fat, and eventually the margraves of Austria were declared immediate princes of the empire. In 1156 the margraviate was made a hereditary duchy by the emperor Frederic I.; and in 1453 it was raised to an archduchy by the emperor Frederic III. Rodolph, count of Hapsburg, elected emperor of Germany in 1273, acquired Austria in 1278; and from 1493 to 1804 his descendants were emperors of Germany. On Aug. 11, 1804, the emperor Francis II. renounced the title of emperor of Germany, and became hereditary emperor of Austria. The condition of Austria is now greatly improving under the enlightened rule of the present emperor. The political constitution of the empire is based upon—1. The pragmatic sanction of Charles VI., 1734, which declares the indivisibility of the empire and rules the order of succession. 2. The pragmatic sanction of Francis II., Aug. 1, 1804, when he became emperor of Austria only. 3. The diploma of Francis-Joseph, Oct. 20, 1860, whereby he imparted legislative power to the provincial states and the council of the empire (Reichsrath). 4. The law of Feb. 26, 1861, on the national representation. Population of the empire in Oct. 1857, 35,018,988.

AUTHORS. For the law securing copyright, see *Copyrights*.

AUTO DA FÉ (Act of faith), the term given to the punishment of a heretic, generally burning alive, inflicted by the Inquisition (*which see*). Since 1203, more than 100,000 victims have been sacrificed by the sentence of the inquisitions of Roman Catholic countries. One of the last executions of this kind was at Goa, where twenty sufferers perished in the flames, 1717. An *auto da fé* took place at Lisbon, in 1761, when Malagrida, a Jesuit, was strangled and burnt for heresy.

AUTOMATON FIGURES (OR ANDROIDES), made to imitate living actions, are of early invention. Archytas' flying dove was formed about 400 B.C. Friar Bacon is said to have made a brazen head which spoke, A.D. 1264. Albertus Magnus spent thirty years in making another. A coach and two horses, with a footman, a page, a lady inside, were made by Camus for Louis XIV. when a child; the horses and figures moved naturally, variously, and perfectly, 1649. Vaucanson, in 1738, made an artificial duck, which performed every function of a real one, even an imperfect digestion—eating, drinking, and quacking. He also made a flute-player. The writing automaton, exhibited in 1769, was a pentagraph worked by a confederate out of sight. The automaton chess-player, exhibited the same year, was also worked by a hidden person, and so was "the invisible girl," 1800. Maelzel made a trumpeter about 1809. Early in this century, an automaton was exhibited in London which pronounced several sentences with tolerable distinctness. In July, 1864, the "anthropoglosson," exhibited in St. James's-hall, London, seemed to utter songs.

AUTOTYPOGRAPHY, a process of producing a metal plate from drawings, made known by Mr. Wallis, in April, 1863; it resembled *Nature-Printing* (*which see*).

AVA in 1822 became the capital of the Burmese empire, it is said, for the third time. A British embassy was received here in Sept. 1855.

AVARS, barbarians who ravaged Pannonia, and annoyed the eastern empire in the 6th and 7th centuries, subdued by Charlemagne about 799, after an eight years' war.

AVEBURY, OR ABURY (Wiltshire). Here are the remains of the largest Celtic or Druidical work in this country. They have been surveyed by Aubrey, 1648; Dr. Stukely,

1720; and sir R. C. Hoare, in 1812, and others. Much information may be obtained from Stukely's "Abury" (1743), and Hoare's "Ancient Wiltshire" (1812-21). Many theories have been put forth, but the object of these remains is still unknown. They are considered to have been set up during the "stone age," *i.e.*, when the weapons and implements were mainly formed of that material.

AVEIN, OR AVAINE (Luxemburg, Belgium). Here the French and Dutch defeated the Spaniards, May 20, 1635.

"*AVE MARIA*!" the salutation of the angel Gabriel to the Virgin (*Luke* i. 28), was made a formula of devotion by pope John XXI. about 1326. In the beginning of the 15th century Vincentius Ferrarius used it before his discourses. *Bingham*.

AVIGNON, a city, S. E. France, ceded by Philip III. to the pope in 1273. The papal seat was removed by Clement V. to Avignon, in 1309. In 1348 Clement VI. purchased the city from Jane, countess of Provence and queen of Naples. In 1408, the French, wearied of the schism, expelled Benedict XIII., and Avignon ceased to be the seat of the papacy. Here were held nine councils (1080—1457). It was seized and restored several times by the French kings; the last time restored on the suppression of the Jesuits, 1773. It was claimed by the national assembly, 1791, and was confirmed to France by the congress of sovereigns in 1815. In Oct. 1791, horrible massacres took place here.

AXE, WEDGE, WIMBLE, LEVER, and various tools in common use, are said to have been invented by Dædalus, an artificer of Athens, to whom also is ascribed the invention of masts and sails for ships, 1240 B.C. Many tools are represented on the Egyptian monuments.

AYACUCHO (Peru). Here the Peruvians finally achieved their independence by defeating the Spaniards, Dec. 9, 1824.

AYDE, OR AIDE, the tax paid by the vassal to the chief lord upon urgent occasions. In France and England an *aide* was due for knighting the king's eldest son. One was demanded by Philip the Fair, 1313. The *aide* due upon the birth of a prince, ordained by the statute of Westminster (Edward I.) 1285, for the ease of the subject, was not to be levied until he was fifteen years of age. The *aide* for the marriage of the king's eldest daughter could not be demanded in this country until her seventh year. In feudal tenures there was an *aide* for ransoming the chief lord; so when our Richard I. was kept a prisoner by the emperor of Germany, an *aide* of 20s., to redeem him, was enforced upon every knight's fee.

AYLESBURY, Buckinghamshire, was reduced by the West Saxons in 571. St. O'Syth, beheaded by the pagans in Essex, was buried there, 600. William the Conqueror invested his favourites with some of its lands, under the tenure of providing "straw for his bed-chambers; three eels for his use in winter; and in summer, straw, rushes, and two green geese thrice every year." Incorporated by charter in 1554.

AYLESFORD (Kent). Here, it is said, the Britons were victorious over the Saxon invaders, 455.

AZINCOUR. See *Agincourt*.

AZOFF, SEA OF, the Palus Mæotis of the ancients, communicates by the strait of Yenikalé (the Bosphorus Cimmerius) with the Black Sea, and is entirely surrounded by Russian territory; Taganrog and Kertch being the principal places. An expedition composed of British, French, and Turkish troops, commanded by sir G. Brown, arrived at Kertch, May 24, 1855, when the Russians retired, after blowing up the fortifications. On the 25th the allies marched upon Yenikalé, which also offered no resistance. On the same evening the allied fleet entered the sea of Azoff, and in a few days completed their occupation of it, after capturing a large number of merchant vessels, &c. An immense amount of stores was destroyed by the Russians to prevent them falling into the hands of the allies.

AZORES, OR WESTERN ISLES (N. Atlantic), belonging to Portugal, the supposed site of the ancient Atlantis, are said to have been discovered in the 15th century by a Dutchman who was driven on their coasts by the weather. Cabral, sent by the Portuguese court, fell in with St. Mary's in 1432, and in 1457 they were all discovered. Martin Behem found one of them covered with beech trees, and he called it therefore *Fuyal*; another abounding in sweet flowers, he called it *Flores*; and all, being full of hawks, were therefore named *Azores*. They were colonised about 1450. A violent concussion of the earth took place here for twelve days in 1591. A devastating earthquake in 1757. Here are fountains of boiling water. A volcano at St. George's destroyed the town of Ursulina, May, 1808; and in 1811 a volcano

appeared near St. Michael's, in the sea, where the water was eighty fathoms deep. An island called Sabrina gradually disappeared, Dec. 1812.

AZOTE, the name given by French chemists to nitrogen (*which see*).

AZTECS, the ruling tribe in Mexico at the time of the Spanish invasion (1519). In 1853 some pretended Aztec children were exhibited in London. They were considered to be mere dwarfs.

B.

BAAL (Lord), the male deity of the Phœnician nations, frequently made the object of worship by the Israelites; and established as such by Ahab, 918 B.C. His worshippers were massacred by Jehu and his temple defiled, 884 B.C.

BAALBEC, **HELIOPOLIS** (both meaning "City of the Sun"), an ancient city of Syria, of which magnificent ruins remain, described by Wood (in 1757), and others. Its origin (referred to Solomon) is lost in antiquity. Here Septimius Severus built a temple to the sun, 200. The city was sacked by the Moslems, 748, and by Timour Bey, 1400.

BABEL, **TOWER OF**, built by Noah's posterity, 2247 B.C. (*Genesis*, ch. xi.) The magnificent temple of Belus, asserted to have been originally this tower, is said to have had lofty spires, and many statues of gold, one of them forty feet high. In the upper part of this temple was the tomb of the founder, Belus (the Nimrod of the sacred scriptures), who was deified after death. *Blair*. The Birs Nimroud, examined by Rich, Layard, and others, is considered by some persons to be the remains of the tower of Babel.

BABINGTON'S CONSPIRACY, to assassinate queen Elizabeth, and make Mary of Scotland queen, was devised by John Savage, a soldier of Philip of Spain, and approved by Wm. Gifford and John Ballard, catholic priests. Anthony Babington and other gentlemen were induced to join in the scheme. They were betrayed by Pooley Aspy, and fourteen were executed, Sept. 20, 21, 1586. Babington was deluded by a romantic hope that Mary, in gratitude, would accept him as a husband.

BABEUF'S CONSPIRACY. See *Agrarian Law*.

BABYLON,* an Asiatic empire (see *Assyria*), founded by Belus, supposed to be the Nimrod of holy writ, the son of Chus, and grandson of Ham, 2245 B.C. *Lenglet*. Ninus of Assyria seized on Babylon, and established what was properly the Assyrian empire, by uniting the two sovereignties, 2059 B.C. 2233 *Cl*. The second empire of Babylon commenced about 725 B.C.

Seleucus Nicator, who died B.C. 280, transfers the seat of government to Seleucia, and Babylon is deserted.

* The city of Babylon was at one time the most magnificent in the world. The *Hanging Gardens* are described as having been of a square form, and in terraces one above another until they rose as high as the walls of the city, the ascent being from terrace to terrace by steps. The whole pile was sustained by vast arches raised on other arches; and on the top were flat stones closely cemented together with plaster of bitumen, and that covered with sheets of lead, upon which lay the mould of the garden, where there were large trees, shrubs, and flowers, with various sorts of vegetables. There were five of these gardens, each containing about four English acres, and disposed in the form of an amphitheatre. *Strabo*; *Diodorus*. Pliny said that in his time it was but a desolate wilderness. Mr. Rich visited the ruins in 1811, and sir R. Kerr Porter in 1818. The laborious researches of Mr. Layard, sir H. Rawlinson, M. Botta, and others, and the interesting relics excavated and brought to this country between the years 1849 and 1855, have caused very much attention to be given to the history of Babylon. Many of the inscriptions in the cuneiform or wedge-like character have been translated, principally by col. (now sir Henry) Rawlinson, and published in the *Journal of the Royal Asiatic Society*. In the spring of 1855, he returned to England, bringing with him many valuable relics, drawings, &c., which are now in the British Museum. He gave discourses on the subject at the Royal Institution, London, in 1851, 1855, and 1865.

BACCHANALIA (games celebrated in honour of Bacchus) arose in Egypt, and were brought into Greece by Melampus, and were there called *Dionysia*, about 1415 B.C. *Diodorus*. In Rome the *Bacchanalia* were suppressed, 186 B.C. The priests of Bacchus were called *Bacchanals*.

BACHELORS. The Roman censors frequently imposed fines on unmarried men; and men of full age were obliged to marry. The Spartan women at certain games laid hold of old bachelors, dragged them round their altars, and inflicted on them various marks of infamy and disgrace. *Vossius*. A tax was laid upon bachelors in England, twenty-five years of age, 12l. 10s. for a duke, and for a common person one shilling, 7 Will. III., 1695. Bachelors were subjected to an extra tax on their male and female servants, in 1785.

BACKGAMMON. Palamedes of Greece is the reputed inventor of this game, about 1224 B.C. It is stated by some to have been invented in Wales in the period preceding the conquest. *Henry*.

BACTRIANA, a province in Asia, was subjugated by Cyrus and formed part of the Persian empire, when conquered by Alexander, 330 B.C. About 254 B.C., Theodotus or Diodotus, a Greek, threw off the yoke of the Seleucidae, and became king. Eucratides reigned prosperously about 181 B.C., and Menander about 126 B.C. The Greek kingdom appears to have been broken up by the irruption of the Scythians shortly after.

BADAJOS (S. W. Spain). An important barrier fortress, surrendered to the French, under Soult, March 11, 1811; was invested by the British, under lord Wellington, on March 16, 1812, and stormed and taken on April 6 following. The French retreated in haste.

BADDESDOWN HILL, or Mount Badon, near Bath, where Bede says the Britons defeated the Saxons in 493; others say in 511 or 520.

BADEN (S. W. Germany). The house of Baden is descended from Herman, regarded as the first margrave (1052), son of Berthold I., duke of Zähringen. From Christopher, who united the branches of Hochberg and Baden, and died in 1527, proceed the branches of Baden-Baden and Baden-Dourlach. By the treaty of Baden, between France and the emperor, when Landau was ceded to the former, Sept. 7, 1714, Baden was elected into a grand duchy, as a member of the Rhenish confederation, Aug. 13, 1806. Its territorial acquisitions by its alliances with France were guaranteed by the congress at Vienna, in 1815. In May, 1849, the grand-duke was expelled by his subjects, but was restored in June. In July, 1857, an amnesty was decreed for political offences. A concordat made with the pope, June 28, 1859, having greatly displeased the representative assembly, was set aside by the grand-duke, April 8, 1860. On June 16, 1860, the emperor of the French met the regent of Prussia, the kings of Hanover, Bavaria, Wurtemberg, and Saxony, and the German princes at Baden-Baden. The population of Baden, Dec. 1861, was 1,369,291.

Louis William, margrave of Baden-Baden, a great general, born 1665; sallied out from Vienna and defeated the Turks, 1683; died 1707.

Charles William, margrave of Baden-Dourlach, born 1679, died 1746; succeeded by his son,

Charles Frederic, margrave, afterwards grand-duke of Baden-Dourlach, born 1728, who joined to his dominions Baden-Baden in 1771, which were also increased by the favour of Napoleon.

GRAND-DUKES.

1806. Charles Frederic; dies 1811; succeeded by his grandson,

1811. Charles Louis Frederic, who died without issue in 1818; succeeded by his uncle,

1818. Louis William, died without issue in 1830; succeeded by his brother,

1830. Leopold, died in 1852; succeeded by his second son (the first being imbecile),

1852. Frederic (born Sept. 9, 1826), regent April 24, 1852; declared grand-duke, Sept. 5, 1856.

[*Heir*: his son Frederic William, born July 9, 1857.]

BAFFIN'S-BAY (N. America), discovered by William Baffin, an Englishman, in 1616. The extent of this discovery was much doubted, until the expeditions of Ross and Parry proved that Baffin was substantially accurate in his statement. Parry entered Lancaster Sound, and discovered the islands known by his name, in 1818. See *North-West Passage*.

BAGDAD, in Asiatic Turkey, built by Al Mansour, and made the seat of the Saracen empire, about 762.—Taken by the Tartars, and a period put to the Saracen rule, 1258. Often taken by the Persians, and retaken by the Turks, with great slaughter: the latter took it in 1638, and have held it since.

BAGPIPE, an ancient Greek and Roman instrument. On a piece of ancient Grecian sculpture, now in Rome, a bagpiper is represented dressed like a modern highlander. Nero is said to have played upon a bagpipe, 51. Our highland regiments retain their pipes.

BAHAMA ISLES (N. America) were the first points of discovery by Columbus. San Salvador was seen by him on the night of the 11th of October, 1492. New Providence was settled by the English in 1629. They were expelled by the Spaniards, 1641; returned, 1666; again expelled in 1703. The isles were formally ceded to the English in 1783. Population in 1861, 35,287.

BAHAR (N. India), a province (conquered by Baber in 1530), with Bengal and Orissa, a princely dominion, became subject to the English East India company in 1765 by the treaty of Allahabad for a quit-rent of about 300,000*l.*

BAIL. By ancient common law, before and since the conquest, all felonies were bailable, till murder was excepted by statute; and by the 3 Edward I. (1274) the power of bailing in treason, and in divers instances of felony, was taken away. Bail was further regulated in later reigns. Bail is now accepted in all cases, felony excepted; and where a magistrate refuses bail, it may be granted by a judge.

BAILIFFS, OR SHERIFFS. Said to be of Saxon origin. London had its *shire-reve* prior to the conquest, and this officer was generally appointed for counties in England in 1079. Hen. Cornhill and Rich. Reynere were appointed bailiffs or sheriffs in London in 1189. *Stow.* Sheriffs were appointed in Dublin under the name of bailiffs, in 1308; and the name was changed to sheriff in 1548. There are still some places where the chief magistrate is called bailiff, as the high bailiff of Westminster. *Bum-bailiff* is a corruption of bound-bailiff, every bailiff being obliged to enter into bonds of security for his good behaviour. *Blackstone.*

BAIRAM, Mahometan festivals. In 1865 the Little Bairam, following the fast of Ramadan (*which see*), fell on Feb. 28, March 1 and 2. The Great Bairam began on May 10.

BAIZE, a species of coarse woollen manufacture, was brought into England by some Flemish or Dutch emigrants who settled at Colchester, in Essex, and had privileges granted them by parliament in 1660. The trade is under the control of a corporation called the governors of the Dutch baize-hall, who examine the cloth previous to sale. *Anderson.*

BAKER. See *Bread.*

BAKERIAN LECTURES, Royal Society, originated in a bequest of 100*l.* by Henry Baker, F.R.S., the interest of which was to be given to one of the fellows, for a scientific discourse to be delivered annually. Peter Woulfe gave the first lecture in 1765. Latterly it has been the custom to nominate as the lecture a paper written by one of the fellows. Davy, Faraday, Tyndall, and other eminent men have given the lecture.

BALAKLAVA, a small town in the Crimea, with a fine harbour, 10 miles S.E. from Sebastopol. After the battle of the Alma, the allies advanced upon this place, Sept. 26, 1854. On Oct. 25 following, about 12,000 Russians, commanded by gen. Liprandi, attacked and took some redoubts in the vicinity, which had been entrusted to about 250 Turks. They next assaulted the English, by whom they were compelled to retire, mainly through the charge of the heavy cavalry, led by brigadier Scarlett, under the orders of lord Lucan. After this, from an unfortunate misconception of lord Raglan's order, lord Lucan ordered lord Cardigan with the light cavalry, to charge the Russian army, which had reformed on its own ground with its artillery in front. This order was most gallantly obeyed. Great havoc was made on the enemy; but of 607 British horsemen, only 198 returned. The British had altogether 9 officers killed, 21 wounded, and 620 men put *hors de combat.* The Russians had 550 men killed, and 6 officers (among whom was one general), and 190 men wounded.—A sortie from the garrison of Sebastopol on the night of March 22, 1855, led to a desperate engagement here, in which the Russians were vigorously repulsed, with the loss of 2000 men killed and wounded, the allies losing about 600.—The electric telegraph between London and Balaklava was completed in April, 1855, and communications were then received by the British government.—A railway between Balaklava and the trenches was completed in June, 1855. See *Russo-Turkish War.*

BALANCE OF POWER, to assure the independency and integrity of states, and control the ambition of sovereigns; the principle is said to have been first laid down by the Italian politicians of the 15th century, on the invasion of Charles VIII. of France. *Robertson.* It was first recognised by the treaty of Munster, Oct. 24, 1648. The arrangements for the balance of power in Europe made in 1815, without the consent of the people of the countries concerned, have been greatly set aside since 1830.

BALEARIC ISLANDS, in the Mediterranean, called by the Greeks *Balearides*, and by the Romans *Baleares*, from the dexterity of the inhabitants at slinging: they include *Majorca* and *Minorca*, with the small isle of *Cabrera*. These islands were conquered by the Romans, 123 B.C.; by the Vandals, about 426 B.C., and formed part of Charlemagne's empire in A.D. 799. They have belonged to Spain since 1232. See *Minorca*.

BALIZE. See *Honduras*.

BALKAN, the ancient *Hæmus*, a range of mountains extending from the Adriatic to the Euxine. The passage, deemed impracticable, was completed by the Russians under *Diebitsch*, during the Russian and Turkish war, July 26, 1829. An armistice was the consequence; and a treaty of peace was signed at *Adrianople*, Sept. 14 following.

BALLADS may be traced in the British history to the Anglo-Saxons. *Turner*. *Adhelme*, who died 709, is mentioned as the first who introduced ballads into England. "The harp was sent round, and those might sing who could." *Bede*. *Alfred* sung ballads. *Malmesbury*. *Canute* composed one. *Turner*. Minstrels were protected by a charter of *Edward IV.*; but by a statute of *Elizabeth* they were made punishable among rogues, vagabonds, and sturdy beggars. *Viner*. "Give me the writing of the ballads, and you may make the laws." *Fletcher of Saltoun*. The sea-ballads of *Dibdin* were very popular in the French war; he died Jan. 20, 1833.

BALLETS began through the meretricious taste of the Italian courts. One performed at the interview between our *Henry VIII.* and *Francis I.* of France, in the field of the Cloth of Gold, at *Ardres*, 1520. *Guicciardini*. They became very popular in France; their zealous patron, *Louis XIV.*, bore a part in one, 1664. They were gradually introduced with operas into England in the 18th century.

BALLINAMUCK, Longford. Here, on Sept. 8, 1798, the Irish rebels and their French auxiliaries were defeated and captured.

BALLOONS.* A just idea of the principle of the construction of balloons was formed by *Albert of Saxony*, an *Augustin* monk in the 14th century, and adopted by a Portuguese Jesuit, *Francesco Mendoza*, who died at *Lyons* in 1626. The idea is also attributed to *Bartolomeo de Guzman*, who died in 1724. The theory of *aëronautics* includes:—1, the power of a balloon to rise in the air; 2, the velocity of its ascent; and 3, the stability of its suspension at any given height. The application of sails and rudders has been duly considered, and judged to be futile. Fatal accidents to the voyagers have been estimated at 2 or 3 per cent.

BALLOONS, *continued.*

- Vauxhall gardens, started from that place on an experimental voyage, having three individuals in the car, and after having been eighteen hours in the air descended at Weillburg, in the duchy of Nassau . . . Nov. 7, 1836
- Mr. Cocking ascended from Vauxhall in order to try his parachute, in which he had great faith; in its descent from the balloon it collapsed, and he was thrown out and killed, . . . July 24, 1837
- An Italian aeronaut ascended from Copenhagen, in Denmark; his corpse was subsequently found on the sea-shore in a contiguous island, dashed to pieces . . . Sept. 14, 1851
- Mr. Wise and three others ascended from St. Louis (after travelling 1150 miles they descended in Jefferson county, New York, nearly dead) . . . June 23, 1859
- Nadar's great balloon (largest ever made) when fully inflated contained 215,363 cubic feet of gas; the car, a cottage in wicker work, raised 35 soldiers at Paris; Nadar hoped by means of screw to steer a balloon in the heavens.
- Nadar's first ascent, with 14 others, successful, . . . Oct. 4, 1863
- Second ascent, nearly all voyagers injured; saved by presence of mind of M. Jules Godard; descend at Nieuburg, Hanover, . . . Oct. 12, "
- Nadar and his balloon at the Crystal Palace, Sydenham . . . Nov. "
- Society for promoting aerial navigation formed at M. Nadar's at Paris; president, M. Barral, . . . Jan. 15, 1864
- Godard's great Montgolfier or fire-balloon ascends . . . July 28 and Aug. 3, "
- Ascent of Nadar and others in his great balloon at Brussels . . . Sept. 26, "
- Mr. Coxwell ascends from Belfast in a new balloon; several persons are injured by the balloon becoming uncontrollable; it escapes, . . . July 3, 1865

MILITARY APPLICATIONS.

- Guyton-Morveau ascended twice during the battle, and gave important information to Jourdain . . . June 17, 1794
- Balloons were used during the battle of Solferino, June 24, 1859; and by the Federal army near Washington, in . . . July, 1862

EQUESTRIAN ASCENTS.

- Mr. Green affirms that he ascended from London, on a horse attached to a balloon, though few persons seem to be aware that the experiment was made . . . May, 1828

BALLOT (French *ballotte*, a little ball).

Greeks and the modern Venetians, and is now of North America.

- The ballot-box used in a political club at Miles's coffee-house, Westminster . . . 1859
- A tract entitled "The Benefit of the Ballot," said to have been written by Andrew Marvell, was published in the "State Tracts" . . . 1693
- Proposed to be used in the election of members of Parliament in a pamphlet . . . 1705
- A bill authorising vote by ballot passed the commons, but rejected by the lords . . . 1710
- The ballot has been an open question in whig governments since . . . 1835

- He did so from Vauxhall gardens with a very diminutive pony . . . July, 1850
- Lieut. Gale, an Englishman, made an ascent with a horse from the Hippodrome of Vincennes, near Bordeaux. On descending, and detaching the animal from the balloon, the people who held its ropes, from some misconception, prematurely let them go, and the unfortunate aeronaut was rapidly borne in the air before he was quite ready to resume his voyage. (He was discovered next morning dashed to pieces in a field a mile from where the balloon was found.) . . . Sept. 8, "
- The ascent of Madame Poitevin from Cremorne gardens, near London, as "Europa on a bull" (a feat she had often performed in France), and several ascents on horses, brought the parties concerned before the police-courts on a charge of cruelty to animals, and put an end to experiments that outraged public feeling . . . Aug. 1852
- M. Poitevin ascended on a horse, in the vicinity of Paris, about the time just mentioned; was nearly drowned in the sea, near Malaga, while descending from his balloon in 1858, and died soon after.

SCIENTIFIC ASCENTS.

- Gay-Lussac and Biot at Paris, Aug. 23; Gay-Lussac (to the height of 22,977 feet) Sept. 15, 1804
- Bixio and Barral at Paris (to the height of 19,000 feet. They passed through a cloud 9000 feet thick) . . . 1850
- Mr. Welsh ascends, Aug. 17, 26; Oct. 21 and Nov. 10, 1852
- Scientific balloon ascents having been recommended by the British Association and funds provided, Mr. James Glaisher commenced his series of ascents, provided with suitable apparatus, in Mr. Coxwell's great balloon, at Wolverhampton: he reached the height of 5 miles . . . July 17, 1862
- He ascended to the height of about 7 miles at Wolverhampton; at 5½ miles high he became insensible; Mr. Coxwell lost the use of his hands, but was able to open the valve with his teeth; they thus descended in safety, Sept. 5, "
- He ascended at Newcastle during the meeting of the British Association . . . Aug. 31, 1863
- His 16th ascent; surveys London . . . Oct. 9, "
- His 17th ascent at Woolwich; descends at Mr. Brandon's, Suffolk (1st winter ascent this century) . . . Jan. 12, 1864
- He ascends from Woolwich (24th time) Dec. 30, "
- His 25th ascent . . . Feb. 27, 1865
- (Mr. Glaisher has laid the result of his observations before the scientific world.)

Secret voting was practised by the ancient employed in France and in the United States

- The Ballot Society is very energetic. The ballot was adopted in Victoria, Australia, in . . . 1856
- Secret voting existed in the chamber of deputies in France from 1840 to 1845. It has been employed since the coup d'état in . . . Dec. 1851
- The house of commons rejected the ballot—257 being against, and 189 for it . . . June 30, 1851
- For several years it has been annually proposed and rejected.

BALL'S BLUFF, on the banks of the Potomac, on the Virginia side, North America. On October 21, 1861, by direction of the Federal general C. P. Stone the heroic col. Baker crossed the river to reconnoitre. He attacked the Confederate camp at Leesburg, and was

thoroughly defeated with great loss. The disaster was attributed to great mismanagement, and in Feb. 1862, general Stone was arrested on suspicion of treason.

BALLYNAHINCH (Ireland), where a sanguinary engagement took place between a large body of the insurgent Irish and the British troops, under gen. Nugent, June 13, 1798. A large part of the town was destroyed, and the royal army suffered very severely.

BALMORAL CASTLE, Deeside, Aberdeenshire; visited by her majesty in 1848, 1849, 1850. The estate was purchased for 32,000*l.* by prince Albert in 1852. In 1853 the new building, in the Scotch baronial style, was commenced, from designs by Mr. W. Smith of Aberdeen.

BALTIC EXPEDITIONS AGAINST DENMARK. In the first expedition under lord Nelson and admiral Parker, Copenhagen was bombarded, and twenty-eight sail of the Danish fleet were taken or destroyed, April 2, 1801. See *Armed Neutrality*. In the second expedition under admiral Gambier and lord Cathcart, eighteen sail of the line, fifteen frigates, and thirty-one brigs and gun-boats surrendered to the British, July 26, 1807.

BALTIC EXPEDITION AGAINST RUSSIA. The British fleet sailed from Spithead in presence of the queen, who led it out to sea in her yacht, the *Fairy*, March 11, 1854. It consisted of a crowd of steam-ships of the line, of which, five were each of 120 guns and upwards: the whole under the command of vice-admiral sir Charles Napier, whose flag floated on board the Duke of Wellington, of 131 guns. The fleet arrived in Wingo Sound, March 15, and in the Baltic, March 20, following. The gulf of Finland was blockaded, April 12. 10,000 French troops embarked at Calais for the Baltic in English ships of war, in presence of the emperor, July 15. The capture of Bomarsund, one of the Aland islands, and surrender of the garrison, took place, Aug. 16. See *Bomarsund*. The English and French fleets, the latter having joined June 14, commenced their return homeward to winter, Oct. 15, 1854.—The SECOND expedition (of which the advanced or flying squadron sailed March 20) left the Downs, April 4, 1855. In July it consisted of 85 English ships (2098 guns), commanded by admiral R. S. Dundas, and 16 French ships (408 guns), under admiral Pernand. On July 21, three vessels silenced the Russian batteries at Hogland island. The fleet proceeded towards Cronstadt. Many infernal machines* were discovered. Sveaborg was attacked Aug. 9. See *Sveaborg*. Shortly after, the fleet returned to England.

BALTIMORE, a maritime city in Maryland, United States, founded in 1729. On Sept. 12, 1814, the British army under col. Ross advanced against this place. He was killed in a skirmish; and the command was assumed by col. Brooke, who attacked and routed the American army, which lost 600 killed and wounded and 300 prisoners. The projected attack on the town was however abandoned. *Alison*. See *United States*, 1861.

BAMBERG (Bavaria), said to have been founded by Saxons, in 804, and endowed with a church by Charlemagne. It was made a bishopric in 1107, and the bishop was a prince of the empire till the treaty of Luneville, 1801, when Bamberg was secularized. It was incorporated with Bavaria in 1803. The noble cathedral, rebuilt in 1110, has been recently repaired. Bamberg was taken and pillaged by the Russians in 1759.

BAMBOROUGH, or *Bamburg*, Northumberland, according to the "Saxon Chronicle," was built by king Ida about 547, and named *Bebbanburgh*. The castle and estate, the property of the Forsters, and forfeited to the crown, through their taking part in the rebellion in 1715, were purchased by Nathaniel lord Crewe, bishop of Durham, and bequeathed by him for various charitable purposes. The valuable library was founded by the trustees in 1778. The books are lent to persons residing within 20 miles of the castle.

BAMPTON LECTURES (Theological), delivered at Oxford annually, began in 1780, with a lecture by James Bandinel, D.D. The lecturer is paid out of the proceeds of an estate bequeathed for the purpose by the rev. John Bampton, and the lectures are published. Among the more remarkable lectures were those by White (1784), Heber (1815), Whately (1822), Milman (1827), Hampden (1832), and Mansel (1858).

BANBURY, Oxfordshire, a Saxon town. The castle, erected by Alexander de Bleis, bishop of Lincoln, 1125, has been frequently besieged. In 1646 it was taken by the parliamentarians and demolished. At Danesmore, near Banbury, Edward IV. defeated the Lancastrians under the earl of Pembroke, July 26, 1469, and their leader and his brother

were soon after taken prisoners and executed. Banbury cakes were renowned in the time of Ben Jonson, and Banbury Cross was destroyed by the Puritans.

BANDA ISLES (ten), Eastern Archipelago, visited by the Portuguese in 1511, who settled on them, 1521, but were expelled by the Dutch about 1600. Rohun island was ceded to the English in 1616. The Bandas were taken by the latter in 1796; restored in 1801; retaken in 1811; and restored in Aug. 1814.

BANGALORE (S. India) was besieged by the British under lord Cornwallis, March 6, and taken by storm, March 21, 1791. Bangalore was restored to Tippoo in 1792, when he destroyed the strong fort, deemed the bulwark of Mysore.

BANGOR (Banehor Iskoed, or Monachorum), Flintshire, the site of an ancient monastery, very populous if it be true that 1200 monks were slain by Ethelfrid, king of the Angles, for praying for the Welsh in their conflict with him in 707. *Tanner*.

BANGOR (N. Caernarvonshire). Its bishopric is of great antiquity, but its founder is unknown. The church is dedicated to St. Daniel, who was a bishop, 516. Owen Glendower greatly defaced the cathedral; but a more cruel ravager than he, the bishop Bulkeley, alienated many of the lands, and even sold the bells of the church, 1553. The see is valued in the king's books at 131*l.* 16*s.* 4*d.* An order in council directing that the sees of Bangor and St. Asaph be united on the next vacancy in either, was issued in 1838; but rescinded by the 10 & 11 Vict. c. 108 (1846). Present income, 4200*l.*

BANGORIAN CONTROVERSY was occasioned by Dr. Benjamin Hoadly, bishop of Bangor, preaching a sermon before George I., March 31, 1717, upon the text, "*My kingdom is not of this world*" (John xviii. 36), in which he demonstrated the spiritual nature of the kingdom of Christ. He thereby drew upon himself the indignation of almost all the clergy, who published hundreds of pamphlets.

BANISHMENT, an ancient punishment. By 39 Eliz. c. 4 (1597) dangerous rogues were to be banished out of the realm, and to be liable to death if they returned. See *Transportation*.

BANK. The name is derived from *banco*, a bench, erected in the market-place for the exchange of money. The first was established in Italy 808, by the Lombard Jews, of whom some settled in Lombard-street, London, where many bankers still reside. The Mint in the Tower of London was anciently the depository for merchants' cash, until Charles I. laid his hands upon the money and destroyed the credit of the Mint in 1640. The traders were thus driven to some other place of security for their gold, which, when kept at home, their apprentices frequently absconded with to the army. In 1645, therefore, they consented to lodge it with the goldsmiths in Lombard-street, who were provided with strong chests for their own valuable wares; this became the origin of banking in England. BANK OF ENGLAND was projected by William Paterson, a Scotch merchant (see *Darien*), to meet the difficulty experienced by William III. in raising the supplies for the war against France. By the influence of Paterson and Michael Godfrey, 40 merchants subscribed 500,000*l.* towards the sum of 1,200,000*l.* to be lent to the government at 8 per cent., in consideration of the subscribers being incorporated as a bank. The scheme was violently opposed in parliament, but the bill obtained the royal assent April 25, 1694, and the charter was granted July 27 following, appointing sir John Houblon the first governor, and Michael Godfrey the first deputy governor. The bank commenced active operations on Jan. 1, 1695, at Grocers' hall, Poultry,† issuing notes for 20*l.* and upwards, and discounting bills for 4½ to 6 per cent. The charter was renewed in 1697, 1708, 1713, 1716, 1721, 1742, 1746, 1749, 1764, 1781, 1800, 1808, 1816, 1833, 1844. *Lawson.*

† The foundation of the bank in Threadneedle-street was laid, Aug. 1, 1732, by sir Edward Bellamy, governor; it was erected by G. Sampson, architect. Great additions have been made from time to time by successive architects: sir Robert Taylor, sir John Soane, and Mr. C. R. Cockerell. It now occupies the site of the church, and nearly all the parish of St. Christopher-le-Stocks. The churchyard is now termed "the garden."

BANK OF IRELAND. On Dec. 9, 1721, the Irish house of commons rejected a bill for establishing a national bank. Important failures in Irish banks occurred in 1727, 1733, and 1758: this led gradually to the establishment of the bank of Ireland at St. Mary's-abbey, Dublin, June 1, 1783. The business was removed to the late houses of parliament, in College-green, in May, 1808. Branch banks of this establishment have been formed in most of the provincial towns in Ireland, all since 1828. Irish banking act passed, July 21, 1845.

BANKS OF SCOTLAND. The old bank of Scotland was set up in 1695, at Edinburgh, and began Nov. 1, the second institution of the kind in these kingdoms: lending money to the crown was prohibited. The Royal bank was chartered July 8, 1727; the British Linen Company's bank, 1746; the Commercial bank, 1810; National bank, 1825; Union bank, 1830. The first stone of the present bank of Scotland was laid June 3, 1801. The Western bank of Scotland and the Glasgow bank stopped in Nov. 1857, causing much distress. Scotch banking act passed, July 21, 1845.

BANKS, JOINT STOCK. Since the act of 1826, a number of these banks have been established. In 1840, the amount of paper currency issued by joint-stock banks amounted to 4,138,618*l.*; the amount in circulation by private banks, same year, was 6,973,613*l.*—the total amount exceeding eleven millions.* In *Ireland* similar banks have been instituted, the first being the Hibernian bank, in 1825. * THE ROYAL BRITISH BANK was established in 1849, by Mr. John McGregor, M.P., and others, under sir R. Peel's joint-stock banking act, 7 & 8 Vict. c. 113 (1844); as an attempt to introduce the Scotch banking system of cash credits into England. On Sept. 3, 1856, it stopped payment, occasioning much distress and ruin to many small tradesmen and others. In consequence of strong evidence of the existence of fraud in the management of the bank, elicited during the examination before the court of bankruptcy, the government instructed the attorney-general to file *ex-officio* informations against the manager, Mr. H. Innes Cameron, and several of the directors. They were convicted Feb. 27, 1858, after 13 days' trial, and sentenced to various degrees of imprisonment. Attempts to mitigate the punishment failed (May, 1858); but all were released except Cameron and Esdaile, in July, 1858. In April, 1860, dividends had been paid to the amount of 15*s.* in the pound. The attorney-general brought in a bill called the Fraudulent Trustees' Act, 20 & 21 Vict. c. 54, to prevent the recurrence of such transactions.—On April 19, 1860, a deficiency of 263,000*l.* was discovered in the *Union Bank of London*. Mr. George Pullinger, a cashier, confessed himself guilty of forgery and fraud, and was sentenced to 20 years' imprisonment.—In Feb. 18, 1861, it was discovered that John Durden, a clerk of the *Commercial Bank of London*, had robbed his employers of 67,000*l.*, of which 46,000*l.* might be recovered.—In Dec. 1864, J. W. Terry and Thomas Burch, manager and secretary of the *Unity Bank*, were committed on a charge of conspiracy for fabricating accounts; but acquitted on their trial.

Oct. 1, 1855, was, in England, 3,990,800*l.*; in Scotland, 4,280,000*l.*; and in Ireland, 6,785,000*l.*; total, with English private banks, about 19,000,000*l.*: and with the bank of England, above 39,000,000*l.*

BANNATYNE CLUB, named after George Bannatyne (the publisher), was established in 1823 by sir Walter Scott and others, for printing works illustrative of the history, antiquities, and literature of Scotland, of which about 113 volumes were issued.

BANNERET, a personal dignity between baron and knight, anciently conferred by the king under the royal standard. Its origin is of uncertain date: Edmondson says 736; but it was probably created by Edward I. John Chandos is said to have been made a banneret by the Black Prince and the king of Castile at Najara, April 3, 1367. The dignity was conferred on John Smith, who rescued the royal standard at Edgehill fight, Oct. 23, 1642. It fell into disuse, but was revived by Geo. III. in the person of sir William Erskine, in 1764.

BANNERS were common to all nations. The Jewish tribes had standards or banners—*Num. ii.* (1491 B.C.) The standard of Constantine bore the inscription, *In hoc signo vinces*—"By this sign thou shalt conquer," under the figure of the cross. See *Cross*. The magical banner of the Danes (said to have been a black raven on a red ground) was taken by Alfred when he defeated Hubba, 878. St. Martin's cap, and afterwards the celebrated auriflamme, or oriflamme, were the standards of France about 1100. See *Auriflamme, Standards, &c.*

BANNOCKBURN (Stirlingshire), the site of the battle between Robert Bruce of Scotland and Edward II. of England, June 24, 1314. The army of Bruce consisted of 30,000; that of Edward of 100,000 men, of whom 52,000 were archers. The English crossed a rivulet to the attack, and Bruce having dug and covered pits, they fell into them, and were thrown into confusion. The rout was complete: the English king narrowly escaped, and 50,000 were killed or taken prisoners. At Sauchieburn, near here, James II. was defeated and slain on June 11, 1488, by his rebellious nobles.—A national monument was founded here, June 24, 1861.

* According to a return to parliament made at the close of February, 1826, there had become bankrupt in the four months preceding, 59 banking-houses, comprising 144 partners; and 20 other banking establishments had been declared insolvent. Every succeeding week continued to add from seventy to a hundred merchants, traders, and manufacturers to the bankrupt list. This was, however, the period of bubble speculation, and of unprecedented commercial embarrassment and ruin.

BANNS, in the feudal law, were a solemn proclamation of any kind : hence arose the present custom of asking banns, or giving notice before marriage ; said to have been introduced into the church about 1200.

BANQUETING-HOUSE, Whitehall, London, built by Inigo Jones, about 1607.

BANTAM (Java), where a rich British factory was established by captain Lancaster, in 1603. The English and Danes were driven from their factories by the Dutch in 1683. Bantam surrendered to the British in 1811, but was restored to the Dutch at the peace in 1814. It was not worth retaining, the harbour being choked up and inaccessible.

BANTINGISM. See *Corpulence*.

BANTRY BAY (S. Ireland), where a French fleet, bringing succour to the adherents of James II., attacked the English under admiral Herbert, May 1, 1689 : the latter retired to form in line and were not pursued. A French squadron of seven sail of the line and two frigates, armed *en flute*, and seventeen transports, anchored here for a few days, without effect, Dec. 1796. **MUTINY** of the Bantry Bay squadron under admiral Mitchell was in Dec. 1801. In Jan. 1802, twenty-two of the mutineers were tried on board the *Gladiator*, at Portsmouth, when seventeen were condemned to death, of whom eleven were executed ; the others were sentenced to receive each 200 lashes. The executions took place on board the *Majestic*, *Centaur*, *Formidable*, *Téméraire*, and *L'Achille*, Jan. 8 to 18, 1802.

BAPTISM, the ordinance of admission into the Christian church, practised by all sects professing Christianity, except Quakers. John *the Baptist* baptized Christ, 30. (*Matt.* iii.) Infant baptism is mentioned by Irenæus about 97. In the reign of Constantine, 319, baptisteries were built and baptism was performed by dipping the person all over. In the west sprinkling was adopted. Much controversy has arisen since 1831 (particularly in 1849 and 1850), in the church of England, respecting the doctrine of baptismal regeneration, which the Arches' Court of Canterbury decided to be a doctrine of the church of England. See *Trials*, 1849, and *note*.

BAPTISTS (see *Anabaptists*). A sect distinguished by their opinions respecting (1) the proper *subjects*, and (2) the proper *mode* of baptism : the former they affirm to be those who are able to make a profession of faith ; the latter to be total immersion. There are seven sections of Baptists—Arminian, Calvinistic (or Particular), &c. The first Baptist church formed in London was in 1608. They published a confession of faith in 1689. In 1851 they had 130 chapels in London and 2789 (with sittings for 752,353 persons) in England and Wales. Rhode Island, America, was settled by Baptists in 1635.

BARBADOES, discovered by the Portuguese, was the first English settlement in the West Indies. About 1605 it gave rise to the sugar trade in England ; and was, with other Caribbee islands, settled by charter granted to James, earl of Marlborough, 2 Charles I., 1627. Barbadoes has suffered severely from elemental visitations ; in a dreadful hurricane, Oct. 10, 1780, more than 4000 of the inhabitants lost their lives. A large plantation with all its buildings was destroyed, by the land removing from its original site to another, and covering everything in its peregrination, Oct. 1784. An inundation, Nov. 1795 ; and two great fires, May and Dec. 1796. Bishopric established, 1824. Awful devastation, with the loss of thousands of lives, and of immense property, by a hurricane, Aug. 10, 1831. Nearly 17,000 persons died of cholera here in 1854. On Feb. 14, 1860, property to the amount of about 300,000*l.* was destroyed by a fire at Bridgetown, the capital.

BARBARY, in N. Africa, considered to comprise Algeria, Morocco, Fez, Tunis, and Tripoli, with their dependencies. Piratical states (nominally subject to Turkey) were founded on the coast by Barbarossa, about 1518.

BARBERS existed at Rome in the 3rd century B.C. In England, formerly, the business of a surgeon was united to the barber's, and he was denominated a **BARBER-SURGEON**. A London company was formed in 1308, and incorporated, 1461. This union was partially dissolved in 1540, and wholly so in 1745. "No person using any shaving or barbery in London shall occupy any surgery, letting of blood, or other matter, except only drawing of teeth." 32 Henry VIII. 1540.

BARCA (N. Africa), the Greek Barce, a colony of Cyrene. It was successively subjugated by the Persians, Egyptians, and Saracens. In 1550 the sultan Solymán combined Barca with the newly conquered pashalik of Tripoli.

BARCELONA, an ancient maritime city, (N. E. Spain), said to have been rebuilt by Hamilcar Barca, father of the great Hannibal, about 233 B.C. With the surrounding country, it was held by the Romans, Goths, Moors, and Franks, and, with the province of which it is the capital, was made an independent county about A.D. 864, and incorporated into Aragon in 1164, the last count becoming king. The city has suffered much by war. The siege by the French, in 1694, was relieved by the approach of the English fleet, commanded by admiral Russell; but the city was taken by the earl of Peterborough in 1706. It was bombarded and taken by the duke of Berwick and the French in 1714, and was taken by Napoleon in 1808, and retained till 1814. It revolted against the queen in 1841, and was bombarded and taken in Dec. 1842, by Espartero.

BARCLAY, CAPTAIN. See *Pedestrianism*.

BARDESANISTS, followers of Bardesanes, of Mesopotamia, who embraced the errors of Valentinus, after refuting them, and added the denial of the incarnation, the resurrection, &c., about 175.

BARDS. Demodocus is mentioned as a bard by Homer; and we find bards, according to Strabo, among the Romans before the age of Augustus. The *Welsh* bards formed an hereditary order, regulated, it is said, by laws, enacted about 940 and 1078. They lost their privileges at the conquest by Edward I. in 1284. The institution was revived by the Tudor sovereigns; and their Eisteddfodds (or meetings) have been and are frequently held; at Swansea, Aug. 1863; at Llandudno, Aug. 1864; and in the vale of Conway, Aug. 7, 1865. The Gwyneddigion Society of Bards was founded in 1770. Turlogh O'Carolan, the last of the *Irish* bards, died in 1737. *Chambers*.

BARBONES' PARLIAMENT. Cromwell, supreme in the three kingdoms, summoned 122 persons, such as he thought he could manage, who with six from Scotland, and five from Ireland, met, and assumed the name of parliament, July 4, 1653. It obtained its appellation from a nickname given to one of its members, a leather-seller, named "Praise-God Barbon," a great haranguer and frequent in prayer. Although violent and absurd propositions were made by some of the members, the majority evinced much sense and spirit, proposing to reform abuses, improve the administration of the law, &c. The parliament was suddenly dissolved, Dec. 13, 1653, at the instance of Sydenham, an independent, and Cromwell was invested with the dignity of Lord Protector.

BAREILLY, province of Delhi (N. W. India), ceded to the East India company by the ruler of Oude in 1801. A mutiny at Bareilly, the capital, was suppressed in April, 1816. On May 7, 1858, it was taken from the sepoy rebels, who had here committed many enormities.

BARFLEUR (N. France), where William, duke of Normandy, equipped the fleet by which he conquered England, 1066. Near it, prince William, son of Henry I., in his passage from Normandy, was shipwrecked, Nov. 25, 1120.* Barfleur was destroyed by the English in the campaign in which they won the battle of Crecy, 1346. The French navy was destroyed near the cape by admiral Russell, after the victory of La Hogue, in 1692.

BARI (S. Italy), the Barium of Horace, was, in the 9th century, a stronghold of the Saracens, and was captured by the emperor Louis II., a descendant of Charlemagne, in 871. In the 10th century it became subject to the eastern empire, and remained so till it was taken by Robert Guiscard, the Norman, about 1060. A great ecclesiastical council was held here on Oct. 1, 1098, when the *filioque* article of the creed and the procession of the Holy Spirit were the subjects of discussion.

BARING ISLAND, Arctic Sea, discovered by captain Penny in 1850-1, and so named by him after sir Francis Baring, first lord of the admiralty in 1849.

BARIUM (Greek, *barys*, heavy), a metal found abundantly as carbonate and sulphate. The oxide baryta was first recognised as an earth distinct from lime by Scheele, in 1774; and the metal was first obtained by Humphrey Davy, in 1808. *Watts*.

BARK. See *Jesuits' Bark*.

* In this shipwreck perished his legitimate son, William, duke of Normandy, and his newly married bride, Matilda, daughter of Fulke, earl of Anjou; the king's natural son, Richard; his niece, Lucia; the earl of Chester, and the flower of the nobility, with 140 officers and soldiers, and 50 sailors, most of the latter being intoxicated, which was the cause of their running upon the rocks near Barfleur. This lamentable catastrophe had such an effect upon Henry that he was never afterwards seen to smile. *Hénault; Hume*.

BARMECIDES, a powerful Persian family, celebrated for virtue and courage, were massacred through the jealousy of the caliph Haroun-al-Raschid, about 802. His visir Giafar was a Barmecide. The phrase Barmecide (or imaginary) feast originated in the story of the barber's sixth brother, in the Arabian Nights' Entertainments.

BARNABITES, an order of monks, established in Milan about 1530, were much engaged in instructing youth, relieving the sick and aged, and converting heretics.

BARNARD'S, SIR JOHN, ACT (7 Geo. II., cap. 8), entitled, "an act to prevent the infamous practice of stock-jobbing," was passed in 1734, and repealed in 1860. Sir John Barnard (born 1685, died 1764) was an eminent and patriotic lord mayor of London.

BARNET, Hertfordshire. Here Edward IV. gained a decisive victory over the Lancastrians, on Easter-day, April 14, 1471, when the earl of Warwick and his brother the marquiss of Montacute, or Montague, and 10,000 men were slain. A column commemorative of this battle has been erected at the meeting of the St. Alban's and Hatfield roads.

BAROMETERS. Torricelli, a Florentine, having discovered that no principle of suction existed, and that water did not rise in a pump through nature's abhorrence of a vacuum, imitated the action of a pump with mercury, and made the first barometer, about 1643. Pascal's experiments (1646) enhanced the value of the discovery by applying it to the measurement of heights. Wheel barometers were contrived in 1668; pendent barometers in 1695; marine in 1700, and many improvements have been since made. In the *Aneroid* barometer (from *a*, no, and *neros*, watery) no liquid is employed; the atmospheric pressure being exerted on a metallic spring. Its invention (attributed to Conté, in 1798, and to Vidi, about 1844) excited much attention in 1848-9. Barometers were placed at N.E. coast stations in 1860, by the duke of Northumberland and others.

BARON, now the lowest title in our peerage, is extremely ancient. Its original name in England, *Varasour*, was changed by the Saxons into *Thane*, and by the Normans into *Baron*. Many of this rank are named in the history of England, and undoubtedly had assisted in, or had been summoned to parliament (in 1205); but the first precept found is of no higher date than the 49 Henry III. 1265. The first raised to this dignity by patent was John de Beauchamp, created baron of Kidderminster, by Richard II., 1387. The barons took arms against king John, and compelled him to sign the great charter of our liberties, and the charter of our forests, at Runnymede, near Windsor, June, 1215. Charles II. granted a coronet to barons on his restoration.

BARONETS, the first in rank among the gentry, and the only knighthood that is hereditary, were instituted by James I. 1611. The rebellion in Ulster seems to have given rise to this order, it having been required of a baronet, on his creation, to pay into the exchequer as much as would maintain "thirty soldiers three years at eightpence a day in the province of Ulster in Ireland." It was further required that a baronet should be a gentleman born, and have a clear estate of 1000*l.* per annum. The first baronet was sir Nicholas Bacon (whose successor is therefore styled *Primus Baronetorum Angliæ*), May 22, 1611. The baronets of Ireland were created in 1619; the first being sir Francis Blundell.—Baronets of Nova Scotia were created, 1625; sir Robert Gordon the first baronet.—All baronets created since the Irish union in 1801 are of the United Kingdom.

BARONS' WAR, arose in consequence of the faithlessness of king Henry III. and the oppression of his favourites. The barons, headed by Simon de Montfort, earl of Leicester, and Gilbert de Clare, earl of Gloucester, met at Oxford in 1262, and enacted statutes to which the king objected. In 1263 their disputes were in vain referred to the decision of Louis IX. of France. War broke out, and on May 14, 1264, the king's party were totally defeated at Lewes: and De Montfort become the virtual ruler of the kingdom. Through treachery the war was renewed; and at the battle of Evesham, Aug. 4, 1265, De Montfort was slain, and the barons were defeated. They, however, did not render their final submission till 1268. A history of this war was published by Mr. W. H. Blaauw in 1844.

BARRACKS (from "*Baraque—Hutte que font les soldats en campagne pour se mettre à couvert*,") were not numerous in these countries until about 1789. A superintendent-general was appointed in 1793, since when commodious barracks have been built in the various garrison towns and central points of the empire.—A report, censuring the condition of many barracks, was presented to parliament in 1858; and great improvements were effected under the direction of Mr. Sydney Herbert. See *Aldershot*.

BARRICADES, mounds formed of trees and earth, and for military defence. During the wars of the League in France, in 1588, the people made *barricades* by means of chains,

casks, &c., and compelled the royal troops to retire. Barricades composed of overturned vehicles, &c., were erected in Paris in the insurrections of July, 27-30, 1830, and June 23, 1848.

BARRIER TREATY, by which the Low Countries were ceded to the emperor Charles VI., was signed by the British, Imperial, and Dutch ministers, Nov. 5, 1715.

BARRISTERS are said to have been first appointed by Edward I., about 1291, but there is earlier mention of professional advocates in England. They are of various rank, as King's or Queen's Counsel, Serjeants, &c., *which see*. Students for the bar must keep a certain number of terms at the Inns of Court, previously to being called; and by the regulations of 1853 must pass a public examination. Irish students must keep eight terms in England.

BARROSA, OR BAROSSA (S. Spain), where a battle was fought on March 5, 1811, between the British army, commanded by major-general sir Thomas Graham, afterwards lord Lynedoch, and the French under marshal Victor. After a long conflict, the British achieved one of the most glorious triumphs of the Peninsular war. Although they fought at great disadvantage, the British compelled the French to retreat, leaving nearly 3000 dead, six pieces of cannon, and an eagle, the first that the British had taken; the loss of the British was 1169 men killed and wounded.

BARROW ISLAND (N. Arctic Sea), discovered by captain Penny in 1850-51, and named by him in honour of John Barrow, Esq., son of sir John.

BARROW'S STRAITS (N. Arctic Sea), explored by Edwd. Parry, as far as Melville Island, lat. 74° 26' N., and long. 113° 47' W. The strait, named after sir John Barrow, was entered on Aug. 2, 1819. The thermometer was 55° below zero of Fahrenheit.

BARROWISTS, a name given to the *Brownists*, *which see*.

BARROWS, circular mounds found in Britain and other countries, were ancient sepulchres. Sir Richard Hoare caused several barrows near Stonehenge to be opened; in them were found a number of curious remains of Celtic ornaments, such as beads, buckles, and brooches, in amber, wood, and gold: Nov. 1808.

BARS in music appear in the madrigals of Bonini, 1607. Their common use in this country is attributed to Henry Lawes, about 1653. *Eng. Cyc.*

BARTHOLOMEW, ST., martyred, 71. The festival (on Aug. 24, O.S., Sept. 3, N.S.) is said to have been instituted in 1130.* The monastery and hospital of St. Bartholomew (Austin Friars), founded in the reign of Henry I., by Rahere, about 1100. On the dissolution the HOSPITAL was re-founded, 1539, and was incorporated in 1546-7. It was rebuilt by subscription in 1729. In 1861 it contained 580 beds, and relieved about 70,000 patients: it has since been considerably enlarged. The MASSACRE commenced at Paris on the night of the festival of St. Bartholomew, Aug. 24, 1572. According to Sully, 70,000 Huguenots, or French Protestants, including women and children, were murdered throughout the kingdom by secret orders from Charles IX., at the instigation of his mother, the queen dowager, Catherine de Medicis.†

BARTHOLOMEW, ST., a West Indian island, held by Sweden. It was colonised by the French in 1648; and has been several times taken and restored by the British. It was ceded to Sweden by France in 1785.

BARTHOLOMITES, a religious order of Armenia, settled 1307, at Genoa, where is preserved in the Bartholomite church the image which Christ is said to have sent to king Abgarus. The order was suppressed by pope Innocent X. 1650.

BARTON AQUEDUCT (near Manchester) was constructed by James Brindley, to carry the Bridgewater canal over the Irwell, which was done at a height of 39 feet above the river. It is said to be in as good a state now as it was on the day it was completed, in 1761.

* The charter of the FAIR was granted by Henry II., and was held on the ground which has been the former scene of tournaments and martyrdoms. The shows at the fair were discontinued in 1850, and the fair was proclaimed for the last time in 1855. In 1858 Mr. H. Morley published his "History of Bartholomew Fair," with many illustrations. See *Smithfield*.

† The number of the victims is differently stated by various authors. La Popelionnière calculates the whole at 20,000; Adriani, De Serres, and De Thou say 30,000; Davila states them at 40,000; and Péréfixe makes the number 100,000. Above 500 persons of rank, and 10,000 of inferior condition, perished in Paris alone, besides those slaughtered in the provinces. The pope, Gregory XIII., ordered a *Te Deum* to be performed on the occasion, with other rejoicings.

BASLE, a rich city in Switzerland. The 18th general council sat here from 1431 to 1443. Many important reforms in the church were proposed, but not carried into effect : among others the union of the Greek and Roman churches. The university was founded in 1460. Treaties of peace between France, Spain, and Prussia were concluded here in 1795.

BASHI-BAZOUKS, irregular Turkish troops, partially employed by the British in the Crimean war, 1854-6.

BASIENTELLO (S. Naples). Here the army of the emperor Otho II. fell into an ambuscade, and was nearly cut to pieces by the Greeks and Saracens on July 13, 982 ; the emperor himself barely escaped.

BASILIANS, an order of monks, which obtained its name from St. Basil, who died 380. The order was reformed by pope Gregory, in 1569.—A sect, founded by Basil, a physician of Bulgaria, held most extravagant notions ; they rejected the books of Moses, the eucharist, and baptism, and are said to have had everything, even their wives, in common, 1110. Basil was burnt alive in 1118.

BASILIKON DORON (Royal Gift), precepts on the art of government, composed by James I. of England for his son, and first published at Edinburgh in 1599. The collected works of this monarch were published at London, 1616-20, in one vol. fol.

BASQUE PROVINCES (N. W. Spain, Biscay, Guipuscoa, and Alava). The Basques, considered to be descendants of the ancient Iberi, were termed Vascones by the Romans, whom they successfully resisted. They were subdued with great difficulty by the Goths about 580 ; and were united to Castile in the 13th and 14th centuries. Their language, distinct from all others, is conjectured to be of Tartar origin.

BASQUE ROADS. Four French ships of the line, riding at anchor here, were attacked by lords Gambier and Cochrane (the latter commanding the fireships), and all, with a great number of merchant and other vessels, were destroyed, April 12, 1809. Cochrane accused Gambier of neglecting to support him, and thereby allowing the French to escape. At a court-martial (July 26—Aug. 4), lord Gambier was acquitted.

BASSORAH, **BASRAH**, or **BUSSORAH** (Asia Minor), a Turkish city, founded by the caliph Omar, about 635. It has been several times taken and retaken by the Persians and Turks.

BASS ROCK, an isle in the Firth of Forth (S. Scotland), was granted to the Lauders, 1316 ; purchased for a state-prison, 1671 ; taken by the Jacobites, 1690 ; surrendered, 1694 ; granted to the Dalrymples, 1706.

BASS'S STRAIT, **AUSTRALIA**. Mr. Bass, surgeon of the *Reliance*, in an open boat from Port Jackson, in 1797, penetrated as far as Western Port, and affirmed that a strait existed between New South Wales and Van Diemen's Land. Lieutenant Flinders circumnavigated Van Diemen's Land, and named the strait after Mr. Bass, 1799.

BASSET, or **BASSETTE**, or *Pour et Contre*, a game at cards, said to have been invented by a noble Venetian, in the 15th century ; introduced into France, 1674.

BASTARD, a child not born in lawful wedlock. An attempt was made in England, in 1236, to make bastard children legitimate by the subsequent marriage of the parents, but it failed, and led to the memorable answer to the barons assembled in the parliament of Merton : *Nolimus leges Angliæ mutari*—"We will not have the laws of England changed." Women concealing their children's birth deemed guilty of murder, 21 James I., 1624. *Viner's Statutes*. In Scotland bastard children had not the power of disposing of their moveable estates by will, until 6 Will. IV. 1836. A new act, facilitating the claims of mothers, and making several provisions for proceeding in bastardy cases, was passed 8 Vict. cap. 10 (1845).

BASTILLE, **PARIS**, a castle built by Charles V., king of France, in 1369, for the defence of Paris against the English ; completed in 1383. It was afterwards used as a state prison, and became the scene of much suffering. Henry IV. and his veteran army assailed it in vain in the siege of Paris, during the war that desolated France between 1587 and 1594. On July 14-15, 1789, it was pulled down by the infuriated populace ; the governor and other officers were seized, conducted to the Place de Grève, and had their hands and heads cut off. The heads fixed on spikes were carried in triumph through the streets.—"The man with the iron mask," the most mysterious prisoner ever known, died here, Nov. 19, 1703. See *Iron Mask*.

BATAVIA and **BATAVIAN REPUBLIC**. See *Holland*.

BATAVIA, the capital of Java, and of all the Dutch settlements in the East Indies, built by that people about 1619. Taken by the English, Jan. 1782. Again, by the British, under general sir Samuel Auchmuty, Aug. 26, 1811; restored in 1814.

BATH (Somerset), a favourite station of the Romans. About 44 B.C. was remarkable then for its hot springs. Coel, a British king, is said to have given this city a charter, and the Saxon king Edgar was crowned here, A.D. 973.

BATH AND WELLS, BISHOPRIC OF. The see of Wells, whose cathedral church was built by Ina, king of the West Saxons, in 704, was established in 909. The see of Bath was established in 1078. John de Villula, the sixteenth bishop, having purchased the city of Bath for 500 marks of Henry I., transferred his seat from Wells to Bath in 1088. Disputes arose between the monks of Bath and the canons of Wells about the election of a bishop, which were compromised in 1135. Henceforward the bishop was to be styled from both places; the precedence to be given to Bath. The see is valued in the king's books at 53*l.* 1*s.* 3*d.* *per annum.* Present income, 500*l.*

BATH ADMINISTRATION. Mr. Pelham and his friends having tendered their resignation to the king (George II.), Feb. 10, 1746, the formation of a new ministry was undertaken by William Pulteney, earl of Bath; but it expired on Feb. 12, while yet incomplete, and received the name of the "Short-lived" administration. The members of it actually appointed were: the earl of Bath, *first lord of the treasury*; lord Carlisle, *lord privy seal*; lord Winchelsea, *first lord of the admiralty*; and lord Granville, one of the secretaries of state, with the seals of the other in his pocket, "to be given to whom he might choose." Mr. Pelham and his colleagues returned to power. *Cox's Life of Pelham.*

BATH, ORDER OF THE, said to be of early origin, but formally constituted Oct. 11, 1399, by Henry IV., two days previous to his coronation in the Tower; he conferred the order upon forty-six esquires, who had watched the night before, and had bathed. After the coronation of Charles II. the order was neglected until May 18, 1725, when it was revived by George I., who fixed the number of knights at 37. On Jan. 2, 1815, the prince regent enlarged the order, forming classes of knights grand crosses (72), and knights commanders (180), with an unlimited number of companions. By an order published May 25, 1847, all the existing statutes of this order were annulled; and by the new statutes, the order, hitherto exclusively military, was opened to civilians. In 1851, Dr. Lyon Playfair, and other promoters of the Great Exhibition of that year, received this honour.

CONSTITUTION:—1st Class. Knights grand cross, 50 military, 25 civil.
2nd Class. Knights commanders, 100 " 50 "
3rd Class. Companions, 525 " 200 "

BATHS were long used in Greece, and introduced by Agrippa into Rome. The thermæ of the Romans and gymnasia of the Greeks (of which baths formed merely an appendage) were sumptuous. The marble group of Laocœon was found in 1506 in the baths of Titus, erected about 80, and the Farnese Hercules in those of Caracalla, erected, 211. See *Bath.*

BATHS IN LONDON.

In London, St. Agnes Le Celre, in Old-street-road, was a spring of great antiquity; baths said to have been formed in 1502.

Acts were passed to encourage the establishment of public baths and wash-houses, "for the health, comfort, and welfare of the inhabitants of populous towns and districts," in England and Ireland . . . 1846
In the quarter ending Sept. 1854, 537,345 bathers availed themselves of the baths in London, and in this period there were 85,260 washers.
Public baths and wash-houses have since been established throughout the empire.

BATON, a truncheon borne by generals in the French army, and afterwards by the marshals of other nations. Henry III. of France, before he ascended the throne, was made generalissimo of the army of his brother Charles IX., and received the *bâton* as the mark of the high command, 1569. *Hénault*.

BATTERIES along the coasts were constructed by Henry VIII. (who reigned 1509-47). The famous floating batteries with which Gibraltar was attacked, in the memorable siege of that fortress, were the scheme of D'Arcon, a French engineer. There were ten of them, and they resisted the heaviest shells and 32-pound shot, but ultimately yielded to red-hot shot, Sept. 13. 1782. See *Gibraltar*.

BATTERING-RAM, *Testudo Arietaria*, with other military implements, some of which are still in use, are said to have been invented by Artemon, a Lacedæmonian, and employed by Pericles, about 441 B.C. These ponderous engines (from 80 to 120 feet long) by their own weight exceeded the utmost effects of the battering cannon of the early part of the last century. *Desaguliers*. Sir Christopher Wren employed a battering-ram in demolishing the old walls of St. Paul's church, previously to rebuilding the edifice in 1675.

BATTERSEA PARK originated in an act of parliament passed in 1846, which empowered Her Majesty's commissioners of woods to form a royal park in Battersea-fields. Acts to enlarge the powers of the commissioners were passed in 1848, 1851, and 1853. The park and the new bridge connecting it with Chelsea were opened in April, 1858.

BATTLE-ABBEY, Sussex, founded by William I., 1067, on the plain where the battle of Hastings was fought, Oct. 14, 1066. It was dedicated to St. Martin, and was given to Benedictine monks, who were to pray for the souls of the slain. The original name of the plain was Hetheland. See *Hastings*. After the battle of Hastings, a list was taken of William's chiefs, amounting to 629, and called the BATTLE-ROLL; and amongst these chiefs the lands and distinctions of the followers of the defeated Harold were distributed.

BATTLE, WAGER OF, a trial by combat formerly allowed by our laws, where the defendant in an appeal of murder might fight with the appellant, and make proof thereby of his guilt or innocence. See *Appeal*.

BATTLE-AXE, a weapon of the Celts. The Irish were constantly armed with an axe. *Burns*. At the battle of Bannockburn king Robert Bruce clove an English champion down to the chine at one blow with a battle-axe, 1314. *Hume*. The battle-axe guards, or beautifiers, who are vulgarly called beef-eaters, and whose arms are a sword and lance, were first raised by Henry VII. in 1485. They were originally attendants upon the king's buffet. See *Yeoman of the Guard*.

BATTLEFIELD, BATTLE OF. See *Shrewsbury*.

BATTLES. Palamedes of Argos is said to have been the first who ranged an army in a regular line of battle, placed sentinels round a camp, and excited the soldier's vigilance by giving him a watchword. *Lenglet*. See *Naval Battles, British*. The following are the most memorable battles, arranged in chronological order. The fifteen battles marked by a † are termed "decisive" by Professor Creasy; *n*. signifies *naval*.

BAUGÉ. *See Anjou.*

BAUTZEN and WURTZCHEN (in North Germany), the sites of battles fought May 20, and 21, 1813, between the French commanded by Napoleon, and the allies under the emperor of Russia and the king of Prussia. The struggle commenced on the 19th with a contest on the outposts, which cost each army a loss of above 2000 men. On the 20th (at BAUTZEN) the French were more successful; and on the 21st (at WURTZCHEN) the Allies were compelled to retire; but Napoleon obtained no permanent advantage from these sanguinary engagements. Duroc was among the killed at Bautzen, to the great sorrow of the emperor and the French army.

BAVARIA (part of ancient Noricum and Vindelicia), a kingdom in South Germany, conquered from the Celtic Gauls (Boii) by the Franks between 630 and 660. The country was afterwards governed by dukes subject to the French monarchs. Tassillon II. was deposed by Charlemagne, who established margraves in 788. The first duke was Leopold I.

† We have no space for the numerous smaller conflicts, of which the accounts are very uncertain.

895. Guelf of the house of Este was made duke by the emperor Henry IV. in 1071. His descendant Henry the Lion, duke of Saxony, Bavaria, and Brunswick (ancestor of the present Brunswick family, see *Brunswick*), was dispossessed in 1180 by the emperor Frederick Barbarossa (who had been previously his friend and benefactor). Otho of Wittelsbach became duke, whose descendants reigned till 1777, when the elector palatine acquired Bavaria, which was made an electorate 1623. In Dec. 1805, Bavaria was erected into a kingdom by Bonaparte, and obtained by the treaty of Presburg the incorporation of the whole of the Italian and German Tyrol, the bishopric of Anspach, and lordships in Germany. Bavaria suffered much by its alliances with France against Austria in 1726 and 1805. The king joined the Allies in Oct. 1813. Population, Dec. 1861, 4,689,837.

DUKES.

- 1825. Louis-Charles, Oct. 13; abdicated March 20.*
- 1848. Maximilian-Joseph II. (son) born Nov. 28, 1811; dies March 10, 1864.
- 1864. Louis II. (son) March 10; born, Aug. 25, 1845; *Heir*: his brother Otho, born April 27, 1848.

BAYEUX TAPESTRY, said to have been wrought by Matilda, queen of William I. It is 19 inches wide, 214 feet long, and is divided into compartments showing the events, from the visit of Harold to the Norman court, to his death at Hastings; it is now preserved in the town house at Rouen. A copy, drawn by C. Stothard, and coloured after the original, was published by the Society of Antiquaries in 1821-3.

BAY ISLANDS (the chief, Ruatan), in the Bay of Honduras, Central America, belonged to Spain till 1821, then to Great Britain, which formed them into a colony in 1852, but ceded them to Honduras, Nov. 28, 1859. See *Honduras*.

BAYLEN (S. Spain), where on July 20, 1808, the French, consisting of 14,000 men commanded by generals Dupont and Wedel, were defeated by the Spaniards under Reding, Cougigny, and other generals, whose force amounted to 25,000. The French had nearly 3000 killed and wounded, and the division of Dupont (about 8000 men) was made prisoners.

BAYONET, the short dagger fixed at the end of fire-arms, said to have been invented at Bayonne, in France, about 1647, 1670, or 1690. It was used at Killiecrankie in 1689, and at Marsaglia by the French, in 1693, "with great success, against the enemy unprepared for the encounter with so formidable a novelty." The ring bayonet was adopted by the British, Sept. 24, 1693. *Aspin.*

BAYONNE (S. France), an ancient city. It was held by the English from 1265 till it was taken by Spain and France VII. The queens of Spain and France met here in 1565 the cruel duke of Alva, it is supposed to arrange the massacre of St. Bartholomew. Charles IV. of Spain abdicated here in favour of "his friend and ally" the emperor Napoleon; and Ferdinand, prince of Asturias, and Don Carlos and Don Antonio renounced their rights to the Spanish throne, May 5, 1808. In the neighbourhood of Bayonne was much desperate fighting between the French and British armies, Dec. 10, 11, and 13, 1813. Bayonne was

* The abdication of Charles-Louis was mainly caused by his attachment to an intriguing woman, known throughout Europe by the assumed name of Lola Montes, who, in the end, was expelled the kingdom for her interference in state affairs, and afterwards led a wandering life. She delivered lectures in London, in 1859, and thence proceeded to the United States. She died at New York, Jan. 17, 1861.

invested by the British, Jan. 14, 1814; on April 14 the French made a sally, and attacked the English with success, but were at length driven back. The loss of the British was considerable, and lieut.-gen. sir John Hope was wounded and taken prisoner.—A Franco-Spanish industrial and fine-arts exhibition was opened at Bayonne in July, 1864.

BAYREUTH (N. Germany), a margraviate, held formerly by a branch of the Brandenburg family, was with that of Anspach abdicated by the reigning prince in favour of the king of Prussia, 1790. The archives were brought (in 1783) from Plassenburg to the city of Bayreuth, which was incorporated with Bavaria by Napoleon in 1806.

BAZAAR, or Covered Market, a word of Arabic origin. The bazaar of Ispahan is magnificent, yet it is excelled by that of Tauris, which has several times held 30,000 men in order of battle. In London, the Soho-square bazaar was opened by Mr. Trotter in 1816 to relieve the relatives of persons killed in the war. The Queen's bazaar, Oxford-street, a very extensive one, was (with the Diorama) burnt down, and the loss estimated at 50,000*l.*, May 27, 1829. It was rebuilt, and converted into the Princess's Theatre, opened Sept. 30, 1841. The St. James's bazaar was built by Mr. Crockford in 1832. There are also the Pantheon, the Western Exchange, &c. The most imposing sale termed a bazaar was opened for the benefit of the Anti-Corn-Law League, in Covent-garden theatre, May 5, 1845; in six weeks 25,000*l.* was obtained, mostly by admission money.

BEACHY HEAD, a promontory on the S.E. coast of Sussex, where the British and Dutch combined fleet, commanded by the earl of Torrington, was defeated by a superior French force, under admiral Tourville, June 30, 1690; the allies suffered very severely. The Dutch lost two admirals, 500 men, and several ships—sunk to prevent them from falling into the hands of the enemy; the English lost two ships and 400 men. The admirals on both sides were blamed; ours, for not fighting; the French, for not pursuing the victory.

BEACONS. See *Lighthouses*.

BEADS were early used in the East for reckoning prayers. St. Augustin mentions them, 366. About 1090, Peter the Hermit is said to have made a series of 55 beads. To Dominic de Guzman is ascribed the invention of the Rosary (a series of 15 large and 150 small beads), in honour of the Blessed Virgin, about 1202. Beads soon after were in general use. The Bead-roll was a list of deceased persons, for the repose of whose souls a certain number of prayers was recited, which the devout counted by a string of beads. Beads appear to have been used by the Druids, being found in British barrows.

BEAM AND SCALES. The apparatus for weighing goods was so called, "as it weighs so much at the king's beam." A public beam was set up in London, and all commodities ordered to be weighed by the city officer, called the weigh-master, who was to do justice between buyer and seller, statute 3 Edw. II. 1309. *Stow.* Beams and scales, with weights and measures, were ordered to be examined by the justices at quarter sessions, 35 Geo. III. 1794. See *Weights and Measures*.

BEANS, BLACK AND WHITE, were used by the ancients in gathering the votes of the people for the election of magistrates. A white bean signified absolution, and a black one condemnation. The precept of Pythagoras to abstain from beans, *abstine a fabis*, has been variously interpreted. "Beans do not favour mental tranquillity." *Cicero.* The finer kinds of beans were brought to these countries at the period of the introduction of most other vegetables, in Henry VIII.'s reign.

BEAR-BAITING, an ancient popular English sport, prohibited by act of parliament in 1835.

BEARDS.* The Egyptians did not wear beards; the Assyrians did. They have been worn for centuries by the Jews, who were forbidden to mar their beards, B.C. 1490. *Lev.* xix. 27. The Tartars waged a long war with the Persians, declaring them infidels, because they would not cut their beards, after the custom of Tartary. The Greeks wore their beards

* A bearded woman was taken by the Russians at the battle of Pultowa, and presented to the czar, Peter I., 1724: her beard measured $1\frac{1}{2}$ yard. A woman is said to have been seen at Paris with a bushy beard, and her whole body covered with hair. *Diet. de Trevoux.* The great Margaret, governess of the Netherlands, had a very long stiff beard. In Bavaria, in the time of Wolfius, a virgin had a long black beard. *Mdlle. Bois de Chêne*, borne at Geneva (it was said) in 1834, was exhibited in London, in 1852-3, when, consequently, eighteen years of age: she had a profuse head of hair, a strong black beard, large whiskers, and thick hair on her arms and down from her neck on her back, and masculine features.

till the time of Alexander, who ordered the Macedonians to be shaved, lest the beard should give a handle to their enemies, 330 B.C. Beards were worn by the Romans, 297 B.C. The emperor Julian wrote a diatribe (entitled "*Misopogon*") against wearing beards, A.D. 362.—In England, they were not fashionable after the Conquest, 1066, until the 13th century, and were discontinued at the Restoration. Peter the Great enjoined the Russians, even of rank, to shave, but was obliged to keep officers on foot to cut off the beard by force. Since 1851 the custom of wearing the beard has gradually increased.

BEAUGÉ. See *Anjou*.

BEAULIEU, ABBEY OF, founded by king John, in the New Forest, Hampshire, in 1204. It was dedicated to the Blessed Virgin, had the privilege of sanctuary, and was devoted to monks of the reformed Benedictine order. It afforded an asylum to Margaret, queen of Henry VI., after the defeat of the earl of Warwick at Barnet, April 14, 1471. Here, too, Perkin Warbeck obtained refuge in the reign of Henry VII., in 1497.

BEAUVAIS (N. France), the ancient Bellocaci, and formerly capital of Picardy. On the town being besieged by Charles the Bold, duke of Burgundy, at the head of 80,000 men, the women under the conduct of Jeanne Fourquet, or Lainé, also De la Hachette, from her using that weapon, particularly distinguished themselves, and the duke was obliged to raise the siege, July 10, 1472. In memory of this, the women of Beauvais walk first in the procession on the anniversary of their deliverance. *Hénault*.

BECKET'S MURDER.* Thomas Becket, archbishop of Canterbury, was murdered at the altar, Dec. 29, 1170. The king was absolved of guilty knowledge of the crime in 1172, and did penance at the tomb in 1174. The bones of Becket were enshrined in gold and jewels in 1220; but were burned in the reign of Henry VIII. 1539.

BED. The ancients slept on skins. Beds were afterwards made of loose rushes, heather, or straw. The Romans are said to have first used feathers. Feather-beds were in use in England in the reign of Henry VIII. The bedsteads of the Egyptians and later Greeks, like modern couches, became common among the Roman upper classes. The ancient great bed at Ware, Herts, capable of holding twelve persons, was sold, it is said, to Charles Dickens, Sept. 6, 1864. A bedstead of gold was presented to the queen on Nov. 2, 1859, by the Maharajah of Cashmere. Air-beds and water-beds have been made since the manufacture of india-rubber cloth by Clark in 1813; and by Macintosh in 1823. Dr. Arnott's hydrostatic bed was invented in 1830.

BED OF JUSTICE, a French court presided over by the king, whose seat was termed a "bed." It controlled the ordinances of the parliament. The last was held by Louis XVI. at Versailles in 1787.

BEDER (Arabia). Here Mahomet gained his first victory (over the Koreish of Mecca), 623. It was considered to be miraculous.

BEDFORD, a town, N.N.W. London, renowned for its many free educational establishments endowed in 1561 by sir Wm. Harpur, a London alderman. Here John Bunyan preached, wrote "*The Pilgrim's Progress*," and died (in 1688).

BEDFORD LEVEL, a portion of the great fen districts in the eastern counties, drained in the early part of the 17th century by the earl of Bedford, aided by the celebrated Dutch engineer, sir Cornelius Vermuyden, amid great opposition. See *Levels*.

BEDLAM. See *Bethlehem*.

BEDOUINS, wandering tribes of Arabs, living on the plunder of travellers, &c. They profess a form of Mahomedanism, and are governed by sheikhs. They are said to be descendants of Ishmael, and appear to fulfil the prophecy respecting him, *Gen. xvi. 12*, 1911 B.C. They are the scourge of Arabia and Egypt.

BEEF-EATERS. See *Battle-axe*.

* Thomas Becket was born in 1119. His father Gilbert was a London trader, and his mother is stated to have been a convert from Mahomedanism. He was educated at Oxford, and made archdeacon by Theobald, archbishop of Canterbury, who introduced him to the king Henry II. He became chancellor in 1155, but on being elected archbishop of Canterbury in 1162, he resigned the chancellorship, to the great offence of the king. He opposed strenuously the constitutions of Clarendon in 1164, and fled the country; and, in 1166, excommunicated all the clergy who agreed to abide by them. He and the king met at Fretville, in Touraine, on July 22, 1170, and were formally reconciled. On his return he recommenced his struggle with the king, which led to his tragical death. The Merchant-Adventurers were at one time termed "the Brotherhood of St. Thomas à Becket."

BEEF-STEAK SOCIETY, the members of which dine together in a room behind the Lyceum theatre, was founded in 1735 by John Rich, patentee of Covent-garden theatre, and George Lambert, the scene-painter, in whose work-room the society originated. Beef-steak clubs existed in 1709 and 1733.

BEER. See *Ale, Porter, Victuallers*.

BEES. Mount Hybla, on account of its odoriferous flowers, thyme, and abundance of honey, has been poetically called the "empire of bees." Hymettus, in Attica, was also famous for its bees and honey. The economy of bees was admired in the earliest ages; and Eumelus, of Corinth, wrote a poem on bees, 741 B.C. There are 292 species of the bee or *apis* genus, and 111 in England. Bees were first introduced into Boston, New England, by the English in 1670, and have since spread over the whole continent. Mandeville's satirical "Fable of the Bees" appeared in 1723. Huber published his observations on bees in 1792. The Apian Society had an establishment at Muswell Hill, near London (1860-2). The Ligurian variety of the honey-bee was successfully introduced into England in 1860.

BEET-ROOT is of recent cultivation in England. *Beta vulgaris*, red beet, is used for the table as a salad. Margraff first produced sugar from the *white* beet-root in 1747. M. Achard produced excellent sugar from it in 1799; and the chemists of France, at the instance of Bonaparte, largely extracted sugar from the beet-root in 1800. 60,000 tons of sugar, about half the consumption, are now manufactured in France from beet. It is also largely manufactured in other countries. A refinery of sugar from beet-root has been erected at the Thames-bank, Chelsea.

BEGGARS were tolerated in ancient times, being often musicians and ballad-singers. In modern times severe laws have been passed against them. In 1572, by 14 Eliz. c. 5, sturdy beggars were ordered to be "grievously whipped and burnt through the right ear." By the Vagrant Act (1824), 5 Geo. IV. c. 83, all public beggars are liable to a month's imprisonment. See *Poor Laws and Mendicity Society*. The "BEGGAR'S OPERA," by John Gay, a satire against the government of sir Robert Walpole, was produced at the Lincoln's-inn-fields theatre, 1727, and had a run of 63 nights.

BEGUINES, a congregation of nuns, first established at Liege, and afterwards at Nivelles, in 1207, some say 1226. The "Grand Beguinage" of Bruges was the most extensive. Some of these nuns imagined that they could in this life arrive at impeccability. The council of Vienne condemned this error, and abolished a branch of the order in 1311. They still exist in Germany and Belgium, acting as nurses to the sick and wounded, &c.

BEHEADING, the *Decollatio* of the Romans, introduced into England from Normandy (as a less ignominious mode of putting high criminals to death) by William the Conqueror, 1076, when Waltheoff, earl of Huntingdon, Northampton, and Northumberland, was first so executed. Since then this mode of execution became frequent, particularly in the reigns of Henry VIII. and Mary, when even women of the noblest blood thus perished.*

BEHISTUN, in Persia. At this place is a rock containing important inscriptions in three languages, in cuneiform (or wedge-shaped) characters, which were deciphered and translated by sir H. Rawlinson in 1844-6 and published in the Journal of the Royal Asiatic Society. Each paragraph commences with "I am Darius the Great King."

BEHRING'S STRAIT, discovered by captain Vitus Behring, a Danish navigator in the service of Russia. He thus proved that the continents of Asia and America are not united, but are distinct from each other about thirty-nine miles, 1728. He died at Behring's island in 1741. The current from the west between the shores is very inconsiderable, the depth not being more than from twelve to thirty fathoms. In 1788 captain James Cook accurately surveyed the coast of both continents.

BELFAST, capital of Ulster, Ireland. First mentioned about 1315; its castle, supposed to have been built by John de Courcy, was then destroyed by the Scots under Edward Bruce. See *Orange*.

* Among other instances (besides queens of England) may be mentioned the lady Jane Grey, beheaded Feb. 12, 1554; and the venerable countess of Salisbury,—the latter remarkable for her resistance of the executioner. When he directed her to lay her head on the block, she refused to do it: telling him that she knew of no guilt, and would not submit to die like a criminal. He pursued her round and round the scaffold, aiming at her hoary head, and at length took it off, after mangling the neck and shoulders of the illustrious victim in a horrifying manner. She was daughter of George, duke of Clarence, and last of the royal line of Plantagenet. May 27, 1541. *Hume*.

BELGIUM, late the southern portion of the kingdom of the Netherlands, and anciently the territory of the Belge, who were finally conquered by Julius Cæsar, 51 B.C. Its size is about one-eighth of Great Britain. The population, December 31, 1862, was 4,836,566. Its government is a liberal constitutional monarchy, founded in 1831. KING OF THE BELGIANS.

1831. Leopold, † first king of the Belgians; born Dec. 16, 1790; inaugurated July 21, 1831, at Brussels; married Aug. 9, 1832, Louise, eldest daughter of Louis Philippe, king of

the French; she died Oct. 11, 1850. The present king, 1865. †
Heir: his son Leopold, duke of Brabant; born April 9, 1835; married archduchess Maria of Austria, Aug. 22, 1853.

BELGRADE, an ancient city in Servia, on the right bank of the Danube. It was taken from the Greek emperor by Solomon, king of Hungary, in 1086; gallantly defended by John Huniades against the Turks, under Mahomed II., July to Sept. 1486, when the latter was defeated with the loss of 40,000 men. Belgrade was taken by sultan Solymán, 1522, and retaken by the Imperialists in 1688, from whom it again reverted to the Turks in 1690. It was besieged in May, 1717, by prince Eugene. On Aug. 5 of that year, the Turkish army, 200,000 strong, approached to relieve it, and a sanguinary battle was fought at Peterwaradein, on August 22, in which the Turks lost 20,000 men; after this battle Belgrade surrendered. In 1739 it was ceded to the Turks, after its fine fortifications had been demolished. It was again taken in 1789, and restored at the peace of Reichenbach, in 1790. The Servian insurgents had possession of it in 1806. In 1815 it was placed under

* This treaty arose out of the conference held in London on the Belgian question; by the decision of which, the treaty of Nov. 15, 1831, was maintained, and the pecuniary compensation of sixty millions of francs offered by Belgium for the territories adjudged to Holland, was declared inadmissible.

† At the revolution in 1830, the Roman Catholic clergy lost the administration of the public charities, which they have struggled to recover ever since. In April, 1857, M. Decker, the head of the ministry, brought in a bill for this purpose; the principle of which was carried. This led, however, to so much agitation that the ministry were compelled to withdraw the bill, and eventually to resign.

‡ Leopold married, in May, 1816, the princess Charlotte of Wales, daughter of the prince regent, afterwards George IV. of England; she died in childhood, Nov. 6, 1817.

prince Milosch, subject to Turkey. The fortifications were restored in 1820. On June 19, 1862, the Turkish pacha was dismissed for firing on the town during a riot. University established by private munificence, 1863. See *Servia*.

BELL, BOOK, AND CANDLE: in the Romish ceremony of Excommunication (*which see*), the bell is rung, the book is closed, and candle extinguished; the effect being to exclude the excommunicated from the society of the faithful, divine service, and the sacraments. Its origin is ascribed to the 8th century.

BELL-ROCK LIGHTHOUSE, nearly in front of the Frith of Tay, one of the finest in Great Britain; it is 115 feet high, is built upon a rock that measures 427 feet in length and 200 feet in breadth, and is about 12 feet under water.* It was erected in 1806-10; it is provided with two bells for hazy weather.

BELLAIR, in North America. The town was attacked by the British forces under sir Peter Parker, who, after an obstinate engagement, were repulsed with considerable loss; their gallant commander was killed, Aug. 30, 1814.

BELLEISLE, an isle on the south coast of Brittany, France, was erected into a duchy in favour of marshal Belleisle, in 1742, in reward of his brilliant military and diplomatic services, by Louis XV. Belleisle was taken by the British forces under commodore Keppel and general Hodgson, after a desperate resistance, June 7, 1761, but was restored to France in 1763.

BELLES-LETTRES, OR POLITE LEARNING. See *Academies and Literature*.

BELLMEN, appointed in London to proclaim the hour of the night before public clocks became general, were numerous about 1556. They were to ring a bell at night and cry "Take care of your fire and candle, be charitable to the poor, and pray for the dead."

BELLOWS. Anacharsis, the Scythian, is said to have been the inventor of them, about 569 B.C.; to him is also ascribed the invention of tinder, the potter's wheel, anchors for ships, &c. Bellows were not used in the furnaces of the Romans. The production of the great leviathan bellows of our foundries (suggested by the diminutive domestic bellows) must have been early, but we cannot trace the time. See *Blowing-Machines*.

BELLS were used among the Jews, Greeks, and Romans. The responses of the Dodonæan oracle were in part conveyed by bells. *Strabo*. The monument of Porsenna was decorated by pinnacles, each surmounted by bells. *Pliny*. Introduced by Paulinus, bishop of Nola, in Campagna, about 400. First known in France in 550. The army of Clothaire II., king of France, was frightened from the siege of Sens by the ringing of the bells of St. Stephen's church. The second exception of our king Egbert commands every priest, at the proper hours, to sound the bells of his church. Bells were used in churches by order of pope John IX., about 900, as a defence, by ringing them, against thunder and lightning. First cast in England by Turketel, chancellor of England, under Edmund I. His successor improved the invention, and caused the first tuneable set to be put up at Croyland abbey, 960. *Stow*. The celebrated "Song of the Bell," by Schiller (died 1805), has been frequently translated. The following list is that given by Mr. E. Beckett Denison in his discourse on bells at the Royal Institution, March 6, 1857.

* Upon this rock, tradition says, the abbots of the ancient monastery of Aberbrothock succeeded in fixing a bell in such a manner that it was rung by the impulse of the sea, thus warning mariners of their impending danger. Tradition also tells us that this apparatus was carried away by a Dutchman, who was afterwards lost upon the rock, with his ship and crew.

† The metal has been valued, at the lowest estimate, at 66,565*l*. Gold and silver are said to have been thrown in as votive offerings.

‡ The largest bell in England (named Big Ben, after sir Benjamin Hall, the then chief commissioner of works), cast at Houghton-le-Spring, Durham, by Messrs. Warner, under the superintendence of Mr. E. Beckett Denison and the rev. W. Taylor, at an expense of 3343*l*. 14*s*. 9*d*. The composition was 22 parts copper and 7 tin. The diameter was 9 ft. 5½ in.; the height 7 ft. 10½ in. The clapper weighed 12 cwt. *Rev. W. Taylor*.

BAPTISM OF BELLS.—They were anointed and baptized in churches it is said from the 10th century. *Du Fresnoy.* The bells of the priory of Little Dunmow, in Essex, were baptized by the names of St. Michael, St. John, Virgin Mary, Holy Trinity, &c., in 1501. *Weaver.* The great bell of Notre Dame, in Paris, was baptized by the name of Duke of Angoulême, 1816. On the continent, in Roman Catholic states, they baptize bells as we do ships, but with religious solemnity. *Ashe.*

RINGING OF BELLS, in changes of regular peals, is almost peculiar to the English, who boast of having brought the practice to an art. There were formerly societies of ringers in London. *Holden.* A sixth bell was added to the peal of five, in the church of St. Michael, 1430. *Stow.* Nell Gwynne left the ringers of the bells of St. Martin's-in-the-fields money for a weekly entertainment, 1687, and many others have done the same.

BELOOCHISTAN, the ancient Gedrosia (S. Asia). The capital was taken by the British in the Afghan war, in 1839; abandoned in 1840; taken and held for a short time in 1841.

BELVIDERE EXPLOSION. See *Gunpowder* (note).

BENARES, in India, a holy city of the Hindoos, abounding in temples. It was ceded by the nabob of Oude, Asoph-ud-Dowlah, to the English in 1775. An insurrection took place here, which had nearly proved fatal to the British interests in Hindostan, 1781. The rajah, Cheyt Sing, was deposed in consequence of it, in 1783. Mr. Cherry, capt. Conway, and others, were assassinated at Benares, by vizier Aly, Jan. 14, 1799. In June, 1857, col. Neil succeeded in suppressing attempts to join the Sepoy mutiny. See *India.*

BENBURB, near Armagh (N. Ireland). Here O'Neill totally defeated the English under Monroe, June 5, 1646. Moore says that it was "the only great victory since the days of Brian Boru, achieved by an Irish chieftain in the cause of Ireland."

BENCÖOLEN (Sumatra). The English East India Company made a settlement here which preserved to them the pepper trade after the Dutch had dispossessed them of Bantam, 1682. *Anderson.* York Fort was erected by the East India Company, 1690. In 1693 a dreadful mortality raged here, occasioned by the town being built on a pestilent morass: among others the governor and council perished. The French, under count D'Estaing, destroyed the English settlement, 1760. Bencoolen was reduced to a residency under the government of Bengal, in 1801, and was ceded to the Dutch in 1825, in exchange for their possessions in Malacca. See *India.*

BENDER (Bessarabia, European Russia) is memorable as the asylum of Charles XII. of Sweden, after his defeat at Pultowa by the czar Peter the Great, July 8, 1709. The peace of Bender was concluded in 1711. Bender was taken by storm, by the Russians, in Sept. 1770; was again taken by Potemkin in 1789, and again stormed in 1809. It was restored at the peace of Jassy, but retained at the peace of 1812.

BENEDICTINES, an order of monks founded by St. Benedict (lived 480—543), who introduced the monastic life into western Europe, in 529, when he founded the monastery on Monte Cassino in Campania, and eleven others afterwards. His *Regula Monachorum* (rule of the monks) soon became the common rule of western monachism. No religious order has been so remarkable for extent, wealth, and men of note and learning, as the Benedictine. Among its branches the chief were the Cistercians, founded in 1098, and reformed by St. Bernard, abbot of Clairvaux, in 1116; and the Carthusians, from the Chartreux (hence Charter-house), founded by Bruno about 1084. The Benedictine order was introduced into England by Augustin, in 596; and William I. built an abbey for it on the plain where the

* The bell "Big Ben," having been found to be cracked on Oct. 24, 1857, it was broken up and another bell cast with the same metal, in May, 1858, by Messrs. Mears, Whitechapel. It is rather different in shape to its predecessor, "Big Ben," and about 2 tons lighter. Its diameter is 9 ft. 6 in.; the height 7 ft. 10 in. It was struck for the first time, Nov. 18, 1858. The clapper weighs 6 cwt.—half that of the former bell. The note of the bell is E natural; the quarter-bells being G, B, E, F. On Oct. 1, 1859, this bell was also found to be cracked. It remains in this state (Sept. 1865).

† The clapper of St. Paul's bell weighs 180 lbs.; the diameter of the bell is 10 feet, and its thickness 10 inches. The hour strikes upon this bell, the quarters upon two smaller ones. See *Clocks.*

battle of Hastings was fought, 1066. See *Battle-Abbey*. William de Warrenne, earl of Warrenne, built a convent at Lewes, in Sussex, in 1077. "At Hammersmith is a nunnery, whose inmates are denominated Benedictine dames." *Leigh*. Of this order it is reckoned that there have been 40 popes, 200 cardinals, 50 patriarchs, 116 archbishops, 4600 bishops, 4 emperors, 12 empresses, 46 kings, 41 queens, and 3600 saints. Their founder was canonised. *Baronius*. The Benedictines have taken little part in politics, but have produced many valuable works : especially the congregation of St. Maur, who published the celebrated *l'Art de Vérifier les Dates*, in 1750, and edited many ancient authors.

BENEFICE (literally a good deed or favour), OR **FIEF**. Clerical benefices originated in the 12th century, when the priesthood began to imitate the feudal lay system of holding lands for performing certain duties : till then the priests were supported by alms and oblations at mass. Vicarages, rectories, perpetual curacies, and chaplaincies, are termed benefices, in contradistinction to dignities, bishoprics, &c. A rector is entitled to all the tithes ; a vicar, to a small part or to none.—All benefices that should become vacant in the space of six months, were given by pope Clement VII. to his nephew, in 1534. *Notitia Monastica*. An act for the augmentation of poor benefices, by the sale of some of those in the presentation of the lord chancellor, was passed in 1863.

BENEFIT OF CLERGY. See *Clergy*.

BENEFIT SOCIETIES. See *Friendly Societies*.

BENEVENTUM (now Benevento), an ancient city in South Italy, said to have been founded by Diomedes the Greek, after the fall of Troy. Pyrrhus of Macedon, during his invasion of Italy, was totally defeated near Beneventum, 275 B.C. Near it was erected the triumphal arch of Trajan, A.D. 114. Benevento was formed into a duchy by the Lombards, 571. At a battle fought here, Feb. 26, 1266, Manfred, king of Sicily, was defeated and slain by Charles of Anjou, who thus became virtually master of Italy. The castle was built 1232 ; the town was nearly destroyed by an earthquake, 1688, when the archbishop, afterwards pope Benedict XIII., was dug out of the ruins alive, and contributed to its subsequent rebuilding again, 1703. It was seized by the king of Naples, but restored to the pope on the suppression of the Jesuits, 1773. Talleyrand de Périgord, Bonaparte's arch-chancellor, had the title of prince of Benevento conferred upon him. Benevento was restored to the pope in 1814.

BENEVOLENCES (Aids, Free Gifts, actually Forced Loans) appear to have been claimed by our Anglo-Saxon sovereigns. Special ones were levied by Edward IV. 1473, by Richard III. 1485 (although a statute forbidding them was enacted in 1484), by Henry VII. 1492 ; and by James I. in 1613, on occasion of the marriage of the princess Elizabeth with the king of Bohemia. In 1615 Oliver St. John, M.P., was fined 500*l.*, and chief justice Coke disgraced, for severely censuring such modes of raising money. Benevolences were declared illegal by the bill of rights, Feb. 1689.

BENGAL, the chief presidency of British India, containing Calcutta, the capital. It was ruled by governors delegated by the sovereigns of Delhi, till 1340, when it became independent. It was added to the Mogul empire by Baber, about 1529. See *India* and *Calcutta*.

BENZOLE, a compound of hydrogen and carbon, discovered by Faraday in oils (1825), and by C. B. Mansfield in coal tar (1849), the latter of whom unfortunately died in consequence of being severely burnt while experimenting on it (Feb. 25, 1855). Benzole has become useful in the arts. Chemical research has produced from it *aniline* (*which see*), the source of the celebrated modern dyes, mauve, magenta, &c.

BEOWULF, an ancient Anglo-Saxon epic poem, describing events which probably occurred in the middle of the 5th century, and supposed to have been written subsequent to 597. An edition by Kemble was published in 1833. It has been translated by Kemble, Thorpe, and Wackerbath.

BERBICE (British Guiana, S. America), settled by the Dutch, who surrendered it to the British, April 23, 1796, and again Sept. 22, 1803. It was finally ceded to England in 1814.

BERENGARIANS, followers of Berenger, or Berengarius, archdeacon of Augers, a learned man, who about 1049 uttered opinions opposed to the Romish doctrine of transubstantiation or the real presence in the Lord's supper. Several councils of the church were held condemning his doctrine. After much controversy he recanted about 1058. He died grieved and wearied in 1088.

BERESINA, a river in Russia, crossed by the French main army after its defeat by the Russians, Nov. 25-29, 1812. The French lost upwards of 20,000 men, and their retreat was attended by great calamity and suffering.

BERG (W. Germany), on the extinction of the line of its counts, in 1348, was incorporated with Juliers. Napoleon I. made Murat grand-duke in 1806. The principal part is now held by Prussia.

BERGEN (in Germany), **BATTLE OF**, between the French and allies, the latter defeated, April 13, 1759.—(In HOLLAND) The allies under the duke of York were defeated by the French, under gen. Brune, with great loss, Sept. 19, 1799. In another battle, fought Oct. 2, same year, the duke gained the victory over Brune; but on the 6th, the duke was defeated before Alkmaer, and on the 20th entered into a convention, by which he exchanged his army for 6000 French and Dutch prisoners in England.

BERGEN-OP-ZOOM, in Holland. This place, whose works were deemed impregnable, was taken by the French, Sept. 16, 1747, and again in 1794. An attempt made by the British under general sir T. Graham (afterwards lord Lynedoch), to carry the fortress by storm, was defeated; after forcing an entrance, their retreat was cut off, and a dreadful slaughter ensued; nearly all were cut to pieces or made prisoners, March 8, 1814.

BERKELEY CASTLE, Gloucestershire, was begun by Henry I. in 1108, and finished in the next reign. Here Edward II. was cruelly murdered by the contrivance of his queen Isabella (a princess of France), and her paramour, Mortimer, earl of March, Sept. 21, 1327. Mortimer was hanged at the Elms, near London, Nov. 29, 1330; and Edward III. confined his mother in her own house at Castle Rising, near Lynn, in Norfolk, till her death.

BERLIN (capital of Prussia, in the province of Brandenburg), was founded by the margrave Albert, surnamed the Bear, about 1163. Its five districts were united under one magistracy, in 1714; and it was subsequently made the capital of Prussia. It was taken by an army of Russians, Austrians, and Saxons, in 1760; but they were obliged to retire in a few days. On Oct. 27, 1806, after the battle of Jena (Oct. 14), the French entered Berlin; and from this place Napoleon issued the famous Berlin decree or interdiction against the commerce of England, Nov. 20. It declared the British islands to be in a state of blockade, and ordered all Englishmen found in countries occupied by French troops to be treated as prisoners of war. On Nov. 5, 1808, Napoleon entered into a convention with Prussia, by which he remitted to Russia the sum due on the war-debt, and withdrew many of his troops to reinforce his armies in Spain. An insurrection commenced here in March 1848. Berlin was declared in a state of siege, Nov. 1848. The continuation of this state of siege was declared to be illegal without its concurrence by the lower chamber, April 25, 1849. The railway to Magdeburg was opened, Sept. 10, 1841. The first constituent assembly was held here on June 21, 1842.

BERMUDAS, OR SOMERS' ISLES, a group in the North Atlantic ocean, discovered by João Bermudas, a Spaniard, in 1522 or 1527, but not inhabited until 1609, when sir George Somers was cast away upon them. They were settled by a statute 9 James I. 1612. Among the exiles from England during the civil war, was Waller, the poet, who wrote, while resident here, a poetical description of the islands. There was an awful hurricane here, Oct. 31, 1780, and another, by which a third of the houses was destroyed, and all the shipping driven ashore, July 20, 1813.

BERNAL COLLECTION of articles of taste and virtù, formed by Ralph Bernal, Esq., many years chairman of committees of ways and means in the house of commons. He died Aug. 26, 1854. The sale in March, 1856, lasted 31 days, and enormous prices were given. The total sum realised was 62,680*l.* 6*s.* 8*d.*

BERNARD, MOUNT ST., so called from a monastery founded on it by Bernardine Menthon in 962. Velan, its highest peak, is about 8000 feet high, covered with perpetual snow. Hannibal, it is said, conducted the Carthaginian army by this pass into Italy

(218 B.C.); and it was by the same route, in May, 1800, that Bonaparte led his troops to the plains of Lombardy, before the battle of Marengo, fought June 14, 1800. On the summit of Great St. Bernard is a large community of monks, who entertain travellers in their convent.

BERNARDINES, a strict order of Cistercian monks, established by St. Bernard, of Clairvaux, about 1115. He founded seventy-two monasteries.

BERNE, the sovereign canton of Switzerland, joined the Swiss League 1352; the town Berne surrendered to the French under general Brune, April 12, 1798. The town has bears for its arms, and some of these animals are still maintained on funds specially provided for the purpose.

BERRY, an ancient province (*Biturigum regis*), central France, held by the Romans since the conquest of Gaul by Cæsar (58—50 B.C.) till it was subdued by the Visigoths; from whom it was taken by Clovis in 507. It was erected into a duchy by John in 1360, and was not incorporated into the royal domains till 1601; since then the title of duke has been merely nominal.

BERSAGLIERI, the sharpshooters of the Sardinian army, first employed about 1848.

BERWICK-ON-TWEED, a fortified town on the north-east extremity of England. It has been the theatre of many bloody contests between the English and Scots; and while England and Scotland remained two kingdoms, was always claimed by the Scots as belonging to them, because it stood on their side of the river. It was taken from the Scots, and annexed to England in 1333; and after having been taken and retaken many times, was finally ceded to England in 1482. In 1551 it was made independent of both kingdoms. The town surrendered to Cromwell in 1648, and afterwards to general Monk in 1659. Since the union of the crowns (James I. 1603), the fortifications, which were formerly very strong, have been much neglected.

BESSARABIA, a frontier province of European Russia, part of the ancient Dacia. After being possessed by the Goths, Huns, &c., it was conquered by the Turks in 1474, and ceded to Russia in 1812.

BETHLEHEM (Syria) now contains a large convent, enclosing, as is said, the very birth-place of Christ; a church erected by the empress Helena, in the form of a cross, about 325; a chapel, called the Chapel of the Nativity, where they pretend to show the manger in which Christ was laid; another, called the Chapel of Joseph; and a third, of the Holy Innocents. Bethlehem is much visited by pilgrims.—The Bethlehemite monks existed in England in 1257.

BETHLEHEM HOSPITAL (so called from having been originally the hospital of St. Mary of Bethlehem), a royal foundation for the reception of lunatics, incorporated by Henry VIII. in 1546. The old Bethlehem Hospital, Moorfields, erected in 1675, pulled down in 1814, was built in imitation of the Tuileries at Paris. The present hospital in St. George's-fields was begun April, 1812, and opened in 1815. In 1856 extensive improvements were completed under the direction of Mr. Sydney Smirk, costing between nine and ten thousand pounds.

BETTING-HOUSES, affording much temptation to gaming, and consequent dishonesty, in the lower classes, were suppressed by an act passed in 1853 (16 & 17 Vict. c. 119), a penalty of 100*l.* being enforced on the owners or occupiers.

BEYROUT (the ancient Berytus), a seaport of Syria, colonised from Sidon. It was destroyed by an earthquake, 566; was rebuilt, and was alternately possessed by the Christians and Saracens; and after a frequent change of masters, fell into the power of Amurath IV., since when it remained with the Ottoman empire up to the revolt of Ibrahim Pacha, in 1832. The total defeat of the Egyptian army by the allied British, Turkish, and Austrian forces, and evacuation of Beyrout (the Egyptians losing 7000 in killed, wounded, and prisoners, and twenty pieces of cannon), took place Oct. 10, 1840. Sir C. Napier was the English admiral engaged. Beyrout suffered greatly in consequence of the massacres in Syria in May 1860. In Nov. 1860 above 27,000 persons were said to be in danger of starving. See *Syria*.

BHOOTAN, a country north of Lower Bengal, with whom a treaty was made April 25, 1774. After fruitless negotiations, Bhootan was invaded by the British in Dec. 1864, in consequence of injurious treatment of an envoy. See *India*, 1864-5.

BHURTPORE (India), capital of Bhurtpore, was besieged by the British, Jan. 3, 1805, and attacked five times up to March 21, without success. The fortress was taken by general Lake, after a desperate engagement with Holkar, the Mahratta chief, April 2, 1805. The defeat of Holkar led to a treaty, by which the rajah of Bhurtpore agreed to pay twenty lacs of rupees, and ceded the territories that had been granted to him by a former treaty, delivering up his son as hostage, April 17, 1805. On the rajah's death, during a revolt against his son, Bhurtpore was taken by storm, by lord Combermere, Jan. 18, 1826. See *India*.

BIANCHI (Whites), a political party at Florence, in 1300, in favour of the Ghibelines or imperial party, headed by Vieri de' Cerchi, opposed the Neri (or Blacks), headed by Corso de' Donati. The latter expelled their opponents, among whom was the poet Dante, in 1301.

BIARCHY. When Aristodemus, king of Sparta, died, he left two sons, twins, Eurysthene and Procles; and the people not knowing to whom precedence should be given, placed both upon the throne, and thus established the first biarchy, 1102 B.C. The descendants of each reigned alternately for 800 years. *Herodotus*.

BIARRITZ, a bathing-place, near Bayonne. Here resided the comtesse de Montijo and her daughter Eugénie, now empress of the French, till her marriage Jan. 29, 1853; since when it has been annually visited by the emperor and empress.

BIBERACH (Wurtemberg). Here Moreau twice defeated the Austrians,—under Latour, Oct. 2, 1796, and under Kray, May 9, 1800.

BIBLE (from the Greek *biblos*, a book), the name especially given to the Holy Scriptures. The Old Testament is said to have been collected and arranged by Ezra between 458 and 450 B.C. The Apocrypha are considered as inspired writings by the Roman Catholics, but not by the Jews and Protestants.* See *Apocrypha*.

The most ancient copy of the *Hebrew* Scriptures existed at Toledo, called the Codex of Hillel; it was of very early date, probably of the 4th century after Christ, some say about 60 years before Christ. The copy of Ben Asher, of Jerusalem, was made about 1100.

The oldest copy of the Old and New Testament in *Greek*, is that in the Vatican, which was written in the 4th or 5th century, and published in 1586. The next in age is the Alexandrian Codex (referred to the 5th century) in the British Museum, presented by the Greek patriarch to Charles I. in

1628. It has been printed in England, edited by Woide and Baber, 1786—1821.—Codex Ephraemi, or Codex Regius, ascribed to the 5th century, in the Royal Library, Paris: published by Tischendorf in 1843.

The Hebrew Psalter was printed at Bologna in 1477. The complete Hebrew Bible was first printed by Soncino in Italy in 1488, and the Greek Testament (edited by Erasmus) at Rotterdam, in 1526. Aldus's edition was printed in 1518; Stephens' in 1546; and the *textus receptus* (or received text) by the Elzevirs in 1624.

* In April, 1865, was published a proposal for raising a fund for exploring Palestine in order to illustrate the Bible by antiquarian and scientific investigation. The first meeting was held June 22, 1865, the archbishop of York in the chair.

† The division of the Bible into *chapters* has been ascribed to archbishop Lanfranc in the 11th and to archbishop Langton in the 13th century; but T. Hartwell Horne considers the real author to have been cardinal Hugo de Sancto Caro, about the middle of the 13th century. The division into sections was commenced by Rabbi Nathan (author of a Concordance), about 1445, and completed by Athras, a Jew, in 1661. The present division into *verses* was introduced by the celebrated printer, Robert Stephens, in his Greek Testament (1551) and in his Latin Bible (1566-7).

TRANSLATIONS.

The Old Testament, in *Greek*, termed the Septuagint (*which see*), generally considered to have been made by order of Ptolemy Philadelphus, king of Egypt, about 286 or 285 B.C.; of this many fabulous accounts are given.

Origen, after spending twenty-eight years in collating MSS., commenced his *polyglot* Bible at Caesarea in A.D. 231; it contained the Greek versions of Aquila, Symmachus, and Theodotion, all made in or about the 2nd century after Christ.

The following are ancient versions:—*Syriac*, 1st or 2nd century; the old *Latin* version, early in the 2nd century, revised by Jerome, in 384; who, however, completed a new version in 405, now called the *VULGATE*, *which see*; the first edition was printed in 1462;—*Coptic*, 2nd or 3rd century; *Ethiopic*; *Armenian*, 4th or 5th century; *Sclavonic*, 9th century; and the *Mæso-Gothic*, by Ulfilas, about 370, a manuscript copy of which, called the *Codex Argenteus*, is at Upsal. The Psalms were translated into *Saxon* by bishop Aldhelm, about 706; and the Gospels by bishop Egbert, about 721; the whole Bible by Bede, in the 10th century.

The British and Foreign Bible Society continue to make and print translations of the Bible in all the dialects of the world. See *Polyglot*.

BIBLE DICTIONARIES. The most remarkable are Calmet's "Dictionary of the Bible," 1722-8; Kitto's "Cyclopædia of Biblical Literature," 1843; and Smith's "Dictionary of the Bible," 1860. See *Concordances*.‡

BIBLE SOCIETIES. Among the principal and oldest societies which have made the dissemination of the Scriptures a collateral or an exclusive object, are the following:—The Society for Promoting Christian Knowledge was formed 1698; Society for Propagating the Gospel in Foreign Parts, 1701; Society in Scotland, for Promoting Christian Knowledge, 1709; Society for Promoting Religious Knowledge among the Poor, 1750; Naval and Military Bible Society, 1780; Sunday School Society, 1785; French Bible Society, 1792; British and Foreign Bible Society, 1804; § Hibernian Bible Society, 1806; City of London Auxiliary Bible Society, 1812. A bull from the Pope against Bible Societies appeared in 1817.

BIBLIA PAUPERUM (the Bible for the Poor), consisting of engravings illustrating scripture history, with texts, carved in wood, a "block book," printed early in the 15th century, was compiled by Bonaventura, general of the Franciscans, about 1260. A facsimile was published by J. Russell Smith, in 1859.

BIBLIOGRAPHY, the Science of Books. Gesner's "Bibliotheca Universale" appeared in 1545; and De Bure's "Bibliographie Instructive" in 1763. The following works on this subject are highly esteemed: Peignot, Manuel, 1823; Horne, Introduction to the Study of

* "The Bible of Every Land," ed. 1860, published by Messrs. Bagsters, London, is full of information respecting ancient and modern versions of the Bible.

† He was strangled at Antwerp in 1536, at the instigation of Henry VIII. and his council. His last words were, "Lord, open the king of England's eyes!" 14 editions of his Testament had then been published.

‡ An "Index to the Persons, Places, and Subjects occurring in the Holy Scriptures," by B. Vincent, editor of the present work, is sold by the Queen's printers.

§ At the end of 1850 this society had issued 24,247,667 copies of the Bible or parts of it; in May, 1863, the number had risen to 43,044,334. In 1857 they published a catalogue of their library, which contains a large number of remarkable editions of the Bible.

Bibliography, 1814; *Scriptural*, Orme, Bibliotheca Biblica, 1824; Darling, *Cyclopædia Bibliographica*, 1854-8; *Classical*, the works of Fabricius, Clarke, and Dibdin; *English*, Watts' *Bibliotheca Britannica*, 1824; Lowndes, *Manual*, 1834 (new edition by Bohn, 1857-64); *French*, Quérard, 1828-64; Brunet's *Manuel du Libraire* (first published in 1810) is exceedingly valuable: the 5th edition, 1862-5; British Catalogues, by Sampson Low, 1835-62.

BIBLIOMANIA (or book-madness) very much prevailed in 1811, when Dr. Dibdin's work with this title was published. See *Boccaccio*.

BIDASSOA. The allied army under lord Wellington, having driven the French from Spain, effected the passage of this river, Oct. 8, 1813, and entered France.

BIDDENDEN MAIDS. A distribution of bread and cheese to the poor takes place at Biddenden, Kent, on Easter Sundays, the expense being defrayed from the rental of twenty acres of land, the reputed bequest of the Biddenden maids, two sisters named Chalkhurst, who, tradition states, were born joined together by the hips and shoulders, in 1100, and having lived in that state to the age of thirty-four, died within six hours of each other. Cakes, bearing a corresponding impression of the figures of two females, are given on Easter day to all who ask for them. Hasted deems this tale fabulous, and states that the print on the cakes is of modern origin, and that the land was given by two maiden ladies named Preston. See *Siamese Twins*.

BIGAMY. The Romans branded the guilty party with an infamous mark; with us the punishment of this offence, formerly, was death. The first act respecting it was passed 5 Edw. I. 1276. *Finer's Statutes*. Declared to be felony, without benefit of clergy, 1 James I. 1603. Subjected to the same punishments as grand or petit larceny, 35 Geo. III. 1794. Now punished, according to circumstances, by imprisonment or transportation.

BIG BETHEL (Virginia, U.S.). On June 10, 1861, the Federals were defeated in an attack on some Confederate batteries at this place.

BILBOA (N.E. Spain), was taken by the French in 1795. This place, which had been invested by the Carlists under Villareal, and was in considerable danger, was delivered by the defeat of the besiegers by Espartero, assisted by British naval co-operation, Dec. 24, 1836. Espartero entered Bilbao in triumph next day.

BILL OF EXCEPTIONS. The right of tendering to a judge upon a trial between parties a bill of exceptions to his charge, his definition of the law, or to remedy other errors of the court, was provided by the 2nd statute of Westminster, 13 Edw. I. 1284. Such bills are tendered to this day.

BILL OF PAINS, &c. See *Queen Caroline's Trial*. **BILL OF RIGHTS, &c.** See *Rights*.

BILLIARDS. The French ascribe their invention to Henrique Devigne, an artist in the reign of Charles IX., about 1571. Slate billiard tables were introduced in England in 1827.

BILLINGSGATE, the celebrated market-place for fish in London, is said to have derived its name from Belinus Magnus, a British prince, the father of king Lud, 400 B.C., but Stow thinks from a former owner. *Mortimer*. It was the old port of London, and the customs were paid here under Ethelred II., A.D. 979. *Stow*. Billingsgate was made a perfect free market, 1669. *Chamberlain*. Fish by land-carriage, as well as seaborne, now arrives daily here. In 1849, the market was very greatly extended and improved, and is now well cleaned, lighted, and ventilated.

BILLS OF EXCHANGE were invented by the Jews as a means of removing their property from nations where they were persecuted, 1160. *Anderson*. Bills are said to have been used in England, 1307. The only legal mode of sending money from England, 4 Richard II. 1381. Regulated, 1698; first stamped, 1782; duty advanced, 1797; again, June, 1801; and since. It was made capital to counterfeit bills of exchange in 1734. In 1825, the year of disastrous speculations in bubbles, it was computed that there were 400 millions of pounds sterling represented by bills of exchange and promissory notes. The present amount is not supposed to exceed 50 millions. The many statutes regarding bills of exchange were consolidated by act 9 Geo. IV. 1828. An act regulating bills of exchange passed 3 Vict. July, 1839. Great alterations were made in the law on the subject by 17 & 18 Vict. c. 83 (1854), and 18 & 19 Vict. c. 67 (1855).

BILLS OF MORTALITY FOR LONDON. These bills were first compiled by order of Cromwell, about 1538, 30 Hen. VIII., but in a more formal and recognised manner in

1603, after the great plague of that year. No complete series of them has been preserved. They are now superseded by the weekly returns of the registrar-general. The following show the numbers at decennial periods:—

BINARY ARITHMETIC, that which counts by twos, for expeditiously ascertaining the property of numbers, and constructing tables, was invented by Baron Leibnitz of Leipsic, the celebrated statesman, philosopher, and poet, 1694. *Moreri*.

BINOMIAL ROOT, in Algebra, composed of only two parts connected with the signs *plus* or *minus*; a term first used by Recorda, about 1550, when he published his Algebra. The celebrated *binomial theorem* of Newton was first mentioned in 1688. *Hutton*.

BIOGRAPHY (from the Greek *bios*, life, and *graphō*, I write), defined as history teaching by example. The book of *Genesis* contains the biography of the patriarchs; and the Gospels that of Christ. Plutarch wrote the Lives of Illustrious Men; Cornelius Nepos, Lives of Military Commanders; and Suetonius, Lives of the Twelve Cæsars (all three in the first century after Christ); Diogenes Laërtius, Lives of the Philosophers (about 205).—Boswell's Life of Johnson (published in 1790) is the most remarkable English biography.

BIOLOGY, a name given to the science of life and living things, by Treviranus, of Bremen, in his work on Physiology, published 1802-22. Biology includes zoology, anthropology, and ethnology, *which see*.

BIRCH TREE. The black (*Betula nigra*), brought from North America, 1736. The birch tree known as the *Betula pumila*, introduced into Kew-gardens, England, by Mr. James Gordon, from North America, 1762. The tree known as the *Birch* is now largely cultivated in all the countries of Europe. *Hardy's Annals*.

BIRDS were divided by Linnaeus into six orders (1735); by Blumenbach, into eight (1805); and by Cuvier, into six (1817). The most remarkable works on birds are those published by John Gould, F.R.S.; they are to consist of about 31 folio volumes of coloured plates, &c. Each set bound will cost about 500*l*.

BIRKENHEAD (Cheshire), a prosperous modern town on the Mersey, immediately opposite to Liverpool. The great dock here was projected by Mr. John Laird, constructed by Mr. Rendell, and opened in Aug. 1847 by lord Morpeth. In 1861 Birkenhead was made a parliamentary borough, and Mr. Laird was elected first representative. Population in 1831, 200; in 1861, 51,649. See *Wrecks*, 1852.

BIRMAN EMPIRE, OR EMPIRE OF AVA. See *Burmese Empire* and *India*.

BIRMINGHAM, formerly Bromwicham and Brummegeg (Warwickshire), existed in the reign of Alfred, 872; and belonged to the Bermengehams, at Domesday survey, 1086. There were "many smythes" here in the time of Henry VIII. (*Leland*), but its great importance commenced in the reign of William III. It has been styled "the toynshop of Europe."

BIRTHS. The births of children were taxed in England, viz., birth of a duke 30*l.*, of a common person 2*s.*, 7 Will. III. 1695. Taxed again, 1783. The instances of four children at a birth are numerous; but it is recorded that a woman of Königsberg had five children at a birth, Sept. 3, 1784, and that the wife of Nelson, a journeyman tailor, of Oxford-Market, London, had also five children at a birth, in Oct. 1800. See *Bills of Mortality* and *Registers*. The Queen usually presents a small sum of money to a poor woman giving birth to three or more children at one time.

BISHOP (Greek *episcopos*, overseer), a name given by the Athenians to those who had the inspection of the city. The Jews and Romans had also like officers. The bishop has the government of church affairs in a certain district. St. Peter, styled the first bishop of Rome, was martyred 65. The episcopate became an object of contention about 144. The title of pope was anciently assumed by all bishops, and was exclusively claimed by Gregory VII. (1073-85).

BISHOPS, COLONIAL. The first was Samuel Seabury, consecrated bishop of Connecticut by four nonjuring prelates, at Aberdeen, in Scotland, Nov. 14, 1784. The bishops of New York and Pennsylvania were consecrated in London, by the archbishop of Canterbury, Feb. 4, 1787, and the bishop of Virginia in 1790. The first *Roman Catholic* bishop of the United States was Dr. Carroll of Maryland, in 1789. By 15 & 16 Vict. c. 52, and 16 & 17 Vict. c. 49, the colonial bishops may perform all episcopal functions in the United Kingdom, but have no jurisdiction.

BISMUTH was recognised as a distinct metal by Agricola, in 1529. It is very fusible and brittle, and of a yellowish white colour.

BISSEXTILE. See *Calendar* and *Leap Year*.

* Bishop Rose connected the established episcopal church of Scotland with that form of it which is now merely tolerated, he having been bishop of Edinburgh from 1687 till 1720, when, on his death, Dr. Fullarton became the first post-revolution bishop of that see. Fife (now St. Andrew's, so called in 1844) now unites the bishopric of Dunkeld (re-instituted in 1727) and that of Dunblane (re-instituted in 1731). Ross (of uncertain date) was united to Moray (re-instituted in 1727) in 1838. Argyll and the Isles never existed independently until 1847, having been conjoined to Moray and Ross, or to Ross alone, previously to that year. Galloway has been added to the see of Glasgow.

BITHYNIA, a province in Asia Minor, previously called *Bebricia*, is said to have been invaded by the Thracians under Bithynus, son of Jupiter, who gave it the name of Bithynia. It was subject successively to the Assyrians, Lydians, Persians, and Macedonians. Most of the cities were built by Grecian colonists.

BITONTO (Naples). Here Montemar and the Spaniards defeated the Germans, on May 26, 1730, and eventually acquired the kingdom of the Two Sicilies for Don Carlos.

BLACK ASSIZES. See under *Oxford*.

BLACK BOOK* (*Liber Niger*), a book kept in the exchequer, which received the orders of that court. It was published by Hearn in 1728.

BLACKBURN, Lancashire, so called in Domesday-book. The manufacture of a cloth called Blackburn cheque, carried on in 1650, was superseded by Blackburn greys. In 1767, James Hargreaves, of this town, invented the spinning-jenny, for which he was eventually expelled from the county. About 1810 or 1812, the townspeople availed themselves of his discoveries, and engaged largely in the cotton manufacture, now their staple trade.

BLACK DEATH. See *Plagues*, 1340.

BLACK FRIARS. See *Dominican*.

BLACKFRIARS BRIDGE, London. The first stone was laid Oct. 31, 1760, and it was completed by Mylne, in 1770. It was the first work of the kind executed in England, in which arches, approaching to the form of an ellipsis, were substituted for semicircles. It was repaired in 1834, and in 1837-1840. Since 1850 the bridge gradually sank. The old bridge was pulled down: and a new temporary one opened for use in 1864. The foundation stone of the new bridge (to be erected according to a design by Mr. J. Cubitt) was laid by the lord mayor, Hale, July 20, 1865. The first railway train (London, Chatham, and Dover) entered the city of London over the new railway bridge, Blackfriars, Oct. 6, 1864.

BLACKHEATH, near London. Here Wat Tyler and his followers assembled June, 1381; and here also Jack Cade and his 20,000 Kentish men encamped, June 1, 1450. See *Tyler* and *Cade*. Battle of Blackheath, in which the Cornish rebels were defeated and Flannock's insurrection quelled, June 22, 1497. The cavern, on the ascent to Blackheath, the retreat of Cade, and the haunt of banditti in the time of Cromwell, was re-discovered in 1780.

BLACK-HOLE. See *Calcutta*.

BLACK LEAD. See *Graphite*.

BLACK LETTER, employed in the first printed books in the middle of the 15th century. The first printing types were Gothic; but they were modified into the present Roman type about 1469; Pliny's Natural History being then printed in the new characters.

BLACK-MAIL, a compulsory payment made in parts of Scotland by the lowlanders to the highlanders, for the protection of their cattle, existed till within a few months of the outbreak of the rebellion, 1745. It rendered agricultural improvement almost impossible.

* A book was kept in the English monasteries, wherein details of the scandalous enormities practised in religious houses were entered for the inspection of visitors, under Henry VIII. 1535, in order to blacken them and hasten their dissolution: hence possibly the phrase, "I'll set you down in the black book."

BLACK MONDAY, Easter Monday, April 6, 1351, "when the hailstones are said to have killed both men and horses, in the army of our king Edward III. in France." *Bailey*. "This was a memorable Easter Monday, which in the 34th of Edward III. happened to be full dark of mist and hail, and so cold that many men died on their horses' backs with the cold," 1351. *Stow*. In Ireland, Black Monday was the day on which a number of the English were slaughtered at a village near Dublin, in 1209.

BLACK ROD has a gold lion at the top, and is carried by the usher of the Order of the Knights of the Garter (instituted 1349), instead of the mace. He also keeps the door when a chapter of the order is sitting, and during the sessions of parliament attends the house of lords and acts as their messenger to the commons.

BLACK SEA, THE EUXINE (Pontus Euxinus of the Ancients), a large internal sea between the S.W. provinces of Russia and Asia Minor, connected with the sea of Azoff by the straits of Yenikalé, and with the sea of Marmora by the channel of Constantinople. This sea was much frequented by the Greeks and Italians, till it was closed to all nations by the Turks after the fall of Constantinople in 1453. The Russians obtained admission by the treaty of Kainardji, in 1774. In 1779 it was partially opened to British and other traders, since which time the Russians gradually obtained the preponderance. It was entered by the British and French fleets, Jan. 3, 1854, at the requisition of the Porte, after the destruction of the Turkish fleet at Sinope by the Russians, Nov. 30, 1853. A dreadful storm in this sea raged from Nov. 13 to 16, 1854, and caused great loss of life and shipping, and valuable stores for the allied armies. See *Russo-Turkish War*. By the treaty of 1856 the Black Sea was opened to the commerce of all nations.

BLACKWALL (London). The site of fine commercial docks and warehouses. See *Docks*. The Blackwall railway was opened to the public, July 4, 1840; the eastern terminus being at Blackwall wharf, and the western in Fenchurch-street.

BLACK WATCH, armed companies of the loyal clans (Campbells, Monros, &c.) employed to watch the Highlands from about 1725 to 1739, when they were formed into the celebrated 42nd regiment, which was formally enrolled "The Royal Highland Black Watch," in 1861. Their removal probably facilitated the outbreak in 1745. They wore dark tartans, and hence were called *Black Watch*.

BLACKWATER, BATTLE OF, in Ireland, Aug. 14, 1598, when the Irish chief O'Neal defeated the English under Sir Henry Bagnall. Pope Clement VIII. sent O'Neal a consecrated plume, and granted to his followers the same indulgence as to crusaders.

BLADENSBURG. See *Washington*, 1814.

BLANK VERSE. See *Verse*.

BLANKETEERS. A number of operatives who on March 30, 1817, met in St. Peter's field, near Manchester, many of them having blankets, rugs, or great coats rolled up and fastened to their backs. This was termed the Blanket meeting. They proceeded to march towards London, but were dispersed by the magistracy. It is stated that their object was to commence a general insurrection. See *Derby*. Eventually the ringleaders had an interview with the cabinet ministers, and a better understanding between the working classes and the government ensued.

BLANKETS are said to have been first made at Bristol by T. Blanket, about 1705.

BLASPHEMY was punished with death by the law of Moses (*Lev. xxiv. 1491 B.C.*); and by the code of Justinian, A.D. 529. It is punishable by the civil and canon law of England, regulated by 60 Geo. III. c. 8 (1819). In Scotland the blasphemer's tongue was cut out; he was punished with fine and imprisonment by law, 1696-7. Daniel Isaac Eaton was tried and convicted in London of blasphemy, March 6, 1812. Robert Taylor, a protestant clergyman, was tried twice for the same crime. He was sentenced to two years' imprisonment, and largely fined, July, 1831. In Dec. 1840, two publishers of blasphemous writings were convicted.

BLAZONRY. Bearing coats-of-arms was introduced and became hereditary in France and England about 1192, owing to the knights painting their banners with different figures, thereby to distinguish them in the crusades. *Dugdale*.

BLEACHING was known in Egypt, Syria, India, and Gaul. *Pliny*. An improved chemical system was adopted by the Dutch, who introduced it into England and Scotland in 1768. There are large bleach-fields in Lancashire, Fife, Forfar, and Renfrew, and in the vale of the Leven, in Dumbarton. The application of the gas chlorine to bleaching is due to Berthollet about 1785. Its combination with lime (as chloride of lime) was devised by

Mr. Tennant, of Glasgow, who took out a patent for the process in 1798, and by his firm it is still extensively manufactured. In 1822 Dr. Ure published an elaborate series of experiments on this substance. In 1860 bleaching and dyeing works were placed under the regulations of the Factories' Act.

BLLENHEIM, or Blindheim, in Bavaria, the site of a battle fought Aug. 2 (new style, 13), 1704, between the English and confederates, commanded by the duke of Marlborough, and the French and Bavarians, under marshal Tallard and the elector of Bavaria. The latter were defeated with the loss of 27,000 killed, and 13,000 prisoners (including Tallard). Bavaria became the prize of the conquerors. The British nation gave Marlborough the honour of Woodstock and hundred of Wotton, and erected for him the house of Blenheim.*

BLIND. The first public school for the blind was established by Valentine Haüy, at Paris, in 1784. The first in England was at Liverpool, in 1791; in Scotland, in Edinburgh, in 1792; and the first in London in 1799. Printing in raised or embossed characters for the use of the blind was begun at Paris by Haüy in 1786. The whole Bible was printed at Glasgow in raised Roman characters about 1848. A sixpenny magazine for the blind, edited by the rev. W. Taylor, F.R.S., so eminent for his exertions on behalf of these sufferers, was published in 1855-6. There is hardly any department of human knowledge in which blind persons have not obtained distinction.† Laura Bridgman, born in 1829, became dumb and blind two years after: she was so well taught by Dr. Howe, of Boston, U.S., as to become an able instructor of blind and dumb persons. By the census of 1851, there were in Great Britain, 21,487 blind persons, 11,273 males; 10,214 females: about one blind in 975.

BLINDING, by consuming the eyeballs with lime or scalding vinegar, was a punishment inflicted anciently on adulterers, perjurers, and thieves. In the middle ages the penalty was frequently changed from total blindness to a diminution of sight. A whole army was deprived of their eyes, by Basil, in the 11th century. See *Bulgarians*. Several of the eastern emperors had their eyes torn from their heads.

BLISTERS, used by Hippocrates (460-357 B.C.), made, it is said, of cantharides, *which see*.

BLOCK BOOKS. See *Printing*.

BLOCKADE is the closing an enemy's ports to all commerce; a practice introduced by the Dutch about 1584. The principle recognised by the European powers is that every blockade, in order to be binding, must be effective. The Elbe was blockaded by Great Britain, 1803; the Baltic, by Denmark, 1848-49 and 1864; the gulf of Finland, by the Allies, 1854; and the ports of the Southern States of North America by president Lincoln, April 19, 1861. See *Orders in Council*, and *Berlin*.

BLOCKS employed in the rigging of ships were much improved in their construction by Walter Taylor, about 1781. In 1801, Mark I. Brunel invented a mode of making blocks which was put into operation in 1808, and in 1815 was said to have saved the country 20,000*l.* a year.

BLOOD. The circulation of the blood through the lungs was known to Michael Servetus, a Spanish physician, in 1553. Cæsalpinus published an account of the general circulation, of which he had some confused ideas, improved afterwards by experiments, 1569. Paul of Venice, or Father Paolo (real name Peter Sarpi), discovered the valves which serve for the circulation; but the honour of the positive discovery of the circulation belongs to William Harvey, between 1619 and 1628. *Freind*.

EATING BLOOD was prohibited to Noah, *Gen. ix.*, to the Jews, *Lev. xvii.*, &c., and to the Gentile converts by the apostles at an assembly at Jerusalem, *A.D. 52, Acts xv.*

BLOOD-DRINKING was anciently tried to give vigour to the system. Louis XI., in his last illness, drank the warm blood of infants, in the vain hope of restoring his decayed strength, 1483. *Hénault*. In the 15th century an opinion prevailed that the declining vigour of the aged might be repaired by

TRANSFUSING into their veins the blood of young persons. It was countenanced in France by the physicians about 1668, and prevailed for many years, till the most fatal effects having ensued, it was suppressed by an edict. It was attempted again in France in 1797, and more recently there, in a few cases, with success; and in England (but the instances are rare) since 1823. *Med. Journ.* "An English physician (Louver, or Lower) practised in this way; he died in 1691." *Freind*.

* On Feb. 5, 1861, a fire broke out at this place, which destroyed the "Titian Gallery" and the pictures; the latter, a present from Victor Amadeus, king of Sardinia, to John, the great duke of Marlborough.

† James Holman, the "blind traveller" (born 1786, died 1857), visited almost every place of note in the world. His travels were published in 1825. In April, 1858, a blind clergyman, rev. J. Sparrow, was elected chaplain to the Mercers' Company, London, and read the service, &c., from embossed books. Viscount Cranbourne (blind) was the author of many interesting historical essays. He died in June, 1865. On July 13, 1865, Henry Fawcett, the blind professor of political economy at Cambridge, was elected M.P. for Brighton.

BLOOD'S CONSPIRACY. Blood, a discarded officer of Oliver Cromwell's household, with his confederates, seized the duke of Ormond in his coach, and had got him to Tyburn, intending to hang him, when he was rescued by his friends, Dec. 4, 1670. Blood afterwards, in the disguise of a clergyman, attempted to steal the regal crown from the Jewel-office in the Tower, May 9, 1671; yet, notwithstanding these and other offences, he was not only pardoned, but had a pension of 500*l.* per annum settled on him by Charles II., 1671. He died in 1680, in prison, for a libel on the duke of Buckingham.

"**BLOODY ASSIZES,**" held by Jeffreys in the west of England, in Aug. 1685, after the defeat of the duke of Monmouth in the battle of Sedgmore. Upward of 300 persons were executed after short trials; very many were whipped, imprisoned, and fined; and nearly 1000 were sent as slaves to the American plantations.

BLOOMER COSTUME. See a *note* to article *Dress*.

BLOOMSBURY GANG, a cant term applied to an influential political party in the reign of George III., in consequence of the then duke of Bedford, the chief, being the owner of Bloomsbury square, &c. The marquess of Stafford, the last survivor, died Oct. 26, 1803.

BLOREHEATH (Staffordshire), **BATTLE OF,** September 23, 1459, in which the earl of Salisbury and the Yorkists defeated the Lancastrians, whose leader, lord Audley, was slain with many Cheshire gentlemen. A cross commemorates this conflict.

BLOWING-MACHINES, the large cylinders, used in blowing-machines, were erected by Mr. Smeaton at the Carron iron works, 1760. One equal to the supply of air for forty forge fires was erected at the king's dock-yard, Woolwich. The hot-air blast, a most important improvement, was invented by Mr. James B. Neilson, of Glasgow, and patented in 1828. He died Jan. 18, 1865. It causes great economy of fuel.

BLOW-PIPE. The origin is unknown. An Egyptian using a blow-pipe is among the paintings on the tombs at Thebes. It was employed in mineralogy, by Andrew Von Swab, a Swede, about 1733, and improved by Wollaston and others. In 1802, professor Robert Hare, of Philadelphia, increased the action of the blow-pipe by the application of oxygen and hydrogen. By the agency of Newman's improved blow-pipes, in 1816, Dr. E. D. Clarke fused the earths, alkalies, metals, &c. The best work on the blow-pipe is by Plattner and Muspratt, 1854.

BLUE was the favourite colour of the Scotch covenanters in the 16th century. Blue and orange or yellow, became the whig colours after the revolution in 1688; and were adopted on the cover of the whig periodical, the "*Edinburgh Review*," first published in 1802. The Prussian blue dye was discovered by Diesbach, at Berlin, in 1710. Fine blues are now obtained from coal-tar, 1864. See *Aniline*. **BLUE-COAT SCHOOLS,** so called in reference to the costume of the children. The Blue-coat school in Newgate-street, London, was instituted by Edward VI. in 1552. See *Christ's Hospital*. **BLUE-STOCKING,** a term applied to literary ladies, was originally conferred on a society comprising both sexes (1760, *et seq.*). Benjamin Stillingfleet, the naturalist, an active member, wore blue worsted stockings; hence the name. The beautiful Mrs. Jerningham is said to have worn blue stockings at the *conversaciones* of lady Montagu.

BOARD OF ADMIRALTY, CONTROL, GREEN-CLOTH, HEALTH, TRADE, &c. See under *Admiralty*, &c.

BOATS. Flat-bottomed boats, made in England in the reign of William I.; again brought into use by Barker, a Dutchman, about 1690. See *Life-Boat*. A mode of building boats by the help of the steam-engine was invented by Mr. Nathan Thompson of New York in 1860, and premises were erected for its application at Bow, near London, in 1861.

BOCCACCIO'S DECAMERONE, a collection of a hundred stories or novels (many very immoral), severely satirising the clergy, feigned to have been related in ten days, during the plague of Florence in 1348. Boccaccio lived 1313—75. A copy of the first edition (that of Valdarfer, in 1471) was knocked down at the duke of Roxburgh's sale, to the duke of Marlborough, for 2260*l.*, June 17, 1812. This identical copy was afterwards sold by public auction, for 875 guineas, June 5, 1819.

BODLEIAN LIBRARY, Oxford, founded in 1598, and opened in 1602, by sir Thos. Bodley (died, 1612). It is open to the public, and claims a copy of all works published in this country. For rare works and MSS. it is said to be second only to the Vatican.

BEOTIA, a division of Greece, north of Attica, known successively as Aonia, Messapia, Hyantis, Ogygia, Cadmeis, and Bœotia. Thebes, the capital, was celebrated for its exploits and misfortunes of its kings and heroes. The term Bœotian was used by the Athenians as a synonym for dulness; but unjustly,—since Pindar, Hesiod, Plutarch, Democritus, Epaminondas, and Corinna, were Bœotians. The early dates are doubtful. See *Thebes*.

Bœotia henceforth partook of the fortunes of Greece; and was conquered by the Turks under Mahomet II.	A.D. 1456

BOGS, probably the remains of forests, covered with peat and loose soil. An act for the drainage of Irish bogs, passed March, 1830. The bog-land of Ireland has been estimated at 3,000,000 acres; that of Scotland at upwards of 2,000,000; and that of England at near 1,000,000 of acres. In Jan. 1849, Mr. Rees Reece took out a patent for certain valuable products from Irish peat. Candles and various other articles produced from peat have been since sold in London.

BOHEMIA, formerly the Hercynian Forest (*Boiemum*, *Tacitus*), derives its name from the Boii, a Celtic tribe. It was governed by dukes, till Ottocar assumed the title of king, 1198. The kings at first held their territory from the empire, but at length threw off the yoke: and the crown was elective till it came to the house of Austria, in which it is now hereditary. Prague, the capital, is famous for sieges and battles. Population in 1857, 4705,525. See *Prague*.

BOHEMIAN BRETHREN, a body of Christians in Bohemia, appear to have separated from the Calixtines (*which see*), a branch of the Hussites in 1467. Dupin says "They

rejected the sacrament of the church, were governed by simple laics, and held the scriptures for their only rule of faith. They presented a confession of faith to king Ladislas in 1504 to justify themselves from errors laid to their charge." They appear to have had communication with the Waldenses, but were distinct from them. Luther, in 1533, testifies to their purity of doctrine, and Melancthon commends their severe discipline. They were doubtless dispersed during the religious wars of Germany in the 17th century.

BOII, a Celtic people of N. Italy, who emigrated into Italy, and were defeated at the Vadimonian lake, 283 B.C. They were finally subdued by Scipio Nasica, 191 B.C.

BOILING OF LIQUIDS. Dr. Hooke, about 1683, ascertained that liquids were not increased in heat after they had once begun to boil, and that a fierce fire only made them boil more rapidly. The following boiling points have been stated :—

Ether	94° Fahr.	Nitric acid	187° Fahr.	Oil of turpentine	312° Fahr.
Alcohol	173 „	Sulphuric acid	600 „	Sulphur	822 „
Water	212 „	Phosphorus	554 „	Mercury	662 „

BOILING TO DEATH, made a capital punishment in England, by statute 22 Henry VIII., 1531. This act was occasioned by seventeen persons having been poisoned by John Roose, the bishop of Rochester's cook, two of whom died. Margaret Davie, a young woman, suffered in the same manner for a similar crime, in 1542.

BOIS-LE-DUC, Dutch Brabant, the site of a battle between the British and the French republican army, in which the British were defeated, and forced to abandon their position and retreat to Schyndel, Sept. 14, 1794. This place was captured by the French, Oct. 10 following; it surrendered to the Prussian army, under Bulow, in Jan. 1814.

BOKHARA, the ancient Sogdiana, after successively forming part of the empires of Persia, of Alexander, and of Bactriana, was conquered by the Turks in the 6th century, by the Chinese in the 7th, and by the Arabs about 705. After various changes of masters it was subdued by the Uzbek Tartars, its present possessors, in 1505. The British Envoys, colonel Stoddart and captain Conolly, were murdered at Bokhara, the capital, by the khan, in 1843.

BOMARSUND, a strong fortress on one of the Aland isles in the Baltic sea, taken by sir Charles Napier, commander of the Baltic expedition, aided by the French military contingent under general Baraguay d'Hilliers, Aug. 16, 1854. The governor Bodisco, and the garrison, about 2000 men, became prisoners. The fortifications were destroyed.

BOMBAY, the most westerly and smallest of our Indian presidencies, was visited by the Portuguese in 1509, and acquired by them in about 1530. It was given (with Tangier in Africa, and 300,000*l.* in money) to Charles II. as the marriage portion of the infanta, Catherine of Portugal, 1661. In 1668, it was granted to the East India Company, who had

long desired it, "in free and common socage," as of the manor of East Greenwich, at an annual rent of 10*l*. Confirmed by William III. 1689. The two principal castes at Bombay are the Parsees (descendants of the ancient Persian fire-worshippers) and the Borahs (sprung from early converts to Islamism). They are both remarkable for commercial activity.

BOMBS (iron shells filled with gunpowder), said to have been invented at Venlo, in 1495, and used by the Turks at the siege of Rhodes in 1522. They came into general use in 1634, having been previously used only by the Dutch and Spaniards. Bomb-vessels were invented in France in 1681. *Voltaire*. The shrapnel shell is a bomb filled with balls, and a lighted fuse to make it explode before it reaches the enemy; a thirteen-inch bomb-shell weighs 198 lbs.

BONES. The art of softening bones was discovered about 1688, and they were used in the cutlery manufacture, &c., immediately afterwards. The declared value of the bones of cattle and of other animals, and of fish (exclusive of whale-fins) imported into the United Kingdom from Russia, Prussia, Holland, Denmark, &c., amounts annually to more than 300,000*l*. (in 1851 about 32,000 tons). Bone-dust has been extensively employed in manure since the publication of Liebig's researches in 1840.

BONHOMMES, hermits of simple and gentle lives, appeared in France about 1257; in England about 1283. The prior of the order was called *le bon homme*, by Louis VI.

BONN, a town on the Rhine (the Roman Bonna), was in the electorate of Cologne. It has been frequently besieged, and was assigned to Prussia in 1814. The Prince Consort of England was a student at the university, founded in 1818.

BOOK OF SPORTS. See *Sports*.

BOOKS (Anglo-Saxon, *boc*; German, *buch*). Books were originally made of boards, or the inner bark of trees: afterwards of skins and parchment. Papyrus, an indigenous plant, was adopted in Egypt. Books with leaves of vellum were invented by Attalus, king of Perganius, about 198 B.C., at which time books were in volumes or rolls. The MSS. in Herculaneum consist of Papyrus, rolled and charred and matted together by the fire, and are about nine inches long, and one, two, or three inches in diameter, each being a separate treatise. The most ancient books are the Pentateuch of Moses and the poems of Homer and Hesiod. The first **PRINTED BOOKS** (see *Printing*) were printed on one side only, the leaves being pasted back to back.

PRICES OF BOOKS.—Jerome (who died 420) states that he had ruined himself by buying a copy of the works of Origen. A large estate was given by Alfred for one on cosmography, about 872. The *Roman de la Rose* was sold for about 30*l*.; and a homily was exchanged for 200 sheep and five quarters of wheat. Books frequently fetched double or treble their weight in gold. They sold at prices varying from 10*l*. to 40*l*. each in 1400. A copy of *Macklin's Bible*, ornamented by Mr. Tomkins, was declared worth 500 guineas. *Butler*. A yet more superb copy was insured in a London office for 3000*l*. See *Boccaccio*.

BOOKS (*continued*).

BOOK-BINDING.—The book of St. Cuthbert, the earliest ornamental book, is supposed to have been bound about 650
 A Latin Psalter, in oak boards, was bound in the 6th century.
 A MS. copy of the Four Evangelists, the book on which our kings from Henry I. to Edward VI. took their coronation oath, was bound in oaken boards, nearly an inch thick 1100
 Velvet was the covering in the 14th century; and silk soon after. Vellum was introduced early in the 15th century; it was stamped and ornamented about 1510
 Leather came into use about the same time.

The rolling machine, invented by Mr. Wm. Burr, was substituted for the beating-hammer, and gas-stoves began to take the place of the charcoal fires used to heat the gilder's finishing tools about 1830
 Cloth binding superseded the common boards generally about 1831
 Caoutchouc, or India-rubber, backs to account-books and large volumes, were introduced in 1841
 BOOK-HAWKING SOCIETIES (already in Scotland) began in England in 1851 by archdeacon Wigram (since bishop of Rochester). The hawkers vend moral and religious books in a similar manner to the French colporteurs.

BOOK-KEEPING. The system by double-entry, called originally Italian book-keeping, was taken from the course of Algebra published by Burgo, in the 15th century, at Venice. John Gowghe, a printer, published a treatise "on the keyping of the famous reconynge . . . Debitor and Creditor," London, 1543. This is our earliest work on book-keeping. James Peele published his *Book-keeping* in 1569. John Mellis published "A Briefe Instruction and Manner how to Keepe Bookes of Accompts," in 1588. Improved systems were published by Benjamin Booth in 1789 and by Edw. Thos. Jones in 1821 and 1831.

BOOKSELLERS, at first migratory like hawkers, became known as *stationarii*, from their practice of having booths or stalls at the corners of streets and in markets. They were long subject to vexatious restrictions, from which they were freed in 1758.*

BOOTHIA FELIX, a large peninsula, the N.W. point of America, discovered by sir John Ross in 1831, and named after sir Felix Booth, who had presented him with 20,000*l*. to fit out his Polar expedition. Sir Felix died at Brighton in Feb. 1850.

BOOTS, said to have been the invention of the Carians, were made of iron, brass, or leather. Leather boots were mentioned by Homer 907 B.C., and frequently by the Roman historians. A variety of forms may be seen in Fairholt's "Costume in England." An instrument of torture termed "*the boot*" was used in Scotland so late as 1630.

BORAX (Boron), known to the ancients, is used in soldering, brazing, and casting gold and other metals, and was called *chrysocolle*. Borax is produced naturally in the mountains of Thibet, and was brought to Europe from India about 1713. Homberg in 1702 discovered in borax *boracic acid*, which latter in 1808 was decomposed by Gay-Lussac, Thénard, and H. Davy, into oxygen, and the previously unknown element, boron. Borax has lately been found in Saxony; and is now largely manufactured from the boracic acid found by Hæfer to exist in the gas arising from certain lagoons in Tuscany; an immense fortune has been made by their owner M. Lardarel since 1818.

* BOOKSELLERS' ASSOCIATION. In 1829 a number of eminent publishers in London formed themselves into an association for the regulation of the trade, and fixed the amount of discount to be allowed, Dec. 29, 1829, and for some years re-briefed the retail booksellers from selling copies of works under the full publishing price. A dispute afterwards arose as to the right, maintained by the latter, to dispose of books (when they had once become theirs by purchase) at such less profit as they might deem sufficiently remunerative. The dispute was referred to lord chief justice Campbell, before whom the parties argued their respective cases, at Stratheden House, April 14, 1852. His lordship gave judgment in effect against the association; this led to its immediate dissolution, May 19 following.

BORNOU, an extensive kingdom in central Africa, explored by Denham and Clapperton, who were sent out by the British government in 1822. The population is estimated by Denham at 5,000,000, by Barth at 9,000,000.

BORODINO, a Russian village on the river Moskwa, near which a sanguinary battle was fought, Sept. 7, 1812, between the French under Napoleon, and the Russians under Kutusoff; 240,000 men being engaged. Each party claimed the victory, but it was rather in favour of Napoleon; for the Russians retreated, leaving Moscow, which the French entered, Sept. 14. See *Moscow*.

BORON. See *Borax*.

BOROUGH, or **BURGH**, anciently a company of ten families living together, now such towns as send members to Parliament, since the election of burgesses in the reign of Henry III. 1265. Charters were granted to towns by Henry I., 1132; which were remodelled by Charles II. in 1682-4, but restored in 1688. 22 new English boroughs were created in 1553. Burgesses were first admitted into the Scottish parliament by Robert Bruce, 1326; and into the Irish, 1365. The "Act to amend the Representation of the People in England and Wales" was passed June 7, 1832; and the Act for the Regulation of Municipal Corporations, Sept. 9, 1835. See *Constituency*.

BOROUGH-BRIDGE (W. R. of York), the site of a battle between the earls of Hereford and Lancaster and Edward II., March 16, 1322. The latter, at the head of 30,000 men, pressed Lancaster so closely, that he had not time to collect his troops together in sufficient force, and being defeated and made prisoner, was led, mounted on a lean horse, to an eminence near Pontefract, or Pomfret, and beheaded by a Londoner.

BOROUGH-ENGLISH, an ancient tenure by which the younger son inherits, is mentioned as occurring 834. It was abolished in Scotland by Malcolm III. in 1062.

BOSCOBEL, near Donington, Shropshire, where Charles II. concealed himself after his defeat at Worcester (*which see*), Sept. 3rd, 1651.* The "Boscobel Tracts" were first published in 1660. In 1861 Mr. F. Manning published "Views," illustrating these tracts.

BOSNIA, a province in Turkey, formerly a dependent upon Servia, was conquered by the Turks about 1526, who still retain it after losing it several times.

BOSPHORUS, THRACIAN (now channel of Constantinople). Darius Hystaspes threw a bridge of boats over this strait when about to invade Greece, 493 B.C. See *Constantinople*.

BOSPORUS (improperly **BOSPHORUS**), now called *Civassia*, near the Bosphorus Cimmerius, now the straits of Kertch or Yenikalé. The history of the kingdom is involved in obscurity, though it continued for 350 years. It was named Cimmerian, from the *Cimmeri*, who dwelt on its borders, about 750 B.C.

BOSTON, a city in the United States, built about 1627. Here originated that resistance to the British authorities which led to American independence. The act of parliament laying duties on tea, papers, colours, &c. (passed June, 1767), so excited the indignation of the citizens of Boston, that they destroyed several hundreds of chests of tea, Nov. 1773. Boston seaport was shut by the English parliament, until restitution should be made to the East India Company for the tea lost, March 25, 1774. The town was besieged by the British next year, and 400 houses were destroyed. A battle between the royalists and independent troops, in which the latter were defeated, took place on June 17, 1775. The city was evacuated by the king's troops, April, 1776. The inhabitants were very zealous against slavery. An industrial exhibition was opened here in Oct. 1856, and lasted two weeks.

* The king, disguised in the clothes of the Pendrills, remained from Sept. 4-6, at White Ladies: on Sept. 7 and 8 he lay at Boscobel house, near which exists an oak, said to be the scion of the Royal Oak in which the king was part of the time hidden with col. Careless. *Sharpe*.

BOSWORTH FIELD, Leicestershire, the site of the thirteenth and last battle between the houses of York and Lancaster, Aug. 22, 1485; Richard III. was defeated by the earl of Richmond, afterwards Henry VII., and slain. Sir Wm. Stanley at a critical moment changed sides, and thus caused the loss of the battle. It is said that Henry was crowned on the spot with the crown of Richard found in a hawthorn bush, near the field.

BOTANY. Aristotle is considered the founder of the science of botany (about 347 B.C.). *Historia Plantarum* of Theophrastus was written about 320 B.C. Authors on botany became numerous at the close of the 15th century. Fuchsius, Bock, Bauhin, Cæsalpinus, and others, wrote between 1535 and 1600. The system and arrangement of the great Linnaeus was made known about 1750; and Jussieu's system, founded on Tournefort's, and called "the natural system," in 1758. At Linnaeus's death, 1778, the species of plants actually described amounted in number to 11,800. The number of species now recorded cannot fall short of 100,000.* J. C. Loudon's "Encyclopædia of Plants," a most comprehensive work, first appeared in 1829. De Candolle's "Prodromus Systematis Naturalis Regni Vegetabilis" (of which Vol. I. appeared in 1818), is nearly completed (1865).

BOTANY BAY, Australia, was discovered by captain Cook, April 28, 1770, and took its name from the great variety of plants which abounded on the shore. It was fixed on for a colony of convicts from Great Britain. The first governor, capt. Arthur Phillip, who sailed from England in May, 1787, arrived at the settlement in Jan. 1788. The colony was eventually established at Port Jackson, about thirteen miles to the north of the bay. See *New South Wales and Transportation*.

BOTHWELL BRIDGE, Lanarkshire. The Scotch covenanters took up arms against the intolerant government of Charles II. in 1679, and defeated the celebrated Claverhouse at Drumclog. They were however totally routed by the earl of Monmouth at Bothwell Bridge, June 22, 1679, and many of the prisoners were cruelly tortured and afterwards executed.

BOTTLE-CONJUROR. On Jan. 16, 1748, a charlatan at the old Haymarket theatre had announced that he would jump into a quart bottle. The theatre was besieged by thousands anxious to gain admittance and witness the feat. The duped crowd nearly pulled down the edifice.

BOTTLES in ancient times were made of leather. Bottles of glass were first made in England about 1558. See *Glass*. The art of making glass bottles and drinking-glasses was known to the Romans at least before 79; for these articles and other vessels have been found in the ruins of Pompeii. A bottle which contained two hogsheads was blown, we are told, at Leith, in Scotland, in Jan. 1747-8.

BOULOGNE, a seaport in Picardy, N. France, was taken by the British under Henry VIII. on Sept. 14, 1544, but restored at the peace, 1550. Lord Nelson attacked Boulogne, disabling ten vessels and sinking five, Aug. 3, 1801. In another attempt he was repulsed with great loss, and captain Parker of the *Medusa* and two-thirds of his crew were killed, Aug. 18 following. In 1804 Bonaparte assembled 160,000 men and 10,000 horses, and a flotilla of 1300 vessels and 17,000 sailors to invade England. The coasts of Kent and Sussex were covered with martello towers and lines of defence; and nearly half the adult population of Britain was formed into volunteer corps. It is supposed that this French armament served merely for a demonstration, and that Bonaparte never seriously intended the invasion. Sir Sidney Smith unsuccessfully attempted to burn the flotilla with fire-machines called catamarans, Oct. 2, 1804. Congreve-rockets were used in another attack, and they set the town on fire, Oct. 8, 1806. The army was removed on the breaking out of war with Austria in 1805. Louis Napoleon (now emperor) made a descent here with about

BOUNTIES, premiums granted to the producer, exporter, or importer of certain articles; a principle introduced into commerce by the British parliament. The first granted on corn in 1688, were repealed in 1815. They were first legally granted in England for raising naval stores in America, 1703, and have been granted on sail-cloth, linen and other goods.

BOUNTY MUTINY, took place on board the *Bounty*, an armed ship which quitted Otaheite, with bread-fruit trees, April 7, 1789. The mutineers put their captain, Bligh, and nineteen men into an open boat, near Annamooka, one of the Friendly Isles, April 28, 1789; these reached the island of Timor, south of the Moluccas, in June, after a perilous voyage of nearly 4000 miles; their preservation was next to miraculous. Some of the mutineers were tried, Sept. 15, 1792; six were condemned and three executed. For the fate of the others, see *Pitcairn's Island*.

BOURBON, HOUSE OF (from which come the royal houses of France, Spain, and Naples), derives its origin from the Archambauds, lords of Bourbon in Berry. Robert, count of Clermont, son of Louis IX. of France, married the heiress Beatrice in 1272: their son Louis I. was created duke of Bourbon and peer of France by Charles IV. in 1327. The last of the descendants of their elder son Peter I. was Susanna, wife of Charles, duke of Montpensier, called constable of Bourbon, who, offended by his sovereign Francis I., entered into the service of the emperor Charles V., and was killed at the siege of Rome, May 6, 1527. From James, the younger son of Louis I., was descended Antony, duke of Vendôme, who married (1548) Jean d'Albret, daughter of Henry, king of Navarre. Their son the great Henry IV. was born at Pau, Dec. 23, 1553, and became king of France, July 31, 1589.—The crown of Spain was settled on a younger branch of this family, 1700, and guaranteed by the peace of Utrecht, 1713. *Rapin*. The Bourbon FAMILY COMPACT (*which see*) was made 1761. The Bourbons were expelled France, 1791; restored, 1814; again expelled on the return of Bonaparte from Elba, and again restored after the battle of Waterloo, 1815. The elder branch was expelled once more, in the person of Charles X. and his family, in 1830, in consequence of the revolution of the memorable days of July in that year. The Orleans branch ascended the throne in the person of the late Louis-Philippe, as "king of the French," Aug. 9, following. He was deposed Feb. 24, 1848, when his family also was expelled. The Bourbon family fled from Naples, Sept. 6, 1860; and Francis II. lost his kingdom. See *France, Spain, Naples, Orleans, Parma, Conde, and Legitimists*.

BOURBON, ISLE OF (in the Indian Ocean), discovered by the Portuguese about 1545. The French are said to have first settled here in 1642. It surrendered to the British, under admiral Rowley, Sept. 21, 1809, and was restored to France in 1815. *Alison*. An awful hurricane in Feb. 1829 did much mischief. See *Mauritius*.

BOURDEAUX, OR BORDEAUX (W. France), was united to the dominions of Henry II. of England by his marriage with Eleanor of Aquitaine. Edward the Black Prince brought his royal captive, John, king of France, to this city after the battle of Poitiers in 1356, and here held his court during eleven years: his son, our Richard II., was born at Bourdeaux, 1366. Bourdeaux finally surrendered to Charles VII. of France in 1453. The fine equestrian statue of Louis XV. was erected in 1743. Bourdeaux was entered by the victorious British army after the battle of Orthes, fought Feb. 27, 1814.

BOURIGNONISTS, a sect founded by *Antoinette Bourignon*, who, in 1658, took the Augustine habit and travelled in France, Holland, England, and Scotland; in the last she made many converts about 1670. She maintained that Christianity does not consist in faith and practice, but in inward feeling and supernatural impulse. A disciple named Court left her a good estate. She died in 1680, and her works, in 21 volumes 8vo, were published in 1686.

BOURNOUS, the Arabic name of a hooded garment worn in Algeria, which has been introduced in a modified form into England and France since 1847.

BOUVINES (N. France), the site of a desperate battle, July 27, 1214, in which Philip Augustus of France obtained a complete victory over the emperor Otho and his allies, consisting of more than 150,000 men. The earls of Flanders and Boulogne were taken prisoners.

BOWLS, OR BOWLING, an English game as early as the 13th century. Charles I. played at it, and also Charles II. at Tunbridge. *Grammont*.

BOW-STREET. See *Magistrates*.

BOWS AND ARROWS. See *Archery*.

BOXING, or PRIZE-FIGHTING, the *pugilatus* of the Romans, once a favourite sport with the British, who possess an extraordinary strength in the arm, an advantage which gives the British soldier great superiority in battles decided by the bayonet. A century ago boxing formed a regular exhibition, and a theatre was erected for it in Tottenham-court.—Broughton's amphitheatre, behind Oxford-road, was built 1742. Schools were opened in England to teach boxing as a science in 1790. Mendoza opened the Lyceum in the Strand in 1791. Boxing was much patronised from about 1820 to 1830, but is now out of favour.* John Gully, originally a butcher, afterwards a prize-fighter, acquired wealth and became M.P. for Pontefract in 1835. He died March 9, 1863.

BOXTEL (in Dutch Brabant), where the British and allied army, commanded by the duke of York, was defeated by the French republicans, who took 2000 prisoners and eight pieces of cannon, Sept. 17, 1794.

BOX-TREE, indigenous to this country, and exceedingly valuable to wood-engravers. In 1815 a large box-tree at Box-hill, Surrey, was cut down, and realised a large sum. Macculloch says, that "the trees were cut down in 1815, and produced upwards of 10,000*l*." About 1820 the cutting of all the trees on the hill produced about 6000*l*.

BOYDELL'S LOTTERY for a gallery of paintings was got up in 1791 at a vast expense by alderman Boydell, lord mayor of London, a great encourager of the arts. The collection was called the Shakspeare gallery, and every ticket was sold at the time the alderman died, Dec. 12, 1804, before the decision of the wheel.

BOYLE LECTURES, instituted in 1691 by Robert Boyle (son of the great earl of Cork), a philosopher, distinguished by his genius, virtues, and benevolence. Eight lectures (in vindication of the Christian religion) are delivered at St. Mary-le-bow church, London, on the first Monday in each month, from January to May and September to November.

BOYNE (a river in Kildare, Ireland), near which William III. defeated his father-in-law, James II., July 1, 1690. The latter lost 1500 (out of 30,000) men; the Protestant army lost about a third of that number (out of 30,000). James fled to Dublin, thence to Waterford, and escaped to France. The duke of Schomberg was killed in the battle, having been shot by mistake by his own soldiers as he was crossing the river. Here also was killed the rev. George Walker, who defended Londonderry in 1689. Near Drogheda is a splendid obelisk, 150 feet in height, erected in 1736 by the Protestants of the empire in commemoration of this victory.

BOYNE, man-of-war of 98 guns, destroyed by fire at Portsmouth, May 4, 1795, by the explosion of the magazine; numbers perished. Portions were recovered June, 1840.

BRABANT (now part of the kingdoms of Holland and Belgium), an ancient duchy, part of Charlemagne's empire, fell to the share of his son Lothaire. It became a separate duchy (called at first Lower Lorraine) in 959. It descended to Philip II. of Burgundy, and in regular succession to the emperor Charles V. In the 17th century it was held by Holland and Austria, as Dutch Brabant and the Walloon provinces, and underwent many changes through the wars of Europe. The Austrian division was taken by the French in 1746 and 1794. It was united to the Netherlands in 1814, but has formed part of Belgium, under Leopold, since 1830. His heir is styled duke of Brabant. See *Belgium*.

BRACELETS were worn by the ancients, and *armillæ* were Roman military rewards. Those of pearls and gold were worn by the Roman ladies.

BRADFIELD RESERVOIR. See *Sheffield*, 1864.

BRADFORD. See *Poison*.

BRADSHAW'S RAILWAY GUIDE was first published by Mr. G. Bradshaw in Dec. 1841. He had previously published occasionally a *Railway Companion*.

* On April 17, 1860, a large number of persons of all classes assembled at Farnborough to witness a desperate conflict between Thomas Sayers, the Champion of England, a light Sussex man, about 5 feet 8 inches high, and John Heenan, the "Beneath Boy," a huge American, in height 6 feet 1 inch. Strength, however, was matched by skill; and eventually the fight was interrupted. Both men received a silver belt on May 31 following. Tom King beat Mace, and obtained the champion's belt, &c., Nov. 26, 1862; he beat Goss, Sept. 1, 1863, and Heenan (nearly to death) Dec. 10, 1863. A trial, in consequence of the last fight ensued: the culprits were discharged, on promising not to offend again, April 5, 1864. On Jan. 4, 1865, Wormald obtained the championship after a contest with Marsden.

BRAGANZA, a city in Portugal, gave title to Alfonso, natural son of Pedro I. of Portugal (in 1422), founder of the house of Braganza. When the nation, in a bloodless revolution in 1640, threw off the Spanish yoke, John, duke of Braganza, as John IV., was called to the throne; his family continues to reign. See *Portugal* and *Brazil*.

BRAHMINS, the highest of the four castes of the Hindoos. Pythagoras is thought to have learned from them his doctrine of the *Metempsychosis*; and it is affirmed that some of the Greek philosophers went to India on purpose to converse with them. The modern Brahmins derive their name from Brahman, one of the three beings whom God, according to their theology, created, and with whose assistance he formed the world. The modern Indian priests are still the depositaries of the sacred learning of India. See *Vedas*.

BRAINTREE CASE (in Essex), which was decided in 1842 by Dr. Lushington, who determined that a minority in a parish vestry cannot levy a church rate.

BRAMHAM (W. R. York): near here the earl of Northumberland and lord Bardolf were defeated and slain by sir Thomas Rokeby, the general of Henry IV., Feb. 19, 1408; and Fairfax was defeated by the royalists under the duke of Newcastle, March 29, 1643.

BRANDENBURG, a city in Prussia, founded by the Slavonians, who gave it the name of *Bamber*, which signified *Guard of the Forest*, according to some; others say, Burg, or city of the *Brenns*. Henry I., surnamed the Fowler, after defeating the Slavonians, fortified Brandenburg, 926, as a rampart against the Huns, and bestowed the government on Sigefroi, count of Ringelheim, with the title of Margrave, or protector of the marches or frontiers. The emperor Sigismund gave perpetual investiture to Frederick IV. of Nuremberg, ancestor of the Royal family of Prussia, who was made elector in 1417. For a list of the Margraves since 1134, see *Prussia*.

BRANDENBURG HOUSE, Hammersmith. See *Queen Caroline*.

BRANDY (German *Brauntwein*, burnt wine), the spirit distilled from wine. It appears to have been known to Raymond Lully in the 13th century, and to have been manufactured in France early in the 14th. It was at first used medicinally, and miraculous cures were ascribed to its influence. In 1851, 938,280 gallons were imported with a duty of 15s. per gallon. It is now manufactured in Britain.

BRANDYWINE, a river in N. America, near which a battle took place between the British and the revolted Americans, in which the latter (after a day's fight) were defeated with great loss, and Philadelphia fell into the possession of the victors, Sept. 11, 1777.

BRASS was known among all the early nations. *Usher*. The British from the remotest period were acquainted with its use. *Whitaker*. When Lucius Mummius burnt Corinth to the ground, 146 B.C., he found immense riches, and during the conflagration, it is said, all the metals in the city melted, and running together, formed the valuable composition described as *Corinthian Brass*. This, however, may well be doubted, for the Corinthian artists had long before obtained great credit for their method of combining gold and silver with copper; and the Syriac translation of the Bible says, that Hiram made the vessels for Solomon's temple of Corinthian brass. *Du Fresnoy*. Some of the English sepulchral engraved *brasses* are said to be as old as 1277.

BRAURONIA, festivals in Attica, at Brauron, where Diana had a temple. The most remarkable that attended these festivals were young virgins in yellow gowns, dedicated to Diana. They were about ten years of age, and not under five; and therefore their consecration was called "*dekateucin*," from *deka*, ten; 600 B.C.

BRAY, THE VICAR OF. Bray, in Berks, is famous in national song for its vicar, the rev. Symon Symonds, who is said to have been twice a papist and twice a Protestant—in four successive reigns—those of Henry VIII., Edward VI., Mary, and Elizabeth, between the years 1533 and 1558. Upon being called a turn-coat, he said he kept to his principle, that of "living and dying the vicar of Bray." *Fuller's Church History*.

BRAZEN BULL, contrived by Perillus, a brass-founder at Athens, for Phalaris, tyrant of Agrigentum, 570 B.C. He cast a brazen bull, larger than life, with an opening in the side to admit the victims. A fire was kindled underneath to roast them to death; and the throat was so contrived that their dying groans resembled the roaring of a bull. Phalaris admired the invention and workmanship, but said it was reasonable the artist should make the first experiment, and ordered his execution. Ovid mentions that the Agrigentes, maddened by the tyrant's cruelties, revolted, seized him, cut his tongue out and roasted him in the brazen bull, 549 B.C.

BRAZIL, an empire in South America, was discovered by Alvarez de Cabral, a Portuguese, who was driven upon its coasts by a tempest, Jan. 26, 1500. He called it the land of the Holy Cross; but it was subsequently called Brazil, on account of its red wood. The French having seized on Portugal in 1807, the royal family and nobles embarked for Brazil, and landed March 7, 1808. The dominant religion is Roman Catholic; but others are tolerated. Population in 1856, 7,677,800. See *Portugal*.

BREAD. Ching-Noung, the successor of Fohi, is reputed to have been the first who taught men (the Chinese) the art of husbandry and the method of making bread from wheat, and wine from rice, 1998 B.C. *Univ. Hist.* Baking of bread was known in the patriarchal ages; see *Exodus* xii. 15. It became a profession at Rome, 170 B.C. After the conquest of Macedon, 148 B.C., numbers of Greek bakers came to Rome, obtained special privileges, and soon obtained the monopoly of the baking trade. During the siege of Paris by Henry IV., owing to the famine which then raged, bread, which had been sold whilst any remained for a crown a pound, was at last made from the bones of the charnel-house of the Holy Innocents, A.D. 1594. *Hénault*. In the time of James I., barley bread was used by the poor; and now in Iceland, cod-fish, beaten to powder, is made into bread; potato-bread is used in Ireland. The London Bakers' Company was incorporated in 1307. Bread-street was once the London market for bread. Until 1302, the London bakers were not allowed to sell any in their own shops. *Stow*. Bread was made with yeast by the English bakers in 1634. In 1856 and 1857 Dr. Daughlish patented a mode of making "aërated bread," in which carbonic acid gas is combined with water and mixed with the flour, which is said to possess the advantages of cleanliness, rapidity, and uniformity. In 1862 a company was

formed to encourage Stevens' bread-making machinery.* An act for regulating bakehouses was passed in July, 1863.

BREAD-FRUIT TREE, mentioned by Dampier, Anson, Wallis, and other voyagers. A vessel under captain Bligh was fitted out to convey these trees to various British colonies in 1789 (see *Bounty*), and again in 1791. The number taken on board at Otaheite was 1151. Some were left at St. Helena, 352 at Jamaica, and five were reserved for Kew Gardens, 1793. The tree was successfully cultivated in French Guiana, 1802.

BREAKWATERS. The first stone of the Plymouth breakwater was lowered August 12, 1812. It was designed to break the swell, and stretches 5280 feet across the sound; it is 360 feet in breadth at the bottom and more than thirty at the top, and consumed 3,666,000 tons of granite blocks, from one to five tons each, up to April, 1841, and cost a million and a half sterling. The architects were Mr. John Rennie and his son sir John. The first stone of the lighthouse on its western extremity was laid Feb. 1, 1841. Breakwaters are now in course of construction at Holyhead, Portland, Dover, &c. (1865).

BREAST-PLATE. One was worn by the Jewish high priest, 1491 B.C. (*Exod.* xxxix.). Goliath "was armed with a coat of mail," 1063 B.C. (1 *Sam.* xvii.) Breast-plates dwindled to the diminutive gorgets. Ancient breast-plates are mentioned as made of gold and silver.

BRECHIN, Scotland; sustained a siege against the army of Edward III., 1333. The battle of Brechin was fought between the forces of the earls of Huntly and Crawford; the latter defeated, 1452. The see of Brechin was founded by David I. in 1150. One of its bishops, Alexander Campbell, was made prelate when but a boy, 1556. The bishopric, discontinued soon after the revolution in 1688, was revived in 1731.

BREDA, Holland, was taken by prince Maurice, of Nassau, in 1590; by the Spaniards, under Spinola, in 1625; and by the Dutch, in 1637. Our Charles II. resided here at the time of the restoration, 1660. See *Restoration*. Breda was taken by the French in 1793. The French garrison was expelled by the burgesses in 1813. The "*Compromise of Breda*" was a proposal to Philip II., deprecating his harsh measures in the Netherlands, presented and refused in 1566.

BRECHES. Among the Greeks, this garment indicated slavery. It was worn by the Dacians, Parthians, and other northern nations; and in Italy, it is said, was worn in the time of Augustus Cæsar. In the reign of Honorius, about 394, the *braccarii*, or breeches-makers, were expelled from Rome; but soon afterwards the use of breeches was adopted in other countries, and at length became general.

BREHONS, ancient judges in Ireland, are said to have administered justice with religious impartiality, but in later times with a tendency to love of country. It was enacted by the statute of Kilkenny, that no English subject should submit to the Brehon laws, 40 Edw. III., 1365. These laws, however, were recognised by the native Irish till about 1650. A translation of them was proposed in 1852, the publication of which may be expected.

BREITENFELD, BATTLE OF. See *Leipsic*.

BREMEN (N. Germany), said to have been founded in 788, and long an archbishopric and one of the leading towns of the Hanseatic league, was allowed a seat and a vote in the college of imperial cities in 1640. In 1648 it was secularised and erected into a duchy and

* ASSIZE OF BREAD. The first statute for the regulation of the sale of bread was 3 John, 1203. The chief justiciary, and a baker commissioned by the king, had the inspection of the assize. *Matthew Paris*. The assize was further regulated by statute in 51 Henry III. 1266, and 8 Anne, 1710. Bread Act, Ireland, placing its sale on the same footing as in England, 1 Vict. 1838. Bread was directed to be sold by weight in London in 1822; the statute "*Assessa Panis*" was repealed in 1824; and the sale of bread throughout the country was regulated in 1836.

held by Sweden till 1712, when it was taken possession of by Denmark in 1731, by whom it was ceded to Hanover. It was taken by the French in 1757, who were expelled by the Hanoverians in 1758. Bremen was annexed by Napoleon to the French empire in 1810; but its independence was restored in 1813, and all its old franchises in 1815. Population of the province in 1862, about 90,000. See *Hanse Towns*.

BRESCIA, N. Italy (the ancient *Brixia*), became important under the Lombards, and suffered by the wars of the Italian Republics. It was taken by the French under Gaston de Foix in 1512, when it is said 40,000 of the inhabitants were massacred. It surrendered to the Austrian general Haynau, March 30, 1849, on severe terms.

BRESLAU, in Silesia, was burnt by the Mongols in 1241, and conquered by Frederick II. of Prussia, in Jan. 1741. A fierce battle took place here between the Austrians and Prussians, the latter under prince Bevern, who was defeated Nov. 22, 1757. Breslau was taken: but was regained, Dec. 21, the same year. It was besieged by the French, and surrendered to them Jan. 1807, and again in 1813.

BREST, a sea-port, N.W. France, was besieged by Julius Cæsar, 54 B.C.—possessed by the English, A.D. 1378—given up to the duke of Brittany, 1390. Lord Berkeley and a British fleet and army were repulsed here with dreadful loss in 1694. The magazine burnt, to the value of some millions of pounds sterling, 1744. The marine hospitals, with fifty galley slaves, burnt, 1766. The magazine again destroyed by fire, July 10, 1784. From this great dépôt of the French navy, numerous squadrons were equipped against England during the late war, among them the fleet which lord Howe defeated on the 1st of June, 1794. England maintained a large blockading squadron off the harbour from 1793 to 1815; but with little injury to France. It is now a chief naval station of that country, and from the fortifications and other vast works of late construction it is considered impregnable. The British fleet visited Brest, Aug. 1865.

BRETAGNE. See *Brittany*. BRETHREN. See *Bohemian* and *Plymouth Brethren*.

BRETIGNY, PEACE OF, concluded with France, May 8, 1360, by which England retained Gascony and Guienne, and acquired other provinces; renounced her pretensions to Maine, Anjou, Touraine, and Normandy; was to receive 3,000,000 crowns, and to release king John, long a prisoner. The treaty not being carried out, the king remained and died in London.

BRETON. See *Cape Breton*.

BRETWALDA (wide-ruling chief), one of the kings of the Saxon heptarchy, chosen by the others as a leader in war against their common enemies. The following are mentioned by Bede (500 to 642), Ella, king of Sussex; Ceawlin of Wessex; Ethelbert of Kent; Redwald of East Anglia; Edwin, Oswald, and Oswy of Northumberland. The title (then become obsolete) was bestowed upon Egbert, 828.

BREVIARY (so called as being an abridgment of the books used in the Roman Catholic Service), contains the seven canonical hours, viz.: matins or lauds, primes, tierce, sexte, nones, vespers, and complines. Its origin is ascribed to pope Gelasius I. about 492. It was first called the *custos*, and afterwards the breviary; and both the clergy and laity use it publicly and at home. It was in use among the ecclesiastical orders about 1080; and was reformed by the councils of Trent and Cologne, and by Pius V., Urban VIII., and other popes. The quality of type in which the breviary was first printed gave the name to the type called *brevier* (in which this page is printed).

BREWERS are traced to Egypt. Brewing was known to our Anglo-Saxon ancestors. *Tindal*. "One William Murle, a rich maltman or bruer, of Dunstable, had two horses all trapped with gold, 1414." *Stow*. In Oct. 1851, there were 2305 licensed brewers in England, 146 in Scotland, and 97 in Ireland; total 2548: these are exclusive of retail and intermediate brewers. There were 40,418 licensed brewers in the United Kingdom in 1858; the revenue from whom to the state was in that year 81,030*l*. In 1858 in England there were 205 great brewers. See *Ale*, *Porter*.

BRIAR'S CREEK (N. America), near which the Americans, 2000 strong, under general Ashe, were totally defeated by the English under general Prevost, March 16, 1779.

BRIBERY forbidden, *Deut.* xvi. 19. Samuel's sons were guilty of it, B.C. 1112. (1 *Sam.* viii. 3.) Thomas de Weyland, a judge, was banished for bribery in 1288; he was chief justice of the common pleas. William de Thorpe, chief justice of the king's bench, was hanged for bribery in 1351. Another judge was fined 20,000*l*. for the like offence, 1616. Mr. Walpole, secretary-at-war, was sent to the Tower for bribery, in 1712. Lord Strangford was suspended from voting in the Irish house of lords, for soliciting a bribe, January, 1784.

BRICKS were used in Babylon, Egypt, Greece, and Rome; in England by the Romans about A.D. 44. Made under the direction of Alfred the Great, about 886. *Saxon Chron.* The size regulated by order of Charles I., 1625. Taxed 1784. The number of bricks which paid duty in England in 1820 was 949,000,000; in 1830, above 1,100,000,000; in 1840, 1,400,000,000; and in 1850, 1,700,000,000. The duties and drawbacks of excise on bricks were repealed in 1850. In 1839 Messrs. Cooke and Cunningham brought out their machinery by which, it is said, 18,000 bricks may be made in ten hours. Messrs. Dixon and Corbett, near Newcastle, in 1861, were making bricks by steam at the rate of 1500 per hour. The machinery is the invention of Clayton & Co., London.

BRIDEWELL, originally a palace of king John, near Fleet-ditch, London, was rebuilt by Henry VIII., 1522, and given to the city for a workhouse by Edward VI., 1553. The New Bridewell prison, erected in 1829, was pulled down in 1864; that of Tothill-fields was rebuilt in 1831.

BRIDGES were first of wood. The ancient stone bridges in China are of great magnitude. Abydos is famous for the bridge of boats which Xerxes built across the Hellespont, 480 B.C. Trajan's magnificent stone bridge over the Danube, 4770 feet in length, was built in A.D. 105. Brotherhoods for building bridges existed in S. France about 1180.†

BRIDGEWATER, Somersetshire, was incorporated by king John, in 1200. In the war between Charles I. and the parliament, the forces of the latter reduced part of the town to ashes, 1643. Here stood an ancient castle in which the ill-advised duke of Monmouth lodged when he was proclaimed king in 1685.

BRIDGEWATER CANAL, the first great work of the kind in England, was begun by the duke of Bridgewater, styled the father of canal navigation in this country, in 1759, and opened 1761. Mr. Brindley was the engineer. It commences at Worsley, seven miles from Manchester; and at Barton Bridge is an aqueduct which, for upwards of 200 yards, conveys the canal across the river Irwell. The length of the canal is about twenty-nine miles.

* On April 17, 1858, in the case of Cooper v. Slade, it was ruled that the payment of travelling expenses was bribery; and in the same year an act was passed which permits candidates to provide conveyances for voters, but forbids payment of travelling expenses.

† The Devil's bridge, in the canton of Uri, so called from its frightful situation, was built on two high rocks, so that it could scarcely be conceived how it was erected, and many fabulous stories were invented to account for it. At Schaffhausen an extraordinary bridge was built over the Rhine, which is there 400 feet wide: there was a pier in the middle of the river, but it is doubtful whether the bridge rested upon it: a man of the lightest weight felt the bridge totter under him, yet waggons heavily laden passed over without danger. The bridge was destroyed by the French in 1799.

Chalmers, John Kidd, William Buckland, William Prout, Peter M. Roget, and the revs. William Whewell and William Kirby) were published 1833—5.

BRIEF, a written instrument in the Roman Catholic church, of early but uncertain date. Briefs are the letters of the pope despatched to princes and others on public affairs, and are usually written short, hence the name, and without preface or preamble, and on paper; in which particulars they are distinguished from *bulls*. The latter are ample and are always written on parchment. Briefs are sealed with red wax and the seal of the fisherman, or St. Peter in a boat, and always in the presence of the pope. The Queen's letter authorising collections in churches for charitable purposes are called "briefs."

BRILL (or **Briel**), Holland. A seaport, seized by the expelled Dutch confederates, became the first seat of their independence. Brill was given up to the English in 1585 as security for advances made by Queen Elizabeth to the states of Holland. It was restored in 1616.

BRISTOL (W. England), built by Brennus, a British prince, 380 B.C., is mentioned in A.D. 430 as a fortified city. It was called *Caer Oder*, a city in the valley of Bath; and sometimes *Caer Brito*, the British city, and by the Saxons *Brightstowe*, pleasant place. Gildas and Nennius speak of Bristol in the 5th and 7th centuries.

BRISTOL, **SEE OF**, one of the six bishoprics erected by Henry VIII. out of the spoils of the monasteries and religious houses which that monarch had dissolved, 1542. The cathedral was the church of the abbey of St. Austin, founded here by Robert Fitz-Harding, son to a king of Denmark, and a citizen of Bristol, 1148. It is valued in the king's books at 338*l.* 8*s.* 4*d.* Paul Bushe, provincial of the *Bons-hommes* was the first bishop, in 1542—deprived for being married, 1554. The see of Bristol was united by an order in council with that of Gloucester, in 1836, and they now form one see under the name of Gloucester and Bristol. The cathedral (under repair since 1844) was reopened in 1861.

* From the period of Henry II. in the 12th to the middle of the 18th century, Bristol ranked next to London, as the most populous, commercial, and flourishing place in the kingdom; but since the latter time it has declined, and been exceeded in these respects by Liverpool, Manchester, Leeds, Birmingham, and Glasgow.

BRITAIN (called by the Romans *Britannia*,* from its Celtic name *Prydhain*, *Camden*). The earliest records of the history of this island are the manuscripts and poetry of the Cambrians. The Celts, the ancestors of the Britons and modern Welsh, were the first inhabitants of Britain. It is referred to as the *Cassiterides* or tin-islands by Herodotus, 450 B.C.; as *Albion* or *Ierne* by Aristotle, 350 B.C.; Polybius, 260 B.C. Britain, including England, Scotland, and Wales, was anciently called *Albion*, the name of Britain being applied to all the islands collectively—*Albion* to only one. *Pliny*. See *Albion*. It was invaded by Julius Cæsar, 55 B.C.; subdued by Agricola, A.D. 84; left by the Romans, about 426; invaded by the Saxons, 429; the southern part became one kingdom under Egbert, 828; subdued by William I., 1066. See *England, Scotland, and Wales*.

BRITISH AMERICA comprises Lower and Upper Canada, Nova Scotia, New Brunswick, Newfoundland and Prince Edward's Island, Labrador, British Columbia and Vancouver's Island. Population about 3,334,000. Delegates from the first six provinces met at Quebec on Oct. 10, 1864, and on Oct. 20, agreed to the basis of a Federal union, with the Queen as the executive (represented by the governor-general), a legislative council of 96 members for life, and a house of commons of 194 members. The project has been transmitted to lay before parliament, and the secretary for the colonies, Mr. Cardwell, expressed his approval of the plan, Dec. 3, 1864. The plan was opposed by New Brunswick, March 7, 1865. Messrs. Cartier and Galt came to England, in April, 1865, to advocate the project, and were well received.

BRITISH ASSOCIATION for the Advancement of Science, was established by sir David Brewster, sir R. I. Murchison, &c. in 1831. Professor John Phillips was secretary till 1863. It holds annual meetings; the first of which was held at York on Sept. 27, 1831. One of its main objects is "to promote the intercourse of those who cultivate science with each other." It appoints commissions and makes pecuniary grants for scientific research; and publishes annually a volume containing Reports of the proceedings. Kew observatory was presented to the association by the Queen in 1842.

BRITISH COLUMBIA (N. America). In June, 1858, news came to California that in April gold had been found in abundance on the mainland of North America, a little to the north and east of Vancouver's Island. A great influx of gold-diggers (in a few weeks above 50,000) from all parts was the consequence. Mr. Douglas, governor of Vancouver's Island, evinced much ability in preserving order. The territory with adjacent islands was made a British colony with the above title, and placed under Mr. Douglas. The colony was nominated and the government settled by 21 & 22 Vic. c. 99 (Aug. 1858), and a bishop nominated in 1859.—For a dispute in July, 1859, see *United States*. The colony is said to be flourishing.

BRITISH INSTITUTION (for the encouragement of British artists, Pall Mall, founded in 1805) opened Jan. 18, 1806, on a plan formed by sir Thomas Bernard. In the gallery (erected by alderman Boydell, to exhibit the paintings executed for his edition of Shakspeare), are exhibited pictures by the old masters and deceased British artists.

BRITISH LEGION, raised by lord John Hay, col. De Lacy Evans, and others, to assist queen Isabella of Spain against the Carlists in 1835, defeated them at Hernani, May 5, 1836, and at St. Sebastian's, Oct. 1.

BRITISH MUSEUM, originated with the grant by parliament (April 5, 1753) of 20,000*l*. to the daughters of sir Hans Sloane, in payment for his fine library, and vast collection of the productions of nature and art, which had cost him 50,000*l*. The library contained 50,000 volumes and valuable MSS., and 69,352 articles of virtu enumerated in the catalogue. Montagu-house was obtained by government as a place for their reception. The museum was opened in 1759, and has since been enormously increased by gifts, bequests, and purchases; by the Cottonian, Harleian, and other libraries; by the Townley marbles (in 1812); by the Elgin marbles (1816); by the Lycian marbles obtained by sir C. Fellows (1842-6); by the Assyrian antiquities collected by Mr. Austin Layard between 1847 and 1850; by the antiquities brought from Halicarnassus (now Budrum), including remains of the celebrated tomb of Mausolus, by Mr. C. T. Newton (Nov. 1858); and by antiquities from Carthage (1860), Cyrene, Rhodes, and the Farnese palace (1864). George II. presented the royal library in 1757; and in 1823, George IV. presented the library collected at Buckingham-house by

George III., consisting of 65,250 volumes, and about 19,000 pamphlets. In 1846 the right hon. Thos. Grenville bequeathed to the museum his library, consisting of 20,240 volumes. Great additions to, and improvements in, the buildings have since been made, independently of the annual grant.* The fine iron railing enclosing the frontage, was completed in 1852. The magnificent reading-room, erected by Mr. Sydney Smirke, according to a plan by Mr. Antonio Panizzi, the librarian, at a cost of about 150,000*l.*, was opened to the public, May 18, 1857. The height of the dome is 106 feet, and the diameter 140 feet. The room contains about 80,000 volumes, and accommodates 300 readers.—The daily increasing library contained in 1860 above 562,000 volumes, exclusive of tracts, MSS., &c. In 1861 the incorporation of the four library catalogues into one alphabet began—three copies being made. The proposed separation of the antiquarian, literary, and scientific collections, was disapproved by a commission in 1860; and a bill to remove the natural history collections to South Kensington was rejected by the commons on May 19, 1862. A refreshment room for readers was opened Nov. 21, 1864. Mr. Panizzi resigned his office in 1865.

BROAD ARROW, a mark for goods belonging to the royal dockyards or navy is said to have been ordered to be used in 1698, in consequence of robberies.

"BROAD BOTTOM" ADMINISTRATION. The Pelham administration (*which see*) was so called because it formed a coalition of parties, Nov. 1744.

BROCADE, a silken stuff, variegated with gold or silver, and enriched with flowers and figures, originally made by the Chinese; the manufacture was established at Lyons in 1757.

BROCOLI was brought to England from Italy in the 17th century.

BROKERS, both of money and merchandise, were known early in England. See *Appraisers*. They are licensed, and their dealings regulated by law in 1695-6, 1816, and 1826. The dealings of *stock-brokers*, were regulated in 1719, 1733, and 1736, and subsequently. See *Pawnbroker* and *Barnard's Act*.

BROMINE (from the Greek *brōmos*, a stink), a poisonous volatile liquid element discovered in salt water by M. Balard in 1826. It is found in combination with metals and mineral waters, but not as yet in the free state.

BRONZE was known to the ancients, some of whose bronze statues, vessels, &c. are in the British Museum. The bronze equestrian statue of Louis XIV., 1699, in the Place Vendôme at Paris (demolished Aug. 10th, 1792), the most colossal ever made; it contained 60,000 lbs. Bronze is composed of copper and tin, with sometimes a little zinc and lead. *Ure*. The present bronze coinage, penny, halfpenny and farthing (composed of 95 parts of copper, 4 tin, 1 zinc), came into circulation Dec. 1860.

* The total expenditure by the government on the British Museum for the year ending March 31, 1860, was 78,445*l.*; 1861, 92,776*l.*; 1864, 95,500*l.*: the number of visitors to the general collection in 1851 (exhibition year), 2,524,754; in 1859, 517,895; in 1862 (exhibition year), 295,007; in 1863, 440,801.

BROWNIAN MOTION. So called from Robert Brown, the celebrated botanist, who, in 1827, by the aid of the microscope, observed in drops of dew a motion of minute particles which at first was attributed to rudimentary life, but was afterwards decided to be due to currents occasioned by inequalities of temperature and evaporation.

BROWNISTS (afterwards called Barrowists), the first Independents (*which see*), began with Robert Brown, a schoolmaster in Southwark, about 1580. In 1592 there were said to be 20,000 Brownists. Henry Penry, Henry Barrow, and other Brownists, were cruelly executed for alleged sedition, May 29, 1593.

BRUCE'S TRAVELS. James Bruce, the "Abyssinian Traveller," set out in June, 1768, to discover the source of the Nile. Proceeding first to Cairo, he navigated the Nile to Syene, thence crossed the desert to the Red Sea, and, arriving at Jedda, passed some months in Arabia Felix, and after various detentions reached Gondar, the capital of Abyssinia, in Feb. 1770. On Nov. 14th, 1770, he obtained a sight of the sources of the Blue Nile. He returned to England in 1773, and died in 1794.

BRUGES, Belgium, in the 7th century was capital of Flanders, and in the 13th and 14th centuries had become almost the commercial metropolis of the world. It suffered much through an insurrection in 1488, and the consequent repression. It was incorporated with France in 1794, with the Netherlands in 1814, and with Belgium in 1830.

BRUNSWICK CLUBS, established to maintain the house of Hanover and the Protestant ascendancy in church and state, began in England at Maidstone, Sept. 18, 1828; in Ireland at the Rotunda in Dublin, Nov. 4, same year. Other cities formed similar clubs.

BRUNSWICK, HOUSE OF. The duchy of Brunswick, in Lower Saxony, was conquered by Charlemagne, and governed afterwards by counts and dukes. Albert-Azzo, marquis of Italy and lord of Este, died in 1055, and left by his wife Cunegonde (the heiress of Guelph, duke of Carinthia in Bavaria), a son, Guelph, who was invited into Germany by Imtiza, his mother-in-law, and invested with all the possessions of his wife's step-father, Guelph of Bavaria. (See *Bavaria*.) His descendant, Henry the Lion, married Maud, daughter of Henry II. of England, and is always looked upon as the founder of the Brunswick family. His dominions were very extensive; but having refused to assist the emperor Frederick Barbarossa in a war against pope Alexander III., through the emperor's resentment he was proscribed at the diet at Wurtzburg, in 1180. The duchy of Bavaria was given to Otho, from whom is descended the family of Bavaria; the duchy of Saxony to Bernard Ascanius, founder of the house of Anhalt; and his other territories to different persons. On this, he retired to England; but at the intercession of our Henry II. Brunswick and Lunenbourg were restored to him. The house of Brunswick in 1409 divided into several branches. Brunswick was included by Napoleon in the kingdom of Westphalia in 1806, but was restored to the duke in 1815.—Population of the duchy of Brunswick in 1858, 273,400; 1862, 282,400.

BRUNSWICK THEATRE, Well-street, East London, was built to replace the Royalty, burnt down April 11, 1826. It was opened Feb. 25, 1828. On the 29th the building was destroyed by the falling in of the walls, due to too much weight being attached to the heavy iron roof. Fortunately, the catastrophe happened in the day time (during a rehearsal of Guy Mannering), and only twelve persons perished.

BRUSSELS, once capital of Austrian Brabant, now of Belgium (since 1831), was founded by St. Gery, of Cambray, in the 7th century. It is celebrated for its fine lace, camlets, and tapestry. The *Hôtel de Ville* has a turret 364 feet in height; and on its top is a copper figure of St. Michael, 17 feet high, which turns with the wind. See *Belgium*.

BUBBLE COMPANIES. See *Companies*, *Law's Bubble*, and *South-sea Bubble*.

BUCCANEERS,* piratical adventurers, chiefly French, English, and Dutch, who commenced their depredations on the Spaniards of America soon after the latter had taken possession of that continent and the West Indies. Their numbers were much increased by a twelve years' truce between the Spaniards and Dutch in 1609, when many of the discharged sailors joined the Buccaneers, and extended the range of their ravages. The first levy of ship-money in England in 1635 was to defray the expense of chastising these pirates. The principal commanders of the first Buccaneers were Montbar, Lolonois, Basco, and Morgan, said to have murdered thousands and plundered millions. The expedition of Van Horn, of Ostend, was undertaken in 1603; that of Gramont in 1685; and that of Pointis in 1697.

BUCENTAUR, the vessel in which the doge of Venice used to proceed to wed the Adriatic, from the twelfth to the eighteenth century.

BUCHANITES (in Scotland): followers of Mrs. Buchan, who about 1779 promised to conduct them to the new Jerusalem, prophesied the end of the world, &c. She died in 1791, when her followers dispersed.

BUCHAREST (in Wallachia). Preliminaries of peace were ratified at this place between Russia and Turkey, it being stipulated that the Pruth should be the frontier of the two empires; signed May 28, 1812. The subsequent war between these powers altered many of the provisions of this treaty. Bucharest was occupied by the Russians, Turks, and Austrians successively in the Crimean war. The last quitted it in 1856.

BUCKINGHAM PALACE, the London residence of the sovereign. Old Buckingham-house was built on the "Mulberry-gardens," by John Sheffield, duke of Buckingham, in 1703. In 1761 it was bought by George III., who in 1775 settled it on his queen, Charlotte. She made it her town residence; and here all her children, except the eldest, were born. Here were married the duke of York and princess Frederica of Prussia, in 1791; the duke of Gloucester and princess Mary, 1816; the prince of Hesse-Homburg and princess Elizabeth, 1818; and the duke of Cambridge and princess of Hesse the same year. The house was pulled down in 1825, and the present palace commenced on its site. After an expenditure of

* Raynal asserts that the name is derived from a Caribbee word *boucan*, signifying the place where the native savages dried their food by smoke; a custom necessarily adopted by the pirates from their mode of life.

nearly a million sterling it was completed, and occupied by queen Victoria, July 13, 1837. Further improvements were made in 1853. The marble arch, taken down from the exterior of this palace was re-erected at Cumberland-gate, Hyde-park, March 29, 1851.

BUCKLERS, used in single combat, are said to have been invented by Prætus and Acrisius of Argos, about 1370 B.C. When Lucius Papirius defeated the Samnites, he took from them bucklers of gold and silver, 309 B.C. The light cuirass of the horse-soldiers called cuirassiers is something akin to the ancient buckler.

BUCKLES were first worn instead of shoe-strings in the reign of Charles II., and soon became fashionable and expensive from the richness of their material; about 1791 they had fallen out of use. Buckles continue to be used in court dress and by persons of rank in most countries of Europe.

BUDA, on the Danube, once called the Key of Christendom, is, in conjunction with Pesth, the capital of Hungary. It was taken by Charlemagne in 799; and sacked by Solyman II. after the battle of Mohatz, when the Hungarian king, Louis, was killed, and 200,000 of his subjects carried away captives, 1526. Buda was sacked a second time, when the inhabitants were put to the sword, and Hungary was annexed to the Ottoman empire, 1541. Retaken by the Imperialists, under the duke of Lorraine, and the Mahometans delivered up to the fury of the soldiers, 1686. It suffered much in 1848-9. See *Hungary*.

BUDE LIGHT (so named from Bude in Cornwall, the residence of Mr. Goldsworthy Gurney, its inventor), consists of two or more concentric argand gas-burners, one rising above another, which produce a most brilliant flame, like the petals of a rose. The illuminating powers were increased by subjecting to the action of the flame manganese, &c., in order to produce oxygen and hydrogen gas. The patent was issued in 1841.

BUDDHISM, the religion (formerly of India, and now of a large part of Asia beyond the Ganges and Japan) from which Brahminism is said to be derived. Buddha (also Bud, Bot, and Poot), or the Wise, flourished about 1000 or 800 B.C. The Buddhists believe that the soul is an emanation from God, and that if it continue virtuous, it will return to him on the death of the body; but if not so, that it will undergo various degrees and changes of abode. Buddhism was expelled from India about A.D. 956.

BUDGET (from the French *bougette*, a small bag), a term applied to the English chancellor of exchequer's statement of the finances of the country. The budgets of Sir R. Peel in 1842 (including the income-tax) and 1846 (free trade), and of Mr. Gladstone in 1860 (in connection with the treaty with France), are the most important in recent times.

BUENOS AYRES, a republic of S. America. The country was explored by Sebastian Cabot in 1526, and the capital founded by Don Pedro de Mendoza in 1535. In 1585 the city was rebuilt and recolonised, after several abandonments. Population in 1859 about 350,000.

BUFFOONS were originally mountebanks in the Roman theatres. Their shows were discouraged by Domitian, and abolished by Trajan, 98. See *Jesters*.

BUILDING. In early times men dwelt in caves; wood and clay were the first building materials. Building with stone was early among the Tyrians; in England it may be referred to Benedict the monk, about 670. In Ireland a castle was built of stone at Tuam by the king of Connaught, in 1161; and it was "so new and uncommon as to be called the

Wonderful Castle." Building with brick was introduced by the Romans into their provinces. Alfred encouraged it in England in 886. It was adopted by the earl of Arundel, about 1598, London being then almost wholly built of wood. See *Architecture*.

BUILDING ACTS were passed by Elizabeth in 1562, 1580, and 1592; and by Charles II. in 1667. Recent acts are very numerous; and building is now regulated by stringent provisions enforced by law. The Building Act for the Metropolis is 7 & 8 Vict. c. 84 (1844), amended in 1855 and 1860.

BUILDING SOCIETIES, formed to enable a person to purchase a house by paying money periodically to a society for a certain number of years, instead of paying rent to a landlord, began about 1836, when an act was passed for their regulation.

BULGARIA, anciently Mœsia, now part of European Turkey. The Bulgarians were a Slavonian tribe, who harassed the Eastern empire and Italy from 499 to 678, when they established a kingdom. They defeated Justinian II., 687; but were subdued, after several conflicts, by the emperor Basil, in 1018, who in 1014, having taken 15,000 Bulgarian prisoners, caused their eyes to be put out, leaving one eye only to every hundredth man, to enable him to conduct his countrymen home. The kingdom was re-established in 1096; but after many changes, it was conquered and annexed to the Ottoman empire, about 1391. In Jan. 1861, it was stated that the Bulgarians had seceded from the Greek to the Roman church.

BULL, OR EDICT OF THE POPE. The bulla is properly the seal, either of gold, silver, lead, or wax. On one side are the heads of Peter and Paul; and on the other the name of the pope, and year of his pontificate. A bull against heresy was issued by Gregory IX. in 1231. Pius V. published a bull against Elizabeth, April 25, 1570; in 1571 bulls were forbidden to be promulgated in England. The bull *Unigenitus* against the Jansenites was issued by Clement XI. in 1713. The Golden Bull of the emperor Charles IV., so called from its golden seal, was made the fundamental law of the German empire, at the diet of Nuremberg, 1356. See *Brazen Bull*.

BULL-BAITING, OR BULL FIGHTING, a sport somewhat equivalent to the fights of the gladiators among the Romans, still exists in Spain, where the ladies are among the spectators. It is recorded as being an amusement at Stamford so early as the reign of John, 1209. Bull-running was a sport at Tutbury in 1374. In the *Sports of England*, we read of the "Easter fierce hunts, when foaming boars fought for their heads, and lusty bulls and huge bears were baited with dogs;" and near the *Clink*, London, was the Paris, or Bear Garden, so celebrated in the time of Elizabeth for the exhibition of bear-baiting, then a fashionable amusement. A bill to abolish bull-baiting was thrown out in the commons, chiefly through the influence of the late Mr. Windham, who made a singular speech in favour of the custom, May 24, 1802. It was made illegal in 1835. See *Cruelty to Animals*. Bull-fights were introduced into Spain about 1260: abolished there, "except for pious and patriotic purposes," in 1784. In June, 1833, ninety-nine bulls were killed at bull-fights at Madrid. There was a bull-fight at Lisbon, at Campo de Santa Anna, attended by 10,000 spectators, on Sunday, June 14, 1840.

BULLETS of stone were in use, 1514. Iron ones are mentioned in the *Fœdera*, 1550. Lead bullets were made before the close of the sixteenth century. The cannon-ball in some eastern countries was long of stone. *Ashe*. The conoidal cup rifle-ball was invented by capt. Minié, about 1833; a modification of this (conoidal but without cup), by Mr. Pritchett (1853), is used with the Enfield rifle. Other bullets have been since devised.

BULLION, uncoined gold and silver. The "Bullion Report" of a parliamentary committee in 1810, principally guided by Mr. Horner and Mr. (afterwards Sir R.) Peel, established the conclusion, that paper money is always liable to be over-issued and consequently depreciated, unless it be at all times immediately convertible into gold. This principle has been adopted in British monetary arrangements.

BULL RUN BATTLES. See *Manassas*.

BULWER-CLAYTON TREATY, ratified July 4, 1850, by which sir Henry Lytton Bulwer on behalf of the British, and Mr. Clayton on behalf of the American government, declared that neither would obtain exclusive control over the proposed ship canal through Central America, or erect any fortification on any part of the country. Disputes afterwards arose with respect to this treaty and the connection of Great Britain with the Mosquito territory (*which see*), which were settled in 1857.

BUNKER'S HILL (near Boston, U.S.), the site of a severe contest on June 17, 1775, between the British (nearly 3000) and the revolted Americans (about 2000); the latter were ultimately compelled to retreat. It was one of the earliest actions in the war, and the Americans refer to it with national pride, on account of their heroic resistance. Ralph Farnham, who was present at the battle, died on Dec. 28, 1860, aged 104½ years. He was introduced to the prince of Wales when in America.

BUONAPARTE. See *France*.

BURFORD CLUB, the appellation given (according to Mr. Laver, the barrister, a conspirator, see *Laver*) by the Pretender and his agents to a club of Tory lords and others, of which lord Orrery was chairman, and lord Strafford, sir Henry Goring, lord Cowper, Mr. Hutcheson, the bishop of Rochester, sir Constantine Phipps, general Webb, lord Bingley, lord Craven, Mr. Dawkins, lord Scarsdale, lord Bathurst, Mr. Shippen, and lord Gower, were members. This club was said to meet at the members' houses, to form designs against the government. This story was set aside by the solemn declarations of lord Cowper and lord Strafford, that they did not know of its existence. The list of this pretended club was published in the *Weekly Journal*, printed in Whitefriars; but when Read, the printer of the paper, was ordered to appear at the bar of the house, he absconded. March, 1722. *Salmon*.

BURGESSES, from the French *Bourgeois*, a distinction coeval in England with its corporations. They were called to parliament in England, 1265; in Scotland in 1326; and in Ireland about, 1365. Burgesses to be resident in the places they represented in parliament, 1 Hen. V. (1413). See *Borough*.

BURGER SECEDERS, a small number of dissenters from the church of Scotland, from a difference regarding the lawfulness of taking the burgess oath, 1739.

BURGLARY was a capital offence till 1829. Formerly, he who convicted a burglar was exempted from parish offices, 1699; Statute of Rewards, 5 Anne, 1706; and 6 Geo. I. 1720. Receivers of stolen plate and other goods to be transported, 10 Geo. III. 1770. Persons having upon them picklock-keys, &c., to be deemed rogues and vagabonds, 13 Geo. III. 1772-3. The laws with respect to burglary were amended by Mr. (afterwards sir Robert) Peel's acts between 1823 and 1829.

BURGOS (Spain), the burial place of the Cid, 1099. Lord Wellington entered Burgos on Sept. 19, after the battle of Salamanca (fought July 22, 1812). The castle was besieged by the British and allied army, but the siege was abandoned Oct. 21, same year. The fortifications were blown up by the French, June 12, 1813.

BURGUNDY, a large province in France, derives its name from the Burgundians, a Gothic tribe who overran Gaul in 275, but were driven out by the emperor Probus; they returned in 287, and were defeated by Maximin. In 413 they established a KINGDOM, comprising the present Burgundy, large parts of Switzerland, with Alsace, Savoy, Provence, &c. Gondicar, their leader, was the first king.—The second kingdom, consisting of a part of the first, began with Gontran, son of Clotaire I. of France, in 561. The kingdom of Arles, Provence, and Transjuran Burgundy, were formed out of the old kingdom.—In 877 Charles the Bald made his brother-in-law Richard the first DUKE of Burgundy. In 938, Hugh the Great, count of Paris, founder of the house of Capet, obtained the duchy. His descendant, Henry, on becoming king of France, conferred it on his brother Robert, in whose family it remained till the death of Philippe de Rouvre, without issue, in 1361. In 1363, king John of France, made his fourth son, Philip, duke, who greatly enlarged his dominions by marrying the heiress of Louis, count of Flanders, Artois, &c. (See *Austria* and *Germany*.)

1363. Philip the Bold.

1404. John the Fearless (son), joined English invading France; supposed to have been privy to the assassination of the duke of Orleans in 1407; was himself assassinated at Montreuil, in the presence of the dauphin, Sept., 1419.

1479. Philip the Good (son), the most powerful duke

in the world; married to Margaret of York, sister to Edward IV.

1467. Charles the Bold: killed in an engagement with the Swiss, before Nancy, Jan. 4, 1477.

1477. Mary (daughter); married Aug., 1477, to Maximilian of Austria; died March 27, 1482.

1479. Louis XI. annexed Burgundy to France. The other dominions fell to Austria.

BURIALS. Abraham buried Sarah at Machpelah, 1860 B.C., *Gen.* xxiii. Places of burial were consecrated under pope Calixtus I. in A.D. 210. *Eusebius*. The Greeks had their burial-places at a distance from their towns; the Romans near the highways; hence the necessity for inscriptions. The first Christian burial-place, it is said, was instituted in 596; burial in cities, 742; in consecrated places, 750; in churchyards, 758. Many of the early Christians are buried in the catacombs at Rome. See *Catacombs*. Vaults were

erected in chancels first at Canterbury, 1075. Woollen shrouds were used in England, 1666. Linen scarfs were introduced at funerals in Ireland, 1729; and woollen shrouds used, 1733. Burials were taxed, 1695—again, 1783. The acts relating to metropolitan burials were passed 1853, 1854, 1855, and 1857. See *Cemeteries*. Parochial registers of burials, births, and marriages, were instituted in England by Cromwell, lord Essex, about 1538. *Stow*. A tax was enacted on burials in England—for the burial of a duke 50*l.*, and for that of a common person 4*s.*—under Will. III. 1695, and Geo. III. 1783. See *Bills of Mortality*.

BURKING, a new species of murder, committed in Britain, thus named from Burke, the first known criminal by whom it was perpetrated. His victims were killed by pressure or other modes of suffocation, and the bodies, which exhibited no marks of violence, were sold to the surgeons for dissection. He was executed at Edinburgh, Jan. 28, 1829. A monster named Bishop was apprehended in Nov. 1831, and executed in London, Dec. 5, with Williams, one of his accomplices, for the murder of a poor friendless Italian boy named Carlo Ferrari. They confessed to this and other similar murders.

BURLINGTON HEIGHTS. Here a fierce contest took place between the British and the United States American forces, June 6, 1813. The British carried the heights.

BURMESE, OR BIRMAN, EMPIRE, founded in the middle of the 18th century by Alompra, the first sovereign of the present dynasty. Our first dispute with this formidable power in 1795, was amicably adjusted by general Erskine. Hostilities were commenced by the British in 1824, and they took Rangoon on May 11. The fort and pagoda of Syriam were taken in 1825. After a short armistice, hostilities were renewed, Dec. 1, same year, and pursued until the successive victories of the British led to the cession of Arracan, and to the signature of peace, Feb. 24, 1826. For the events of this war, and of the war in 1851, see *India*. Pegu was annexed to our Indian empire, Dec. 20, 1852. The war ended June 20, 1853.

BURNING ALIVE was inflicted among the Romans, Jews, and other nations, on the betrayers of counsels, incendiaries, and for incest. The Britons punished heinous crimes by burning alive in wicker-baskets. See *Stonchenge*.—This punishment was countenanced by bulls of the pope; and witches suffered in this manner. See *Witches*. Many persons have been burned alive on account of religious principles. The first sufferer was sir William Sawtre, parish priest of St. Osyth, London, 3 Hen. IV., Feb. 9, 1401. In the reign of Mary, numbers were burned; among others, Ridley, bishop of London, Latimer, bishop of Rochester, and Crammer, archbishop of Canterbury, at Oxford in 1555 and 1556.* Bartholomew Leggatt and Edward Wightman were burned for heresy in 1612, by warrant of James I.

BURNING THE DEAD was practised among the Greeks and Romans, and the poet Homer gives descriptions of it. It was very general about 1225 B.C., and was revived by Sylla about 78 B.C. It is still practised in parts of the East Indies. See *Subtices*, *Barrows*.

BURNING-GLASS AND CONCAVE MIRRORS. Their power was known to Archimedes, and it is even asserted that by their aid he burnt a fleet in the harbour of Syracuse, 214 B.C.; their powers were increased by Settalla; Tschirnhausen, 1680; Buffon, 1747; and Parker and others more recently. The following experiments were made about 1800, with Mr. Parker's lens or burning mirror, which cost 700*l.*, and is said to have been the largest ever made. It was sold to capt. Mackenzie, who took it to China, and left it at Pekin.

BURWELL FIRE. A number of persons assembled to see a puppet-show in a barn at Burwell near Newmarket, Sept. 8, 1727. A candle having set fire to a heap of straw, seventy-six individuals perished, and others died of their wounds.

* It is computed, that during the three years of Mary's reign, there were 277 persons brought to the stake; besides those who were punished by imprisonment, fines, and confiscations. Among those who suffered by fire were 5 bishops, 21 clergymen, 8 lay gentlemen, 84 tradesmen, 100 husbandmen, servants, and labourers, 55 women, and 4 children. The principal agents of the queen were the bishops Gardiner and Bonner. The latter is said to have derived a savage pleasure from witnessing the torture of the sufferers.

BURY ST. EDMUND'S, Suffolk, named from St. Edmund, king of East Anglia, who was murdered by the Danes in 870, and buried here, and to whom its magnificent abbey was founded. It shares with Runnymede the honour of producing Magna Charta in 1215; it having been prepared here by the barons in 1214. Henry VI. summoned a parliament in 1447, when Humphrey, duke of Gloucester, was imprisoned, and died here, it is supposed by poison. It was almost consumed by fire in 1608; and was desolated by plague in 1636.

BURYING ALIVE. A mode of death adopted in Bœotia, where Creon ordered Antigone, the sister of Polynices, to be buried alive, 1225 B.C. The Roman vestals were subjected to it for any levity that excited suspicion of their chastity. The vestals buried alive on a charge of incontinence, were Minutia, 337 B.C.; Sextilla, 274 B.C.; Cornelia, A.D. 92. Lord Bacon gives instances of the resurrection of persons who had been buried alive; the famous Duns Scotus is of the number. The two assassins of Capo d'Istria, president of Greece, were sentenced to be immured in brick walls built around them up to their chins, and to be supplied with food in this species of torture until they died, Oct. 1831.

BUSACO, or **BUZACO** (Portugal). Here the British, under lord Wellington, repulsed the French army, commanded by Massena, Sept. 27, 1810. The latter losing one general and 1000 men killed, two generals and about 3000 men wounded, and several hundred prisoners; the loss of the allies did not exceed 1300; the British retreated to the lines of Torres Vedras, which were too strong for Massena to force, and the two armies remained in sight of each other to the end of the year.

BUSHEL. This measure was ordered to contain eight gallons of wheat, 12 Henry VIII. 1520; the legal Winchester bushel was regulated 9 Will. III. 1697; the imperial corn bushel of 2218¹/₁₉₂ cubic inches is to the Winchester of 2150¹/₄₂, as 32 to 31. Regulated by act 5 Geo. IV. June, 1824, which act came into operation Jan. 1, 1826.

BUSHIRE (on the Persian Gulf), attacked by sea by sir H. Lecke and by land by general Stalker, was taken Dec. 10, 1856. The place proved stronger than was expected, and was bravely defended. Brigadier Stopford and col. Malet were killed in a previous attack on the fort at Reshire, Dec. 9. The loss of the British was four officers killed, and one wounded; five men killed and thirty-five wounded.

BUSSORAH. See *Bassorah*.

BUSTS. This mode of preserving the remembrance of the human features is the same with the *hermæ* of the Greeks. Lysistratus, the statuary, was the inventor of moulds, from which he cast wax figures, 328 B.C. *Pliny*. Busts from the face in plaster of Paris were first taken by Andrea Verrochi, about A.D. 1466. Smaller busts and statuettes are now accurately produced from larger ones by machinery.

BUTCHERS. Among the Romans there were three classes: the *Suarii* provided hogs, the *Boarii* oxen, which the *Lanvi* killed. The butchers' company in London is ancient, although not incorporated till 1604.

BUTE ADMINISTRATION. John earl of Bute, tutor of prince George (afterwards George III.), obtained great influence over him. His administration formed in May, 1762, resigned April, 1763. It was severely attacked by Junius and John Wilkes.

John, earl of Bute, *first lord of the treasury*.
Sir Francis Dashwood, *chancellor of the exchequer*.
Lord Grenville, *president of the council*.
Duke of Bedford, *prince of the seal*.
Earl of Halifax, *admiralty*.
Earl of Egremont and George Grenville, *secretaries of state*.

Lord Ligonier, *ordnance*.
Henry Fox, afterwards lord Holland, *paymaster of the forces*.
Viscount Barrington, *treasurer of the navy*.
Lord Sandys, *first lord of trade*.
Duke of Marlborough, earl Talbot, lord Huntingdon, lord North, &c.

BUTTER. It was late before the Greeks had any notion of butter, and by the early Romans it was used only as a medicine—never as food. The Christians of Egypt burnt butter in their lamps instead of oil, in the 3rd century. Butter forming an important article of commerce as well as food in these countries, various statutes have passed respecting its package, weight, and sale; the principal of which are the 36th & 38th Geo. III. and 10 Geo. IV. 1829. In Africa, vegetable butter is made from the fruit of the shea tree, and is of richer taste, at Kebba, than any butter made from cow's milk. *Mungo Park*. The import duty of 5s. per cwt. on foreign butter (producing in 1859, 104,587*l.* on 421,354 cwts.) was repealed in 1860.

BUTTONS, an early manufacture in England; those covered with cloth were prohibited by a statute, thereby to encourage the manufacture of metal buttons, 8 Geo. I. 1721. They are now made of glass, porcelain, &c.

BUXAR, a town in Bengal, near to which, on Oct. 23, 1764, sir Hector Monro (with 857 Europeans and 6215 sepoy) gained a great victory over the troops of the nabob of Oude, &c., 50,000 in number; 6000 of these were killed, and 130 pieces of cannon were taken. The loss of the English was trifling.

BY-LAWS, or **BYE-LAWS** (from Danish, *bye*), a town, private ordinances made by subordinate communities, such as corporations. These laws must not militate against the law of the land. By 5 & 6 Will. IV. 1834, those made by corporate bodies become valid, if not disallowed by the king's council within forty days after their enactment.

BYNG, HON. ADMIRAL JOHN, was charged with neglect of duty in an engagement with the enemy off Minorca, May 20, 1756, condemned for an error of judgment, and shot on board the Monarch at Spithead, March 14, 1757.

BYRON'S VOYAGE. Commodore Byron left England on his voyage round the globe June 21, 1764, and returned May 9, 1766. He discovered the populous island in the Pacific Ocean which bears his name, Aug. 16, 1765. Though brave and intrepid, such was his general ill-fortune at sea, that he was called by the sailors of the fleet "Foulweather Jack."

BYZANTIUM, now *Constantinople*, founded by a colony of Megarians, under Byzas, 667 B.C.; but various dates and persons are given. It was taken successively by the Medes, Athenians, and Spartans. In 340 B.C., in alliance with the Athenians, the Byzantines defeated the fleet of Philip of Macedon. During the wars with Macedon, Syria, &c., it became an ally of the Romans, by whom it was taken, A.D. 73. Rebelling, it was taken after two years' siege and laid in ruins by Severus in 196. Byzantium was re-founded by Constantine in 324, and dedicated in May 22, 330, all the heathen temples being destroyed; from him it received the name of Constantinople. See *Constantinople*. **BYZANTINE ART** flourished from the time of Constantine to about 1204. The Byzantine or Eastern empire really commenced in A.D. 395, when Theodosius divided the Roman empire. See *East*.

C.

CABAL (from Italian and Spanish, *cabala*, secret knowledge). In English history, the term was applied to the cabinet of Charles II. in 1670; the word Cabal being formed from the initials of their names: sir Thomas, afterwards lord Clifford (C); the lord Ashley (A), (afterwards earl of Shaftesbury); George Villiers, duke of Buckingham (B); Henry, lord Arlington (A); and John, duke of Lauderdale (L).

CABBAGE. Varieties were brought to these realms from Holland about 1510. To sir Arthur Ashley of Dorset the first planting in England is ascribed. It was introduced into Scotland by the soldiers of Cromwell's army. See *Gardening*.

CABBALA, a Hebrew word, signifying recension or tradition, applied to a mystical mode of interpreting the Scriptures as well as natural things, said to have been given to Adam by angels, and transmitted from father to son by his descendants. It is said to have been lost at the Babylonian captivity (587 B.C.), but to have been revealed again to Ezra. The Cabbalists were opposed by the philosophers and by Talmudists, *which see*.

CABINET COUNCIL. There were councils in England as early as the reign of Ina, king of the West Saxons, 690; Offa, king of the Mercians, 758; and in other reigns of the Heptarchy. State councils are referred to Alfred the Great. *Spelman*. See *Administrations*, p. 8.

CABLES. A machine was invented in 1792, for making the largest, by which human labour was reduced nine-tenths. Chain cables were introduced into the British navy about 1812.

CABRIOLETS (*vulgo* Cabs), one-horsed vehicles, were introduced into the streets of London in 1823, when the number plying was twelve. In 1831 they had increased to 165, and then the licences were thrown open. The number in 1862 running in the metropolis exceeded 6000 (of which about 1800 only plied on Sunday). Previous to throwing open the trade, the number of hackney carriages was limited to 1200, when there were few omnibuses, *which see*.

CABRIOLETS, *continued.*

Cab Strike.—On June 28, 1853, an act (called Mr. FitzRoy's act) was passed for "the better regulation of metropolitan stage and hackney carriages, and for prohibiting the use of advertising vehicles," by which the cab fares were reduced to 6d. a mile. It came into operation July 11, and on the 27th a general strike of the London cabmen took place. Much inconvenience was felt, and every kind of vehicle was employed to supply the deficiency. Some alterations (previously agreed on) having been made in the act, the cabs re-appeared on the stands on the 30th.

Cabmen's clubs began at Paddington in Feb. 1859
A London General Cab Company published its prospectus, professing a reformed system, July, 1862

Cab Tragedy.—S. H. Hunt, a servant of Butler and MacCulloch's, seedsmen, Covent-garden, London, poisoned his wife and children in a cab, on Nov. 7, 1863; and himself on Nov. 9, at his own house, just before his apprehension.

The cabmen in Paris strike against a company; above 3000 vehicles stopped, June 16; fierce attack on men who give in; strike subsides, June 23, 1865

CABUL, OR CABOOL, a city of Afghanistan, taken 977 by Subuctajeen, grandfather of Mahomed, founder of the Gaznevide dynasty. It was taken by Nadir Shah in 1738. It was the capital of the Durani empire at the end of the last century. In 1809 the sovereign Shah Soojah was expelled, and eventually Cabul came into the hands of Dost Mahomed, a clever and ambitious chieftain. In 1839 the British restored Shah Soojah; but in 1842 a dreadful outbreak took place. The chief British civil officer, sir Wm. M'Naghten, was massacred, and the British commenced a most disastrous retreat. Of 3849 soldiers, and about 12,000 camp followers, only one European, Dr. Dryden, and four or five natives escaped. In the same year (Sept. 16) general afterwards sir George Pollock retook the town, and rescued lady Sale and many of the prisoners. After destroying many public buildings, he left Cabul to its fate, Oct. 12, 1842.

CADDEE, OR LEAGUE OF GOD'S HOUSE, the celebrated league of independence in Switzerland, formed by the Grisons to resist domestic tyranny, 1400 to 1419. A second league of the Grisons was called the Grise or Gray League, about 1424. A third league, called the League of Ten Jurisdictions, was formed in 1436.

CADE'S INSURRECTION. Jack Cade, an Irishman, a fugitive on account of his crimes, assumed the name of Mortimer, and headed about 20,000 Kentish men, who armed "to punish evil ministers, and procure a redress of grievances." He defeated and slew sir Humphrey Stafford, at Sevenoaks, June 27, 1450; entered London in triumph, and beheaded the lord treasurer, lord Saye, and several other persons of consequence, July 3. The insurgents at length losing ground, a general pardon was proclaimed; and Cade, deserted by his followers, fled. A reward was offered for his apprehension; he was discovered, and refusing to surrender, was slain by Alexander Iden, sheriff of Kent, July 11.

CADIZ (W. Spain), anciently Gadiz, the Roman Gades; said to have been built by the Phœnicians.

One hundred vessels of the Spanish armada destroyed in the port by sir Francis Drake . 1587
Cadiz was taken by the English, under the earl of Essex, and plundered . Sept. 15, 1596

CADMIUM, a metal, discovered by Stromeyer in 1818.

CAEN (N. France), a place of importance before 912, when it became the capital of the possessions of the Normans, under whom it flourished. It was taken by the English in 1346 and 1417; but was finally recovered by the French in 1450.

CAERNARVON (N. Wales). In the castle (founded in 1283 or 1284) Edward II. was born, April 25, 1284; and the town was chartered by Edward I. in the same year. The town suffered by the civil war of Charles, but was finally retained for the parliament.

CÆSAREAN SECTION, which, it is said, first gave the name of Caesar to the Roman family, is performed by cutting the child out of the womb, when it cannot otherwise be delivered. The case of Alice O'Neal, an Irishwoman, who survived the section, which was performed by a female, is authenticated by Dr. Gabriel King, of Armagh, and surgeon Duncan Stewart, of Dungannon. In Jan. 1847, the operation was performed in St. Bartholomew's hospital, London, on a young woman of diminutive stature, under the influence of ether:

but she died the next day. On Dec. 9, 1860, a similar operation was successfully performed by Dr. James Edmunds at Bethnal Green. On the continent the operation is said to have been more frequent and more successful. Cooper's Surgical Dictionary (ed. 1861) contains a table, which, out of 2009 cases, gives a mortality of 55·4 per cent. of the mothers and 29·45 per cent. of the children.

CÆSARS. See *Rome: Emperors*. The Era of the Cæsars or Spanish Era, is reckoned from the 1st of Jan. 38 B.C., being the year following the conquest of Spain by Augustus. It was much used in Africa, Spain, and the south of France; but by a synod held in 1180 its use was abolished in all the churches dependent on Barcelona. Pedro IV. of Arragon abolished the use of it in his dominions in 1350. John of Castile did the same in 1383. It was used in Portugal till 1415, if not till 1422. The months and days of this era are identical with the Julian calendar; and to turn the time into that of our era, subtract thirty-eight from the year; but if before the Christian era, subtract thirty-nine.

CÆSIUM (Latin, bluish), a rare alkaline metal, found in some mineral waters by Bunsen in 1861, by means of the "Spectrum analysis," *which see*.

CAFFRARIA, AND CAFFRE WAR. See *Kaffraria*.

CAGLIARI. See *Naples*, note.

CA IRA! the burden of a popular song, during the French revolution, 1791:

"Ah! ça ira, ça ira, ça ira! Les Aristocrates à la lanterne!" ("It will proceed! &c. Hang the aristocrats.")

CAI-FONG (China), was besieged by 100,000 rebels, in 1642. The commander of the relieving forces, in order to drown the enemy, broke down its embankments. All the besiegers perished; but 300,000 of the citizens also.

CAIRO, OR GRAND CAIRO, the modern capital of Egypt, remarkable for the minarets of its mosques, and the sepulchres of its caliphs, in what is called the "city of the dead."

It was built by the Saracens	969	when 40,000 persons perished	June, 1754
Burnt to prevent its occupation by the Crusaders	1220	Taken by the French under Napoleon Bonaparte; they enter the city	July 23, 1798
Taken by the Turks from the Egyptian sultans	1517	Taken by the British and Turks, when 6000 French capitulated	June 27, 1801
Ruined by an earthquake and a great fire,			

CALABRIA (the ancient Messapia, S.E. Italy), was conquered by the Romans, 266 B.C. It formed part of the kingdom of the Ostrogoths under Theodoric, A.D. 493; was re-conquered (for the Eastern empire) by Belisarius, 536; subdued by the Lombards and joined to the duchy of Benevento, 572. After various changes, it was conquered by Robert Guiscard, the Norman, 1058, who obtained the title of duke of Calabria, and eventually that of king of Naples. See *Naples*.

CALAIS (N. W. France), taken by Edward III. after a year's siege, Aug. 4, 1347, and held by England 210 years. It was retaken by the duke of Guise, in the reign of Mary, Jan. 7, 1558, and its loss so deeply touched the queen's heart, as to cause some to say it occasioned her death, which occurred soon afterwards, Nov. 17, same year. "When I am dead," said the queen, "Calais will be found written on my heart." It was held by the Spaniards, 1594-6; and was bombarded by the English, 1694. Here Louis XVIII. landed after his long exile from France, April 1814.

CALATRAVA. See *Knighthood*.

CALCIUM, the metallic base of lime, was discovered at the Royal Institution, London, by Humphrey Davy in 1808.

CALCULATING MACHINES. With the utmost care, errors in computation and in printing will always occur in logarithms and tables of figures. To avoid them, machines to calculate and print have been devised. Pascal, when nineteen years of age, invented one about 1650. The construction of Mr. C. Babbage's machine was commenced at the expense of government, in 1821, and continued till 1833, when the work was suspended after an expenditure of above 15,000*l*. The portion completed is in the library of King's College, London. In 1857, Messrs. E. and G. Schantz, two Swedish engineers, published in London specimen tables, calculated and printed by machinery constructed between 1837 and 1843, after a study of the account of Mr. Babbage's machine. Messrs. Schantz brought their machine to England in 1854. It was bought for 1000*l*. by Mr. J. F. Rathbone, an American merchant, to be presented to Dudley observatory in his own town, Albany. In 1857, Messrs.

Scheutz were engaged to make one for the British government, which is now completed. Mr. Wiberg's machine, exhibited at Paris, Feb. 1863, was much commended.

CALEDONIA (now *Scotland*). The name is supposed by some to be derived from *Gael*, or *Gael-men*, or *Gadel-doine*, corrupted by the Romans. Tacitus, who died 99, distinguishes this portion of Britain by the appellation of *Caledonia*. Venerable Bede says that it retained this name until 258, when it was invaded by a tribe from Ireland, and called *Scotia*. The ancient inhabitants appear to have been the Caledonians and Picts, tribes of the Celts, who passed over from the opposite coast of Gaul. About the beginning of the fourth century of the Christian era they were invaded (as stated by some authorities) by the Scythians or Scythians (since called Scots), who, having driven the Picts into the north, settled in the Lowlands, and gave their name to the whole country. Hence the remarkable distinction of language, habits, customs, and persons between the Highlanders and the southern inhabitants. See *Scotland*.

CALEDONIAN CANAL, from the North Sea to the Atlantic Ocean. The act for its construction received the royal assent July 27, 1803; and the works were commenced same year. The nautical intercourse between the western ports of Great Britain and those also of Ireland to the North Sea and Baltic, is shortened in some instances 800, and in others 1000 miles. A sum exceeding a million sterling was granted by parliament from time to time; and the safe navigation for ships of nearly every tonnage was opened Nov. 1, 1822. It has not paid. CALENDAR. The Roman Calendar, which has in great part been adopted by almost all nations, was introduced by Romulus, who divided the year into ten months, comprising 304 days, 738 B.C. This year was of fifty days' less duration than the lunar year, and of sixty-one less than the solar year, and its commencement did not of course correspond with any fixed season. Numa Pompilius, 713 B.C., corrected this calendar, by adding two months; and Julius Cæsar, 45 B.C., desirous to make it more correct, fixed the solar year at 365 days and 6 hours, every fourth year being bissextile or leap year. See *Leap Year*. This almost perfect arrangement was denominated the Julian style, and prevailed generally throughout the Christian world till the time of pope Gregory XIII. The calendar of Julius Cæsar was defective in this particular, that the solar year consisted of 365 days, 5 hours, and 49 minutes; and not of 365 days 6 hours. This difference, then, amounted to 10 entire days, the vernal equinox falling on the 11th instead of the 21st of March. To obviate this error, Gregory ordained, in 1582, that *that* year should consist of 356 days only (Oct. 5 became Oct. 15); and to prevent further irregularity, it was determined that a year beginning a century should not be bissextile, with the exception of that beginning each fourth century; thus, 1700 and 1800 have not been bissextile, nor will 1900 be so: but the year 2000 will be a leap year. In this manner three days are retrenched in 400 years, because the lapse of eleven minutes makes three days in about that period. The year of the calendar is thus made as nearly as possible to correspond with the true solar year, and future errors of chronology are avoided. See *New Style* and *French Revolutionary Calendar*.

CALENDER, a machine used in glazing various kinds of cloth, was introduced into England by the Huguenots, who were driven by persecution from France, Holland, and the Netherlands to these countries, about 1685. *Anderson.*

CALENDS were the first day of the Roman months. The *Nones* of March, May, July, and October, fell on the 7th; and their *Ides* on the 15th. The other months had the *Nones* on the 5th and the *Ides* on the 13th. As the Greeks had no *Calends*, *ad Græcas Calendas*, "on the Greek Calends," meant *never*.

CALICO, the well-known cotton cloth, is named from Calicut, a city of India, which was visited by the Portuguese in 1498. Calico was first brought to England by the East India Company in 1631. Calico-printing and the Dutch loom engine were first used in 1676, when a Frenchman established a factory at Richmond, near London. *Anderson.* Calicoes were prohibited to be printed or worn in 1700; and again in 1721, a penalty of 5*l.* was laid on the wearer, and 20*l.* on the seller of calico. In 1831, by the exertions of Mr. Poulett Thompson, afterwards lord Sydenham, and others, the consolidated duty of 3½*d.* on the square of printed calico was taken off. Since 1834, the manufacture has been greatly increased by the applications of science. Cylinders for printing are now engraved by galvanism, and new dyes have been introduced by the discoveries of Liebig, Hoffmann, Perkin, &c. See *Cotton* and *Dyeing*.

CALIFORNIA (from the Spanish, *Caliente Fornalla*, hot furnace, in allusion to the climate) was discovered by Cortez in 1537; others say by Cabrillo in 1542; and visited by sir Francis Drake, who named it New Albion, in 1579. California was admitted into the United States in 1850. It is advancing rapidly in wealth and importance, but society is still in a very disorganised state. The population in 1856 was 506,067; in 1860, 700,000.

CALIPER COMPASS, whereby founders and gunners measure the bore or diameter of cannon, small arms, &c. : shot is said to have been invented by an artificer of Nuremberg in 1540.

CALIPH (Arabic), Vicar, or Apostle, the title assumed by the sophi of Persia, as successor of Ali, and, since 1517, by the sultan of Turkey, as successor of Mahomet. The caliphat began with Abubeker, the father of the prophet's second wife.

CALIPHS OF ARABIA.	655. Ali.	In 775 they were styled caliphs of Bagdad.
632. Abubeker.	661. Hassan.	Haroun-al-Raschid ruled 786—809.
634. Omar I.	The OMMIADES ruled 661—750.	See <i>Ommiades</i> and <i>Abbasides</i> .
644. Othman.	The ABBASIDES ruled 750—1258.	

CALIPPIC PERIOD, invented by Calippus, to correct the Metonic cycle, consists of four cycles, or of seventy-six years, at the expiration of which he imagined the new and full moons returned to the same day of the solar year; which is incorrect. This period began about the end of June, in the third year of the 112th Olympiad, in the year of Rome 424, and 330 B.C.

CALIXTINS, a sect derived from the Hussites, about 1451, demanded the cup (Greek, *Kalix*) in the Lord's supper. Also the followers of George Calixtus, a Lutheran, who died in 1656. He wrote against the celibacy of the priesthood, and proposed a re-union of Catholics and Protestants based on the Apostles' creed.

CALI YUGA, the Hindoo era of the DeFuge, dates from 3101 B.C. (according to some, 3102), and begins with the entrance of the sun into the Hindoo sign Aswin, now on April 11, N.S. In 1600 the year began on April 7, N.S., from which it has now advanced four days, and from the precession of the equinoxes is still advancing at the rate of a day in sixty years. The number produced by subtracting 3102 from any given year of the Cali Yuga era will be the Christian year in which the given year begins.

CALLAO (Peru). Here, after an earthquake, the sea retired from the shore, and returned in mountainous waves, which destroyed the city in 1687, and on Oct. 28, 1746.

CALLIGRAPHY (beautiful writing). Calligraphes is said to have written an elegant distich on a sesamum seed, 472 B.C. In the 16th century Peter Bales wrote the Lord's Prayer, Creed, and Decalogue, two short Latin prayers, his own name, motto, day of the month, year of our Lord, and of the reign of Queen Elizabeth (to whom he presented them at Hampton-court), all within the circle of a silver penny, encased in a ring and border of gold, and covered with crystal, so accurately done, as to be plainly legible. *Holished.*

CALMAR, UNION OF. The treaty, whereby Denmark, Sweden, and Norway, were united under one sovereign; Margaret of Waldemar, "the Semiramis of the North," being the first, June, 1397. The deputies of the three kingdoms assembled at Calmar for the election of a king; and Margaret, having defeated Albert of Sweden (whose tyranny had caused a revolt of his subjects) in 1393, was made choice of to rule over Denmark, as well as Sweden and Norway, of which she was then queen. This union was dissolved by Gustavus Vasa in 1523.

CALMUCKS. See *Tartary*.

CALOMEL ("beautiful black"), a compound of mercury, sulphuric acid, and chloride of sodium, first mentioned by Crolius early in the 17th century. The first directions given for its preparation were by Beguin in 1608.

CALORESCENCE. In Jan. 1865 Professor Tyndall rendered the ultra-red rays of the spectrum of the electric light visible by causing them to impinge on a plate of platinum raised to a white heat. He termed the phenomenon Calorescence. See *Fluorescence*.

CALORIC. See *Heat*.

CALOTYPE PROCESS (from the Greek *kalos*, beautiful), by which negative photographs are produced on paper, is the invention of Mr. Henry Fox Talbot, about 1840.

CALOYERS (meaning *good old men*). The monks of the Greek church, of the order of St. Basil. Their most celebrated monastery in Asia is at Mount Sinai, endowed by Justinian (died 565); the European one is at Mount Athos.

CALVARY, MOUNT, the place where the Redeemer suffered death, April 5, A.D. 30; (*Hales*, 31; *Clinton*, 29, others, 30). See *Luke* xxiii. 33. Adrian, at the time of his persecution of the Christians, erected a temple of Jupiter on Mount Calvary, and a temple of Adonis on the manger at Bethlehem, 142. The empress Helena built a church here about 326. See *Holy Places*.

CALVES' HEAD CLUB, noblemen and gentlemen, who exposed raw calves' heads at the windows of a tavern, Jan. 30, 1735, the anniversary of the execution of Charles I. An incensed mob was dispersed by soldiers, and the club was suppressed.

CALVI (Corsica). The British forces besieged the fortress of Calvi, June 12, 1794. After fifty-nine days it surrendered on Aug. 10. It surrendered to the French in 1796.

CALVINISTS, named after John Calvin (or Chabvin), who was born at Noyon, in Picardy, July 10, 1509. Adopting the reformed doctrines, he fled to Angoulême, where he composed his *Institutio Christianæ Religionis* in 1533; published in 1536. He retired to Basle, and settled in Geneva, where he died, May 27, 1564. He was instrumental in burning Servetus for denying the Trinity in 1553. A formal separation between the Calvinists and Lutherans first took place after the conference of Poissy in 1561, where the former expressly rejected the tenth and other articles of the confession of Augsburg, and took the name of Calvinists. In France (see *Huguenots*) they took up arms against their persecutors. Henry IV., originally a Calvinist, on becoming king, secured their liberty by the *Edict of Nantes* in 1598 (*which see*). Calvinistic doctrines appear in the Articles of the Church of England and in the Confession of the Church of Scotland, and are held by many Protestant sects.

CAMBIUM REGIS. See *Royal Exchange*.

CAMBRAY (N. France), an independent archbishopric in 1007, and lordship in 1076, gives name to cambrie. It was taken by the Spaniards by surprise in 1595; and has been taken and retaken several times. Fénelon was archbishop in 1695.

It was invested by the Austrians, Aug. 8, when the republican general, Decay, replied to the imperial summons to surrender, that "he knew not how to do that, but his soldiers knew how to fight." It was, however, taken

by Clairfait, the Austrian general, on Sept. 10, 1793. The French were defeated at Caesar's camp, in the neighbourhood, by the allied army under the duke of York . . . April 24, 1794

CAMBUSKENNETH (Central Scotland). Here Wallace defeated the English in 1297.

CAMDEN (N. America). A battle was fought here Aug. 16, 1780, between general Gates and lord Cornwallis, the former commanding the revolted Americans, who were defeated. At a second battle, between general Greene and lord Rawdon, the Americans were again defeated, April 25, 1781. Camden was evacuated and burnt by the British, May 13, 1781.

CAMERA LUCIDA, invented by Dr. Hooke about 1674; another by Dr. Wollaston in 1807. CAMERA OBSCURA, or dark chamber, constructed, it is said, by Roger Bacon in 1297; and improved by Baptista Porta, about 1500; and remodelled by sir Isaac Newton. By the invention of M. Daguerre, in 1839, the pictures of the camera are fixed. See *Photography*.

CAMERONIANS, a name frequently given to the Reformed Presbyterian Church of Scotland, the descendants of the covenanters of the 17th century, the established church, 1638-50.* Charles II. signed the League and Covenant in 1650, in hopes of recovering his kingdoms, but renounced it in 1661, and revived episcopacy. A revolt ensued in 1666, when many covenanters were slain in battle (in the Pentland hills, &c.), and many refusing to take the oaths required, and declining to accept the king's *indulgence*, died on the scaffold, after undergoing cruel tortures. The name *Cameronian* is derived from Richard Cameron, one of their ministers, who was killed in a skirmish, in 1680. In 1689 they raised a body of soldiers to support William III., who enrolled them under the command of lord Angus, as the 26th regiment, since so famous. In 1712 they renewed the public covenants, and are described in one of their tracts as "the suffering anti-popish, and anti-prelatical, anti-erastian, true presbyterian church of Scotland." They have now between thirty and forty congregations in Scotland.—The 79th regiment (*Cameron Highlanders*), raised in 1793 by Allan Cameron, has no connection with the Cameronians.

CAMISARDS (from *chemise*, a shirt, which they frequently wore over their dress in night attacks), a name given to the more warlike French Protestants in the neighbourhood of the Cevennes (mountain chains in S. France), who defended themselves and attacked their enemies after the revocation of the edict of Nantes, in 1685. They were suppressed in 1704. Their leader, Cavalier, is said to have been made governor of Jersey by William III.

CAMLET, formerly made of silk and camel's hair, but now of wool, hair, and silk. Oriental camlet first came here from Portuguese India, in 1660. *Anderson*.

CAMP. The Hebrew encampment was first laid out by divine direction, 1490 B.C. (*Numbers* ii.) The Romans and Gauls had intrenched camps in open plains; and vestiges of such exist to this day in England and Scotland. A camp was formed at Hyde Park in 1745 and 1814. See *Chobham* and *Aldershot*.

CAMPANIA (S. Italy), was occupied by Hannibal and declared in his favour 216 B.C., but regained by the Romans, 213. Its capital was Capua (*which see*).

CAMPBELL'S ACT, introduced by lord Campbell, in order to compel railway companies to grant compensation for accidents, was passed in 1846; amended in 1864. In accordance with it the family of a gentleman killed through the breaking of a rail, obtained a verdict for 13,000*l.* from the Great Northern Railway Company. On appeal the sum was reduced.

CAMPEACHY-BAY (Yucatan, Central America), discovered about 1520, and settled in 1540; was taken by the English in 1659; by the buccaneers, in 1678; and by the freebooters of St. Domingo, in 1685. These last burnt the town and blew up the citadel. The English logwood-cutters made their settlement here about 1662.

CAMPERDOWN: south of the Texel, Holland, near which admiral Duncan defeated the Dutch fleet, commanded by admiral De Winter; the latter losing fifteen ships, either taken or destroyed, Oct. 11, 1797. The British admiral obtained a peerage. He died suddenly on his way to Edinburgh, Aug. 4, 1804.

CAMPO FORMIO (N. Italy). Here a treaty was concluded between France and Austria; the latter yielding the Low Countries and the Ionian Islands to France, and Milan, Mantua, and Modena to the Cisalpine republic, Oct. 17, 1797. By a secret article the emperor gained the Venetian dominions.

CAMPO SANTO (Holy Field), a burial-place at Pisa, surrounded by an arcade erected by archbishop Ubaldino, about 1300, which is celebrated for the frescoes painted on the walls by Giotto, Memmi, and others.

CANAAN (Palestine), is considered to have been settled by the Canaanites, 1965 B.C. (Clinton, 2088). The land was divided among the Israelites by Joshua, 1445 (Hales, 1602).

CANADA (N. America), was discovered by John and Sebastian Cabot, in June, 1497; in 1535 Jacques Cartier (a Breton mariner), ascended the St. Lawrence as far as where Montreal now stands. See *Montreal* and *Quebec*.

Quebec founded	1608	by the peace	1763

CANALS (artificial watercourses). A canal in China, commenced in the 10th century, is said to pass over 2000 miles, and to 41 cities.

The canal of Languedoc, which joins the Mediterranean with the Atlantic Ocean, was completed in . . . 1681
 That of Orleans from the Loire to the Seine, commenced in . . . 1675
 That between the Baltic and North Sea, at Kiel, opened . . . 1785

 The great American Erie canal, 363 miles in length, was commenced in . . . 1817
 That of Amsterdam to the sea . . . 1819-25
 (See *Ganges Canal*, the most stupendous modern one.)

BRITISH CANALS.

The first was by Henry I., when the Trent was joined to the Witham, 1134.
 Francis Mathew in 1656, and Andrew Yarranton in 1677, in vain strongly urged improvement in internal navigation.
 In England there are 2800 miles of canals, and 2500 miles of rivers, taking the length of those only that are navigable—total, 5300 miles. (Mr. Porter, in 1851, says 4000 miles.)
 In Ireland there are 300 miles of canals; 150 of navigable rivers; and 60 miles of the Shannon, navigable below Limerick; in all, 510 miles. *Williams*.
 The prosperity of canals, for a time largely checked by the formation of railways, is now greatly revived.

CANARY ISLANDS (N. W. Africa), known to the ancients as the *Fortunate Isles*. The first meridian was referred to the Canary Isles by Hipparchus, about 140 B.C. They were re-discovered by a Norman named Bethencourt, about 1400; his descendants sold them to the Spaniards, who became masters, 1483. The canary-bird, a native of these isles, brought to England about 1500. Teneriffe is the largest island.

CANCER HOSPITAL, West Brompton, near London, was founded by Miss Burdett Coutts, May 30, 1859. A temporary hospital began in 1851.

CANDIA, the ancient Crete, an island in the Mediterranean Sea, celebrated for its 100 cities, its centre Mount Ida; and the laws of its king Minos, and its labyrinth to secure the Minotaur (about 1300 B.C.). It was conquered by the Romans 68 B.C. It was seized by the Saracens A.D. 823, when they changed its name; taken by the Greeks in 960; sold to the Venetians, 1204, and held by them until the Turks obtained it, after a twenty-four years' siege, during which more than 200,000 men perished, 1669. It was ceded to the Egyptian pacha in 1830, but was restored to Turkey in 1840. An insurrection, which broke out here in May, 1858, when a reduction of taxation was demanded, soon subsided on the adoption of conciliatory measures. A persecution of the Christians took place, July 31, 1859.

CANDLEMAS DAY, Feb. 2, is kept in the church in memory of the purification of the Virgin, who presented the infant Jesus in the Temple. From the number of candles lit (it is said in memory of Simeon's song, *Luke ii. 32*, "a Light to lighten the Gentiles," &c.), this festival was called Candlemas, as well as the Purification. Its origin is ascribed by Bede to pope Gelasius in the 5th century. The practice of lighting the churches was forbidden by order of council, 2 Edw. VI. 1548; but it is still continued in the church of Rome.

CANDLES.* The Roman candles were composed of string surrounded by wax, or dipped in pitch. Splinters of wood fattened were used for light among the lower classes in England, about 1300. At this time wax candles were little used, and esteemed a luxury; dipped candles were usually burnt. The Wax- Chandlers' company was incorporated 1484. Mould candles are said to be the invention of the sieur Le Brez, of Paris. Spermaceti candles are of modern manufacture. The Chinese make candles from wax obtained from the berries of a tree, which wax is fragrant, and yields a bright light.† The duty upon candles made in England, imposed in 1709, amounted to about 500,000*l.* annually, when it was repealed in 1831. Very great improvements in the manufacture of candles are due to the researches on oils and fats, carried on by "the father of the fatty acids," Chevreul, since 1811, and published in 1823. At Price's manufactory at Lambeth, the principles involved in many patents are carried into execution; including those of Gwynne (1840), Jones and Price (1842),

* The custom of selling at public auctions *by inch of candle* is said to have been borrowed from the church of Rome, where there is an excommunication by inch of candle, and the sinner is allowed to come to repentance before final excommunication, while yet the candle burns.

† The candlebury myrtle (*Myrica caribæa*), at Nankin, in China, flourishes with beautiful blossoms and fruit. The latter, when ripe, is gathered and thrown into boiling water; the white unctuous substance which covers the kernels is thereby detached, and swims at the top; it is skimmed off and purified by a second boiling, when it becomes transparent, of a consistence between tallow and wax, and is converted into candles. It is said that specimens of this tree were brought to England from America in 1699. Its cultivation in America in a commercial point of view has been recommended.

and Wilson in 1844, for candles which require no snuffing (termed *composite*). Palm and cocoa-nut oils are now extensively used. In 1860, at the Belmont works 900 persons were employed, and in winter 100 tons (7000*l.* worth) of candles are manufactured weekly. Candles are manufactured at Belmont from the mineral oil or tar brought from Rangoon in the Burmese empire and from Trinidad.

CANDLESTICKS (or *lamp-stands*) with seven branches were regarded as emblematical of the priest's office, and were engraven on their seals, cups, and tombs. Bezaleel made "a candlestick of pure gold" for the tabernacle, B.C. 1491 (*Exod.* xxvii. 17). Candlesticks were used in Britain in the days of king Edgar, 959, ("silver candelabra and gilt candelabra well and honourably made;") but in 1388 they were not common.

CANDY (Ceylon), was taken by a British detachment, Feb. 20, 1803, who capitulated June 23 following, anxious to evacuate the place on account of its unhealthiness: on the third day many were treacherously massacred at Colombo. The war was renewed in October, 1814; the king was made prisoner by general Brownrigg, Feb. 19, 1815; and the sovereignty vested in Great Britain, March 2, 1815.

CANNÆ (Apulia). Here on Aug. 2, 216 B.C., Hannibal with 50,000 Africans, Gauls, and Spaniards, defeated Paulus Æmilius and Terentius Varro, with 88,000 Romans, of whom 40,000 were slain. The victor sent to Carthage three bushels of rings, taken from the Roman knights. The place is now denominated by some "the field of blood."

CANNIBALISM. See *Anthropophagi*.

CANNING ADMINISTRATION.* The illness of lord Liverpool, led to the formation of this Administration, April 24—30, 1827. See *Goderich*.

George Canning, first lord of the treasury and chancellor of the exchequer.

Lord Harrowby, president of the council.

Duke of Portland, lord privy seal.

Lord Dudley, viscount Goderich, and Mr. Sturges Burne, secretaries of state.

W. W. Wynn, president of the India board.

Wm. Huskisson, board of trade.

Lord Palmerston, secretary of war.

Lord Bexley, chancellor of the duchy of Lancaster.

Duke of Clarence, lord high admiral.

Lord Lyndhurst, lord chancellor, &c.

Marquess of Lansdowne, without office; afterwards home secretary.

On Mr. Canning's death (Aug. 8) the cabinet was re-constructed.

CANNON. See *Artillery*. Gibbon described a cannon employed by Mahomet II. at the siege of Adrianople, in 1453; the bore was 12 palms wide, and the stone balls weighed each 600 lb.

At Ehrenbreitstein castle, one of the strongest forts in Germany, opposite Coblenz on the Rhine, is a prodigious cannon, eighteen feet and a half long, a foot and a half in diameter in the bore, and three feet four inches in the breech. The ball made for it weighs 180 lb., and its charge of powder 94 lb. The inscription on it shows that it was made by one Simon

1529

In Dover castle is a brass gun called queen Elizabeth's pocket pistol, which was presented to her by the states of Holland; this piece is 24 feet long, and is beautifully ornamented, having on it the arms of the states, and a motto in Dutch, importing thus—"Charge me well, and sponge me clean—I'll throw a ball to Calais green."

Some fine specimens are to be seen in the Tower.

A leather cannon was fired three times in the King's park, Edinburgh—*Phillips*. Oct. 23, 1788

The Turkish piece now in St. James's park, was taken by the French at Alexandria; but was retaken, and placed in the park March, 1803

Messrs. Horsfall's monster wrought-iron gun was completed in May, 1856, at Liverpool. Its length is 15 feet 10 inches, and its weight

21 tons 17 cwt. 1 qr. 14 lb. Its cost was 3,500*l.* With a charge of 25 lb. it struck a target 2000 yards' distance. It has been since presented to government.

Of late years very great improvements have been made in the construction of cannon, by Messrs. Whitworth, Mallet, Armstrong, and others. Mr. Wm. G. Armstrong knighted

Feb. 18, 1859

He had been working for four years on gun-making, and had succeeded in producing "a breech-loading rifled wrought-iron gun of great durability and of extreme lightness, combining a great extent of range and extraordinary accuracy." The range of a 32-lb. gun, charged with 5 lb. of powder, was a little more than 5 miles. The accuracy of the Armstrong gun is said at equal distances to be fifty-seven times more than that of our common artillery, which it greatly exceeded also in destructive effects. The government engaged the services of sir W. Armstrong for ten years (commencing with 1855) for 20,000*l.*, as consulting engineer of rifled ordnance.

Feb. 22, "

A parliamentary committee on ordnance was appointed Feb. 20, and reported on July 23, 1860

* George Canning was born April 11, 1770; became foreign secretary in the Pitt administration, 1807; fought a duel with Castlereagh and resigned in 1809; president of the council in 1820; disapproved of the queen's trial and resigned in 1821; appointed governor-general of India in 1822, but became soon after foreign secretary, and remained such till 1827, when he became premier. He died Aug. 8, same year.

The Horsfall gun mentioned above, with a charge of 75 lb. of powder and a shot of 270 lb. totally smashed a Warrior target . . . Sept. 16, "

Mr. Whitworth's shells were sent through 5½

inch iron plates and the wood-work behind it . . . Nov. 12, 1862

Armstrong's gun "Big Will" was tried and pronounced to be a perfect specimen of workmanship. It weighed 22 tons; its length, 15 feet; range with shot weighing 510 lb., 748 to 4187 yards . . . Nov. 19, 1863

Clark's target was destroyed . . . July 7, "

Reed's target was tried successfully . . . Dec. 8, "

The competitive trial between the Armstrong and Whitworth guns began . . . April 1, 1864

The Iron-plate commission experiments closed on . . . Aug. 4, "

Capt. Palliser, by experiment, has shown that iron shot cast in cold iron moulds instead of hot sand, is much harder and equals steel; he also suggested the lining cast iron guns with wrought iron exits, which is stated to be successful. . . . "

The competitive trials of Armstrong's and Whitworth's cannon upon the Alfred target-ship at Portsmouth closed . . . Nov. 15, "

"Hercules target," 4 ft. 2 in. thick, 11½ inches of iron, resists 300 pounders . . . June, 1865

CANON OF SCRIPTURE. See *Bible*.

CANONISATION, of pious men and martyrs as saints, was instituted by pope Leo III., 800. *Tallent.* Every day in the calendar is now a saint's day. The first canonisation was of St. Udalricus, in 993. *Hénault.* On June 8, 1862, the pope canonised 27 Japanese, who had been put to death on Feb. 5, 1597, near Nagasaki.

CANONS, APOSTOLICAL, ascribed by Bellarmine and Baronius to the Apostles; by others to St. Clement, are certainly a forgery of much later date (since 325). The Greek church allows 85, the Latin 50 of them. The first Ecclesiastical Canon was promulgated 380. *Usher.* Canon law was introduced into Europe by Gratian, the canon law author, about 1140, and into England in 1154. *Stow.* See *Decretals*. The present Canons and Constitutions of the Church of England, collected from former ordinances, were established in 1603 by the clergy in convocation, and ratified by king James I. An intermediate class of religious, between priests and monks, in the 8th century, were termed *canons*, as living by a rule.

CANOSSA, a castle in Modena, celebrated on account of the degrading penance submitted to by the emperor Henry IV. of Germany, in deference to his greatest enemy, pope Gregory VII. (Hildebrand), then living at the castle, the residence of the great countess Matilda. Henry was exposed for several days to the inclemency of winter, Jan. 1077, till it pleased the pope to admit him. Matilda greatly increased the temporal power of the papacy by bequeathing to it her large estates, to the injury of her second husband, Guelph, duke of Bavaria.

CANTERBURY (Kent), the *Durovernum* of the Romans, and capital of Ethelbert, king of Kent, who reigned 560—616. He was converted to Christianity by Augustin, 596, upon whom he bestowed many favours, giving him land for an abbey and cathedral, which was dedicated to Christ, 602.* St. Martin's church was the first Saxon Christian church in Britain. The riot at Boughton, near Canterbury, produced by a fanatic called Tom or Thom, who assumed the name of sir William Courtenay, occurred May 31, 1838. See *Thomites*. The railway to London was completed in 1846.—The ARCHBISHOP is primate and metropolitan of all England, and the first peer in the realm, having precedence of all officers of state, and of all dukes not of the blood royal. Canterbury had formerly jurisdiction over Ireland, and the archbishop was styled a patriarch. This see has yielded to the church of Rome 18 saints and 9 cardinals; and to the civil state of England, 12 lord chancellors and 4 lord treasurers. The see was made superior to York, 1073. See *York*. The revenue is valued in the king's books at 2816*l.* 7*s.* 9*d.* *Beatson.* Present income, 15,000*l.*

* The cathedral was sacked by the Danes, 1011, and burnt down 1067; rebuilt by Lanfranc and Anselm, and the choir completed by the prior Conrad in 1130, and in which Becket was murdered, 1170, was burnt 1174. It was rebuilt by William of Sens (1174-78) and by "English William," 1178-84. A new nave was built and other parts, 1378-1410. The great central tower was erected by prior Goldstone about 1495. The gorgeous shrine of Becket was stripped at the reformation, and his bones burnt. Here were interred Edward the Black Prince, Henry IV., cardinal Pole, and other distinguished persons. During the civil war, Cromwell's dragoons used the cathedral as a stable.

CANTERBURY TALES, by Geoffrey Chaucer, were written about 1364; and first printed about 1475 or 1476 (by Caxton).

CANTHARIDES, venomous green beetles (called Spanish flies), are used to raise blisters. This use is ascribed to Aretæus of Cappadocia, about 50 B.C.

CANTON, the only city in China with which Europeans were allowed to trade, till the treaty of Aug. 29, 1842. Nearly every nation has a factory at Canton, but that of England surpasses all others in elegance and extent. Merchants arrived here in 1517. A fire destroying 15,000 houses, 1822. An inundation swept away 10,000 houses and 1000 persons, Oct. 1833. Canton was taken by the British in 1857; restored, 1861. See *China* 1835, 1839, 1856, 1861. Population estimated at 1,000,000.

CANULEIAN LAW, permitting the patricians and plebeians to intermarry, was passed at Rome 445 B.C.

CAOUTCHOUC, OR INDIA RUBBER, an elastic resinous substance that exudes by incisions from several trees that grow in Cayenne, Quito, and the Brazils, the *Hevea caoutchouc* and *Siphonia elastica* (vulgarly called syringe trees). It was first brought to Europe from South America, about 1730.

In 1770, Dr. Priestley said that he had seen "a substance excellently adapted to the purpose of wiping from paper the marks of a black lead pencil." It was sold at the rate of gs. the cubic half-inch.

India rubber cloth was made by Samuel Peal and patented.

Vulcanised rubber formed by combining India rubber with sulphur, which process removes the susceptibility of the rubber to change under atmospheric temperatures, was patented in America, by Mr. C. Goodyear 1791

Invented also by Mr. T. Hancock (of the firm

of Mackintosh and Co.), and patented 1843

Mr. Goodyear invented the hard rubber (termed Ebonite) as a substitute for horn and tortoise-shell, for combs, paper-knives, veneer, walking-sticks, &c. 1849

A mode of retaining India rubber in its natural fluid state (by applying to it liquid ammonia) was patented in England, on behalf of the inventor, Mr. Henry Lee Norris, of New York 1853

Caoutchouc imported in 1850, 7617 cwts.; in 1856, 28,765 cwts.; in 1864, 71,027 cwts.

CAP. The general use of caps and hats is referred to 1449. See *Caps and Hats*.

CAPE BRETON, a large island, W. coast of N. America, said to have been discovered by the English in 1584; taken by the French in 1632, but was afterwards restored; and again taken in 1745, and re-taken in 1748. It was finally captured by the English in 1758, when the garrison of 5600 men were made prisoners, and eleven French ships were captured or destroyed. Ceded to England in 1763.

CAPE-COAST CASTLE (S. W. Africa). Settled by the Portuguese in 1610; but it soon fell to the Dutch. It was demolished by admiral Holmes in 1661. All the British factories and shipping along the coast were destroyed by the Dutch admiral, De Ruyter, in 1665. It was confirmed to the English by the treaty of Breda, in 1667. See *Ashantees*.

CAPE DE VERDE ISLANDS (N. Atlantic Ocean), were known to the ancients as *Gorgades*; but not to the moderns till discovered by Antonio de Noli, a Genoese navigator in the service of Portugal, 1446, 1450, or 1460. The Portuguese possess them still.

CAPE OF GOOD HOPE, a promontory on the S.W. point of Africa, called "Cabo Tormentoso" (the stormy cape), the "Lion of the Sea," and the "Head of Africa," discovered by Bartholomew de Diaz in 1486. Its present name was given by John II. of Portugal, who augured favourably of future discoveries from Diaz having reached the extremity of Africa. Population in 1856, 267,096.

The cape was doubled, and the passage to India discovered by Vasco de Gama, Nov. 20, 1497

CAPE ST. VINCENT (S. W. Portugal). Sir George Rooke, with twenty-three ships of war, and the Turkey fleet, was attacked by Tourville, with 160 ships off Cape St. Vincent, when twelve English and Dutch men of war, and eighty merchantmen, were captured or destroyed by the French, June 16, 1693.—Sir John Jervis, with the Mediterranean fleet of fifteen sail, defeated the Spanish fleet of twenty-seven ships of the line off this cape, taking four ships and destroying others, Feb. 14, 1797. For this victory sir John was raised to the peerage, as earl St. Vincent. Nelson was engaged in this battle.

CAPET (or Capevigiens), the third race of the kings of France, named from Hugo Capet, count of Paris and Orleans, who seized the throne on the death of Louis V., called the Indolent, 987. *Hénault*. The first line of the house of Capet expired with Charles IV., in 1328, when Philip VI. of Valois ascended the throne. See *France*.

CAPILLARITY (the rising of liquids in small tubes, and the ascent of the sap in plants) is said to have been first observed by Niccolo Aggiunti of Pisa, 1600—35. The theory has been examined by Newton, La Place, and others. Dr. T. Young's theory was put forth in 1805, and Mr. Wertheim's researches in 1857.

CAPITAL PUNISHMENT. See *Death*.

CAPITATION TAX. See *Poll-tax*.

CAPITOL, so called from a human head (*caput*) being found when digging the foundations of the principal fortress of Rome, on Mons Tarpeius, on which a temple was built to Jupiter, thence called *Jupiter Capitolinus*. The foundation was laid by Tarquinius Priscus, 616 B.C. The building was continued by Servius Tullius, and completed by Tarquinius Superbus, but was not dedicated till 507 B.C. by the consul Horatius. It was burnt during the civil wars, 83 B.C., rebuilt by Sylla, and dedicated again by Lutatius Catulus, 69 B.C. The Roman consuls made large donations to this temple, and the emperor Augustus bestowed on it 2000 pounds weight of gold, of which metal the roof was composed: its thresholds were of brass, and its interior was decorated with shields of solid silver. It was destroyed by

lightning 188 B.C. ; by fire, A.D. 70, and rebuilt by Domitian. The Capitoline *games*, instituted 387 B.C., were revived by Domitian, A.D. 86. The Campidoglio contains palaces of the senators, erected on the site of the Capitol by Michael Angelo soon after 1546.

CAPITULARIES, the laws of the Frankish kings, commencing with Charlemagne (801). Collections have been published by Baluze (1677) and others.

CAPPEL (Switzerland). Here the reformer Zwinglius was slain in a conflict between the catholics and the men of Zurich, Oct. 11, 1531.

CAPRI (Capræ), an island near Naples, the sumptuous residence of Augustus, and particularly of Tiberius, memorable for the debaucheries he committed during the seven last years of his life, 27. Capri was taken by sir Sidney Smith, April 22, 1806.

CAPS AND HATS.* About 1750 Sweden was much distracted by two factions thus named, the former in the interest of the Russians, and the latter in that of the French. They were broken up and the names prohibited by Gustavus III. in 1771, who desired to exclude foreign influence. His assassination by Ankarström, March 16, 1792, set aside all his plans for the improvement of Sweden.

CAPUA (Naples), capital of Campania, took the part of Hannibal when his army wintered here after the battle of Cannæ, 216 B.C., and it is said became enervated through luxury. In 211, when the Romans retook the city, they scourged and beheaded all the surviving senators ; the others had poisoned themselves after a banquet previous to the surrender of the city. Only two persons escaped degradation, a woman who had prayed for the success of the Romans, and another who succoured some prisoners. During the middle ages Capua was in turn subjugated by the Greeks, Saracens, and Normans, and Germans. It was restored to Naples in A.D. 1424, and was taken Nov. 2, 1860, by Garibaldi.

CAPUCHIN FRIARS, Franciscans, so named from wearing a *Capuchon*, or cowl hanging down upon their backs. The Capuchins were founded by Matthew Baschi, about 1525.

CAR. The invention is ascribed to Erichthonius of Athens, about 1486 B.C. Covered cars (*currus arcuati*) were used by the Romans. The *lectica* (a soft cushioned car), next invented, gave place to the *carpentum*, a two-wheeled car, with an arched covering, hung with costly cloth. Still later were the *carruca*, in which the officers of state rode. Triumphant cars, introduced by Tarquin the Elder, were formed like a throne.

CARACAS (S. America), part of Venezuela, discovered by Columbus 1498. It was reduced by arms, and assigned as property to the Welsers, German merchants, by Charles V. ; but from their tyranny, they were dispossessed in 1550, and a crown governor appointed. The province declared its independence of Spain, May 9, 1810. The city Leon de Caracas, on March 26, 1812, was visited by a violent earthquake, and nearly 12,000 persons perished. See *Venezuela*.

CARBERRY HILL (S. Scotland). Here on June 15, 1567, lord Hume and the con-

* None allowed to sell any hat for above 20d. nor cap for above 2s. 8d. 5 Henry VII. 1489. It was enacted in 1571 that every person above seven years of age should wear on Sundays and holidays, a cap of wool, knit, made, thickened, and dressed in England by some of the trade of cappers, under the forfeiture of three farthings for every day's neglect, 1571. Excepted : maids, ladies, and gentlewomen, and every lord, knight, and gentleman, of twenty marks of land, and their heirs, and such as had borne office of worship, in any city, town, or place, and the wardens of London companies.

federate barons dispersed the royal army under Bothwell, and took Mary queen of Scots prisoner. Bothwell fled.

CARBOLIC ACID (or phenic acid), obtained by the distillation of pit-coal, is a powerful antiseptic. It is largely manufactured for medical purposes, and has been advantageously used at Carlisle and Exeter in the deodorisation of sewage (1860-1).

CARBON was shown to be a distinct element by Lavoisier in 1788. He proved the diamond to be its purest form, and converted it into carbonic acid gas by combustion. *Gmelin*.

CARBONARI (colliers, or charcoal-burners), a powerful secret society in Italy, which derived its origin, according to some, from the Waldenses, and which became prominent early in the present century. It aimed at the expulsion of foreigners from Italy, and the establishment of civil and religious liberty. In March, 1820, it is said that 650,000 joined the society, and an insurrection soon after broke out in Naples, general P  pe taking the command. The king Ferdinand made political concessions, but the allied sovereigns at Laybach assisted Ferdinand to suppress the liberal party. The Carbonari were henceforth denounced as traitors. The society since 1818 spread in France, and doubtless hastened the fall of the Bourbons in 1830 and 1848. It has been frequently but incorrectly confounded with freemasonry.

CARBONIC ACID GAS, a compound of carbon and oxygen, which occurs in the air, and is a product of combustion, respiration, and fermentation. The Grotto del Cane yields 200,000 lbs. per annum. No animal can breathe this gas. The briskness of champagne, beer, &c., is due to its presence. It was liquefied by atmospheric pressure by Faraday in 1823. On exposing the liquid to the air for a short time it becomes solid, in the form of snow.

CARDIFF CASTLE (S. Wales). Here Robert, duke of Normandy, eldest son of William I., was imprisoned from 1106 till his death, 1135.

CARDINALS, ecclesiastical princes in the church of Rome, the council of the pope, and the conclave or sacred college, at first were the principal priests or incumbents of the parishes in Rome, and were called *cardinales* in 853. They began to assume the exclusive power of electing the popes in 1181. They first wore the red hat to remind them that they ought to shed their blood for religion, if required, and were declared princes of the church by Innocent IV., 1243 or 1245. In 1586 Sixtus V. fixed their number at 70; but there are generally vacancies. In 1860 there were 69 cardinals, in 1861, 63, in 1864, 59. Paul II. gave the scarlet habit, 1464; and Urban VIII. the title of Eminence in 1623 or 1630. *Ducange*.

CARDROSS CASE. See *Trials*, 1861.

CARDS (referred to the Chinese, Hindoos, and Romans), are said to have been invented in France in 1391, to amuse Charles IV. during the intervals of a melancholy disorder. Piquet and all the early names are French.—Cards first taxed in England 1710. 428,000 packs were stamped in 1775, and 986,000 in 1800. In 1825, the duty being then 2s. 6d. per pack, less than 150,000 packs were stamped; but in 1827 the stamp duty was reduced to 1s., and 310,854 packs paid duty in 1830. Duty was paid on 239,200 packs in the year ending 5th Jan. 1840; and on near 300,000, year ending 5th Jan. 1850. By an act passed in 1862 the duty on cards was reduced to 3d. per pack, and the sellers were required to take out a licence.

CARIA, Asia Minor, was conquered by Cyrus, 546 B.C.; by Dercyllidas, a Lacedæmonian, 397; his successor Iecatomnus became king, 385 B.C.; for his son Mausolus the *Mausoleum* was erected (*which see*). Caria was absorbed into the Turkish empire.

CARICATURES. Bufalmaco, an Italian painter, about 1330, drew caricatures and put labels to the mouths of his figures with sentences. The modern caricatures of Gilray, Rowlandson, H. B. (John Doyle ^{ID}=HB), Richard Doyle, John Leech, and John Tenniel are justly celebrated. The well-known "Punch" was first published in 1841. The most eminent writers of fiction of the day and others (Douglas Jerrold, Thackeray, A'Becket, Professor E. Forbes, &c.) have contributed to this amusing periodical.

CARINTHIA, a Bavarian duchy, was annexed to Austria, 1363.

CARISBROOKE CASTLE (Isle of Wight), said to have been a British and Roman fortress, was taken 530, by Cerdic, founder of the kingdom of the West Saxons. Its Norman character has been ascribed to William Fitz-Osborne, earl of Hereford in William I.'s time. Here Charles I. was imprisoned in 1647. Here died his daughter Elizabeth, aged fifteen, too probably of a broken heart, Sept. 8, 1650.

CARLAVEROCK CASTLE (S. Scotland), taken by Edward I. July, 1300, the subject of a contemporary poem published, with illustrations, by sir Harris Nicolas in 1828.

CARLISLE (Cumberland), a frontier town of England, wherein for many ages a strong garrison was kept. Just below this town the famous Picts' wall began, which crossed the whole island to Newcastle-upon-Tyne, and here also ended the great Roman highway. The great church, called St. Mary's, is a venerable old pile; a great part of it was built by St. David, king of Scotland, who held Cumberland, Westmoreland, and Northumberland, in vassalage from the crown of England. The castle, restored in 1092 by William II., was the prison of Mary queen of Scots in 1568.—Taken by the parliamentary forces in 1645, and by the young Pretender, Nov. 15, 1745; retaken by the duke of Cumberland, Dec. 30, same year. The see was erected by Henry I. in 1132, and made suffragan to York. The cathedral had been founded a short time previously, by Walter, deputy in these parts for William Rufus. It was almost ruined by Cromwell, and has never recovered its former great beauty, although repaired after the Restoration. It has been lately renovated at a cost of 15,000*l.* and was reopened in 1856. The see has given to the civil state one lord chancellor and two lord treasurers; it is valued in the king's books at 530*l.* 4*s.* 11*d.* per annum. Present income 4500*l.*

CARLISLE ADMINISTRATION. See *Halifax*.

CARLOVINGIANS, the second dynasty of the French kings. See *France*.

CARLOW (S. E. Ireland). The castle, erected by king John, surrendered after a desperate siege to Rory Oge O'Moore, in 1577; again to the parliamentary forces, in 1650. Here the royal troops routed the insurgents, May, 1798.

CARLSBAD (or Charles's Bath), in Bohemia, the celebrated springs, discovered by the emperor Charles IV. in 1358.—On Aug. 1, 1819, a congress was held here, when the great powers decreed measures to repress the liberal press, &c.

CARMAGNOLE, a Piedmontese song and dance, popular in France during the reign of terror, 1793-4. The chorus was "*Dansons la Carmagnole : vive le son du canon !*"

CARMATHIANS, a Mahometan sect. Carmath, a Shiite, about 890, assumed the title of "the guide, the director," &c., including that of the representative of Mahomet, St. John the Baptist, and the angel Gabriel. His followers subdued Bahrein in 900, and overran the east. Dissensions arose amongst themselves, and their power soon passed away.

CARMELITES, or **WHITE FRIARS**, of Mount Carmel, one of the four orders of mendicants with austere rules, founded by Berthold about 1156, and settled in France in 1252. *Hénault*. These rules were moderated about 1540. They claimed descent from Elijah. They had numerous monasteries in England, and a precinct in London without the Temple, west of Blackfriars, is called Whitefriars to this day, after a community of their order, founded there in 1245.

CARNATIC, a district of Southern Hindostan, extending along the whole coast of Coromandel. Hyder Ali entered the Carnatic with 80,000 troops, in 1780, and was defeated by the British under sir Eyre Coote, July 1, and Aug. 27, 1781; and decisively overthrown, June 2, 1782. The Carnatic was overrun by Tippoo in 1790. The British have possessed entire authority over the Carnatic since 1801. See *India*.

CARNATION, so called from the original species being of a flesh colour (*carnis*, of flesh). Several varieties were first planted in England by the Flemings, about 1567. *Stow*.

CARNEIAN GAMES, observed in many Grecian cities, particularly at Sparta (instituted about 675 B.C. in honour of Apollo, surnamed Carneus), lasted nine days.

CARNIVAL (*Carni vale*, Italian, i.e. *Flesh, farewell!*), a festival time in Italy, particularly at Venice, about Shrove-tide, or beginning of Lent.

CAROLINA (N. America). Said to have been discovered by Sebastian Cabot in 1498, or by De Leon in 1512. A body of English, about 850 persons, landed and settled here about 1660; and Carolina was granted to lord Berkeley and others a few years afterwards. The cultivation of rice was introduced by governor Smith in 1695, and subsequently cotton. The province was divided into North and South in 1719. See *America*. The Carolinas were slave states. Great excitement prevailed in them in Nov. 1860, on account of Mr. Abraham Lincoln's election to the presidency of the United States, he being strongly opposed to slavery. South Carolina began the secession from the United States, Dec. 20, 1860: North Carolina followed, May 21, 1861. See *United States*, 1861-5.

CAROLINE ISLANDS were discovered by the Spaniards in the reign of Charles II. 1686.

CARP, a fresh-water or pond fish, was, it is said, first brought to these countries about 1525. *Walton*. It is mentioned by Lady Juliana Berners in 1496.

CARPETS are of ancient use in the East. The manufacture of woollen carpets was introduced into France from Persia, in the reign of Henry IV., between 1589 and 1610. Some artizans who had quitted France in disgust established the English carpet manufacture, about 1750. A cork-carpet company was formed in 1862.

CARRACK, or Karrack (Italian, *Caracca*), a large ship in the middle ages. The Santa Anna, the property of the knights of St. John, of about 1700 tons, sheathed with lead, was built at Nice about 1530. It was literally a floating fortress, and aided Charles V. in taking Tunis in 1535. It contained a crew of 300 men and 50 pieces of artillery.

CARRIAGES. Erichthonius of Athens is said to have produced the first chariot about 1486 B.C. Rude carriages were known in France in the reign of Henry II. A.D. 1547; in England in 1555; Henry IV. of France had one without straps or springs. They were made in England in the reign of Elizabeth, and then called whirlicotes. The duke of Buckingham, in 1619, drove six horses; and the duke of Northumberland, in rivalry, drove eight. Carriages were let for hire in Paris, in 1650, at the Hôtel Fiacre; hence the name, *fiacre*. See *Car*, *Cabriolets*, and *Coaches*.

CARRICKFERGUS (Antrim, Ireland). Its castle is supposed to have been built by Hugh de Lacy, in 1178. The town surrendered to the duke of Schomberg, Aug. 28, 1689. The castle surrendered to the French admiral Thurot, 1760. See *Thurot*.

CARRON IRON-WORKS, on the banks of the Carron, in Stirlingshire, established in 1760. The works in 1852 employed about 1600 men. Here since 1776 have been made the pieces of ordnance called *carronades*.

CARROTS and other edible roots were imported from Holland and Flanders, about 1540.

CARTESIAN DOCTRINES, promulgated by René Des Cartes, the French philosopher, in 1637. His metaphysical principle is, "I think, therefore I am;" his physical principle, "Nothing exists but substance." He accounts for all physical phenomena on his theory of vortices, motions excited by God, the source of all motion. He was born 1596, and died at Stockholm, the guest of queen Christina, in 1650.

CARTES DE VISITE. The small photograph portraits thus termed are said to have been first taken at Nice, by M. Ferrier in 1857. The duke of Parma had his portrait placed upon his visiting cards, and his example was soon followed in Paris and London.

CARTHAGE (N. coast of Africa, near Tunis), founded by Dido or Elissa, sister of Pygmalion, king of Tyre, B.C. 878 (869, *Blair*; 826, *Niebuhr*). She fled from that tyrant, who had killed her husband, and took refuge in Africa. Carthage became a great commercial and warlike republic, and disputed the empire of the world with Rome, which occasioned the Punic wars. The Carthaginians bore the character of a faithless people, hence the term *Punic faith*. Cato the censor (about 146 B.C.) ended his speeches in the senate with *Carthago delenda!* "Carthage must be destroyed!"

CARTHAGENA, OR NEW CARTHAGE (S. E. Spain), built by Hasdrubal, the Carthaginian general 229 B.C.; was taken by Scipio, 210. The modern Carthagena was taken by a British force under sir John Leake in 1706, but was retaken by the duke of Berwick, 1707.—CARTHAGENA, in Columbia, South America, was taken by sir Francis Drake in 1585; was pillaged by the French of 1,200,000*l.* in 1697; and was bombarded by admiral Vernon in 1740-1.

CARTHUSIANS, a religious order (springing from the Benedictines) founded by Bruno of Cologne, who retired with six companions from the converse of the world about 1080, to Chartreuse (*which see*), in the mountains of Dauphiné. Their austere rules were formed by Basil VII., general of the order. They appeared in England about 1180, and a Carthusian monastery, founded by sir William Manny, 1371, was the site of the present Charter-house, London. See *Charter-house*. The Carthusian powder, of father Simon, at Chartreuse, was first compounded about 1715.

CARTOONS. Those of RAPHAEL (twenty-five in number) were designed (for tapestries) in the chambers of the Vatican under Julius II. and Leo X. about 1510 to 1516. The seven preserved were purchased in Flanders by Rubens for Charles I. of England, for Hampton court palace in 1629. They represent—1, the Miraculous draught of Fishes; 2, the Charge to Peter; 3, Peter and John healing the Lame at the Gate of the Temple; 4, the Death of Ananias; 5, Elymas the Sorcerer struck with blindness; 6, the Sacrifice to Paul and Barnabas, at Lystra; 7, Paul preaching at Athens.—The cartoons were removed to South Kensington, April 28, 1865.—The tapestries executed at Arras from these designs are at Rome. They were twice carried away by invaders, in 1526 and 1798, and were restored in 1815.—The Cartoons for the British Houses of Parliament were exhibited in 1843.

CASH-PAYMENTS. See *Bank of England*.

CASHEL (Tipperary, Ireland). Cormack Cuillinan, king and bishop of Cashel, was the reputed founder or restorer of the cathedral, 901. In 1152, bishop Donat O'Danergan was invested with the pall. See *Pallium*. Cashel was valued in the king's books, 29 Henry VIII., at 66*l.* 13*s.* 4*d.* Irish money. By the Church Temporalities act, 1833, it ceased to be archiepiscopal, and was joined to Waterford and Lismore.

CASHMERE, in the Himalayas; was subdued by the Mahometans in the 16th century; by the Affghans in 1754; by the Sikhs in 1819; and was ceded to the British in 1846; who gave it to the Maharajah Gholab Singh, with a nominal sovereignty. The true Cashmere shawls were first brought to England in 1666; but are well imitated at Bradford and Huddersfield. Shawls of Thibetian wool, for the omrahs, cost 150 rupees each, about 1650. *Bernier*.

CASSATION, COURT OF, the highest court of appeal in France, was established in 1790 by the national assembly.

CASSITERIDES. See *Scilly Isles*.

CASTEL FIDARDO, near Ancona, Central Italy. Near here general Lamoricière and the papal army of 11,000 men were totally defeated by the Sardinian general, Cialdini, Sept. 18, 1860. Lamoricière with a few horsemen fled to Ancona, then besieged. On Sept. 29, he and the garrison surrendered, but were shortly after set at liberty.

CASTES, a distinct section of society in India. In the laws of Menu (see *Menu*), the Hindus are divided into the Brahmans, or sacerdotal class; the Kshatrya or Chuttree, military class; the Vaisya, or commercial class; and the Sudras, or sooders, servile class.

CASTIGLIONE (N. Italy). Here the French under Augereau defeated the Austrians, commanded by Wurmser, with great loss, Aug. 3—5, 1796.

CASTILE (Central Spain). A powerful Gothic government was established here about 800.—Ferdinand, count of Castile, became king, 1035. Ferdinand of Arragon married Isabella of Castile in 1474, and formed one monarchy, 1479. See *Spain*.

CASTILLEJOS (N. Africa). Here on Jan. 1, 1860, was fought the first decisive action in the war between Spain and Morocco. General Prim, after a vigorous resistance, repulsed the Moors under Muley Abbas, and advanced towards Tetuan.

CASTILLON, in Guienne. Here the army of Henry VI. of England was defeated by that of Charles VII. of France. An end was put to the English dominion in France, Calais alone remaining, July 23, 1453. Talbot, earl of Shrewsbury, was killed.

CASTLEBAR (Ireland). French troops, under Humbert, landed at Killala, and assisted by Irish insurgents here, compelled the king's troops to retreat, Aug. 28, 1798.

CASTLEPOLLARD (Ireland). Fatal affray at a fair here between some peasantry and a body of police, when thirteen persons lost their lives, and more than twice that number were wounded, May 23, 1831. The chief constable, Blake, and his men, escaped punishment.

CASTLES. The castle of the Anglo-Saxon was a tower keep, either round or square, and ascended by a flight of steps in front. William I. erected 48 strong castles. Several hundreds, built by permission of Stephen, between 1135 and 1154, were demolished by Henry II., 1154. Many were dismantled in the civil wars.

CATACOMBS. The early depositories of the dead. The first Christians at Rome met for worship in the catacombs; and here are said to have been the tombs of the apostles Peter and Paul. Belzoni in 1815 and 1818 explored many Egyptian catacombs, built 3000 years ago. He brought to England the sarcophagus of Psammetichus, formed of oriental alabaster, exquisitely sculptured. In the Parisian catacombs (formerly stone quarries), human remains from the cemetery of the Innocents were deposited in 1785; and many of the victims of the revolution in 1792-4, are interred in them.

CATALONIA (W. Spain), was settled by the Goths and Alani, about 409; conquered by the Saracens, 712; recovered by Pepin and Charlemagne. It formed part of the Spanish marches and the territory of the count of Barcelona (*which see*). The natives were able seamen: being frequently unruly, their peculiar privileges were abolished in 1714.

CATALYTIC FORCE. The discovery in 1819 by Thenard of the decomposition of peroxide of hydrogen by platinum, and by Döbereiner in 1825 of its property to ignite a mixture of hydrogen and oxygen, formed the groundwork of the doctrine of Catalytic Force, also termed "action of contact or presence," put forth by Berzelius and Mitscherlich. Their view has not been adopted by Liebig and other chemists.

CATAMARANS (or carcasses), fire-machines for destroying ships; tried in vain by sir Sidney Smith, Oct. 2, 1804, on the Boulogne flotilla destined by Bonaparte to invade England.

CATANIA, a town near Etna, Sicily, was founded by a colony from Chalcis, about 753 B.C. Ceres had a temple here, open to none but women. Catania was almost totally overthrown by an eruption of Etna in 1669, and in 1693 was nearly swallowed up by an earthquake: in a moment more than 18,000 of its inhabitants were buried in the ruins. An earthquake did great damage, Feb. 22, 1817. In Aug. 1862, the town was held by Garibaldi and his volunteers, in opposition to the Italian government. He was captured on Aug. 29.

CATAPHRYGIANS, heretics in the 2nd century, who followed the errors of Montanus. They are said to have baptized their dead, forbidden marriage, and mingled the bread and wine in the Lord's supper, with the blood of young children.

CATAPULTÆ, military engines of the cross-bow kind, for throwing huge stones as well as darts and arrows; invented by Dionysius, the tyrant of Syracuse, 399 B.C. *Josephus*.

CATEAU CAMBRESIS (N. France), where, on April 2, 3, 1559, peace was concluded between Henry II. of France, Philip II. of Spain, and Elizabeth of England. France ceded to Philip Savoy, Corsica, and nearly 200 forts in Italy and the Low Countries.

CATECHISMS. The catechism of the church of England in the second book of Edward

VI., 1552, contained merely the baptismal vow, the creed, the ten commandments, and the Lord's prayer, with an explanation: but James I. ordered the bishops to enlarge it by adding an explication of the sacraments, 1612. It was increased subsequently by the doctrinal points of the established religion. The catechism of the council of Trent was published in 1566; that of the Assembly of Divines at Westminster in 1648.

CATHARI (from the Greek *katharos*, pure), a name given to the Novatians (about 251), Montanists, and other early Christian sects.

CATHERINE. The order of knights of St. Catherine was instituted in Palestine, 1063. The order of nuns called Catherines was founded in 1373. An order of ladies of the highest rank in Russia was founded by Catherine, empress of Peter the Great, 1714. They were to be distinguished, as the name implied (from *katharos*, pure), for purity of life and manners.

CATHOLIC MAJESTY. This title was first given by pope Gregory III. to Alphonsus I. of Spain, 739. *Licenciado.* The title was also given to Ferdinand V. and his queen in 1474 by Innocent VIII. on account of their zeal for the Roman Catholic religion, and their establishment of the Inquisition in Spain.

CAT ISLE. See *Salvador*.

CATHOLICS. See *Roman Catholics*.

CATILINE'S CONSPIRACY. L. Sergius Catiline, a Roman of noble family, having squandered away his fortune by debaucheries and extravagance, and having been refused the consulship (B.C. 65), meditated the ruin of his country, and conspired with many of the dissolute aristocracy to extirpate the senate, plunder the treasury, and set Rome on fire. This conspiracy was timely discovered and frustrated. A second plot (in 63), was detected by the consul Cicero, whom he had resolved to murder. Catiline's daring appearance in the senate-house, after his guilt was known, drew forth Cicero's celebrated invective, "Quousque tandem, Catilina!" on Nov. 8. On seeing five of his accomplices arrested, Catiline retired to Gaul where his partisans were assembling an army. Cicero punished the conspirators at home, and Petreius routed Catiline's ill-disciplined forces; the conspirator being killed in the engagement, December, 62 B.C.

CATO, SUICIDE OF, termed the "era destructive of the liberties of Rome." This Roman philosopher, considering freedom as that which alone "sustains the name and dignity of man," and unable to survive the independence of his country, stabbed himself at Utica, 46 B.C.

CATO-STREET CONSPIRACY, a gang of desperate politicians, formed by Arthur Thistlewood, which assembled in Cato-street, Edgware-road, proposed the assassination of the ministers of the crown, at a cabinet dinner, and the overthrow of the government. They were betrayed by one of their number, and arrested Feb. 23, 1820, and the principals, Thistlewood, Brunt, Davidson, Ings, and Tidd, were executed with the horrors adjudged to the punishment of traitors, on May 1, following.

CATTLE. The importation of horned cattle from Ireland and Scotland into England was prohibited by a law, 1663; but the export of cattle from Ireland became very extensive. In 1842 the importation of cattle into England from foreign countries was subjected to a moderate duty, and in 1846 they were made duty free.—In 1850, were imported of all sorts of cattle, 217,247; in 1854, 397,430; in 1859, 347,341; in 1864, 727,977. In 1849, 53,480 horned cattle were imported; in 1863, 150,898; in 1864, 496,243 from all countries. In April, 1857, great disease arose among cattle abroad, but by great care it was almost excluded from this country. The cattle-plague now raging in England (Sept., 1865) appeared in June. The nature and origin of the disease caused much dispute. It is generally considered to be a typhoid fever, and of foreign origin. Active preventive and remedial measures have been adopted, under the authority of the privy council. The importation of cattle from England into Ireland was prohibited Aug. 25, 1865. See *Metropolitan Cattle-market* and *Smithfield*.

CAUCASUS, a lofty mountain, a continuation of the ridge of Mount Taurus, between the Euxine and Caspian seas. Prometheus was said to have been tied on the top of Caucasus by Jupiter and continually devoured by vultures, (according to ancient authors, 1548 B.C.). The passes near the mountain were called *Caucasæ Portæ*, and it is supposed that through them the Sarmatians or Huns invaded the provinces of Rome, A.D. 447. See *Circassia*.

CAUDINE FORKS, according to Livy, the *Furculæ Caudinæ* (in Samnium, S. Italy), were two narrow defiles or gorges, united by a range of mountains on each side. The Romans went through the first pass, but found the second blocked up; on returning they found the first similarly obstructed. Being thus hemmed in by the Samnites, under the command of C. Pontius, they surrendered at discretion, 321 B.C. (after a fruitless contest, according to Cicero). The Roman senate broke the treaty.

CAULIFLOWER, said to have been first planted in England about 1603 ; it came from Cyprus.

CAUSTIC in PAINTING, a method of burning colours into wood or ivory, invented by Gausias of Sicyon. He painted his mistress Glycerē sitting on the ground making garlands with flowers ; the picture was hence named *Stephanoplocon*. It was bought by Lucullus for two talents, 335 B.C. *Pliny*.

CAUTIONARY TOWNS (Holland), (the Briel, Flushing, Rammekins, and Walcheren), were given to queen Elizabeth in 1585 as security for their repaying her for assistance in their struggle with Spain. They were restored to the Dutch republic by James I. in 1616.

CAVALIER. The appellation given to the supporters of the king during the civil war, from a number of gentlemen forming themselves into a body-guard for the king in 1641. They were opposed to the Roundheads, or friends of the parliament. *Hume*.

CAVALRY. The Romans were celebrated for the discipline and efficiency of their cavalry. Attached to each Roman legion was a body of 300 horse, in ten turmae ; the commander always a veteran. The Persians had 10,000 horse at Marathon, 490 B.C. ; and 10,000 Persian horse were slain at the battle of Issus, 333 B.C. *Plutarch*. In the wars with Napoleon I. the British cavalry reached to 31,000 men. Our cavalry force, in 1840, was, in household troops, 1209 ; dragoons, hussars and lancers, 9524 ; total, 10,733. In 1856 the total was stated to be 21,651 ; in 1861, 23,210. See *Horse Guards*, &c.

CAVENDISH EXPERIMENT. In 1798 the hon. Henry Cavendish described his experiment for determining the mean density of the earth, by comparing the force of terrestrial attraction with that of the attraction of leaden spheres of known magnitude and density, by means of the torsion balance. *Brande*.

CAWNPORE, a town in India, on the Doab, a peninsula between the Ganges and Jumna. During the mutiny in 1857 it was garrisoned by native troops under sir Hugh Wheeler. These broke out into revolt. An adopted son of the old Peishwa Bajee Rao, Nana Sahib, who had long lived on friendly terms with the British, came apparently to their assistance, but joined the rebels. He took the place after three weeks' siege, June 26 ; and in spite of a treaty massacred great numbers of the British, without respect to age or sex, in the most cruel manner. General Havelock defeated Nana Sahib, July 16, at Futtehpore, and retook Cawnpore, July 17. A column was erected here, in memory of the sufferers, by their relatives of the 32nd regiment. In Dec. 1860, Nana was said to be living at Thibet ; and in Dec. 1861 was incorrectly said to have been captured at Kurrachee. See *India*, 1857.

CAYENNE, French Guiana (S. America), settled by the French 1604-35. It afterwards came successively into the hands of the English (1654), French, and Dutch. The last were expelled by the French in 1677. Cayenne was taken by the British, Jan. 12, 1809, but was restored to the French in 1814. Here is produced the *capsicum baccatum*, or cayenne pepper. Many French political prisoners have been sent here since 1848.

CECILIAN SOCIETY. See under *Musie*.

CEDAR TREE. The red cedar (*Juniperus Virginiana*) came from North America before 1664 ; the Bermudas cedar from Bermudas before 1683 ; the cedar of Lebanon (*Pinus Cedrus*) from the Levant before 1683. In 1850 a grove of venerable cedars, about 40 feet high, remained on Lebanon. The cedar of Goa (*Cupressus Lusitanica*) was brought to Europe by the Portuguese about 1683. See *Cypress*.

CELERY is said to have been introduced into England by the French marshal, Tallard, during his captivity in England, after his defeat at Blenheim by Marlborough in 1704.

CELESTIAL GLOBE. See *Globes*.

CELIBACY (from *celōbs*, unmarried), was preached by St. Anthony in Egypt about 305. His early converts lived in caves, &c., till monasteries were founded. The doctrine was rejected in the council of Nice, 325. Celibacy was enjoined to bishops only in 692. The Romish clergy generally were compelled to a vow of celibacy by pope Gregory VII. in 1073-85. The decree was opposed in England, 958-978. Its observance was finally established by the council of Placentia, held in 1095. The privilege of marriage was restored to the English clergy in 1547. The marriage of the clergy was proposed, but negatived at the council of Trent (1563).

CELL THEORY (propounded by Schwann in 1839) supposes that the ultimate particles of all animal and vegetable tissues are small cells. Some of the lowest forms of animal and vegetable life are said to be composed of merely a single cell, as the germinal vesicle in the egg and the red-snow plant.

CELTIBERI. See *Numantine War*. **CELTS**, a group of the Aryan family. See *Gauls*.

CEMETERIES. The burying-places of the Greeks and Romans were at a distance from their towns; and the Jews had their sepulchres in gardens and in fields. (*John* xix. 41; *Matthæw* xxvii. 60.) Public cemeteries planted after the manner of the great cemetery at Paris, named Père La Chaise* have been opened in all parts of the kingdom. See *Catacombs*.

CENIS, MOUNT. See under *Alps*.

CENSORS, Roman magistrates, whose duty was to survey, rate, and correct the manners of the people. The two first censors were appointed 443 B.C. Plebeian censors were first appointed 131 B.C. The office, abolished by the emperors, was revived by Decius, 251 A.D. See *Press*.

CENSUS. The Israelites were numbered by Moses, 1490 B.C.; and by David, 1017 B.C.; and Demetrius Thalerens is said to have taken a census of Attica, 317 B.C. In the Roman polity, a general estimate of every man's estate and personal effects, delivered to the government upon oath every five years; established by Servius Tullius, 566 B.C. In England the census, formerly not periodical, is now taken at decennial periods, of which the latest were in 1801, 1811, 1821, 1831, 1841, 1851 and 1861 (April 7). For the latest census taken in other countries, see Table, p. viii., after the preface.

CENTRAL AMERICA. See *America*. A large American steamer of this name was wrecked during a gale in the gulf of Mexico, Sept. 12, 1857. Of about 550 persons only 152 were saved: several of these after drifting on rafts above 600 miles. The loss of about 2½ million dollars in specie aggravated the commercial panic at New York shortly after. The captain and crew behaved heroically.

CENTRAL CRIMINAL COURT, established in 1834. Commissions are issued to the fifteen judges of England (of whom three attend in rotation at the Old Bailey) for the periodical delivery of the gaol of Newgate, and the trial of offences of greater degree, committed in Middlesex and parts of Essex, Kent, and Surrey; the new district is considered as one county.

CENTURION, the captain, head, or commander of a subdivision of a Roman legion which consisted of 100 men, and was called a *centuria*. By the Roman census each hundred of the people was called a *centuria*, 556 B.C.

CENTURY. The Greeks computed time by the Olympiads, beginning 776 B.C., and the Roman church, by Indictions, the first of which began Sept. 24, A.D. 312. The method of computing time by centuries commenced from the incarnation of Christ, and was adopted in chronological history first in France. *Dupin*.

CEPHALONIA, one of the Ionian islands, was taken from the Ætolians by the Romans, 189 B.C., and given to the Athenians by Hadrian, A.D. 135. See *Ionian Isles*.

CEPHESUS, a river in Attica, near which Walter de Brienne, duke of Athens, was defeated and slain by the Catalans, 1311.

CERBÈRE, French brig, mounted nine large guns, had a crew of eighty-seven men, and was lying at Port Louis. The harbour was entered in a ten-oared cutter manned with only eighteen men, commanded by lieutenant Paddon, who cut out and made good their prize, July 29, 1800.

* Père La Chaise was the favourite and confessor of Louis XIV. who made him superior of a great establishment of the Jesuits on this spot, then named Mont Louis. The house and grounds were bought for a national cemetery, which was laid out by M. Brongniart, and first used on May 21, 1804.

CEREMONIES, MASTER OF THE, an office instituted for the more honourable reception of ambassadors and persons of quality at court, 1 James I. 1603. The order maintained by the master of the ceremonies at Bath, "Beau Nash," the "King of Bath," led to the adoption of the office in ordinary assemblies: he died in his 88th year, 1761. *Ashe*.

CERES, a planet, 160 miles in diameter, was discovered by M. Piazz, at Palermo, Jan. 1, 1801; he named it after the goddess highly esteemed by the ancient Sicilians.

CERESUOLA (N. Italy). Here Francis de Bourbon, count d'Enghien, defeated the imperialists under the marquis de Guasto, April 14, 1544.

CERIGNOLA (S. Italy). Here the great captain Gonsalvo de Cordova and the Spaniards defeated the duc de Nemours and the French, April 28, 1503.

CERINTHIANS, followers of Cerinthus, a Jew, who lived about 80, are said to have combined Judaism with pagan philosophy.

CERIUM, a very rare metal, discovered by Klaproth and others in 1803.

CEUTA (the ancient Septa), a town on N. coast of Africa, stands on the site of the ancient Abyla, the southern pillar of Hercules. It was taken from the Vandals by Belisarius for Justinian 534; by the Goths 618; by the Moors (about 709), from whom it was taken by the Portuguese 1415. With Portugal, it was annexed in 1580 to Spain, which power still retains it.

CEYLON (the ancient Taprobane), an island in the Indian Ocean, called by the natives the seat of paradise. It was discovered by the Portuguese Almeyda, 1505; but it was known to the Romans in the time of Claudius, 41. The Dutch landed in Ceylon in 1602; they captured the capital, Colombo, in 1603. Frequent conflicts ensued between the Candians and the Europeans, and peaceful commercial relations were established only in 1664. intercourse with the British began in 1713. A large portion of the country was taken by them in 1782, but was restored in 1783. The Dutch settlements were seized by the British; Trincomalee, Aug. 26, 1795, and Jeppanapatam, in Sept. same year. Ceylon was ceded to Great Britain by the peace of Amiens in 1802. The British troops were treacherously massacred or imprisoned by the Adigar of Candy, at Colombo, June 26, 1803. The complete sovereignty of the island was assumed by England in 1815. The governor, lord Torrington, was absolved from a charge of undue severity in suppressing a rebellion, May 1851. The prosperity of Ceylon greatly increased under the administration of sir H. Ward, 1855-60. Sir J. E. Tennent's work, "Ceylon," appeared in 1859.

CHÆRONEA (Bœotia). Here Greece lost its liberty to Philip; 32,000 Macedonians defeating 30,000 Thebans, Athenians, &c., Aug. 6 or 7, 338 B.C. Here Archelaus, lieutenant of Mithridates, was defeated by Sylla, and 110,000 Cappadocians were slain, 86 B.C. See *Coronea*.

CHAIN-BRIDGES. The largest and oldest chain-bridge in the world is said to be that at Kingtung, in China, where it forms a perfect road from the top of one mountain to the top of another. Mr. Telford constructed the first chain-bridge on a grand scale in England, over the strait between Anglesey and the coast of Wales, 1818-25. See *Menai Straits*.

CHAIN-CABLES, PUMPS, AND SHOT. Iron chain-cables were in use by the Veneti, a people intimately connected with the Belgæ of Britain in the time of Cæsar, 55 B.C. These cables came into modern use, and generally in the royal navy of England, in 1812. An Act for the proving and sale of chain-cables and anchors was passed in 1864.—**CHAIN-SHOT**, to destroy the rigging of an enemy's ship, were invented by the Dutch admiral, De Witt, in 1666.—**CHAIN-PUMPS** were first used on board the *Flora*, British frigate, in 1787.

CHAINS, HANGING IN. By the 25th Geo. II. 1752, it was enacted that the judge should direct the bodies of pirates and murderers to be dissected and anatomised, or hung in chains. The custom of hanging in chains was abolished in 1834.

CHALCEDON, Asia Minor, opposite Byzantium, colonised by Megarians, about 684 B.C. It was taken by Darius, B.C. 505; by the Romans, 74; plundered by the Goths, A.D. 259; taken by Chosroes, the Persian, 609; by Orchan, the Turk, 1338. Here was held the "Synod of the Oak," 403; and the fourth general council, which annulled the act of the "Robber Synod," Oct. 8, 451.

CHALCIS. See *Eubœa*.

CHALDEA, the ancient name of Babylonia, but afterwards restricted to the S. W. portion. The Chaldeans were devoted to astronomy and astrology. See *Dan. ii. &c.*—The **CHALDEAN REGISTERS** of celestial observations were commenced 2234 B.C., and were brought down to the taking of Babylon by Alexander, 331 B.C. (a period of 1903 years). These registers were sent by Callisthenes to Aristotle.—**CHALDEAN CHARACTERS**: the Bible was transcribed from the original Hebrew into these characters, now called Hebrew, by Ezra, about 445 B.C.

CHALGROVE (Oxfordshire). At a skirmish here with prince Rupert, June 18, 1643, John Hampden, of the parliament party, was mortally wounded. A column was erected to his memory June 18, 1843.

CHALONS-SUR-MARNE (N. E. France). Here the emperor Aurelian defeated Tetricus, the last of the pretenders to the throne, termed the Thirty Tyrants, 274; and here in 451 Aëtius defeated Attila the Hun, compelling him to retire into Pannonia.

CHAMBERLAIN, early a high court officer in France, Germany, and England. The office of chamberlain of the exchequer was discontinued in 1834. The chamberlain is also a civic officer, as in London, of ancient origin.

LORD GREAT CHAMBERLAIN OF ENGLAND.—The sixth great officer of state, whose duties, among others, relate to coronations and public solemnities. The rank long appertained to the family of De Vere, earls of Oxford, granted to it by Henry I. in 1101. On the death of John De Vere, the sixteenth earl, Mary, his sole daughter, marrying lord Willoughby d'Eresby, the right was established in that nobleman's family by a judgment of the house of peers, 2 Charles I. 1625. On the death of his descendant, unmarried, in July 1779, the house of lords and twelve judges concurred that the office devolved to lady Willoughby d'Eresby, and her sister the lady Georgina Charlotte Bertie, as heirs to their brother Robert, duke of Ancaster, deceased; and that they had powers to appoint a deputy to act for them, not

under the degree of a knight, who, if his majesty approved of him, might officiate accordingly. *Beaton*. The office is now held by the present lord Willoughby d'Eresby (1865).

LORD CHAMBERLAIN OF THE HOUSEHOLD.—An ancient office. The title is from the French *Chambellan*, in Latin *Camerarius*. He has the oversight of the king's chaplains, the officers of the standing and removing wardrobes, beds, tents, revels, music, hunting, and of all the physicians, surgeons, apothecaries, messengers, tradesmen, and artisans retained in his majesty's service. Sir William Stanley, knt., afterwards beheaded, was lord chamberlain, 1 Henry VII. 1485. A vice-chamberlain acts in the absence of the chief; the offices are co-existent. *Beaton*.

CHAMBERS. See *Commerce, Agriculture*.

CHAMBERS' JOURNAL was first published in Feb., 1832.

CHAMBRE ARDENTE (fiery chamber), an extraordinary French tribunal so named from the punishment frequently awarded by it. Francis I. in 1535 and Henry II. in 1549 employed it for the extirpation of heresy, which led to the civil war with the Huguenots in 1560; and in 1679 Louis XIV. appointed one to investigate the poisoning cases which arose after the execution of the marchioness Brinvilliers.

CHAMP DE MARS,* an open square in front of the Military School at Paris, with artificial embankments on each side, extending nearly to the river Seine. Here was held, July 14, 1790, the "fédération," or solemnity of swearing fidelity to the "patriot king" and new constitution: great rejoicings followed, public balls were given by the municipality in the *Champs Elysées*, and Paris was illuminated. On July 14, 1791, a second great meeting was held here, directed by the Jacobin clubs, to sign petitions on the "altar of the country," praying for the abdication of Louis XVI. A commemoration meeting took place July 14, 1792. Another constitution was sworn to here, under the eye of Napoleon I., May 1, 1815, at a ceremony called the *Champ de Mai*. The prince president (now Napoleon III.) had a grand review in the Champ de Mars, and distributed eagles to the army, May 10, 1852.

CHAMPAGNE, an ancient province, N.E. France, formed part of the kingdom of Burgundy, and was governed by counts from the 10th century till it was united to Navarre, count Thibaut becoming king, in 1234. The countess Joanna married Philip V. of France in 1284; and in 1361 Champagne was annexed by their descendant king John.

CHAMPION OF THE KING OF ENGLAND, an ancient office, which since 1377 has been attached to the manor of Scrivelsby, held by the Marmion family. Their descendant, sir Henry Dymoke, the seventeenth of his family who has held the office, died Apr. 28, 1865, and was succeeded by his brother John. At the coronation of the English kings, the champion used to challenge any one that should deny their title.

CHAMPLAIN. See *Lake Champlain*.

* The ancient assemblies of the Frankish people, the germ of parliaments, held annually in March, received this name. In 747, Pepin changed the month to May.

CHANCELLOR OF ENGLAND, LORD HIGH, ranks after the princes of the blood royal as the first lay subject. Anciently the office was conferred upon some dignified ecclesiastic termed *cancellarius*, or doorkeeper, who admitted suitors to the sovereign's presence. Arfastus or Herfast, chaplain to the king (William the Conqueror) and bishop of Elmham, was lord chancellor in 1067. *Hardy*. Thomas à Becket was made chancellor in 1154. The first person qualified by education, to decide causes upon his own judgment, was sir Thomas More, appointed in 1529, before which time the office was more that of a high state functionary than the president of a court of justice. Sir Christopher Hatton, appointed lord chancellor in 1587, was very ignorant, on which account the first reference was made to a master in 1588. In England, the great seal has been frequently put in commission; in 1813 the office of *Vice-Chancellor* was established. * See *Keeper*, and *Vice-Chancellor*.

CHANCELLOR OF IRELAND, LORD HIGH. The earliest nomination was by Richard I., 1189, when Stephen Ridel was elevated to this rank. The office of vice-chancellor was known in Ireland in 1232, Geoffrey Turvillo, archdeacon of Dublin, being so named.

CHANCELLOR OF SCOTLAND, LORD. In the laws of Malcolm II., who reigned 1004, this officer is thus mentioned:—"The chancellor sall at al tymes assist the king in giving him counsall mair secretly nor the rest of the nobility. . . . The chancellor sall be ludgit neir unto the kingis Grace, for keiping of his bodie, and the seill, and that he may be readie, baith day and nicht, at the kingis command." *Sir James Balfour.* Evan was lord chancellor to Malcolm III., surnamed Canmore, in 1057; and James, earl of Seafield, afterwards Findlater, was the last lord chancellor of Scotland, the office having been abolished in 1708, after the union. See *Keeper, Lord.*

CHANCELLOR OF THE EXCHEQUER. See *Exchequer.*

CHANCELLORSVILLE, Virginia, U. S., a large brick hotel, once kept by a Mr. Chancellor, was the site of severe sanguinary conflicts, on May 2, 3, and 4, 1863, between the American federal army of the Potomac under general Hooker, and the confederates under general Lee. On Apr. 28, the federal army crossed the Rappahannock; on May 2, general "Stonewall" Jackson furiously attacked and routed the right wing, but was unfortunately mortally wounded by his own party firing on him by mistake. Gen. Stuart took his command, and after a severe conflict on May 3 and 4, with great loss to both parties, the federals were compelled once more to retreat across the Rappahannock. The struggle has been compared to that at Hougomont during the battle of Waterloo. Jackson died May 9.

CHANCERY, COURT OF. According to some, instituted as early as 605, to others, by Alfred, in 887; settled upon a better footing by William I., in 1067 (*Stow*) or 1070. This court had its origin in the desire to render justice complete, and to moderate the rigour of other courts that are bound to the strict letter of the law. It gives relief to or against infants, notwithstanding their minority: and to or against married women, notwithstanding their coverture; and all frauds, deceits, breaches of trust and confidence, for which there is no redress at common law, are relieviable here. *Blackstone.* See *Chancellors of England.* The delays in chancery proceedings having long given dissatisfaction, the subject was brought before parliament in 1825, and frequently since; which led to the passing of important acts in 1852, 1853, and 1855, to amend the practice in the court of chancery. See *County Courts.*

CHANDOS CLAUSE. See *Counties.*

CHANTING the psalms was adopted by Ambrose from the pagan ceremonies of the Romans, about 350. *Lenglet.* About 602, Gregory the Great added tones to the Ambrosian chant, and established singing schools. Chanting was adopted by some dissenters about 1859.

CHANTRY, a chapel endowed with revenue for priests to sing mass for the souls of the donors. See *Chanting*. Chantries were abolished in England in 1545.

CHAPEL. There are free chapels, chapels of ease, the chapel royal, &c. *Cowel*. The gentlemen pensioners (formerly poor knights of Windsor, who were instituted by the direction of Henry VIII. in his testament, 1546-7) were called knights of the chapel. See *Poor Knights of Windsor*.—The place of conference among printers, and the conference itself, are by them called a *chapel*, it is said because the first work printed in England by Caxton was executed in a ruined chapel in Westminster-abbey.

CHAPLAIN, a clergyman who performs divine service in a chapel, or who is retained by a prince or nobleman. About seventy chaplains are attached to the chapel royal. The chief personages invested with the privilege of retaining chaplains are the following, with the number that was originally allotted to each rank, by 21 Hen. VIII. c. 13 (1529):—

Archbishop 8	Earl 5	Knight of the Garter . . . 3	Baroness 2
Duke 6	Viscount 4	Duchess 2	Master of the Rolls . . . 2
Bishop 6	Baron 3	Marchioness 2	Almoner 2
Marquess 5	Chancellor 3	Countess 2	Chief Justice 1

CHAPLETS, the string of beads used by the Roman Catholics in reciting the Lord's prayer, Ave Maria, &c. See *Beads*.

CHAPTER. Anciently the bishop and clergy lived in the cathedral, the latter to assist the former in performing holy offices and governing the church, until the reign of Henry VIII. The chapter is now an assembly of the clergy of a collegiate church or cathedral. *Cowel*. The chapter-house of Westminster-abbey was built in 1250. By consent of the abbot, the commoners of England held their parliaments there from 1377 until 1547, when Edward VI. granted them the chapel of St. Stephen.

CHARCOAL AIR-FILTERS were devised by Dr. John Stenhouse, F.R.S., in 1853. About the end of the last century Löwitz, a German chemist, discovered that charcoal (carbon) possessed the property of deodorising putrid substances, by absorbing effluvia and gases. Air-filters, based on this property, have been successfully applied to public buildings, &c. Dr. Stenhouse also invented charcoal respirators.

CHARING CROSS, so called from one of the crosses which Edward I. erected to the memory of his queen Eleanor, who died 1291; Charing being the name of the village in which it was built. Some contend that it derived its name from being the resting-place of the *chère royne, dear queen*. It was yet a small village in 1353, and the cross remained till the civil wars in the reign of Charles I., when it was destroyed as a monument of popish superstition. A new cross was erected by the South Eastern Railway Company in 1865.—Charing-cross was built about 1678, nearly as it appeared before the new buildings were commenced in 1829. The first stone of Charing-cross hospital was laid by the duke of Sussex, Sept. 15, 1831. Hungerford-bridge (or Charing-cross bridge) was opened May 1, 1845; taken down July, 1862, and the materials employed in erecting Clifton suspension bridge, beginning March, 1863. See *Clifton*. The **CHARING-CROSS RAILWAY**. The first train passed over it Dec. 2, 1863, and it was opened to the public on Jan. 11, 1864. The new Hungerford railway bridge is built of iron with brick piers. It was constructed by Mr. Hawkshaw.

CHARIOTS. Chariot racing was one of the exercises of Greece. The chariot of the Ethiopian officer (*Acts viii. 27*), is supposed to have been in the form of our chaise with four wheels. Caesar relates that Cassibelannus, after dismissing all his other forces, retained no fewer than 4000 war-chariots about his person. See *Carriages, Coaches, &c.*

CHARITABLE BEQUESTS, &c. Boards for their recovery were constituted in 1764 and 1800, and a board for Ireland (chiefly prelates of the established church), in 1825. The Roman Catholic Charitable Bequests act passed in 1844, and an act for the better administration of Charitable Trusts in 1853, when commissioners were appointed, who have from time to time published voluminous reports. The law relating to the conveyance of land for Charitable Uses was amended in 1861.

CHARITABLE BRETHERN, an order founded by St. John of God, and approved by pope Pius V. 1572; introduced into France, 1601; settled at Paris, 1602. *Hennault*.

CHARITIES AND CHARITY SCHOOLS are very numerous in this country. The Charity Commission reported to parliament that the endowed charities alone of Great Britain amounted to 1,500,000*l.* annually, in 1840. *Parl. Rep.* Charity schools were instituted in London to prevent the seduction of the infant poor into Roman Catholic seminaries, 3 James

II., 1687. *Rapin*. See *Education*. Mr. Low's "Charities of London" (2nd edition) was published 1862.

CHARLEROI,* in Belgium. Great battles have been fought near this town in several wars; the principal in 1690 and 1794. See *Fleurus*. Charleroi was besieged by the prince of Orange in 1672, and was again invested by the same prince with 60,000 men, in 1677; but he was soon obliged to retire. Near here, at Ligny, Napoleon attacked the Prussian line, making it fall back upon Wavres, June 16, 1815.

CHARLES-ET-GEORGES. Two French vessels of this name, professedly conveying free African emigrants (but really slaves), were seized by the Portuguese, in Conducia Bay, Nov. 29, 1857, sent to Lisbon, and condemned as slavers. They were demanded haughtily by the French government, who, on the hesitation of the Portuguese, sent two ships of war to the Tagus. The captured vessels were then surrendered under protest. The conduct of the British government (that of Lord Derby), to whom the Portuguese had referred the dispute, was considered more prudent than dignified. The emperor of France, however, gave up the free emigration scheme.

CHARLESTOWN (Massachusetts) was burnt by the British forces under general Gage, June 17, 1775. Charleston taken by the British, May 7, 1779.

CHARLESTON (South Carolina). The English fleet here was repulsed with great loss, June 28, 1776. It was besieged by the British troops at the latter end of March, 1780, and surrendered May 13 following, with 6000 prisoners; it was evacuated April 14, 1783. Great commotion arose here on Nov. 1860, through the election of Mr. Lincoln for the presidency, he being opposed to slavery. On April 12, 1861, the war began, by the confederates capturing Fort Sumter. See *United States*, 1863. In Dec. 1861, the federals sank a number of vessels laden with stone in order to choke up the entrance to Charleston harbour. On Feb. 17, 1865, the confederates were compelled to retire from Charleston, and the federals replaced their standard on Fort Sumter, April 14, the day on which president Lincoln was assassinated.

"CHARTÉ," the French political constitution acknowledged by Louis XVIII. in 1814. The infraction of this constitution led to the revolution of 1830. The "Charte" was sworn to by Louis-Philippe, Aug. 29, 1830; but set aside by the revolution of 1848.

CHARTER-HOUSE (a corruption of Chartreuse, *which see*), London, formerly a Carthusian monastery, founded in 1371 by sir Walter de Manny, one of the knights of Edward III., now an extensive charitable establishment. The last prior, John Houghton, was executed as a traitor, for denying the king's supremacy, in 1535. After the dissolution of monasteries in 1539, it passed through various hands till Nov. 1, 1611, when it was sold by the earl of Suffolk to Mr. Thomas Sutton for 13,000*l.*, who obtained letters patent directing that it should be called "the hospital of king James, founded in the Charter-house," and that "there should be for ever 16 governors," &c. On the foundation are 80 poor brothers, and 44 poor scholars. Sutton died Dec. 12, 1611. The expenditure for 1853-4 was 22,396*l.*; the receipts 28,908*l.*

CHARTER-PARTY, a covenant between merchants and masters of ships relating to the ship and cargo, is said to have been first used in England about 1243.

CHARTERS granted to corporate towns to protect their manufactures by Henry II. in 1132; called in and modified by Charles II. in 1682; the ancient charters restored in 1698. Alterations were made by the Municipal Reform Act in 1835. See *Magna Charta* and *Boroughs*.

CHARTISTS, the name assumed by large bodies of the working people, shortly after the passing of the Reform Bill in 1832, from their demanding the people's *Charter*, the six points of which were *Universal Suffrage*, *Vote by Ballot*, *Annual Parliaments*, *Payment of the Members*, *the Abolition of the Property Qualification* (which was enacted, June, 1858), and *Equal Electoral Districts*. In 1838 the Chartists assembled in various parts of the country, armed with guns, pikes, and other weapons, and carrying torches and flags. They conducted themselves so tumultuously, that a proclamation was issued against them, Dec. 12. Their petition (agreed to at Birmingham, Aug. 6, 1838) was presented by Mr. T. Attwood, June 14, 1839. They committed great outrages at Birmingham, July 15, 1839, and at Newport (*which see*), Nov. 4, 1839. They held for some time a sort of parliament called the "National Convention," the leading men being Feergus O'Connor, Henry Vincent, Mr. Stephens, &c. On April 10, 1848, they proposed to hold a meeting of 200,000 men on Kennington Common, London, to march thence in procession to Westminster, and present a petition to parliament; but only about 20,000 came. The bank and other establishments

were fortified by military ; and the preventive measures adopted by the government proved so completely successful, that the rioters dispersed after some slight encounters with the police. The monster petition, in detached rolls, was sent in cabs to the house of commons, and not less than 150,000 persons of all ranks (including Louis Napoleon, now emperor) were voluntarily sworn to act as special constables. From this time the proceedings of the Chartists became insignificant.

CHARTREUSE, LA GRANDE, famous as the chief of the monasteries of the Carthusian order, is situated among the rugged mountains near Grenoble, in France. It was founded by Bruno of Cologne about 1084. At the revolution in 1792, the monks were expelled and their valuable library destroyed. They returned to the monastery after the restoration in 1814.

CHARTS AND MAPS. Anaximander of Miletus was the inventor of geographical and celestial charts, about 570 B.C. Modern sea-charts were brought to England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. The first tolerably accurate map of England was drawn by George Lilly, who died in 1559. Gerard Mercator published an atlas of maps in 1595. See *Mercator*.

CHASTITY. The Roman laws justified homicide in defence of one's self or relatives ; and our laws justify a woman for killing a man in defence of her chastity ; and a husband or a father in taking the life of him who attempts to violate his wife or daughter. In 1000 years from the time of Numa, 710 B.C., to the reign of Theodosius the Great, A.D. 394, only eighteen Roman vestals had been condemned for incontinence. See *Vestals, Acre, and Coldingham*.

CHATHAM (Kent), a principal station of the royal navy. Its dockyard, commenced by queen Elizabeth, contains immense naval magazines. The *Chatham Chest*, for the relief of wounded and decayed seamen, originally established here by the queen and admirals Drake and Hawkins, in 1588, was removed to Greenwich in 1803. In 1667, on the 10th June, the Dutch fleet, under admiral De Ruyter, sailed up to this town and burnt several men-of-war ; but the entrance into the Medway is now defended by Sheerness and other forts, and additional fortifications were made at Chatham. On Feb. 8, 1861, a violent outbreak of the convicts was suppressed by the military, and many of the rioters severely flogged. About 1000l. worth of property was destroyed, and many persons were seriously hurt.

CHATHAM ADMINISTRATION.* Formed Aug. 1766; terminated Dec. 1767.

Earl of Chatham, *first minister and lord privy seal*.

Duke of Grafton, *first lord of the treasury*.

Lord Camden, *lord chancellor*.

Charles Townshend, *chancellor of the exchequer*.

Earl of Northampton, *lord president*.

Earl of Shelburne and general Conway, *secretaries of state*.

Sir Charles Saunders (succeeded by sir Edward Hawke), *admiralty*.

Marquess of Granby, *ordnance*.

Lord Hillsborough, *first lord of trade*.

Lord Barrington, *secretary at war*.

Lord North and Sir George Cooke, *joint paymasters*.

Viscount Howe, *treasurer of the navy*.

Duke of Ancaster, lord le Despenser, &c.

CHATILLON (on the Seine, France). Here a congress was held by the four great powers allied against France, at which Caulaincourt attended for Napoleon, Feb. 5, 1814 ; the negotiations for peace were broken off on March 19, following.

CHAT MOSS (Lancashire), a peat bog twelve miles square, in most places so soft as to be incapable of supporting a man or horse, over which George Stephenson, the railway engineer, carried the Liverpool and Manchester railway, after overcoming difficulties considered invincible. The road (literally a floating one) was completed by Jan. 1, 1830, when the first experimental train, drawn by the Rocket locomotive, passed over it.

HATTANOOGA (Tennessee). Near here the federal generals, Sherman and Thomas, defeated the confederate general Bragg, after storming the entrenchments, Nov. 25, 1863. The result was very injurious to the confederates. Bragg retreated into Georgia, and Longstreet into Virginia.

CHAUMONT (on the Marne, France), **TREATY OF**, entered into between Great Britain, Austria, Russia, and Prussia, and signed by these powers respectively, March 1, 1814. This

* William Pitt, earl of Chatham (called the *great commoner*), was born Nov. 15, 1708, entered parliament in 1735; became secretary of state (but virtually the premier) in the Devonshire administration, Nov. 1756, and secretary in the Newcastle administration, Jan. 1757. In 1766 he became premier, lord privy seal, and earl of Chatham, which lord Chesterfield called a *fall upstairs*. He opposed the taxation of the American colonies, but protested against the recognition of their independence, April 7, 1778, and died May 11 following.

treaty was succeeded by the celebrated treaty of Paris, April 11 following, by which Napoleon renounced his sovereignty over France. See *Paris*.

CHEATS are punishable by pillory (since abolished), imprisonment, and fine, 1 *Hawk. L.C.* 188. A rigorous statute was enacted against them in 1542. Persons cheating at play, or winning at any time more than 10*l.* or any valuable thing, were deemed infamous, and were to suffer punishment as in cases of perjury, 9 *Anne*, 1711. *Blackstone*.

CHEESE. It is supposed by Camden and others that the English learned cheese-making from the Romans about the Christian era. Wilts, Gloucester, and Cheshire make vast quantities; the last alone, annually, about 31,000 tons. In 1840 we imported from abroad about 10,000 tons; and in 1864, 41,742 tons. The duty on foreign cheese, producing annually about 50,000*l.*, was taken off in 1860.

CHELSEA. On the site of a college founded by James I. in 1609 for theological disputations against popery, but converted by Charles II. in 1682 to its present purpose, stands *Chelsea college*, an asylum for wounded and superannuated soldiers.—The erection was carried on by James II., and completed by William III. in 1690. The real projector was sir Stephen Fox, grandfather of the orator C. J. Fox. The architect was sir Christopher Wren, and the cost 150,000*l.* In 1850 there were 70,000 *out-* and 539 *in-pensioners*.—The body of the duke of Wellington lay here in state, Nov. 10—17, 1852.—The physic garden of sir Hans Sloane, at Chelsea, was given to the Apothecaries' company in 1721. The Chelsea waterworks were incorporated 1722. The first stone of the Military Asylum, Chelsea, was laid by Frederick, duke of York, June 19, 1801.—The bridge, constructed by Mr. T. Page to connect Chelsea with Battersea-park, was opened in the spring of 1858.

CHELTENHAM (Gloucestershire). Its celebrated mineral spring was discovered in 1718. The king's-well was sunk in 1778; and other wells by Mr. Thompson in 1806. Magnesian salt was first found in the waters in 1811. The theatre was erected in 1804.

CHEMICAL SOCIETIES. One formed in London in 1780, did not long continue. The present chemical society was established in 1841. The Chemical Society at Paris was established in 1857.

CHEMISTRY was introduced into Europe by the Spanish Moors, about 1150; they had learned it from the African Moors, and these from the Egyptians. In Egypt they had, in very early ages, extracted salts from their bases, separated oils, and prepared vinegar and wine; and embalming was a kind of chemical process. The Chinese also claim an early acquaintance with chemistry. The first chemical students in Europe were the Alchemists (see *Alchemy*); but chemistry could not be said to exist as a science till the 17th century; during which its study was promoted by the writings of Bacon and the researches of Hooke, Mayow, and Boyle. In the early part of the 18th century, Dr. Stephen Hales laid the foundation of *Pneumatic Chemistry*, and his contemporary Boerhaave combined the study of chemistry with medicine. These were succeeded by Black, Bergman, Stahl, &c. In 1772, Priestley published his researches on air, having discovered the gases oxygen, ammonia, &c.; and thus commenced a new era in the history of chemistry. He was ably seconded by Lavoisier, Cavendish, Scheele, Chaptal, &c. The 19th century opened with the brilliant discoveries of Davy, continued by Dalton, Faraday, Thomson, &c. *Organic Chemistry* has been very greatly advanced by the labours of Berzelius, Liebig, Dumas, Laurent, Hofmann, Cahours, Frankland,* &c., since 1830. See *Pharmacy*, *Electricity*, *Galvanism*. For the analytical processes termed "*Spectrum analysis*," invented by Kirchhoff and Bunsen (1861), and "*Dialysis*" (1861), and "*Atmolysis*" (1863), invented by Mr. T. Graham, see those articles. The *Royal College of Chemistry*, Oxford Street, London, was established in 1845. The publication of Watt's great "*Dictionary of Chemistry*" began in April, 1863.

CHERBOURG, the great naval fortress and arsenal of France on the coast of Brittany, about 60 or 70 miles equi-distant from Portsmouth and Plymouth. It was captured by our Henry V. in 1418, and lost in 1450. Under the direction of Louis XIV., some works were erected here by the great Vauban, which with some shipping, &c., were destroyed by the British, Aug. 6, 7, 1758. The works were resumed on a stupendous scale by Louis XVI.;

* In 1828 Wöhler succeeded in producing artificially *urea*, a body hitherto known only as a product of the animal organism. Since then, acetic acid, alcohol, grape sugar, various essential oils, similar to those of the pine apple, pear, garlic, &c., have been formed by combinations of the gases, oxygen, hydrogen, and carbonic acid. The barrier formed by chemists between organic and inorganic bodies is thus broken down, though the names are still retained.

but their progress was interrupted by the revolution. The breakwater, commenced in 1783, resumed by Napoleon I. about 1803, and finally completed in 1813, is a magnificent work, forming a secure harbour, capable of affording anchorage for nearly the whole navy of France, and protected by strong fortifications, increased by the present emperor. On Aug. 4, 5, 1858, the railway and the Grand Napoleon docks were opened, the latter in the presence of the queen of England and court. The British fleet visited Cherbourg, Aug. 15-17, 1865, and the officers and men were treated with much hospitality.

CHERITON DOWN (Hants). Here sir Wm. Waller defeated the royalists under lord Hopton, May 29, 1644.

CHERRY, the *Prunus Cerasus* (so called from Cerasus, a city of Pontus, whence the tree was brought by Lucullus to Rome, about 70 B.C.), was first planted in Britain, it is said, about 100. Fine kinds were brought from Flanders, in 1540, and planted in Kent, with much success.

CHESAPEAKE. At the mouth of this river a contest took place between the British admiral Greaves and the French admiral De Grasse, in the interest of the revolted states of America; the former was obliged to retire, 1781. The Chesapeake and Delaware were blockaded by the British fleet in the American war of 1812, and the bay was, at that period, the scene of great hostilities of various results.—The *Chesapeake* American frigate, commanded by capt. Lawrence (50 guns, 376 men), struck to the *Shannon* British frigate (49 guns, 330 men), commanded by capt. Philip Vere Broke, after a severe action of eleven minutes, June 1, 1813. Capt. Lawrence, who had invited the contest, died of his wounds.

CHESS, a game invented, according to some authorities, by Palamedes, 680 B.C.; and according to others, in the fifth century of our era. The learned Hyde and sir William Jones concur in stating that the origin of chess is to be traced to India. The automaton chess-player (a piece of machinery) was exhibited in England in 1769.* A chess congress was held at New York in 1857, and an international one in London in June and July, 1862.

CHESTER (England, N. W.), the British Caerleon and the Roman Deva, the station of the twentieth legion, *Valeria Victrix*, quitted by them about 476. The city wall was first built by Edelfleda, 908; and Hugh Lupus, the earl, nephew of William I., rebuilt the Saxon castle in 1084, and the abbey of St. Werburgh. Chester was incorporated by Henry III. and made a distinct county. It was ravaged by the Danes, 980; and nearly destroyed by an accidental fire in 1471. A fatal gunpowder explosion occurred Nov. 5, 1772. The exchange and town hall were burnt Dec. 30, 1862.—The see was anciently part of Lichfield, one of whose bishops, Peter, removing the seat thither in 1075, occasioned his successors to be styled bishops of Chester; but it was not erected into a distinct bishopric until the dissolution of monasteries. Henry VIII. in 1542 raised it to this dignity, and allotted the church of the abbey of St. Werburgh for the cathedral. This see is valued in the king's books at 420*l.* 1*s.* 8*d.* per annum. Present income 4500*l.*

CHICAMAUGA ("the stream of death"), near the Chattanooga, Tennessee, North America. Near here the confederates under general Bragg, aided by Longstreet, totally defeated the federals under Rosecrans, Sept. 19, 20, 1863. The loss was severe on both sides. The credit of the victory is attributed to Longstreet; its fruitlessness is assigned to Bragg.

CHICHESTER (Sussex), built by Cissa, about 540. The cathedral was completed about 1088, burnt with the city in 1114, and rebuilt by bishop Seffrid about 1187. The present cathedral was erected during the 13th century. The spire fell Feb. 20, 1861, and the foundation of a new one was laid May 2, 1865. The bishopric originated thus: Wilfrida, archbishop of York, compelled to flee by Egfrid, king of Northumberland, preached the gospel in this country, and built a church in the Isle of Selsey, about 673. * A chess-club was formed at Slaughter's coffee-house, St. Martin's lane, in 1747. M. F. A. Danican, known as Phillidor, played three matches blindfold at the Salopian; he died in 1795. The London Chess-club was founded in 1807, and St. George's in 1833. In Dec. 1861 Herr Paulsen played ten games at once, of which he won five, and lost one; three were drawn, and one not played out.

CHILDREN. Many ancient nations exposed their infants,—the Egyptians on the banks of rivers, and the Greeks on highways,—when they could not support or educate them; in such cases, they were taken care of, and humanely protected by the state. The custom, which long previously existed, of English parents selling their children to the Irish for slaves, was prohibited in the reign of Canute, about 1017. *Mat. Paris.* See *Foundling*.

CHILI (S. America), discovered by Diego de Almagro, one of the conquerors of Peru, 1535. When Almagro crossed the Cordilleras, the natives, regarding the Spaniards on their first visit as allied to the Divinity, collected for them gold and silver amounting to 290,000 ducats, a present which led to the subsequent cruelties and rapacity of the invaders. Chili was subdued, but not wholly, in 1546. Population in 1857, 1,558,319.

CHILLIANWALLAH, BATTLE OF, India, between the Sikh forces in considerable strength, and the British commanded by lord (afterwards viscount) Gough, fought Jan. 13, 1849. The Sikhs were completely routed, but the loss of the British was very severe: 26 officers were killed and 66 wounded, and 731 rank and file killed, and 1446 wounded. The Sikh loss was 3000 killed and 4000 wounded.† On Feb. 21, lord Gough attacked the Sikh army, under Shere Singh, in its position at Goojerat, with complete success; and the whole of the enemy's camp fell into the hands of the British.

* Chicory had been for many years so largely mixed with coffee in England, that it became a matter of serious complaint, the loss of revenue being estimated at 100,000*l.* a-year. An excise order was issued, Aug. 3, 1852, interdicting the mixture of chicory with coffee. The admixture, however, has since been permitted, provided the word "chicory" be plainly printed on each parcel sold. ceiling, in 1300. Chimneys were general in domestic architecture in 1310. Act to regulate chimney-sweeping, 28 Geo. III. 1789. The *chimney-sweeping machine* was invented by Smart in 1805. A statute regulating the trade, the apprenticeship of children, the construction of flues, preventing calling "sweep" in the streets, &c., passed 1834. By 5 Viet. 1840, it is not lawful for master sweeps to take apprentices under sixteen years of age: and since July 1, 1842, no individual under twenty-one may ascend a chimney. In 1864, the enforcement of this law was made more stringent, it having been neglected. At the chemical works, Glasgow, is a chimney (there termed a *stalk*) 420 feet in height; the height of the Monument in London being 202 feet; of St. Paul's, 404 feet.

CHINA, the "Celestial Empire," in Eastern Asia, for which the Chinese annals claim an antiquity of from 80,000 to 100,000 years B.C., is allowed to have commenced about 2500 B.C.; by others to have been founded by Fohi, supposed to be the Noah of the Bible, 2240 B.C. We are told that the Chinese were acute astronomers in the reign of Yao, 2357 B.C. Towards the close of the 7th century B.C., the history of China becomes more distinct. Twenty-two dynasties have reigned, including the present. In the battle between Phraates and the Scythians, 129 B.C., the Chinese aided the latter, and afterwards ravaged the coasts of the Caspian, which is their first appearance in history. *Longlet*. The population of China was estimated at 190,348,228 in 1757; and at 414,607,000 in 1860.

‡ The emperor Taou-Kwang, who died Feb. 25, 1850, during the latter part of his reign, became liberal in his views, and favoured the introduction of European arts; but his son, the late emperor, a rash and narrow-minded prince, quickly departed from his father's wise policy, and adopted reactionary measures, particularly against English influence. An insurrection broke out in consequence, Aug. 1850, and quickly became of alarming importance. The insurgents at first proposed only to expel the Tartars; but in March 1851, a pretender was announced among them, first by the name of Tien-teh (Celestial Virtue), but afterwards assuming other names. He is stated to have been a native of Quang si, of obscure origin, but to have obtained some literary knowledge at Canton about 1835, and also to have become acquainted at that time with the principles of Christianity from a Chinese Christian, named Leung-afa, and also from the missionary Roberts in 1844. He announced himself as the restorer of the worship of the true God, Shang-ti, but has derived many of his dogmas from the Bible. He declared himself to be the monarch of all beneath the sky, the true lord of China (and thus of all the world), the brother of Jesus, and the second son of God, and demanded universal submission. He made overtures for alliance to lord Elgin, in November, 1860. His followers are termed *Taepings*, "princes of peace," a title utterly belied by their atrocious deeds. The rebellion was virtually terminated July 18, 1864, by the capture of Nankin, the suicide of the Tien-wang, and the execution of the military leaders.

CHINA PORCELAIN introduced into England about 1531. See *Pottery*.

CHINA ROSE, &c. The *Rosa indica* was brought from China, and successfully planted in England, 1786; the Chinese apple-tree, or *Pyrus spectabilis*, about 1780.

CHIOS (now Scio), an isle in the Greek Archipelago, revolted against Athens, 412 B.C. It partook of the fortunes of the Greeks, being conquered by the Venetians, A.D. 1124; by the Crusaders, 1204; by the Greek emperor and Romans, 1329; by the Genoese, 1329, and by the Turks in 1459. A dreadful massacre of the inhabitants by the Turks took place April 11, 1822, during the Greek insurrection.*

CHIPPAWA (N. America). Here the British under Riall were defeated by the Americans under Browne, July 5, 1814. The Americans were defeated by the British, under generals Drummond and Riall, July 25 following, but the latter was wounded and taken prisoner.

CHIVALRY arose out of the feudal system in the latter part of the 8th century (*chevalier*, or knight, being derived from the *caballarius*, the equipped feudal tenant on horseback). From the 12th to the 15th century it tended to refine manners. The knight swore to accomplish the duties of his profession, as the champion of God and the ladies; to speak the truth, to maintain the right, to protect the distressed, to practise courtesy, to fulfil obligations, and to vindicate in every perilous adventure his honour and character. Chivalry, which owed its origin to the feudal system, expired with it. See *Tournaments*. By letters patent of James I. the earl-marshal of England had "the like jurisdiction in the courts of chivalry, when the office of lord high constable was vacant, as this latter and the marshal did jointly exercise," 1623. See *Knighthood*.

CHLORINE (Greek *chloros*, pale green), a gas first obtained by Scheele in 1774, by treating manganese with muriatic (hydrochloric) acid. Sir H. Davy, in 1810, proved this gas to be an element, and named it chlorine. Combined with sodium it forms common salt (chloride of sodium), and combined with lime, the bleaching powder and disinfectant—chloride of lime. The bleaching powers of chlorine were made known by Berthollet in 1785. In 1823 chlorine was condensed into a liquid by Faraday.

CHLOROFORM (the ter-chloride of the hypothetical radical formyl) is a compound of carbon, hydrogen, and chlorine, and was made from alcohol, water, and bleaching powder. It was discovered by Soubeiran in 1831, and its composition was determined by Dumas in 1834. The term "chloric ether" was applied in 1820 to a mixture of chlorine and olefiant gas. Chloroform was first applied as an anæsthetic by Dr. Simpson of Edinburgh; it was first administered in England on Dec. 14, 1848, by Mr. James Robinson, surgeon-dentist.†

CHOBHAM COMMON, in Surrey. A military camp was formed here on June 14, 1853, by a force between 8000 and 10,000 strong. The last field-day took place Aug. 17, 1860. Only one serious case of misconduct was reported during all the time.

CHOCOLATE, made of the cocoa berry, introduced into Europe (from Mexico and the Brazils) about 1520, was sold in the London coffee-houses soon after their establishment, 1650.

* The slaughter lasted 10 days: 40,000 of both sexes falling victims to the sword, or to the fire, which raged until every house, save those of the foreign consuls, was burned to the ground. 7000 Greeks, who had fled to the mountains, were induced to surrender by a promise of amnesty, guaranteed by the consuls of England, France, and Austria: yet even they were all butchered! The only exception made during the massacre was in favour of the young and more beautiful women and boys, 30,000 of whom were reserved for the markets.

† A committee of the Royal Medical and Chirurgical Society in July, 1864, after examining statistics, reported that the use of anæsthetics had in no degree increased the rate of mortality.

CHOIR. This was separated from the nave of the church in the time of Constantine. The choral service was first used in England at Canterbury, 677. See *Chanting*.

CHOLERA MORBUS, known in its more malignant form as the Indian cholera, made great ravages in the north, east, and south of Europe, and in Asia, where alone it carried off more than 900,000 persons, in 1829-30. In England and Wales in 1848-9, 53,293 persons died of cholera, and in 1854, 20,097.

Cholera appears at Sunderland . . . Oct. 26, 1831	and other northern towns, suffer much from cholera . . . Sept. 1853
And at Edinburgh . . . Feb. 6, 1832	It rages in Italy and Sicily; above 10,000 are said to have died at Naples; it was also very fatal to the allied troops at Varna, autumn, 1854
First observed at Rotherhithe and Limehouse, London, Feb. 13; and in Dublin . . . March 3	Cholera very severe for a short time in the southern parts of London, and in Soho and St. James's, Westminster . . . Aug. and Sept. "
The mortality very great, but more so on the Continent; 18,000 deaths at Paris, between March and August, 1832	Raging in Alexandria, June; abated . . . July, 1865
Cholera rages in Rome, the Two Sicilies, Genoa, Berlin, &c., in July and August, 1837	Prevailing in Ancona (843 deaths) Aug., subsiding . . . Sept. "
Another visitation of cholera in England: the number of deaths in London, for the week ending Sept. 15, 1849, was 3183; the ordinary average 1003; and the number of deaths by cholera from June 17 to Oct. 2, in London alone, 13,161. The mortality lessened and the distemper disappeared . . . Oct. 13, 1849	Very severe in Constantinople, nearly 50,000 deaths, Aug.; subsides after the great fire, Sept. 6 "
Newcastle-upon-Tyne, Hexham, Tynemouth,	Cases at Marseilles, Toulon, and Southampton, end of . . . Sept. "

CHORAGUS, a Greek officer who regulated the chorus in the public feasts, worship, &c. Stesichorus (or Tysias) received this name, he having first taught the chorus to dance to the lyre, 556 B.C. *Quintil*.

CHORUS-SINGING was early practised at Athens. Hypodicius, of Chalcides, carried off the prize for the best voice, 508 B.C. *Parian marbles*. See *Music*.

CHOUANS, a name given to the Bretons during the war of La Vendée in 1792, from their chief Jean Cottureau, using the cry of the *Chat-haunt*, or screech-owl, as a signal. He was killed in 1794. Georges Cadoudal, their last chief, was connected with Pichegru in a conspiracy against Napoleon when first consul, and was executed in 1804.

CHRISM, consecrated oil, was used early in the ceremonies of the Roman and Greek churches. Musk, saffron, cinnamon, roses, and frankincense, are mentioned as used with the oil, in 1541. It was ordained that chrism should consist of oil and balsam only; the one representing the human nature of Christ, and the other his divine nature, 1596.

CHRIST. See *Jesus Christ*. **CHRIST'S HOSPITAL** (the *Blue-Coat* school) was established by Edward VI. 1553, on the site of the Grey Friars monastery. A mathematical ward was founded by Charles II., 1672, and the city of London and the community of England have contributed to render it a richly endowed charity. The *Times* ward was founded in 1841. Large portions of the edifice having fallen into decay, it was rebuilt: in 1822 a new infirmary was completed, and in 1825 (April 25) the duke of York laid the first stone of the magnificent new hall.—On Sept. 24, 1854, the master, Dr. Jacob, in a sermon, in the church of the hospital, censured the system of education and the general administration of the establishment, and many improvements have since been made. The subordinate school at Hertford, for 416 younger boys and 80 girls, was founded in 1683. **CHRIST'S-THORN**, conjectured to be the plant of which our Saviour's crown of thorns was composed, came hither from the south of Europe before 1596.

CHRISTIAN ERA. See *Anno Domini*. **CHRISTIAN KNOWLEDGE SOCIETY** was founded in 1698 to promote charity schools, and to disperse bibles and religious tracts. It has an annual revenue of about 100,000*l*. **MOST CHRISTIAN KING**; *Christianissimus Rex*, a title conferred by pope Paul II. in 1469 on the crafty Louis XI. of France.

CHRISTIANIA, the capital of Norway, built in 1624, by Christian IV. of Denmark, to replace Opslo (the ancient capital founded by Harold Haardrade, 1058), which had been destroyed by fire. On April 13, 1858, Christiania suffered by fire, the loss being about 250,000*l*. The university was established in 1811. New Storthing (parliament house) built 1861-2.

CHRISTIANITY. The name Christian was first given to the believers and followers of Christ's doctrines at Antioch, in Syria, 43 (*Acts* xi. 26, 1 *Peter* iv. 6). The first Christians were divided into *episcopoi* (bishops or overseers), *presbyteroi* (elders), *diaconoi* (ministers or deacons), and *pistoi* (believers); afterwards were added *catechumens*, or learners, and *energumens*, who were to be exorcised. See *Persecutions*.

Into Flanders in the 7th century.		Into China, where it made some progress (but was afterwards extirpated, and thousands of Chinese Christians were put to death)	1575
Into Saxony, by Charlemagne	785	Into India and America, in the 16th century.	
Into Denmark, under Harold	827	Into Japan, by Xavier and the Jesuits, 1549; but the Christians were exterminated in	1638
Into Bohemia, under Borzivoi	894	Christianity re-established in Greece	1628

CHRISTMAS-DAY, Dec. 25 (from *Christ* and the Saxon *mæsse*, signifying the *mass* and a *feast*), a festival in commemoration of the nativity of our Saviour, said to have been first kept 98; and ordered to be held as a solemn feast, by pope Telesphorus, about 137.† In the eastern church, Christmas and the Epiphany (*which see*) are deemed but one and the same feast. The holly and mistletoe used at Christmas are said to be the remains of the religious observances of the Druids. See *Anno Domini*.

CHRISTMAS ISLAND, in the Pacific Ocean, so named by captain Cook, who landed here on Christmas-day, 1777. He had passed Christmas-day at Christmas-sound, 1774. On the shore of Christmas Harbour, visited by him in 1776, one of his men found a piece of parchment with this inscription: "Ludovico XV. Galliarum rege, et d. Boyneri regi a secretis ad res maritimas, annis 1772 et 1773." On the other side of it captain Cook wrote: "Navis Resolution et Discovery de rege Magnæ Britannie, Dec. 1776," and placed it in a bottle safely.

CHRISTOPHER'S, St. (or St. Kitt's), a West India island, discovered in 1493, by Columbus, who gave it his own name. Settled by the English and French 1623 or 1626. Ceded to England by the peace of Utrecht, 1713. Taken by the French in 1782, but restored the next year. The town of Basseterre suffered from a fire, Sept. 3, 1776.

CHROMIUM (Greek, *chrome* colour), a rare metal, discovered by Vauquelin in 1797. It is found combined with iron and lead, and forms the colouring matter of the emerald.

CHROMO-LITHOGRAPHY. See *Printing in Colours*.

CHRONICLES. The earliest are those of the Jews, Chinese, and Hindoos. In Scripture there are two "Books of Chronicles." Collections of the British chroniclers have been published by Camden, Gale, &c., since 1602; in the present century by the English Historical Society, &c. In 1858, the publication of "Chronicles and Memorials of Great Britain and Ireland during the Middle Ages," commenced under the direction of the Master of the Rolls. Macray's "Manual of British Historians" was published 1845.

CHRONOLOGY (the science of time) has for its object the arrangement and exhibition of the various events of the history of the world in the order of their succession, and the ascertaining the intervals between them. See *Eras* and *Epochs*. Valuable works on the subject are *l'Art de Vérifier les Dates*, compiled by the Benedictines (1783—1820). Playfair's *Chronology*, 1784; Blair's *Chronology*, 1753 (new editions by sir H. Ellis, in 1844, and by Mr. Rosse, in 1856). The *Oxford Chronological Tables*, 1838. Sir Harris Nicolas' *Chronology of History*, 1833; new edition, 1852. Hales' *Chronology*, 2nd edition, 1830; Mr. H. Fynes-Clinton's *Fasti Hellenici and Fasti Romani* (1824-50).

CHRONOMETER. See *Clocks* and *Harrison*.

* It is, traditionally, said that Gregory the Great, shortly before his elevation to the papal chair, chanced one day to pass through the slave-market at Rome, and perceiving some children of great beauty who were set up for sale, he inquired about their country, and finding they were English pagans, he is said to have cried out in the Latin language, "*Non Angli sed Angeli forent, si essent Christiani*;" that is, "They would not be English, but angels, if they were Christians." From that time he was struck with an ardent desire to convert that unenlightened nation, and ordered a monk named Austin, or Augustin, and others of the same fraternity, to undertake the mission to Britain in the year 596.

† Diocletian, the Roman emperor, keeping his court at Nicomedia, being informed that the Christians were assembled on this day in great multitudes to celebrate Christ's nativity, ordered the doors to be shut, and the church to be set on fire, and 600 perished in the burning pile. This was the commencement of the tenth persecution, which lasted ten years, 303.

CHRONOSCOPE, an apparatus invented by professor Wheatstone in 1840, to measure small intervals of time. It has been applied to the velocity of projectiles, and of the electric current. Chronoscopes were invented by Pouillet, and others in 1844.

CHUNAR, TREATY OF, concluded between the nabob of Oude and governor Hastings, by which the nabob was relieved of all his debts to the East India Company, on condition of his seizing the property of the begums, his mother and grandmother, and delivering it up to the English, Sep. 19, 1781. This treaty enabled the nabob to take the lands of Fyzoola Khan, a Rohilla chief, who had settled at Rampoor, under guarantee of the English. The nabob presented to Mr. Hastings 100,000*l*.

CHURCH (probably derived from the Greek *kyriakos*, pertaining to the Lord, *Kyrios*), signifies a collective body of Christians, and also the place where they meet. In the New Testament, it signifies "congregation," in the original *ekklesia*. Christian architecture commenced with Constantine, who, after he was settled in his government, erected, at Rome, churches (called basilicas, from the Greek *basileus*, a king); St. Peter's being erected about 330. His successors erected others; and adopted the heathen temples as places of worship. Several very ancient churches exist in Britain and Ireland. See *Architecture*; *Choir* and *Chanting*; *Rome, Modern*: and *Popes*.

* The church of England consists of three *orders of clergy*—bishops, priests, and deacons; viz., two archbishops and twenty-five bishops, exclusive of the see of Sodor and Man. The other dignities are chancellors, deans (of cathedrals and collegiate churches), archdeacons, prebendaries, canons, minor canons, and priest-vicars: these and the incumbents of rectories, vicarages, and chapelries, make the number of preferments of the established church, according to official returns, 12,327. The number of *benefices* in England and Wales, according to parliamentary returns, in 1844, was 11,127, and the number of glebe-houses 5527. The number of parishes is 11,077, and of churches and chapels about 14,100. The number of benefices in Ireland was 1495, to which there were not more than about 900 glebe-houses attached, the rest having no glebe-houses. An act was passed in 1860 for the union of contiguous benefices. See *Church of England*.

CHURCH OF IRELAND is now in connection with that of England—the United Church of England and Ireland. Previously to the Church Temporalities Act of Will. IV. in 1833, there were four archbishoprics and eighteen bishoprics in Ireland, of which two archbishoprics and eight bishoprics have ceased; that act providing for the union or abolition of certain sees, according as the possessors of them died. See *Bishops*.

CHURCH OF NORTH AMERICA. The Episcopal church was established in Nov. 1784, when bishop Seabury, chosen by the churches in Connecticut, was consecrated in Scotland. The first convention was held at Philadelphia in 1785. On Feb. 4, 1787, two more American bishops were consecrated at Lambeth. In 1851 there were 37 bishops.

CHURCH OF SCOTLAND. See *Bishops in Scotland*. On the abolition of Episcopacy in Scotland in 1638, Presbyterianism became the established religion. Its distinguishing tenets were first embodied in the formulary of faith, said to have been compiled by John Knox, in 1560, which was approved by the parliament and ratified in 1567, finally settled by an act of the Scottish senate in 1696, and secured by the treaty of union with England in 1707. The church of Scotland is regulated by four courts—the general assembly,* the synod, the presbytery, and kirk sessions. See *Presbyterians*. A large body seceded from this church in 1843, and took the name of the "Free Church of Scotland," *which see*.

CHURCH-RATES. The maintaining the church (*i. e.* the building) in repair belongs to the parishioners, who have the sole power of taxing themselves for the expense when assembled in vestry. The enforcement of payment, which is continually disputed by dissenters and others, belongs to the ecclesiastical courts. Many attempts have been made to abolish church-rates. A bill for this purpose has passed the commons only several times since 1855; one was thrown out in May, 1861. See *Braintree*.

CHURCH-SERVICES were ordered by pope Vitellianus to be read in Latin 663; by queen Elizabeth in 1558 to be read in English.

CHURCH-WARDENS, officers of the church, appointed by the first canon of the synod of London in 1127. Overseers in every parish were also appointed by the same body, and they continue now nearly as then constituted. *Johnson's Canons*.

CHURCHING OF WOMEN is the act of returning thanks in the church by women after child-birth. It began about 214. *Wheatley*. See *Purification*.

CHUSAN, a Chinese isle. See *China*, 1840, 1841, 1860.

CIDER (*Zider*, German), when first made in England, was called wine, about 1284. The earl of Manchester, when ambassador in France, is said to have frequently passed off cider for a delicious wine. It was subjected to the excise in 1763 *et seq.* A powerful spirit is drawn from cider by distillation.—Many orchards were planted in Herefordshire by lord Scudamore, ambassador from Charles I. to France. John Philips published his poem "Cider" in 1706.

CILICIA, in Asia Minor, partook of the fortunes of that country. It became a Roman province 67 B.C., and was conquered by the Turks, A.D. 1387.

* The first general assembly of the church was held Dec. 20, 1560. The general assembly constitutes the highest ecclesiastical court in the kingdom; it meets annually in Edinburgh in May, and sits about ten days. It consists of a grand commissioner, appointed by the sovereign, and delegates from presbyteries, royal boroughs, and universities, some being laymen. To this court all appeals from the inferior ecclesiastical courts lie, and its decision is final.

CIMBRI, a Teutonic race, who came from Jutland, and invaded the Roman empire about 120 B.C. They defeated the Romans, under Cn. Paperius Carbo, 113 B.C.; under the consul, Marcus Silanus, 109 B.C., and under Manlius, on the banks of the Rhine, where 80,000 Romans were slain, 105 B.C. Their allies, the Teutones, were defeated by Marius in two battles at Aquæ Sextiæ (Aix) in Gaul; 200,000 were killed, and 70,000 made prisoners, 102 B.C. The Cimbri were defeated by Marius and Catulus, as they were again endeavouring to enter Italy; 120,000 were killed, and 60,000 taken prisoners, 101 B.C. They were afterwards absorbed into the Teutones or Saxons.

CIMENTO (Italian, *experiment*). The "Accademia del Cimento," at Florence, held its first meeting for making scientific experiments, June 18, 1657. It was patronised by Ferdinand, grand duke of Tuscany. Its establishment was followed by the foundation of the Royal Society of London in 1660, and the Academy of Sciences at Paris in 1666.

CINCINNATI. A society established in the American army soon after the peace of 1783, "to perpetuate friendship," and to raise a fund for relieving the widows and orphans of those who had fallen during the war." On the badge was a figure of Cincinnatus. The people dreading military influence, the officers gave up the society.

CINNAMON, a species of laurel in Ceylon, is mentioned among the perfumes of the sanctuary, *Eccodus* xxx. 23. It was found in the American forests, by Don Ulloa, in 1736, and was cultivated in Jamaica and Dominica in 1788.

CINQUE-CENTO (five hundred); *ter-cento*, &c., see note to article *Italy*.

CINQUE PORTS, on the south coast of England, were originally *five* (hence the name) —Dover, Hastings, Hythe, Romney, and Sandwich: Winchelsea and Rye were afterwards added. *Jeake*. Their jurisdiction was vested in barons, called wardens, for the better security of the coast, these ports being nearest to France, and considered the keys of the kingdom; instituted by William I. in 1078. *Rapin*. The latest lord-wardens were the duke of Wellington, 1828-52; the marquess of Dalhousie, 1852-60; lord Palmerston, appointed March, 1861.

CINTRA (Portugal). The convention of Cintra was concluded between the British army under sir Hew Dalrymple, and the French under marshal Junot. By this compact, on Aug. 30, 1808, shortly after the battle of Vimeira (Aug. 22), the defeated French army was allowed to evacuate Portugal in British ships, carrying with them all their spoil. The convention was publicly condemned, and in consequence a court of inquiry was held at Chelsea, which exonerated the British commanders, who, however, were never again employed. Wellington and Napoleon both justified sir Hew Dalrymple.

CIRCASSIA (Asia, on N. side of the Caucasus). The Circassians are said to be descended from the Albanians. They were unsubdued, even by Timour. In the 16th century the greater part of them acknowledged the authority of the czar, Ivan II. of Russia, and about 1745, the princes of Kabarda took oaths of fealty. Many Circassians became Mahometans in the 18th century.

Above a million Circassians emigrate into Turkey, and suffer many privations, partially relieved by the sultan's government, June, et seq. ,

CIRCENSIAN GAMES were combats in the Roman circus (at first in honour of Consus, the god of councils, but afterwards of Jupiter, Neptune, Juno, and Minerva), instituted by Evander, and established at Rome 732 B.C. by Romulus, at the time of the rape of the Sabines. They were an imitation of the Olympian games among the Greeks, and, by way of eminence, were called the Great games, but Tarquin named them Circensian; their celebration continued from Sept. 4 to 12.

CIRCLE. The quadrature, or ratio of the diameter of the circle to its circumference, has exercised the ingenuity of mathematicians of all ages. Archimedes, about 221 B.C., gave it as 7 to 22; Abraham Sharp (1717) as 1 to 3 and 72 decimals, and Lagny (1719) as 1 to 3 and 122 decimals.

CIRCLES OF GERMANY (formed about 1500, to distinguish the members of the diet of the empire) were, in 1512, Franconia, Bavaria, Upper and Lower Rhine, Westphalia, and Saxony; in 1789, Austria, Burgundy, Westphalia, Palatinate, Upper Rhine, Suabia, Bavaria, Franconia, and Upper and Lower Saxony. In 1804 these divisions were annulled by the establishment of the Confederation of the Rhine, in 1806 (*which see*).

CIRCUITS IN ENGLAND were divided into three, and three justices were appointed to each, 1176. They were afterwards divided into four, with five justices to each division, 1180. *Rapin*. They have been frequently altered. England and Wales are at present divided into eight—each travelled in spring and summer for the trial of civil and criminal cases; the larger towns are visited in winter for trials of criminals only: this is called “going the circuit.” There are monthly sessions for the city of London and county of Middlesex.

CIRCULATING LIBRARY. Stationers lent books on hire in the middle ages. The public circulating library in England, opened by Samuel Fancourt, a dissenting minister of Salisbury, about 1740, failed; but similar institutions at Bath and in London succeeded, and others were established throughout the kingdom. There was a circulating library at Crane-court, London, in 1748, of which a catalogue in two vols. was published.—No books can be taken from the British Museum except for judicial purposes, but the libraries of the Royal Society and the principal scientific societies, except that of the Royal Institution, London, are circulating.—The London Library (circulating) was founded in 1841, under the highest auspices, and is of great value to literary men.—Of the subscription libraries belonging to individuals, that of Mr. C. E. Mudie, in New Oxford-street, is the most remarkable for the large quantity and good quality of the books: several hundreds, sometimes thousands, of copies of a new work being in circulation. It was founded in 1842, and grew into celebrity in Dec. 1848, when the first two volumes of Macaulay’s History of England were published, for which there was an unprecedented demand, which this library supplied. The hall, having the walls covered with shelves filled with new books, was opened in Dec. 1860. The “Circulating Library Company” was founded in Jan. 1862.

CIRCULATION OF THE BLOOD. See *Blood*.

CIRCUMCISION (instituted 1897 B.C.) was the seal of the covenant made by God with Abraham. It was practised by the ancient Egyptians, and is still by the Copts and some oriental nations. The Festival of the Circumcision (of Christ), originally “the Octave of Christmas,” is mentioned about 487. It was introduced into the Liturgy in 1550.

CIRCUS. There were eight (some say ten) buildings of this kind at Rome; the largest, the *Circus Maximus*, was built by the elder Tarquin, 605 B.C. It was an oval figure; length three stadia and a half, or more than three English furlongs; breadth 960 Roman feet. It was enlarged by Julius Cæsar so as to seat 150,000 persons, and was rebuilt by Augustus. Julius Cæsar introduced in it large canals of water, which could be quickly covered with vessels, and represent a sea fight. *Pliny*. See *Amphitheatres*. In the 5th and 6th centuries after Christ, Constantinople was greatly disturbed by the white, red, green, and blue factions of the circus. In 501, about 3000 persons were killed. In Jan. 532 a fierce conflict between the blue and green factions lasted five days, and was only suppressed by the efforts of Belisarius after a frightful slaughter. The watchword was “Nika!” (conquer).

CIRRHA, a town of Phocis (N. Greece), razed to the ground in the Sacred War, 586 B.C., for sacrilege.

* The first ship that sailed round the earth, and hence determined its being globular, was Magellan’s, or Magelhaen’s; he was a native of Portugal, in the service of Spain, and by keeping a westerly course he returned to the same place he had set out from in 1519. The voyage was completed in 3 years and 29 days; but Magellan was killed on his homeward passage, at the Philippines, in 1521.

CISALPINE REPUBLIC (N. Italy) was formed by the French in May, 1797, out of the *Cispadane* and *Transpadane* republics, acknowledged by the emperor of Germany to be independent, by the treaty of Campo Formio (*which see*), Oct. 17 following. It received a new constitution in Sept. 1798; but merged into the kingdom of Italy in March, 1805. See *Italy*.

CISTERCIANS, an order of monks founded by Robert, a Benedictine, abbot of Citeaux (the order of Citeaux), in France, near the end of the 11th century. For a time it governed almost all Europe. The monks observed silence, abstained from flesh, lay on straw, and wore neither shoes nor shirts. *De Vitri*. They were reformed by St. Bernard. See *Bernardines*.

CITATE. The Russian general Gortschakoff, intending to storm Kalafat, threw up redoubts at Citate, close to the Danube, which were stormed by the Turks under Omer Pacha, Jan. 6, 1854. The fighting continued on the 7th, 8th, and 9th, when the Russians were compelled to retire to their former position at Krajowa, having lost 1500 killed and 2000 wounded. The loss of the Turks was estimated at 338 killed and 700 wounded.

CITY. (French *cit *, Italian *citt *, Latin *civitas*.) The word has been used in England only since the conquest, when London was called *Londonburgh*. Cities were first incorporated 1079. A town corporate is called a city when made the seat of a bishop and having a cathedral church. *Camden*.

CITIZEN. It is not lawful to scourge a citizen of Rome. *Livy*. In England a citizen is a person who is free of a city, or who doth carry on a trade therein. *Camden*. Various privileges have been conferred on citizens as freemen in several reigns.—The wives of citizens of London (not being aldermen's wives, nor gentlewomen by descent) were obliged to wear miniver caps, being white woollen knit three-cornered, with the peaks projecting three or four inches beyond their foreheads; aldermen's wives made them of velvet, 1 Eliz. 1558. *Stow*. On Oct. 10, 1792, the convention decreed that "citoyen" and "citoyenne" should be the only titles in France.

CIUDAD RODRIGO, a strong fortress of Spain, invested by the French, June 11, 1810, and surrendered to them July 10. It remained in their possession until it was stormed by the British, under Wellington, Jan. 19, 1812.

CIVIL ENGINEERS. See *Engineers*.

CIVIL LAW. A body of Roman laws, founded upon the laws of nature and of nations, was first collected by Alfrenus Varus, the civilian, who flourished about 66 B.C.; and a digest of them was made by Servius Sulpicius, the civilian, 53 B.C. The Gregorian code was issued A.D. 290; the Theodosian in 438. Many of the former laws having grown out of use, the emperor Justinian ordered a revision of them (in 529-534), which was called the Justinian code, and constitutes a large part of the present civil law. Civil law was restored in Italy, Germany, &c. 1127. *Blair*. It was introduced into England by Theobald, a Norman abbot, afterwards archbishop of Canterbury in 1138. It is now used in the spiritual courts only, and in maritime affairs. See *Doctors' Commons*, and *Laws*.

CIVIL LIST. This now comprehends the revenue awarded to the kings of England in lieu of their ancient hereditary income. The entire revenue of Elizabeth was not more than 600,000*l.*, and that of Charles I. was about 800,000*l.* After the revolution a civil list revenue was settled on the new king and queen of 700,000*l.*, the parliament taking into its own hands the support of the forces both maritime and military. The civil list of George II. was increased to 800,000*l.*; and that of George III. in the 55th year of his reign, was 1,030,000*l.*

In 1831, the civil list of the sovereign was fixed at 510,000*l.*, and in Dec., 1837, the civil list of the queen was fixed at 385,000*l.*
Prince Albert obtained an exclusive sum from parliament of 30,000*l.* per an. on Feb. 7, 1840

Sir H. Parnell's motion for inquiry into the civil list led to the resignation of the Wellington administration Nov. 15, 1830
A select committee was appointed by the house of commons for the purpose Feb. 2, 1860

CIVIL SERVICE. Nearly 17,000 persons are employed in this service under the direction of the treasury, and the home, foreign, colonial, post, and revenue offices, &c. In 1855 a commission reported most unfavourably on the existing system of appointments, and on May 21 commissioners were appointed to examine into the qualifications of the candidates, who report annually. The civil service superannuation act passed in April, 1859. Civil service for the year (ending March 31) 1855, cost 7,735,515*l.*; 1865, 10,205,413*l.*

CIVIL WARS. See *England, France, &c.*

CLANSHIPS were tribes of the same race, and commonly of the same name, and originated in feudal times. See *Feudal Laws*. They are said to have arisen in Scotland, in the reign of Malcolm II., about 1008. The legal power of the chiefs of clans and other remains of heritable jurisdiction were abolished in Scotland, and the liberty of the English was granted to clansmen in 1747, in consequence of the rebellion of 1745. The following is a list of all the known clans of Scotland, with the badge of distinction anciently worn by each. The chief of each respective clan was, and is, entitled to wear two eagle's feathers in his bonnet, in addition to the distinguishing badge of his clan. *Chambers*. A history of the clans by Wm. Buchanan was published in 1775.

CLARE AND CLARENCE (Suffolk). Richard de Clare, earl of Gloucester, is said to have seated here a monastery of the order of Friars Eremites, the first of this kind of mendicants who came to England, 1248. *Tanner*. Lionel, third son of Edward III. becoming possessed of the honour of Clare, by marriage, was created duke of Clarence. The title has ever since belonged to a branch of the royal family.*—CLARE was the first place in Ireland for 140 years that elected a Roman Catholic member of parliament. See *Roman Catholics*. At the election, held at Ennis, the county town, Mr. Daniel O'Connell was returned, July 5, 1828. He did not sit till after the passing of the Catholic Emancipation Act, in 1829, being re-elected July 30, 1829.

CLARE, NUNS OF ST., a sisterhood, called Minorettes, founded in Italy about 1212. This order settled in England, in the Minorities without Aldgate, London, about 1293. by Blanche, queen of Navarre, wife of Edmund, earl of Lancaster, brother of Edward I. At the suppression, the site was granted to the bishopric of Bath and Wells, 1539. *Tanner*.

CLAREMONT (Surrey), the residence of the princess Charlotte (daughter of the prince-regent, afterwards George IV.), and the scene of her death, Nov. 6, 1817. The house was originally built by sir John Vanbrugh, and was the seat successively of the earl of Clare, afterwards duke of Newcastle, of lord Clive, lord Galloway, and the earl of Tyrconnel. It was purchased of Mr. Ellis by government for 65,000*l.* for the prince and princess of Saxe-Coburg; and the former, now king of Belgium, assigned it to prince Albert in 1840. The exiled royal family of France took up their residence at Claremont, March 4, 1848; and the king, Louis-Philippe, died there, Aug. 29, 1850.

CLARENCIEUX, the second king-at-arms, formerly subject to the duke of Clarence; his duty was to arrange the funerals of all the lower nobility, as baronets, knights, esquires, and gentlemen, on the south side of the Trent, from whence he is also called *sur-roy* or *south-roy*.

CLARENDON, CONSTITUTIONS OF, were enacted at a council held Jan. 25, 1164, at Clarendon, in Wiltshire, the object of which was to retrench the then enormous power of the clergy. They were the ground of Becket's quarrel with Henry II., and were at first condemned by the pope, but afterwards agreed to in 1173.

* DUKES OF CLARENCE: 1362, Lionel, born 1338, died 1369. See *York, dukes of*.—1411, Thomas (second son of Henry IV.), born 1389, killed at Baugé 1421.—1461, George (brother of Edward IV.), murdered 1478.—1789, William (third son of George III.), afterwards William IV.

CLARENDON, CONSTITUTIONS OF, *continued.*

I. All suits concerning advowsons to be determined in civil courts.

II. The clergy accused of any crime to be tried by civil judges.

III. No person of any rank whatever to be permitted to leave the realm without the royal licence.

IV. Laics not to be accused in spiritual courts, except by legal and reputable promoters and witnesses.

V. No chief tenant of the crown to be excommunicated, or his lands put under interdict.

VI. Revenues of vacant sees to belong to the king.

VII. Goods forfeited to the crown not to be prosecuted in churches.

VIII. Sons of villains not to be ordained clerks without the consent of their lord.

IX. Bishops to be regarded as barons, and be sub-

jected to the burthens belonging to that rank.

X. Churches belonging to the king's see not to be granted in perpetuity against his will.

XI. Excommunicated persons not to be bound to give security for continuing in their abode.

XII. No inhabitant in demesne to be excommunicated for non-appearance in a spiritual court.

XIII. If any tenant *in capite* should refuse submission to spiritual courts, the case to be referred to the king.

XIV. The clergy no longer to pretend to the right of enforcing debts contracted by oath or promise.

XV. Causes between laymen and ecclesiastics to be determined by a jury.

XVI. Appeals to be ultimately carried to the king, and no further without his consent.

CLARENDON PRINTING-OFFICE, OXFORD, erected by sir John Vanbrugh, in 1711-13, the expense being defrayed out of the profits of lord Clarendon's History of the Rebellion, the copyright of which was given by his son to the university. The original building has been converted into a museum, lecture-rooms, &c., and a new printing-office erected by Blore and Robertson, 1826-9. *Sharp.*

CLARION, it is said by Spanish writers, invented by the Moors in Spain, about 800, was at first a trumpet, serving as a treble to trumpets sounding tenor and bass. *Ashe.* Its tube is narrower and its tone shriller than the common trumpet. *Pardon.*

CLARIONET, a wind instrument of the reed kind, invented by Joseph Denner, in Nuremberg, about 1690.

CLASSIS. The name was first used by Tullius Servius (the sixth king of ancient Rome), in making divisions of the Roman people, 573 B.C. The first of the six classes were called *classici*, by way of eminence, and hence authors of the first rank (especially Greek and Latin) came to be called *classics*.

CLAVICHORD, a musical instrument in the form of a spinnet (called also a manichord); much in use in France, Spain, and Germany, in the 17th century.

CLEARING-HOUSE. In 1775, a building in Lombard-street was set apart for the use of bankers, in which they might exchange cheques, bills, and securities, and thereby save labour and curtail the amount of floating cash requisite to meet the settlement of the different houses, if effected singly. By means of transfer tickets, transactions to the amount of millions daily are settled without the intervention of a bank note. In 1861, the clearing-house was used by 117 companies, and on May, 1864, it was joined by the Bank of England. The *railway clearing-house* in Seymour-street, near Easton-square, is regulated by an act passed in 1850.

CLEMENTINES, apocryphal pieces, attributed to Clemens Romanus, a contemporary of St. Paul, and said to have succeeded St. Peter as bishop of Rome. He died 102. *Niceron.* Also the decretals of pope Clement V. who died 1314, published by his successor. *Bowyer.* Also Augustine monks, each of whom having been a superior nine years, then merged into a common monk. CLEMENTINES were the adherents of Robert, son of the count of Geneva, who took the title of Clement VII. on the death of Gregory XI., 1378, and URBANISTS, those of pope Urban VI. All Christendom was divided by the claims of these two pontiffs: France, Castile, Scotland, &c., adhering to Clement; Rome, Italy, and England, declaring for Urban. The schism ended in 1409, when Alexander V. was elected pope, and his rivals resigned. See *Anti-Popes*.

CLEPSYDRA, a water-clock. See *Clocks*.

CLERGY (from the Greek *kleros*, a lot or inheritance) in the first century were termed presbyters, elders, or bishops, and deacons. The bishops (*episcopoi* or *overseers*), elected from the presbyters, in the second century assumed higher functions (about 330), and, under Constantine, obtained the recognition and protection of the secular power. Under the Lombard and Norman kings in the 7th and 8th centuries, the clergy began to possess temporal power, as owners of lands; and after the establishment of monachism, a distinction was made

between the regular clergy, who lived apart from the world, in accordance with a *regula* or rule, and the *secular* (worldly) or beneficed clergy. See *Church of England*.*

CLERGY CHARITIES. The Clergymen's Widows' and Orphans' Corporation was established in England, 1670, and incorporated 1678. William Assheton, an eminent theological writer, was the first proposer of a plan to provide for the families of deceased clergy. *Watts's Life of Assheton*. The festival of the "Sons of the Clergy," held annually at St. Paul's cathedral, was instituted about 1655; the charity called the "Sons of the Clergy" was incorporated July 1, 1678. There are several other charities for the relatives of the clergy.

CLERICAL SUBSCRIPTION ACT, passed July, 1865.

CLERK. See *Clergy*.

CLERKENWELL, a parish near London, so called from a well (*fons clericorum*) in Raystreet, where the parish-clerks occasionally acted mystery-plays; once before Richard II. in 1390. Hunt's political meetings in 1817 were held in Spa-fields in this parish. In St. John's parish are the remains of the priory of the knights of St. John of Jerusalem. Clerkenwell prison was built in 1615, in lieu of the noted prison called the Cage, which was taken down in 1614; the then Bridewell having been found insufficient. The prison called the House of Detention, erected in 1775, was rebuilt in 1818; again 1844. At Clerkenwell-cloze formerly stood the house of Oliver Cromwell, where some suppose the death-warrant of Charles I. was signed, Jan. 1649.

CLERMONT (France). Here was held the council under pope Urban II. in 1095, in which the first crusade against the infidels was determined upon, and Godfrey of Bouillon appointed to command it. In this council the name of pope was first given to the head of the Roman Catholic Church, exclusively of the bishops who used previously to assume the title. Philip I. of France was (a second time) excommunicated by this assembly. *Hénault*.

CLEVES (N.E. Germany). Rutger, count of Cleves, lived at the beginning of the 11th century. Adolphus, count of Mark, was made duke of Cleves by the emperor Sigismund, 1417. John William, duke of Cleves, Berg, Juliers, &c., died without issue, March 25, 1609, which led to a war of succession. Eventually Cleves was assigned to the elector of Brandenburg in 1666; seized by the French in 1757; restored at the peace in 1763, and now forms part of the Prussian dominions.

CLIFTON SUSPENSION-BRIDGE, over the Avon, connecting Gloucestershire and Somersetshire, constructed of the removed Hungerford-bridge, was completed in Oct. 1864; opened Dec. 8, 1864. It is said to have the largest span (702 feet) of any chain bridge in the world. In 1753 alderman Vick of Bristol, bequeathed 1000*l.* to accumulate for the erection of a bridge over the Avon. In 1831 Brunel began one which was abandoned after the expenditure of 45,000*l.*

CLIMACTERIC, the term applied to certain periods of time in a man's life (multiples of 7 or 9), in which it is affirmed notable alterations in the health and constitution of a person happen, and expose him to imminent dangers. Cotgrave says, "Every 7th or 9th or 63rd year of a man's life, all very dangerous, but the last most." The *grand climacteric* is 63. Hippocrates is said to have referred to these periods in 383 B.C. Much misemployed erudition has been expended on this subject.

* The clergy were first styled clerks, owing to the judges being chosen after the Norman custom from the sacred order, and the officers being clergy: this gave them that denomination, which they keep to this day. *Blackstone's Comm.* "As the Druids," says Pasquier, "kept the keys of their religion and of letters, so did the priests keep both these to themselves; they alone made profession of letters, and a man of letters was called a clerk, and hence learning went by the name of clerkship." The English clergy add "clerk" to their name in legal documents.—In 992, the distinction began in France. *Hénault*.—The **BENEFIT OF CLERGY**, *Privilegium Clericale*, arose in the regard paid by Christian princes to the church, and consisted of: 1st, an exemption of places consecrated to religious duties from criminal arrests, which was the foundation of sanctuaries; 2nd, exemption of the persons of clergymen from criminal process before the secular judge, in particular cases, which was the original meaning of the *privilegium clericale*. In the course of time, however, the *benefit of clergy* extended to every one who could read, which was thought a great proof of learning; and it was enacted, that there should be a prerogative allowed to the clergy, that if any man who could read were to be condemned to death, the bishop of the diocese might, if he would, claim him as a clerk, and dispose of him in some places of the clergy as he might deem meet. The ordinary gave the prisoner at the bar a Latin book, in a black Gothic character, from which to read a verse or two; and if the ordinary said, "*Legit ut Clericus*" ("He reads like a clerk"), the offender was only burnt in the hand; otherwise he suffered death, 3 Edw. I. (1274). This privilege was restricted by Henry VII. in 1489, and abolished, with respect to murderers and other great criminals, by Henry VIII., 1512. *Stow*. The reading was discontinued by 5 Anne, c. 6 (1706). Benefit of clergy was wholly repealed by statute 7 & 8 Geo. IV. c. 28 (1827).

CLIO. The initials C. L. I. O., forming the name of the muse of history, were rendered famous from the most admired papers of Addison, in the *Spectator*, having been marked by one or other of them, signed consecutively, in 1713. *Cibber*.

CLOACA MAXIMA, the chief of the celebrated sewers at Rome, the construction of which is attributed to king Tarquinius Priscus (588 B.C.) and his successors.

CLOCK. The clepsydra, or water-clock, was introduced at Rome about 158 B.C. by Scipio Nasica. Toothed wheels were applied to them by Ctesibius, about 140 B.C. Said to have been found by Cæsar on invading Britain, 55 B.C. The only clock supposed to be then in the world was sent by pope Paul I. to Pepin, king of France A.D. 760. Pacificus, archdeacon of Genoa, invented one in the 9th century. Originally the wheels were three feet in diameter. The earliest complete clock of which there is any certain record was made by a Saracen mechanic in the thirteenth century. Alfred is said to have measured time by wax tapers, and to have invented lanterns to defend them from the wind about 887.

CLOGHER (Ireland). St. Macartin, a disciple of St. Patrick, fixed a bishopric at Clogher, where he also built an abbey "in the street before the royal seat of the kings of Ergal." He died in 506. Clogher takes its name from a golden stone, from which, in times of paganism, the devil used to pronounce juggling answers, like the oracles of *Apollon Pythius*. *Sir James Ware*. In 1041 the cathedral was built anew and dedicated to its founder. Clogher merged, on the death of its last prelate (Dr. Tottenham), into the archiepiscopal see of Armagh, by the act of 1834.

CLONFERT (Ireland). St. Brendan founded an abbey at Clonfert in 558: his life is extant in jingling monkish metre in the Cottonian library at Westminster. In his time the cathedral, famous in ancient days for its seven altars, was erected; and Colgan makes St. Brendan its founder and the first bishop; but it is said in the Ulster Annals, under the year 571, "*Maena*, bishop of Clonfert-Brenain, went to rest." Clonfert, in Irish, signifies a wonderful den or retirement. In 1839 the see merged into that of Killaloe. See *Bishops*.

CLONTARF (near Dublin), the site of a battle fought on Good Friday, April 23, 1014, between the Irish and Danes, the former headed by Bryan Boroinhe, monarch of Ireland, who signally defeated the invaders, after a long and bloody engagement, but was wounded, and soon afterwards died. His son Murchard also fell with many of the nobility; 11,000 of the Danes are said to have perished in the battle.

CLOSTERSEVEN (Hanover), **CONVENTION OF**, was entered into Sept. 8, 1757, between the duke of Cumberland, third son of George II., and the duke of Richelieu, commander of the French armies. By its humiliating stipulations, 38,000 Hanoverians laid down their arms, and were dispersed. The duke immediately afterwards resigned all his military commands. The convention was soon broken by both parties.

CLOTH. See *Woollen Cloth* and *Calico*.

CLOUD, St., a palace, near Paris, named from prince Clodoald or Cloud, who became a monk there in 533, after the murder of his brothers, and died in 560. The palace was built in the 16th century, and in it Henry II. was assassinated by Clement in 1589.

CLOUDS consist of minute particles of water, often in a frozen state, floating in the air. In 1803 Mr. Luke Howard published his classification of clouds, now generally adopted, consisting of three primary forms—cirrus, cumulus, and stratus; three compounds of these

forms; and the nimbus or black rain-clouds (cumulo-cirro-stratus). A new edition of Howard's Essay on the Clouds appeared in 1865.

CLOVESHOO (now Cliff), Kent. Here was held an important council of nobility and clergy concerning the government and discipline of the church, Sept. 747; and others were held here 800, 803, 822, 824.

CLOYNE (S. Ireland), a bishopric, founded in the 6th century by St. Coleman, in 1431 united to that of Cork, and so continued for 200 years. It was united with that of Cork and Ross, 1834. See *Bishops*.

CLUBMEN, associations formed in the southern and western counties of England, to restrain the excesses of the armies during the civil wars, 1642-9. They professed neutrality, but inclined towards the king, and were considered enemies by his opponents.

CLUBS, originally consisted of a small number of persons of kindred tastes and pursuits, who met together at stated times for social intercourse. The club at the Mermaid tavern, established about the end of the 16th century, consisted of Raleigh, Shakspeare, and others. Ben Jonson set up a club at the Devil tavern. Addison, Steele, and others, frequently met at Button's coffee-house, as described in the *Spectator*. The present London clubs, some comprising 300, others about 1500 members, possess luxuriously furnished edifices, several of great architectural pretensions, in or near Pall Mall. The members obtain the choicest viands and wines at very moderate charges. Many of the clubs possess excellent libraries, particularly the Athenæum (*which see*). The annual payment varies from 6*l.* to 11*l.* 11*s.*; the entrance fee from 9*l.* 9*s.* to 31*l.* 11*s.* The following are the principal clubs:—

CLUBS, FRENCH. The first of these arose about 1782. They were essentially political, and were greatly concerned in the revolution. The *Club Breton* became the celebrated *Club des Jacobins*, and the *Club des Cordeliers* comprised among its members Danton and Camille Desmoulins. From these two clubs came the *Mountain* party which overthrew the Girondists in 1793, and fell in its turn in 1794. The clubs disappeared with the Directory in 1799. They were revived in 1848 in considerable numbers, but did not attain to their former eminence, and were suppressed by decrees, in June 22, 1849, and June 6, 1850. *Bouillet*.

CLUB-FOOT, a deformity produced by the shortening of one or more of the muscles, although attempted to be cured by Lorenz in 1784, by cutting the tendo Achillis, was not effectually cured till 1831, when Stromeyer of Erlangen cured Dr. Little by dividing the tendons of the contracted muscles with a very thin knife. Judicious after-treatment is required.

CLUGNY, OR CLUNY, ABBEY OF, in France, formerly most magnificent, founded by Benedictines, under the abbot Bern, about 910, and sustained afterwards by William, duke of Berry and Aquitaine. English foundations for Cluniac monks were instituted soon after.

CLYDE AND FORTH WALL was built by Agricola 84. The Forth and Clyde CANAL was commenced by Mr. Smeaton, July 10, 1768, and was opened July 28, 1790. It forms a communication between the seas on the eastern and western coasts of Scotland.

CNIDUS, in Caria, Asia Minor; near here Conon the Athenian defeated the Lacedæmonian fleet, under Peisander, 394 B.C.

COACH (from *coucher*, to lie). Beekmann states that Charles of Anjou's queen entered Naples in a *caretta* (about 1282). Under Francis I. there were but two in Paris, one belonging to the queen, the other to Diana, the natural daughter of Henry II. There were but three in Paris in 1550; and Henry IV. had one without straps or springs. John de Laval de Bois-Dauphin set up a coach on account of his enormous bulk. The first coach seen in England was about 1553. Coaches were introduced by Fitz-Allen, earl of Arundel,

in 1580. *Stow*. A bill was brought into parliament to prevent the effeminacy of men riding in coaches, 43 Eliz. 1601.* *Carte*. Repealed 1625. The coach-tax commenced in 1747. Horace Walpole says that the present royal state coach (first used Nov. 16, 1762) cost 752*l*. See *Car, Carriages, Chariots, Hackney Coaches, Mail Coaches, &c.*

COAL.† It is contended, with much seeming truth, that coal, although not mentioned by the Romans in their notices of Britain, was yet in use by the ancient Britons. *Brandt*. Henry III. is said to have granted a licence to dig coals near Newcastle-upon-Tyne in 1234; some say earlier, and others in 1239. Sea-coal was prohibited from being used in and near London, as being "prejudicial to human health;" and even smiths were obliged to burn wood, 1273. *Stow*. In 1306 the gentry petitioned against its use. Coal was first made an article of trade from Newcastle to London, 4 Rich. II. 1381. *Rymer's Fœdera*. Notwithstanding the many previous complaints against coal as a public nuisance, it was at length generally burned in London in 1400; but it was not in common use in England until the reign of Charles I. 1625.

COAL CONSUMED IN LONDON IN THE FOLLOWING YEARS.

1700	317,000 chald.	1810	980,372 chald.	1835	2,299,816 tons.
1750	510,000 ditto.	1820	1,171,178 ditto.	1840	2,638,256 ditto.
1800	814,000 ditto.	1830	1,588,360 ditto.	1850	3,638,883 ditto.

1850.—Coal brought to London, 3,573,377 tons coast ways; 1,499,899 tons by railways and canals.
1861.—" " " 5,232,082 tons; in 1862, 4,973,823 tons.

The coal-fields of Great Britain are estimated at 5400 square miles; of Durham and Northumberland, 723 square miles. *Bakevell*. In 1857 about 65½ millions of tons were extracted (value about 16,348,676*l*.) from 2095 collieries; about 25 millions are consumed annually in Great Britain.

Coal obtained in Great Britain and Ireland:—In 1861, 86,417,941 tons; in 1862, 81,638,338 tons; in 1863, 86,292,215 tons (valued at 51,000,000*l*.); in 1864 (from 3268 collieries), 92,787,873 tons.

Mr. Sopwith, in 1855, computed the annual product of the coal-mines of Durham and Northumberland at 14 million tons:—6 millions for London, 2½ millions exported, 2½ millions for coke, 1 million for colliery engines, &c., and 2 millions for local consumption.

By a stipulation in the commercial treaty of 1860, in consequence of the French government greatly reducing the duty on imported coal, the British government (it is thought by many imprudently) engaged to lay no duty on exported coal for ten years. In 1859 about 7,000,000 tons of British coals were exported, of which 1,391,009 tons went to France.

The first ship laden with Irish coal arrived in Dublin from Newry 1742

Sale of Coal Regulation Act 1831

The duties on the exportation of British coal, which had existed since the 16th century, were practically repealed 1834

Sir R. Peel imposed a duty of 4*s*. a ton in 1842; caused much dissatisfaction; repealed 1845

Women were prohibited from working in English collieries in 1842

The consumption of coal in France, in 1780 only 400,000 tons, rises to 6,000,000 tons in 1845.

The United States produced between 8 and 9 millions of tons; Belgium, 5,000,000; and France, 4,500,000, in 1855

An act for the regulation and inspection of mines was passed in 1860
Coal-pitmen's strikes frequently occur; a long and severe one arose in Staffordshire in 1864

ACCIDENTS.—About 1000 lives are lost annually by accidents in coal-mines.

In 1858, by explosions in coal-mines, 52 persons perished at Bardsley; 20 at Duffryn, near Newport; 52 at Tyldesley, near Leeds; and about 36 in different parts of the country.

On April 5, 1859, 26 lives were lost at the chain colliery, near Neath, through the irruption of water.

In 1860, 76 lives were lost on March 2, at Burdodon, near Killingworth; 145 at the Risca mine, near Newport, Dec. 1; and 22 at the Hetton mine, Northumberland, Dec. 20.

On June 11, 1861, 21 lives were lost through an inundation in the Claycross mines, Derbyshire.

In 1862, 47 lives were lost at Cethin mine, Merthyr Tydvil, S. Wales, Feb. 19; at Walker, near Newcastle-on-Tyne, 15 lives lost, Nov. 22; Edmund's Main, near Barnsley, 60 lives lost, Dec. 8.

In 1863, 13 lives lost at Coxbridge, near Newcastle, March 6; 39 lives lost at Margam, S. Wales, Oct. 17; 14 lives lost at Moestig, S. Wales, Dec. 26.

In 1865, 6 lives lost at Claycross, May 3; 24 at New Bedwelly pit, near Tredegar, June 16.

(For still more fatal accidents, see *Lundhill and Hartley*.)

85 lives were lost at Lalle coal-mine, in France, in Oct. 1861.

COAL EXCHANGE, London, established by 47 Geo. III. c. 68 (1807). The present building (a most interesting structure) was erected by Mr. J. B. Bunning, and opened by prince Albert Oct. 30, 1849

COAL-WHIPPER'S BOARD, to protect the men employed in unloading coal-vessels from publicans, formed by an act of parliament in 1843, lasted till 1856, when the coal-owners themselves established a whipping-office.

* In the beginning of the year 1619, the earl of Northumberland, who had been imprisoned ever since the gunpowder plot, obtained his liberation. Hearing that Buckingham was drawn about with six horses in his coach (being the first that was so), the earl put on eight to his, and in that manner passed from the Tower through the city. *Rapin*.

† There are five kinds of fossil fuel: anthracite, coal, lignite, bituminous shale, and bitumen. No satisfactory definition of coal has yet been given. The composition of *wood* is 49.1 carbon, 6.3 hydrogen, 44.6 oxygen; of *coal* 82.6 carbon, 5.6 hydrogen, 11.8 oxygen.

COALITIONS AGAINST FRANCE generally arose through England subsidising the great powers of the continent. They were entered into as follows :—

Austria, Prussia, and Great Britain	1793	Great Britain, Russia, Prussia, and Saxony,	
Great Britain, Germany, Russia, Naples, Portugal, and Turkey, signed	June 22, 1799	England and Austria	Oct. 6, 1806
Great Britain, Russia, Austria, and Naples,	Aug. 5, 1805	Russia and Prussia; the treaty ratified at Kalisch	April 6, 1809

COAST GUARD. In 1856, the raising and governing this body was transferred to the admiralty. A coast brigade of artillery was established in Nov. 1859.

COAST VOLUNTEERS. See under *Navy of England*.

COBALT, a rare mineral found among the veins of ores, or in the fissures of stone, at an early date, in the mines of Cornwall, where the workmen call it mundic. *Hill*. It was distinguished as a metal by Brandt, in 1733.

COBURG. See *Saxe-Coburg*.

COCCEIANS, a small sect founded by John Cocceius, of Bremen, about 1665, who held, amongst other opinions, that of a visible reign of Christ in this world, after a general conversion of the Jews and all other people to the Christian faith.

COCHIN (India), held by the Portuguese, 1503; by the Dutch, 1663; taken by the British, 1735; ceded to them 1814.

COCHIN CHINA OR **ANAM**, *which see*.

COCHINEAL INSECT (*Coccus cacti*), derives its colour from feeding on the *cactus*, and became known to the Spaniards soon after their conquest of Mexico in 1518. Cochineal was brought to Europe about 1523, but was not known in Italy in 1548, although the art of dyeing then flourished there. In 1858 it was cultivated successfully in Teneriffe, the vines having failed through disease. 260,000 lbs. of cochineal were imported into England in 1830; 1,081,776 lbs. in 1845; 2,360,000 lbs. in 1850; and 3,034,976 lbs. in 1859. Duty repealed 1845.

COCKER'S ARITHMETIC. The work edited by John Hawkins, first appeared in 1677.

COCK-FIGHTING, practised by the Greeks. It was introduced at Rome after a victory over the Persians, 476 B.C.; and was brought by the Romans into England. William Fitz-Stephen, in the reign of Henry II., describes cock-fighting as the sport of school-boys on Shrove-Tuesday. It was prohibited by Edward III. 1365; by Henry VIII.; and by Cromwell, 1653. Part of the site of Drury-lane theatre was a cock-pit in the reign of James I.; and the cock-pit at Whitehall was erected by Charles II. Till within these few years there was a *Cock-pit Royal* in St. James's Park; but the governors of Christ's Hospital would not renew the lease for a building devoted to cruelty.* Cock-fighting is now forbidden by law.

COCK-LANE GHOST, an imposition practised by William Parsons, his wife, and daughter, by means of a female ventriloquist, during 1760 and 1761, carried on at No. 33, Cock-lane, London, was at length detected, and the parents were condemned to the pillory and imprisonment, July 10, 1762.

COCOA, OR **CACAO**, the kernel or seed of the tree *Theobroma cacao* (Linn.), was introduced into this country shortly after the discovery of Mexico, where it forms an important article of diet. From cocoa is produced chocolate. The cocoa imported into the United Kingdom, chiefly from the British West Indies and Guiana, was in 1849, 1,989,477 lbs.; in 1851, 4,349,051 lbs.; in 1855, 7,343,458 lbs.; in 1859, 6,006,759 lbs.; in 1861, 9,080,288 lbs.; in 1864, 7,920,912 lbs., about half for home consumption.

* Mr. Ardesoif, a gentleman of large fortune and great hospitality, who was almost unrivalled in the splendour of his equipages, had a favourite cock, upon which he had won many profitable matches. The last wager he laid upon this cock he lost, which so enraged him, that in a fit of passion he thrust the bird into the fire. A delicious fever, the result of his rage and inebriety, in three days put an end to his life. He died at Tottenham, near London, April 4. 1788.—On April 22, 1865, 34 persons were fined at Marlborough-street police-office, for being present at a cock-fight.

COCOA-NUT TREE (*Cocos nucifera*, Linn.), supplies the Indians with almost all they need, as bread, water, wine, vinegar, brandy, milk, oil, honey, sugar, needles, clothes, thread, cups, spoons, basins, baskets, paper, masts for ships, sails, cordage, nails, covering for their houses, &c. *Ray*. In Sept. 1829, Mr. Soames patented his mode of procuring stearine and elaine from cocoa-nut oil. It is said that 32 tons of candles have been made in a month from these materials at the Belmont works, Lambeth.

CODES, see *Laws*. Alfrenus Varus, the civilian, first collected the Roman laws about 66 B.C.; and Servius Sulpicius, the civilian, embodied them about 53 B.C. The Gregorian and Hermoginian codes were published A.D. 290; the Theodosian code in 438; the celebrated code of the emperor Justinian, in 529—a digest from this last was made in 533. Alfred's code of laws is the foundation of the common law of England, 887. The CODE NAPOLEON, the civil code of France, was promulgated from 1803 to 1810. The emperor considered it his most enduring monument. It was prepared under his supervision by the most eminent jurists, from the 400 systems previously existing. It has been adopted by other countries.

CODFISH. See *Holland*, 1347.

COD-LIVER OIL was recommended as a remedy for chronic rheumatism by Dr. Percival in 1782, and for diseases of the lungs about 1838. De Jongh's treatise on cod-liver oil was published in Latin in 1844; in English in 1849.

CŒUR DE LION, OR THE LION-HEARTED, a surname given to Richard I. of England, on account of his courage about 1192; and also to Louis VIII. of France, who signalised himself in the crusades, and in his wars against England, about 1223.

COFFEE. The tree was conveyed from Mocha in Arabia to Holland about 1616; and carried to the West Indies in 1726. First cultivated at Surinam by the Dutch, 1718. The culture was encouraged in the plantations about 1732, and the British and French colonies now grow the coffee-tree abundantly. Its use as a *beverage* is traced to the Persians. It came into great repute in Arabia Felix, about 1454; and passed thence into Egypt and Syria, and thence (in 1511) to Constantinople, where a coffee-house was opened in 1551. M. Thevenot, the traveller, was the first who brought it into France, to which country he returned after an absence of seven years, in 1662. *Chambers*.

Coffee was brought into England by Mr. Nathaniel Canopus, a Cretan, who made it his common beverage at Balliol college, Oxford, in 1641. *Anderson*.

The quantity of coffee imported into these realms and entered for home consumption in 1843 was 29,979,404 lbs.; in 1850, 31,166,358 lbs.; in 1857, 34,367,484 lbs.; in 1859, 34,492,947 lbs.; in 1860, 35,674,381 lbs. (duty 3d. per lb. raw coffee; 4d. roasted.) Total imported in 1861, 82,532,525 lbs.; in 1863, 117,354,217 lbs.; in 1864, 109,370,213 lbs. The first coffee-house in England was kept by a Jew, named Jacobs, in Oxford . . . 1650

Mr. Edwards, an English Turkey merchant, brought home with him a Greek servant, named Pasquet, who opened the first coffee-house in London, in George-yard, Lombard-street . . . 1652
Pasquet afterwards went to Holland, and opened the first house in that country. *Anderson*.
The Rainbow coffee-house, near Temple-bar, was represented as a nuisance to the neighbourhood . . . 1657
Coffee-houses were suppressed by proclamation in 1675; but the order was revoked in 1676, on the petition of the traders in tea and coffee.

COFFERER OF THE HOUSEHOLD, formerly an officer of state, and a member of the privy council, who had special charge of the other officers of the household. Sir Henry Cocks was cofferer to queen Elizabeth. Some of the highest statesmen filled the office up to 1782, when it was suppressed by act of parliament, and the duties of it ordered to be discharged by the lord steward and the paymaster of the household. *Beatson*.

COFFINS. Athenian heroes were buried in coffins of cedar; owing to its aromatic and incorruptible qualities. *Thucydides*. Coffins of marble and stone were used by the Romans. Alexander is said to have been buried in one of gold; and glass coffins have been found in England. *Gough*. The earliest record of wooden coffins amongst us is that of the burial of king Arthur in an entire trunk of oak hollowed, A.D. 542. *Asser*. Patent coffins were invented in 1796. Air-tight metallic coffins were advertised at Birmingham in 1861.

COHORT. A division of the Roman army consisting of about 600 men. It was the sixth part of a legion, and its number, consequently, was under the same fluctuation as that of the legions, being sometimes more and sometimes less. The cohort was divided into centuries. In the time of the empire the cohort often amounted to a thousand men.

COIF. The serjeant's coif was originally an iron skull-cap, worn by knights under their helmets. The coif was introduced before 1259, and was used to hide the tonsure of such renegade clergymen as chose to remain advocates in the secular courts, notwithstanding their prohibition by canon. *Blackstone*. The coif was at first a thin linen cover gathered together in the form of a skull or helmet, the material being afterwards changed into white silk, and the form eventually into the black patch at the top of the forensic wig, which is now the distinguishing mark of the degree of serjeant-at-law. *Foss's Lives of the Judges*.

COIMBRA was made the capital of Portugal by Alfonso, the first king, 1139. The only Portuguese university was transferred from Lisbon to Coimbra in 1308; but only and finally settled in 1527. In a convent here, Alfonso IV. caused Inez de Castro, at first mistress and afterwards wife of his son Pedro, to be cruelly murdered in 1355.

COIN. Homer speaks of brass money as existing 1184 B.C. The invention of coin is ascribed to the Lydians, who cherished commerce, and whose money was of gold and silver. Both were coined by Pheidon, tyrant of Argos, 862 B.C. Money was coined at Rome under Servius Tullius, about 573 B.C. The most ancient known coins are Macedonian of the fifth century B.C.; but others are believed to be more ancient. Brass money only was in use at Rome previously to 269 B.C. (when Fabius Pictor coined silver), a proof that little correspondence was then held with the east, where gold and silver were in use long before. Gold was coined 206 B.C. Iron money was used in Sparta, and iron and tin in Britain. *Dufresnoy*. Julius Cæsar was the first who obtained the express permission of the senate to place his portrait on the coins, and the example was soon followed. In the earlier days of Rome the heads were those of deities, or of those who had received divine honours. The gold and silver coinage in the world is about 250,000,000*l.* silver, and 150,000,000*l.* gold. *Times*, June 25, 1852. See *Gold, Silver, and Copper*.

COIN OF ENGLAND.

The first coinage in England was under the Romans at Canadodunum, or Colchester. English coin was of different shapes, as square, oblong, and round, until the middle ages, when round coin only was used.

Coin was made sterling in 1216, before which time rents were mostly paid in kind, and money was found only in the coffers of the barons. *Stow*.

Queen Elizabeth caused the *base coin* to be recalled and genuine issued in 1560. During the reigns of the Stuarts the coinage was greatly debased by clipping, &c.

A commission (lord Somers, sir Isaac Newton, and John Locke) was appointed by William III. to reform the coinage, an act was passed, withdrawing the debased coin from circulation, and 1,200,000*l.* was raised by a house duty to defray the expense. 1696

English and Irish money were assimilated. Jan. 1, 1826

The coin of the realm was valued at about 12,000,000*l.* in 1711. *Davenant*. At 16,000,000*l.* in 1762. *Anderson*. It was 20,000,000*l.* in 1786. *Chalmers*. 37,000,000*l.* in 1800. *Phillips*. The gold is 28,000,000*l.*, and the rest of the metallic currency is 13,000,000*l.*, while paper largely supplies the place of coin. *Duke of Wellington*, 1830. The metallic currency calculated as reaching 45,000,000*l.*, 1840; and was estimated as approaching in gold and silver 60,000,000*l.* 1853

COINING. Originally performed by the metal being placed between two steel dies, struck by a hammer. In 1553, a mill, invented by Antonie Brucher, was introduced into England, 1562. An engine was invented by Balancier, 1617. Great improvements were effected by Boulton and Watt, at Soho, 1788. The erection of the Mint machinery, London, began 1811.

COLCHESTER (Essex), *Camalodunum*, a Roman station, supposed to be the birthplace of Constantine the Great; obtained its first charter from Richard I. in 1189. Its sixteen churches and all its buildings sustained great damage at the ten weeks' siege, 1648. Two of its defenders, sir George Lisle and sir Charles Lisle, were tried and shot after surrendering. The haize manufacture was established here, 1660. *Anderson.* The railway to London was opened in 1843.

COLD. The extremes of heat and cold are found to produce the same perceptions on the skin, and when mercury is frozen at forty degrees below zero, the sensation is the same as touching red-hot iron. During the hard frost in 1740, a palace of ice was built at St. Petersburg. *Greig.* Quicksilver was frozen hard at Moscow, Jan. 13, 1810. Perhaps the coldest day ever known in London was Dec. 25, 1796, when the thermometer was 16° below zero. On Jan. 3, 1854, the thermometer marked 4° below zero; and on Dec. 25, 1860, it fell in some places to 18° and in others to 15° below zero; at Torquay, Devon, 20° below zero. From Dec. 23 to 30 the cold was excessive. See *Frosts, Ice, Congelation, and Regelation.*

COLDINGHAM, near Berwick, is celebrated for the heroism of its nuns, who, on the attack of the Danes, in order to preserve their chastity, cut off their noses and lips. The Danes burnt the whole sisterhood, with the abbess Ebba, in their monastery, 875.

COLDSTREAM GUARDS. General Monk, before marching from Scotland into England to restore Charles II., raised this regiment in the town of Coldstream, 1660. The town is situated at the confluence of the Leet with the Tweed.

COLISEUM, OR COLOSSEUM, at Rome, an elliptical amphitheatre, of which the external diameter is 1641 Italian feet, is supposed to have been able to contain 80,000 spectators of the fights with wild beasts, and other sports in the arena. It was erected between 75 (some say 77) and 80, by the emperors Vespasian and Titus, at an expense sufficient to have built a metropolis. Its remains are still very imposing.

COLLAR, generally a gold enamelled chain with ciphers and other devices, having the badge of some order suspended at the bottom. The collar of the order of the Garter consists of SS., with roses enamelled red, within a garter enamelled blue, 1349-50. The fashion of wearing the collar of SS., in honour of St. Simplicius, began about 1407. One was given to the mayor of Dublin, Robert Deey, by Charles II., 1660. A second was presented as a royal donation to the chief magistrate of Dublin, the former one having been lost.

COLLECTS are short prayers introduced into the Roman mass by pope Gelasius, about 493, and into the English Liturgy in 1548. The king of England coming into Normandy, appointed a collect for the relief of the Holy Land, 1166. *Rapin.*

COLLEGES. University education preceded the erection of colleges, which were munificent foundations to relieve the students from the expense of living at lodging-houses and at inns. Collegiate or academic degrees are said to have been first conferred at the university of Paris, 1140; but some authorities say not before 1215. In England, it is contended that the date is much higher, and some hold that Bede obtained a decree formerly at Cambridge, and John de Beverley at Oxford, that they were the first doctors of these universities. See *Cambridge, Oxford, Aberdeen, Queen's Colleges, Working Men's Colleges, &c.*

COLLODION, a film obtained from the solution of gun-cotton in ether. The *iodised* collodion extensively employed in photography, was discovered by Mr. F. Scott Archer, and announced in the "*Chemist*," in March, 1851. On the premature death of himself and wife, a pension of 50*l.* per annum was granted by government to his three orphan children.

COLOGNE (*Colonia Agrippina*), on the Rhine, the site of a colony founded by the empress Agrippina, about 50; became a member of the Hanseatic league, 1260. The Jews were expelled from it in 1485, and the Protestants in 1618, and it then fell into decay. Cologne was taken by the French, under Jourdan, Oct. 6, 1794. In the cathedral are shown the heads of the three Magi; and in the church of St. Ursula is the tomb of that saint, and bones said to be those of 11,000 virgins put to death with her. The archbishopric was secularised in 1801, and Cologne was made over to Prussia in 1814. The building of the cathedral, begun in 1248, and suspended in consequence of the Reformation, was vigorously continued by king Frederick William IV. since 1842. An international industrial exhibition was opened at Cologne by the crown prince, June 2, 1865.

COLOMBIA, a republic of S. America, formed of states which declared their independence of the crown of Spain, Dec. 1819, but its several chiefs afterwards contending against each other, the states became a prey to civil war, and the union was dissolved.

COLOMBO (Ceylon) was built in 1638, by the Portuguese, who were expelled by the Dutch in 1666; the latter surrendered it to the British, Feb. 15, 1796. The British troops were murdered here in cold blood by the adigar of Candy, June 6, 1803. See *Ceylon*.

COLON (:), a point known to the ancients, but not expressed. The colon and period were adopted and explained by Thrasymachus about 373 B.C. *Suidas*. It was known to Aristotle. The colon and semicolon (;) were both first used in British literature in the 16th century.

COLONEL (from Italian, *colonna*, a column), the highest regimental military officer. The term had become common in England in the 16th century.

COLONIAL NAVAL DEFENCE. Act to enable the colonies to take effectual measures for their defence against attacks by sea was passed in 1865.

COLONIES. The Phœnician and Greek colonies being frequently founded by political exiles, soon became independent of the mother country. The Roman colonies on the contrary continued in close connection with Rome itself; being governed almost entirely by military law.—The **COLONIES OF GREAT BRITAIN** partake of both these characters. The N. American colonies revolted in consequence of the attempt at taxation without their consent in 1764. The loyal condition of the present colonies now is due to the gradual relaxation of the pressure of the home government. The population of the British colonies in all parts of the world was estimated, in 1861, at 142,952,243 (of which 135,442,911 belong to the East Indies). The revenue of the colonies was estimated in 1865 to be 51,492,000*l.*, the expenditure, 59,353,000*l.* The act for the abolition of slavery in the British colonies, and

for compensation to the owners of slaves (20,000,000*l.* sterling), was passed in 1833. All the slaves throughout the British colonies were emancipated on Aug. 1, 1834. See *Separate Articles*.

COLORADO, a territory of the United States of North America, was organised March 2, 1861. Capital, Golden City.

COLOSSEUM, see *Coliseum*. The building in Regent's Park, London, was planned by Mr. Hornor, a land surveyor, and commenced in 1824, by Peto and Grissell, from designs by Decimus Burton. The chief portion is a polygon of 16 faces, 126 feet in diameter externally: the walls are three feet thick at the ground: the height to the glazed dome 112 feet. On the canvas walls of the dome is painted the panoramic view of London, completed in 1829 from sketches by Mr. Hornor taken from the summit of St. Paul's cathedral in 1821-2. The picture covers above 46,000 square feet, more than an acre of canvas. The different parts were combined by Mr. E. T. Parris, who in 1845 repainted the whole. In 1848 a panorama of Paris was exhibited; succeeded, in 1850, by the lake of Thon in Switzerland; in 1851 the panorama of London was reproduced. In 1848 the theatre with the panorama of Lisbon was added. In 1831, when Mr. Hornor failed, the establishment was sold for 40,000*l.* to Messrs. Braham and Yates. In 1843 it was bought by Mr. D. Montague for 23,000 guineas. *Timbs*. After having been closed for some time, the building was opened to the public at Christmas, 1856, all the several charges being reduced to one shilling. Under the superintendence of Dr. Bachhoffner it continued open till the spring of 1864, when it was again closed.

COLOSSUS OF RHODES, a brass statue of Apollo, seventy cubits high, esteemed one of the wonders of the world, was erected at the port of Rhodes in honour of the sun, by Chares of Lindus, disciple of Lysippus, 290 or 288 B.C. It was thrown down by an earthquake about 224 B.C. The figure is said to have stood upon two moles, a leg being extended on each side of the harbour, so that a vessel in full sail could enter between. A winding staircase led to the top, from which could be discerned the shores of Syria, and the ships that sailed on the coast of Egypt. The statue was in ruins for nearly nine centuries, and had never been repaired; when the Saracens taking Rhodes, pulled it to pieces, and sold the metal, weighing 720,000 lbs., to a Jew, who is said to have loaded 900 camels in transporting it to Alexandria about 653. *Dufresnoy*.

COLOUR is to light what pitch is to sound, according to the undulatory theory of Huyghens (about 1678) established by Dr. T. Young, and others. The shade varies according

to the number of vibrations. The number of millions of millions of vibrations in a second attributed to the red end of the spectrum is 458; to the violet, 727. See *Spectrum*.*

COLUMBIA, a federal district round the city of Washington in Maryland: established 1800. In 1862, slavery was abolished therein. It has no political rights. See *British Columbia*.

COMBAT, SINGLE. Trial by this commenced by the Lombards, 659. *Baronius*. It was introduced into England for accusations of treason, if neither the accuser nor the accused could produce good evidence, 9 Will. II. 1096. The first battle by single combat was that fought before the king and the peers between Geoffrey Baynard and William earl of Eu, who was accused by Baynard of high treason; and Baynard having conquered, Eu was deemed convicted. The last combat proposed was between lord Reay and David Ramsay, in 1631, but the king prevented it. See *High Constable* and *Appeal of Battle*. The same method of trial had also existed in *Ireland*. A trial was appointed between the prior of Kilmainham and the earl of Ormond, the former having impeached the latter of high treason; but the quarrel having been taken up by the king, was decided without fighting, 1446. Remarkable combat in Dublin castle, before the lords justices and council, between Connor MacCormack O'Connor and Teig Mac-Gilpatrick O'Connor, in which the former had his head cut off, and presented to the lords justices, 1553.

COMBINATION. Laws were enacted from the time of Edward I. downwards, regulating the price of labour and the relations between masters and workmen, and prohibiting the latter from *combining* for their own protection. All these laws were repealed in 1825, due protection being given to both parties. The act was amended in 1859, when the subject was much discussed, in consequence of the strike in the building trades.

COMEDY. Thalia is the muse of comedy and lyric poetry. Susarion and Dolon, the inventors of theatrical exhibitions, 562 B.C., performed the first comedy at Athens, on a waggon or moveable stage, on four wheels, for which they were rewarded with a basket of figs and a cask of wine. *Arundelian Marbles*. Aristophanes was called the prince of ancient comedy, 434 B.C., and Menander that of the new, 320 B.C. Of Plautus, 20 comedies are extant; he flourished 220 B.C. Statius Cæcilius wrote upwards of 30 comedies; he flourished at Rome 180 B.C. The comedies of Lælius and Terence were first acted 154 B.C. The first regular comedy was performed in England, about A.D. 1551. It was said of Sheridan that he wrote the best comedy (the *School for Scandal*), the best opera (the *Duenna*), and the best afterpiece (the *Critic*), in the English language (1775-1779). See *Drama*.

COMETS (Greek *comē*, a hair). It is recorded that more than 600 have been seen. Mr. Hind, in his little work on comets, gives a chronological list of comets. The first discovered and described accurately was by Nicephorus. At the birth of the great Mithridates two large comets appeared, which were seen for seventy-two days together, whose splendour eclipsed that of the mid-day sun, and occupied the fourth part of the heavens, about 135 B.C. *Justin*. A grand comet was seen in 1264. Its tail is said to have extended 100°. It is considered to have re-appeared in 1556, with diminished splendour; and was expected to appear again about Aug. 1858 or Aug. 1860. *Hind*. A remarkable one was seen in England, June 1337. *Stow*. Comets were first rationally explained by Tycho Brahe, who, about 1577, demonstrated that comets are extraneous to our atmosphere. A comet, which terrified the people from its near approach to the earth, was visible from Nov. 3, 1679, to March 9, 1680. The orbits of comets were proved to be ellipses by Newton, 1704. A most brilliant comet appeared in 1769, which passed within two millions of miles of the earth.† One still more brilliant appeared in Sept. Oct. and Nov. 1811, visible all the autumn to the naked eye. Another in 1823.

HAILEY'S COMET, 1682. Named after one of the greatest astronomers of England. He first proved that many of the appearances of comets were but the periodical returns of the same bodies, and he

demonstrated that the comet of 1682 was the same with the comet of 1456, 1531, and 1607, deducing this fact from a minute observation of the first-mentioned comet, and being struck by its won-

* Some persons (about 65 out of 1154) cannot distinguish between colours, and are termed *Colour blind*. In 1859, professor J. Clerk Maxwell invented spectacles to remedy this defect, which is also called "Daltonism," after John Dalton, the chemist, to whom scarlet appeared drab-coloured.

† This beautiful comet, moving with immense swiftness, was seen in London; its tail stretched across the heavens, like a prodigious luminous arch, 36,000,000 miles in length. The computed length of that which appeared in 1811, and which was so remarkably conspicuous, was, on October 15, according to the late Dr. Herschel, upwards of 100,000,000 miles, and its apparent greatest breadth, at the same time, 15,000,000 miles. *Philos. Trans. Royal. Soc.* for 1812.

derful resemblance to the comets described as having appeared in those years: Halley, therefore, first fixed the identity of comets, and predicted their periodical returns. *Vince's Astronomy.* The revolution of Halley's comet is performed in about 75 years; it appeared in 1759, and came to its perihelion on March 13; its last appearance was 1835.

ENCKE'S COMET. First discovered by M. Pons, Nov. 26, 1818, but justly named by astronomers after professor Encke, for his success in detecting its orbit, motions, and perturbations; it is, like the preceding, one of the three comets which have appeared according to prediction, and its revolutions are made in 3 years and 15 weeks.

BIELA'S COMET has been an object of fear to many on account of the nearness with which it has approached, not the earth, but a point of the earth's path; it was first discovered by M. Biela, an Austrian officer, Feb. 28, 1826. It is one of the three comets whose re-appearance was predicted, its revolution being performed in 6 years and 38 weeks. Its second appearance was in 1832, when the time of its perihelion passage was Nov. 27; its third was in 1839; its fourth in 1845; and its fifth in 1852.

DONATI'S COMET, so called from its having been first observed by Dr. Donati, of Florence, June 2, 1858,

being then calculated to be 228,000,000 miles from our earth. It was very brilliant in England in the end of September and October following, when the tail was said to be 40,000,000 miles long. On the 10th of October it was nearest to the earth; on the 18th it was near coming into collision with Venus. Opinions varied as to this comet's brilliancy compared with that of 1811.

THE GREAT COMET of 1861 was first seen by Mr. Tebbutt, at Sydney, in Australia, May 13; by M. Goldschmidt and others in France and England on June 29, 30. The nucleus was about 400 miles in diameter, with a long bush-like tail, travelling at the rate of 10,000,000 miles in 24 hours. On June 30 it was suggested that we were in the tail,—there being "a phosphorescent auroral glare." *

A tailless comet was discovered in the constellation Cassiopeia, by M. Seeling, at Athens, on July 2, and by M. Tempel, at Marseilles, July 2 & 3, 1862. M. Rosa (at Rome) discovered a comet on July 25, 1862. It was visible by the naked eye in August and September.

Six telescopic comets were observed in 1863, and several in 1864.

A fine comet appeared in the southern hemisphere, and was visible in South America and Australia, in Jan., Feb., 1865.

COMMANDER-IN-CHIEF. This office in the British army has been very frequently vacant, and sometimes for several years consecutively. When the duke of Wellington resigned the office, on becoming minister, in 1828, his grace's successor, lord Hill, assumed the rank of commander of the forces, or general commanding in chief.

COMMENDAM. By 6 & 7 Will. IV. c. 77 (1836), future bishops were prohibited from holding in commendam the livings, &c. they held when consecrated.

COMMERCE flourished in Arabia, Egypt, and among the Phœnicians in the earliest ages. In later times it was spread over Europe by a confederacy of maritime cities, 1241. See *Hanse Towns*. The discoveries of Columbus, and the enterprises of the Dutch and Portuguese, enlarged the sphere of commerce, and led other nations, particularly England, to engage extensively in its pursuit.† See the various articles connected with this subject through the volume.

The first treaty of commerce made by England with any foreign nation was entered into with the Flemings, 1 Edw. I. 1272. The second was with Portugal and Spain, 2. Edw. II. 1308. *Anderson.* See *Treaties.* *Hertslett's*

Collection, in 10 vols. 8vo., published 1827-59, has a copious index. An important commercial treaty was concluded with France in 1860

* M. Babinet, on May 4, 1857, considered that comets had so little density that the earth might pass through the tail of one without our being aware of it.

† *Chambers of Commerce* originated at Marseilles in the 14th century, and similar chambers were instituted in all the chief cities in France about 1700. These chambers were suppressed in 1791, but afterwards restored, and their great utility was recognised by a decree of Sept. 3, 1851. The chamber of commerce at Glasgow was established 1783; at Edinburgh, 1785; Manchester, 1800; Hull, 1837; and at other important places. On Feb. 21, 1865, 27 of these chambers of commerce (not including Liverpool, Manchester, and Glasgow) met at Westminster for interchange of opinions on various questions.

COMMISSION. See *High Court of Commission*.

COMMISSIONAIRES. The street messengers thus named (pensioners wounded either in the Crimea or India) were first employed in the west-end of London. They were appointed by a society, founded in Feb. 1859 by capt. Edward Walter, which is now under the patronage of the queen and the commander-in-chief. The charges are regulated by a tariff. In Jan. 1861 the society commenced the gratuitous issue of a Monthly Advertising Circular. In March, 1864, there were 250 commissioners in London. In June 17, 1865, capt. Walter resigned the superintendence, and a permanent system of administration was formed. In 1865 commissioners began to be employed in London as private night watchmen. Commissioners have long existed in France.

COMMON COUNCIL OF LONDON. Its organisation began about 1208. The charter of Henry I. mentions the *folk-mote*, this being a Saxon appellation, and which may fairly be rendered the court or assembly of the people. The general place of meeting of the *folk-mote* was in the open air at St. Paul's Cross, St. Paul's churchyard. It was not discontinued till after Henry III.'s reign; when certain representatives were chosen out of each ward, who, being added to the lord mayor and aldermen, constituted the court of common council. At first only two were returned for each ward; but the number was enlarged in 1347, and since. This council became the parent of similar institutions throughout the realm. It is elected annually on Dec. 21, St. Thomas's day. A *Common Hall* is held occasionally. The common council supported the prince of Orange in 1688; and queen Caroline in 1820.

COMMON LAW OF ENGLAND, an ancient collection of unwritten maxims and customs (*Leges non scriptæ*), of British, Saxon, and Danish origin, which has subsisted immemorially in this kingdom; and although somewhat impaired by the rude shock of the Norman conquest, has weathered the violence of the times. This endeared it to the people in general, as well because its decisions were universally known, as because it was found to be excellently adapted to the genius of the English nation; and accordingly, at the famous parliament of Merton, 1236, "all the earls and barons," says the parliament roll, "with one voice answered, that they would not change the laws of England, which have hitherto been used and approved;" eminently the law of the land. See *Bastard*. The process, practice, and mode of pleading in the superior courts of common law, were amended in 1852 and 1854.

COMMON PLEAS, COURT OF, IN ENGLAND. This court in ancient times followed the king's person, and is distinct from that of the King's Bench; but on the confirmation of *Magna Charta* by king John, in 1215, it was fixed at Westminster, where it still continues. In 1833 the mode of procedure in all the superior courts was made uniform. In England, no barrister under the degree of a serjeant could plead in the court of common pleas; but in 1846 the privilege was extended to barristers practising in the superior courts at Westminster.

COMMON PRAYER, BOOK OF, was ordered by parliament to be printed in the English language in April 1, 1548. It was voted out of doors by parliament, and the Directory (*which see*) set up in its room in 1644, and a proclamation was issued against it in 1647. With a few changes the English Common Prayer-book is used by the episcopal churches in Scotland and North America.

The *State services* (which had never formed part of the Prayer-book, but were annexed to it at the beginning of every reign) for November 5 (Gunpowder treason), January 30 (Charles I.'s execution), and May 29 (Charles II.'s restoration), were ordered to be discontinued on January 17, 1859.

COMMONS, HOUSE OF, the great representative assembly of the people of Great Britain, originated with Simon de Montfort, earl of Leicester, who by the Provisions of Oxford ordered returns to be made of two knights from every shire, and deputies from certain boroughs to meet such of the barons and clergy as were his friends, with a view thereby to strengthen his own power in opposition to that of his sovereign Henry III., 1258. *Stow*. See *Parliament*. The following is the constitution of the house of commons since the passing of the Reform Bill in 1832:—

COMMONWEALTH OF ENGLAND. The term is applied to the interregnum between the death of Charles I. and the restoration of Charles II. The form of the government was changed to a republic on the execution of Charles I., Jan 30, 1649,—a new oath called the "Engagement" was framed, which the people were obliged to take.† *Salmon*. Oliver Cromwell was made Protector, Dec. 16, 1653. Richard Cromwell was made Protector, Sept.

In 1848 Sudbury, and in 1852 St. Alban's were disfranchised for bribery and corruption; each having previously returned two members; the aggregate number of the house then became 656. In 1861, the forfeited seats were thus distributed by act of parliament—two additional to the west riding of York, one additional to south Lancashire, and one to a newly-created borough, Birkenhead.

† By this oath they swore to be true and faithful to the commonwealth, without king or house of lords. The statues of Charles were next day demolished, particularly that at the Royal Exchange, and one at the west end of St. Paul's; and in their room the following inscription was conspicuously set up:—*"Exit Tyrannus Regum ultimus, Anno Libertatis Angliæ Restitute Primo, Anno Dom. 1648, Jan. 30."*

3, 1658. Monarchy was restored in the person of Charles II., who entered London, May 29, 1660. See *Rome*.

COMMUNION, one of the names given to the ordinance of the Lord's supper, in the primitive church. Communicating under the form of bread alone is said to have had its rise in the West, under pope Urban II., 1096. The fourth Lateran council, 1215, decreed that every believer should receive the communion at least at Easter. The cup was first denied to the laity by the council of Constance, 1414-18. The communion service, as now performed in the church of England, was instituted in 1548.

COMPANIES.^{*} Among the earliest commercial companies in England may be named the Steel-yard Society, established 1232. The second company was the merchants of St. Thomas à Becket, in 1248. *Stow*. The third was the Merchant Adventurers, incorporated by Elizabeth, 1564. The following are the city companies of London, in the order of precedence; the first twelve are the chief, and are styled "the Honourable." Several companies are virtually extinct, and many of the dates are doubtful.

COMPASS, MARINER'S, is said to have been known to the Chinese, 1115 B.C.; and is ascribed to Marco Polo, a Venetian, A.D. 1260; and to Flavio Gioja, of Amalfi, a navigator of Naples.† Until this time the needle was laid upon a couple of pieces of straw, or small split sticks, in a vessel of water; Gioja introduced the suspension of the needle, 1302. It is also said to have been known to the Swedes in the time of king Jarl Birger, 1250. Its variation was discovered first by Columbus, 1492; afterwards by Sebastian Cabot, 1540. The compass-box and hanging compass used by navigators were invented by William Barlowe, an English divine and natural philosopher, in 1608. See *Magnetism*. The measuring compass was invented by Jost Bing, of Hesse, in 1602.

COMPIEGNE, a French city north of Paris, the residence of the Carlovingian kings. During the siege, Joan of Arc was captured by the English, May 24, 1430. The emperor Napoleon III. and the king of Prussia met here on Oct. 6, 1861.

COMPLUTENSIAN BIBLE. See *Polyglot*.

COMPOSITE ORDER, principally a mixture of the Corinthian and Ionic, and also called the Roman order, is of uncertain date.

COMTE PHILOSOPHY. See *Positive Philosophy*.

^{*} Bubble companies have been formed, commonly by designing persons. Law's bubble, in 1720-1, was perhaps the most extraordinary of its kind, and the *South Sea Bubble*, in the same year, was scarcely less memorable for its ruin of thousands of families. Many companies were established in these countries in 1824 and 1825, and turned out to be bubbles. Immense losses were incurred by individuals, and the families of thousands of speculators were totally ruined. Many railway enterprises (1844-5) may be termed bubbles. See *Law's Bubble*; *South Sea*; *Railways*; *Joint-Stock Companies*.

† The statement that the fleur-de-lis was made the ornament of the northern point of the compass in compliment to Charles, the king of Naples, at the time of the discovery, has been contradicted.

CONCEPTION, IMMACULATE. A festival (on Dec. 8) appointed in 1389, is observed with great devotion in the Roman Catholic Church in honour of the Virgin Mary's having been conceived and born immaculate, or without original sin. Pope Paul V. in 1617 forbade any one to stand up against the opinion of the immaculate conception; this order was confirmed by Gregory XV. and by Alexander VII. *Hénault*. On December 8, 1854, the pope, Pius IX., promulgated a bull with great solemnity, declaring this dogma to be an article of faith, and charging with heresy those who should doubt it or speak against it.—The **CONCEPTIONISTS** were an order of nuns in Italy, established in 1488. See *Santiago*.

CONCERTINA, a musical instrument invented by prof. Wheatstone, about 1825, and improved by Mr. G. Case. The sounds are produced by free vibrating metal springs.

CONCERTS. The Filarmonia gave concerts at Vicenza in the 16th century. The first public subscription concert was performed at Oxford in 1665. The first concert in London is said to have been in 1672. The Academy of Ancient Music began in 1710; the Concerts of Ancient Music in 1776; and the present Philharmonic Society in 1813. See *Music*; *Crystal Palace* and *Handel*.

CONCHOLOGY, the science of shells, is mentioned by Aristotle and Pliny. It was first reduced to a system by John Daniel Major, of Kiel, who published his classification of the *Testacea* in 1675. Lister's system was published in 1685; and that of Largius in 1722. Johnston's Introduction (1850) and Sowerby's Manual of Conchology (1842), are useful. Forbes and Hanley's "British Mollusca and their Shells" (1848-53) is a magnificent work.

CONCLAVE. This term is derived from the conclave, a range of small cells in the hall of the Vatican, or palace of the pope of Rome, where the cardinals usually meet to elect a pope, and is also used for the assembly of the cardinals shut up for the purpose. The conclave had its rise in 1271. Clement IV. having died at Viterbo in 1268, the cardinals were nearly three years unable to agree in the choice of a successor, and were on the point of breaking up, when the magistrates, by the advice of St. Bonaventure, then at Viterbo, shut the gates of their city, and locked up the cardinals in the pontifical palace till they agreed. Hence the custom of shutting up the cardinals while they elect a pope.

CONCORDANCE. An index or alphabetical catalogue of all the words and also a chronological account of all the transactions in the Bible. The first concordance was made under the direction of Hugo de St. Charo, who employed as many as 500 monks upon it, 1247. *Abbé Lenglet*. Cruden's well-known Concordance was published in London in 1737. The Index to the Bible, published by the Queen's printers, was prepared by B. Vincent, editor of this volume, and completed in May, 1848.*

CONCORDAT. The name is given to an instrument of agreement between a prince and the pope, usually concerning benefices. The concordat between the emperor Henry V. of Germany and pope Calixtus II., in 1122, has been regarded as the fundamental law of the church in Germany. The concordat between Napoleon Bonaparte and Pius VII., signed at Paris, July 15, 1801, re-established the Catholic church and the papal authority in France. Napoleon was made in effect the head of the Gallican church, as bishops were to have their appointments from him and their investiture from the pope. Another concordat between the same persons was signed at Fontainebleau, Jan. 25, 1813. These were almost nullified in 1817 and 1819. A concordat, signed Aug. 18, 1855, between Austria and Rome, by which a great deal of the liberty of the Austrian church was given up to the Papacy, caused much dissatisfaction.

CONCUBINES were tolerated among the Jews, Greeks, and Romans, but strictly forbidden by Christ (*Mark x. 1 Cor. vii. 2*). They are mentioned as having been allowed to the priests, 1132. See *Morganitic Marriage*.

CONDOTTIERI, *conductors* or leaders of mercenaries and their bands, became so troublesome in Italy in the middle ages, that the various cities formed a league to suppress them in 1342.

CONDUITS. Two remarkable conduits, among a number of others in London, existed early in Cheapside. The Great Conduit was the first cistern of lead erected in the city, and was built in 1285. At the procession of Anna Boleyn, on the occasion of her marriage, it ran with white and claret wine all the afternoon, June 1, 1533. *Stow*.

* Verbal indexes accompany good editions of the ancient classics. An index to *Shakspeare*, by Ayscough, appeared in 1700; another by Twiss in 1805; and Mrs. Cowden Clarke's (late Mary Novello) complete concordance to *Shakspeare* (on which she spent 16 years' labour) in 1847. Todd's verbal index to *Milton* was published in 1804.

CONFEDERATE STATES OF AMERICA. The efforts of the Southern States for the extension of slavery, and the zeal of the Northern States for its abolition, with the consequent political dissensions, led to the great secession of 1860-1. On Nov. 4, 1860, Abraham Lincoln, the Republican or Abolitionist candidate, was elected president of the United States. Hitherto, a president in the interest of the South had been elected. On Dec. 20, South Carolina seceded from the Union; and Alabama, Florida, Mississippi, Georgia, Louisiana, Texas, Virginia (except West Virginia), Arkansas, Tennessee, and North Carolina also seceded early in 1861. Jefferson Davis was inaugurated president of the Southern Confederacy at Montgomery in Alabama, Feb. 18, 1861. For the events of the war which ensued, and the restoration of the Southern States to the Union, see *United States*, 1861-5.

CONFEDERATION AT PARIS, July 14, 1790. See *Champs de Mars*, and *Bastille*.

CONFEDERATION OF THE RHINE. The League of the Germanic States, formed by Napoleon Bonaparte, July 12, 1806, when he abolished the Holy Roman Empire, and the emperor of Germany became emperor of Austria. It consisted of the kingdoms of Bavaria, Wurtemberg, Saxony, and Westphalia; seven grand duchies; six duchies; and twenty principalities. The German princes collectively engaged to raise 258,000 troops to serve in case of war, and established a diet at Frankfurt, July 12, 1806. This league terminated with the career of Bonaparte in 1814, and was replaced by the *Germanic Confederation* (*which see*).

CONFERENCES. One was held at Hampton Court Palace, between the prelates of the church of England and the dissenting ministers, in order to effect a general union, at the instance of the king, James I. Jan. 14-16, 1604. It led to a new translation of the Bible, that now in general use in England; executed in 1607-11. Some alterations in the church liturgy were agreed upon; but these not satisfying the dissenters, nothing more was done.—Another conference of the bishops and presbyterian ministers, with the same view, was held in the *Savoy*, April 25 to July 25, 1661. The dissenters' objections were generally disallowed, but some alterations were recommended in the Prayer-book. See *Wesleyans*.

CONFSSIONAL. See *Auricular Confession*.

CONFESSIONS OF FAITH, or CREEDS. See *Apostles'*, *Nicene* (325), and *Athanasian* (about 434) *Creeds*.

The confession of faith of the Greek church was presented to Mahommed II. in 1453. This gave way in 1643 to one composed by Mogila, metropolitan of Kiev, which is the present standard of the Russo-Greek church.

The creed of Pius VI., composed of the Nicene creed, with additional articles which embody all the peculiar dogmas of the Roman Catholic church, published by the council of Trent 1564
The church of England retains the Apostles', Nicene, and Athanasian creeds, with Ar-

ticles:—42 in 1552; reduced to 39 . . . 1563
The confession of Augsburg (that of the Lutherans) was drawn up principally by Melancthon, in 1530, and has since undergone modifications, the last of which is called the "Form of Concord" . . . 1579
The Westminster confession was agreed to in 1643; and adopted by the presbyterian church of Scotland. See *Westminster* . . . 1647
The congregational dissenters published a declaration of faith . . . 1833

CONFIRMATION, OR LAYING ON HANDS, was practised by the apostles in 34 and 56 (*Acts* viii. 17; xix. 6), and was general, according to some church authorities, in 190. In the church of England it is the public profession of the Christian religion by an adult person, who has been baptized in infancy. It is made a sacrament by the church of Rome.

CONFLANS (near Paris), **TREATY OF**, between Louis XI. of France and the dukes of Bourbon, Brittany, and Burgundy, 1465. By its provisions Normandy was ceded to the duke of Berry, and an end was put to the "War of the Public Good." It was confirmed by that of Peronne in 1468.

CONGÉ D'ÉLIRE (permission to elect), the licence of the sovereign as head of the church, to chapters and other bodies, to elect dignitaries, particularly bishops, asserted by Henry VIII. 1535. After the interdict of the pope upon England had been removed in 1214, king John made an arrangement with the clergy for the election of bishops.

CONGELATION, the act of freezing. Ice was produced in summer by means of chemical mixtures, by Mr. Walker, in 1783. The congelation of quicksilver was effected without snow or ice, in 1787. In 1810 Leslie froze water in an air-pump by placing a vessel of sulphuric acid under it. Numerous freezing mixtures have been discovered since. Intense cold is produced by the aërication of liquefied carbonic acid gas. In 1857 Mr. Harrison patented a machine for manufacturing ice for commercial purposes, by means of ether and

salt water, and made large blocks. In 1860, M. Carré devised a method of freezing to 60° below zero by making water in a close vessel absorb and give off the gas ammonia. Siebe's ice-making machine, exhibited at the International Exhibition of 1862, excited much admiration.

CONGREGATION OF THE LORD. A name taken by the Scotch Reformers, headed by John Knox, about 1546. Their leaders (the duke of Argyle, &c.) were called Lords of the Congregation about 1557.

CONGREGATIONALISTS. See *Independents*.

CONGRESS. An assembly of princes or ministers for the settlement of the affairs of nations or of a people.* The following are the most remarkable congresses of Europe:—

Munster	1648	Rastadt	Dec. 9, 1797	Laybach	May 6, 1821
Nimeguen	1678	Chatillon	Feb. 5, 1814	Verona	Aug. 25, 1822
Ryswick	1697	Vienna	Nov. 3, "	Paris	Jan 16—April 22, 1856
Utrecht	1713	Aix-la-Chapelle	Oct. 9, 1818	Frankfort (see <i>Germany</i>)	
Soissons	1728	Carlsbad	Aug. 1, 1819		Aug. 16-31, 1863
Antwerp	April 8, 1793	Troppau	Oct. 20, 1820	See <i>Alliances, Conventions, &c.</i>	

The first general congress of the UNITED STATES of AMERICA, preparatory to their declaration of independence, when strong resolutions were passed, also a petition to the king, and an address to the people of England, was held Sept. 5, 1774. The second was held May 10, 1775; the third, when the independence was declared July 4, 1776
The first federal American congress, under the

constitution, was held at New York; George Washington, president March, 1789
The first congress of the seceding southern states was held at Montgomery, Alabama, Feb. 4; it elected Jefferson Davis president of the confederate states on Feb. 9. For political reasons it adjourned on May 24, to meet at Richmond, in Virginia, on . . . July 20, 1861

CONGREVE ROCKETS. Invented by general sir William Congreve, in 1803. They were used with great effect in the attack upon Boulogne, Oct. 8, 1806, when they set a part of the town on fire, which burned for two days: they were employed in various operations in the French war with much success, by a corps called rocket-men.

CONIC SECTIONS. Their more remarkable properties were probably known to the Greeks, four or five centuries before the Christian era. The study of them was cultivated in the time of Plato, 390 B.C. The earliest treatise on them was written by Aristæus, about 330 B.C. Apollonius's eight books were written about 240 B.C. The parabola was applied to projectiles by Galileo, who died 1608; the ellipse to the orbit of planets by Kepler, about 1609.

CONJURATION. See *Witchcraft*.

CONNECTICUT granted to lords Say and Brooke, 1631. See *America*, and *United States*.

CONNOR, BISHOPRIC OF, in Ireland. The see was united to that of Down, 1442. The first prelate was Ængus Macnisiuis, who died 507. The united sees were added to Dromore on the death of the last bishop of the latter, 1842, in accordance with the provisions of the Irish Church Temporalities' Act, passed 1833.

CONQUEST. The memorable era in British history, when William duke of Normandy overcame Harold II. at the battle of Hastings, Oct. 14, 1066, and obtained the crown which had been most unfairly bequeathed to him by Edward the confessor (for Edgar was the rightful heir). William has been erroneously styled the *Conqueror*, for he succeeded to the crown of England by *compact*. He defeated Harold, who was himself a usurper, but a large portion of the kingdom afterwards held out against him; and he, unlike a conqueror, took an oath to observe the laws and customs of the realm, in order to induce the submission of the people. Formerly our judges were accustomed to reprehend any gentleman at the bar who said casually William the conqueror instead of William I. *Selden*. Maclise exhibited forty-two drawings on the events of the Norman conquest, in May, 1857.

CONSCIENCE, COURTS OF, OR REQUESTS, first constituted by a statute of Henry VII. 1493, and re-organised by statute 9 Hen. VIII. 1517. These courts were improved and amended by various acts; their jurisdiction in London reached to 5*l*. and (until superseded by county-courts) to 40*s*. in other towns. The practice was by summons, and if the party did not appear, the commissioners had power to apprehend and commit. See *County Courts*.—James II. proclaimed Liberty of Conscience in 1687. *Conscience Clause*, see *Education*.

* In 1863, the emperor Napoleon invited the sovereigns of Europe to a congress; which was declined by England Nov. 25, and only conditionally acceded to by other powers.

CONSCRIPT FATHERS (*patres conscripti*) was the honourable designation given to the Roman senators, because their names were written in the registers of the senate.

CONSCRIPTION, a mode (derived from the Romans) adopted for recruiting the French and other armies. On Sept. 5, 1798, a military conscription was ordained in France, comprehending all the young men from 20 to 25 years of age : from these selections were made. The present law of 1818 (modified in 1824 and 1832) requires a certain annual contingent from each department,—for all the country, 80,000 men,—which may be increased. The duration of service is seven years. Substitutes and exemptions are permitted. A conscription for 350,000 men took place in Jan. 1813, after the disastrous Russian campaign, and in Dec. same year, another for 300,000 after the battle of Leipsic.

CONSECRATION. Aaron and his sons were consecrated priests, 1490 B.C. (*Lev. viii.*). The Jewish Tabernacle was dedicated 1490 B.C., and Solomon's Temple, 1004 B.C. (*1 Kings, viii.*). The consecration of churches was instituted in the 2nd century, the temple of worship being dedicated with pious solemnity to God and a patron saint. Anciently the consecration of popes was deferred until the emperor had given his assent to their election. Gregory IV. desired to have his election confirmed by the emperor Louis, in 828. *Hénault*. The consecration of churches, places of burial, &c., is admitted in the reformed religion. The consecration of bishops was ordained in the church of England in 1549. *Stow*.

CONSERVATION OF FORCE. The philosophical doctrine that no physical force can be created or destroyed, but may be transferred, is maintained by Grove, Faraday, Helmholtz, Tyndall, and other philosophers. See *Correlation*.

CONSERVATIVES, a name of modern date, is given to, and accepted by a political party, whose leading principle is the conservation of our ancient national institutions. It sprung up in England at the time when the Orange Societies and lodges were discouraged, 1836, and was substituted for Orangemen as a less obnoxious term, and as indicative of milder, but equally constitutional opinions. Conservative has, however, in some measure, changed its signification, and in popular parlance is now opposed to Liberal. Sir Robert Peel acknowledged himself a conservative when reproached by the Irish party in parliament with being an Orangeman ; but the party that afterwards separated from him called their principles conservative in contradistinction to his,—his policy and measures being changed.—The Conservative Club was founded in 1840. See *Protectionists*.

CONSERVATOIRES, a name given to schools for the cultivation of music on the continent. The celebrated Conservatoire de Musique at Paris began in 1793.

CONSERVATORS OF THE PUBLIC LIBERTIES. Officers chosen in England to inspect the treasury and correct abuses in administration, 28 Hen. III. 1244. *Rapin*. Conservators were appointed to see the king's peace kept. *Pardon*. Conservators were formally appointed in every sea-port to take cognizance of all offences committed against the peace upon the main sea out of the liberty of the Cinque Ports. *Bailey*.

CONSISTORIES for regulating ecclesiastical discipline and divine worship in the Lutheran church in Germany, were established at the reformation—the first at Wittenberg in 1542 ; other consistories were established after the peace of Augsburg in 1555.

CONSISTORY COURT, anciently joined with the hundred court ; and its original, as divided therefrom, is found in a law of William I., 1079, quoted by lord Coke. The chief and most ancient consistory court of the kingdom belongs to the see of Canterbury, and is called the Court of Arches (*which see*).

CONSOLIDATED FUND was formed of the other funds in 1786. On Jan. 5, 1816, the exchequers of Great Britain and Ireland, previously separate, were amalgamated.

CONSOLS. See *Stocks*.

CONSPIRACIES AND INSURRECTIONS IN GREAT BRITAIN. Among the recorded conspiracies, real or supposed, the following are the most remarkable :—

CONSTABLE OF ENGLAND, LORD HIGH. The seventh great officer of the crown, and, with the earl marshal, formerly a judge of the court of chivalry, called, in the time of Henry IV., *curia militaris*, and subsequently the court of honour. The power of this officer was so great, that in 1389 a statute was passed for abridging it, and also the power of the earl marshal (*which see*). The office existed before the conquest, after which it went by inheritance to the earls of Hereford and Essex, and next in the line of Stafford. In 1521 it became forfeited to the king in the person of Edward Stafford, duke of Buckingham, that year attainted for high treason, and has never since been granted to any person, otherwise than *pro hac vice* (for this occasion), and that to attend at a coronation or trial by combat. The only instance of a trial by combat being *ordered* since this office fell into the hands of the crown, was that commanded between lord Reay and sir David Ramsay, in Nov. 1631; but the king prevented it.*

CONSTABLE OF SCOTLAND, LORD HIGH. The office was instituted by David I. about 1147. The holder had the keeping of the king's sword, which the king, at his promotion delivered to him naked (and hence the badge of the lord high constable is a naked sword); and the absolute command of the king's armies while in the field, in the absence of the king. The jurisdiction of this office came at last to be exercised only in dealing with crimes during the time of parliament, which some extended likewise to all general conventions. The office was conferred heritably in 1321 on sir Gilbert Hay, created earl of Erroll, by Robert Bruce, and with his descendants it still remains, being expressly reserved by the treaty of union in 1707. The present earl of Erroll is the twenty-second lord high constable (1865).

CONSTABLES of Hundreds and Franchises, instituted in the reign of Edward I., 1285, are now called high constables. There are three kinds of constables, *high, petty, and special*; the high constable's jurisdiction extends to the whole hundred; the petty constable's to the parish or liberty for which he is chosen; and the special constable is appointed for particular occasions and emergencies (as in April, 1848, on account of the Chartists).

CONSTABULARY FORCE. For that of London, *see Police*. The Constabulary of Ireland act passed in 1823, when this species of force was embodied throughout the country. Several subsequent acts were consolidated in 1836.

CONSTANCE, a city in Baden (S. Germany). Here was held the seventeenth general council, 1414, which condemned John Huss; and here he was burnt, July 6, 1415. *See Hussites.*

CONSTANTINA, the ancient capital of Numidia, was taken by the French, Oct. 13, 1837. During the assault on Oct. 12, the French general Damremont was killed. Achmet Bey retired with 12,000 men, as the victors entered Constantina.

CONSTANTINOPLE, formerly Byzantium (*which see*), derives its name from Constantine the Great, who removed the seat of the Eastern Empire here in 330. It was continually

convulsed by factions and religious dissensions. General Ecclesiastical councils were held here in 381, 553, 680, and 869. See *Eastern Empire and Turkey*.—The ERA of Constantinople has the creation placed 5508 years B.C. It was used by the Russians until the time of Peter the Great, and is still used in the Greek church. The civil year begins Sept. 1, and the ecclesiastical year towards the end of March; the day is not exactly determined. To reduce it to our era subtract 5508 years from January to August, and 5509 from Sept. to the end. *Nicolas*.

CONSTELLATIONS. *Arcturus*, *Orion*, the *Pleiades*, and *Mazzaroth*, are mentioned in the book of *Job*, ix. 9, and xxxviii. 31, about 1520 B.C. Homer and Hesiod notice constellations; but though some mode of grouping the visible stars had obtained in very early ages, our first direct knowledge was derived from Claudius Ptolemæus, about A.D. 140. Hipparchus (about 147 B.C.) made a catalogue of forty-eight constellations. Others were added by Tycho Brahe, Hevelius, Halley, and others. The number at present acknowledged is 29 northern, 45 southern, and 12 zodiacal.

CONSTITUENCIES. See *Commons*.

CONSTITUTION OF ENGLAND. It comprehends the whole body of laws by which the British people are governed, and to which it is presumptively held that every individual has assented. *Lord Somers*. This assemblage of laws is distinguished from the term government in this respect—that the constitution is the rule by which the sovereign ought to govern at all times; and government is that by which he does govern at any particular time. *Lord Bolingbroke*. The king of England is not seated on a solitary eminence of power; on the contrary, he sees his *equals* in the co-existing branches of the legislature, and he recognises his superior in the law. *Sheridan*. Hallam's "Constitutional History of England" was first published in 1827.

CONSULS. These officers were appointed at Rome, 509 B.C., when the Tarquins were expelled. They possessed regal authority for the space of a year; Lucius Junius Brutus, and Lucius Tarquinius Collatinus, the latter the injured husband of Lucretia, were the first consuls. A consular government was established in France in 1799, when the directory was abolished: on Nov. 10, Bonaparte, Siéyès, and Roger Ducos were made provisional consular commissioners; and on Dec. 13, Bonaparte, Cambacérès, and Lebrun were made consuls. Bonaparte was made first consul for life, May 6, 1802. Commercial agents were first distinguished by the name of *consuls* in Italy in 1485, being appointed by Richard III. A British consul was first appointed in Portugal in 1633.

CONTINENTAL SYSTEM, the name given to Napoleon's plan to exclude the British merchandise from the entire continent. It began with his *Berlin decree* in 1806, and occasioned by the *Orders in Council* (which see).

CONTRABAND OF WAR, a term said to have been first employed in the treaty of Southampton between England and Spain in 1625. During the struggle between Spain and Holland both powers acted with much rigour towards ships of neutrals conveying goods to the belligerents. This provoked the resistance of England. A milder policy was adopted by the treaty of Pyrenees, 1650; and by the declaration of Paris, April 26, 1856. The subject has been much discussed during the North American conflict, 1861-4.

CONTRACTORS WITH GOVERNMENT, disqualified from sitting in parliament, 1782.

CONTRIBUTIONS, VOLUNTARY, to a vast amount have been several times made by the British people in aid of the government. The most remarkable of these in 1798, to support the war against France, amounted to two millions and a half sterling. Several men of wealth, among others Sir Robert Peel, of Bury, Lancashire, subscribed each 10,000*l.*; and 200,000*l.* were transmitted from India in 1799. See *Patriotic Fund*.

CONTROL, BOARD OF. Mr. Pitt's bill, establishing this board for the purpose of aiding and controlling the executive government of India, and of superintending the territorial concerns of the company, was passed May 18, 1784. Act amended and the board remodelled, 1793. The president of the board was a chief minister of the crown, and necessarily one of the members of the cabinet. This board was abolished in 1858, when the government of India was transferred from the company to the crown. See *India Bills*, and *India*.

CONVENTICLES, private assemblies for religious worship, held by dissenters from the established church; but first applied to the schools of Wickliff. They were strictly forbidden by Elizabeth in 1593, and by Charles II., 1664; and persons attending them were liable to severe punishment. The statutes were repealed by William III. in 1689.

CONVENTION PARLIAMENTS. Two memorable parliaments (especially distinguished by this term), assembled without the king's writ upon extraordinary occasions. The first held on April 25, 1660, voted the restoration of Charles II.; the second, held Jan. 1689, by a majority of two voices, declared for a new sovereign William III. (and Mary), in preference to a regent, which had been proposed. See *National Convention*.

CONVENTIONS. The following are the principal conventions between Great Britain and foreign powers, and by foreign powers with each other. They are more fully described in their respective places through the volume :—

Of Closterseven	Sept. 8, 1757	Of England and United States	Nov. 26, 1826
Of Armed Neutrality	July 9, 1780	Of Spain, for satisfying the claims of British merchants	June 26, 1828
Of Pilnitz	July 20, 1791	Of the Viceroy of Egypt and sir E. Codrington, for restoring Greek captives, &c.	Aug. 6, "
Of Paris (French National) instituted	Sept. 17, 1792	Of France with Brazil	Aug. 14, "

Of Capua, with Murat	May 20, "		
Of St. Cloud, between Davoust, and Wellington, and Blucher	July 5, "		
Of Paris, with the allies	April 25, 1818		
Of Aix-la-chapelle	Oct. 9, "		
Of Austria, with England: the latter agrees to accept 2,500,000 <i>l.</i> as a composition for claims on Austria, amounting to 30,000,000 <i>l.</i> sterling	1824		
Of England with Russia	Feb. 28, 1825		

See *Treaties*.

CONVENTS were first founded, according to some authorities, 270. The first in England was erected at Folkstone, by Eadbald, in 630. *Camden*. The first in Scotland was at Coldingham, where Ethelreda took the veil in 670. They were founded earlier than this last date in Ireland. They were suppressed in England in various reigns, particularly in that of Henry VIII., and few existed in Great Britain till lately.* A very great number have been suppressed in Europe in the present century. The emperor of Russia abolished 187 convents of monks by an ukase dated July 31, 1832. The king of Prussia followed his example, and secularised all the convents in the duchy of Posen. Don Pedro put down 300 convents in Portugal in 1834; and Spain has abolished 1800 convents. Many were abolished in Italy and Sicily in 1860 and 1861; and in Russia in Nov. 1864.

CONVICTS. See *Transportation*.

CONVOCAION. A general assembly of the clergy in the nation, convened by the sovereign's writ, to consult on the affairs of the church, and directed to the archbishop of each province, requiring him to summon all the bishops, deacons, archdeacons, &c. The convocation is divided into two houses, called the upper, consisting of the bishops; and lower, consisting of the deans, prebendaries, archdeacons, and members elected from the lower clergy. The clergy were summoned to meet the king by writ, 23 Edw. I. 1295. The power of the convocation was limited by a statute of Henry VIII., in whose reign the convocation was reorganised. The two houses of convocation were deprived of various privileges in 1716. Formal meetings of the clergy have been held annually since 1854, and attempts have been made to obtain the power of dealing summarily with ecclesiastical affairs, but without effect.

CONVOLVULUS. The Canary Convolvulus (*Convolvulus Canariensis*) came to England from the Canary Isles, 1690. The many-flowered convolvulus in 1779.

COOKERY, an art connected with civilised life. Animals were granted as food to Noah, 2348, B.C., the eating blood being expressly forbidden (*Gen.* ix. 3, 4). In 1898 B.C. a calf was cooked by Abraham to entertain his guests (*Gen.* xviii. 7, 8). "The Forme of Cury" (*i.e.* cookery) is dated 1390. An English cookery-book was printed 1498.† See *Cottage's Store*.

* In 1597, lady Mary Percy founded a convent at Brussels, which flourished there till 1794, when the nuns were compelled to remove to England. They were received by bishop Milner, and placed at Winchester, at which place they remained till their removal to East Bergholt, in Suffolk, June, 1857. This was the first English conventual establishment founded on the continent after the Reformation.—It is stated that there were 16 convents in England in 1841, 53 in 1861, and 189 in 1865.

† *Military Cookery*.—Capt. Grant devised a system of cooking for the camp at Aldershot, which has continued in successful operation for the service of between 12,000 and 14,000 men. From April to August, in 1857, the plan was subjected to the severe test of cooking for 92,000 men, who marched in and out of the encampment during that period. The consumption of fuel requisite for this system of cooking is one half-

COOK'S VOYAGES. James Cook, accompanied by sir Joseph Banks, sailed from England in the *Endeavour* on his first voyage, July 30, 1768;* and returned home after having circumnavigated the globe, arriving at Spithead July 13, 1771. Captain Cook sailed to explore the southern hemisphere, July, 1772, and returned in July, 1775. In his third expedition he was killed by the savages of Owhyhee, Feb. 14, 1779. His ships, the *Resolution* and *Discovery*, arrived home at Sheerness, Sept. 22, 1780.

COOPERAGE, an ancient art, probably suggested for preserving wine. The coopers of London were incorporated in 1501.

CO-OPERATIVE SOCIETIES are composed of working men, having for their object the sale of articles of daily consumption to the members at low prices. The Rochdale Equitable Pioneers Society began in 1844, with a capital of 28*l*. In 1860, the business done amounted to 152,063*l*., the profits being 15,906*l*. These societies (in 1862, 332) are registered pursuant to 13 & 14 Vict. c. 115 (1849).

COORG, a province (S. India). War broke out between the rajah and the East India Company, 1832, which ended by col. Lindsay defeating and deposing the rajah, April 10, 1834; his territories were soon after annexed to the British possessions. In 1853 the rajah brought his daughter to be educated in England, where she was baptized.

COPENHAGEN (Denmark), built by Waldemar I., 1157, and made the capital 1443; university founded 1479. In 1728, more than seventy of its streets and 3785 houses were burnt. Its palace, valued at four millions sterling, was wholly burnt, Feb. 1794, when 100 persons lost their lives. In a fire which lasted forty-eight hours, the arsenal, admiralty, and fifty streets were destroyed, 1795. Copenhagen was bombarded by the English under lord Nelson and admiral Parker; and in their engagement with the Danish fleet of twenty-three ships of the line, eighteen were taken or destroyed by the British, April 2, 1801. Again, after a bombardment of three days, the city and Danish fleet surrendered to admiral Gambier and lord Cathcart, Sept. 7, 1807. The capture consisted of eighteen sail of the line, fifteen frigates, six brigs, and twenty-five gun-boats, and immense naval stores. See *Denmark*.

COPENHAGEN FIELDS (N. London). Here the Corresponding Society met on Oct. 26, 1796; and the Trades' Union, April 21, 1834. The fields are now occupied by the Metropolitan Cattle-market, opened June 13, 1855.

COPERNICAN SYSTEM, so called from its author Nicolas Copernicus, born at Thorn, Feb. 19, 1473, died May 2, 1543. A few days before his death, the printing of his book on the "Revolution of the Celestial Bodies" was completed. The system, which resembles that attributed to Pythagoras, was condemned by a decree of pope Paul V. in 1616, which was not revoked till 1821 by Pius VII. The sun is supposed to be in the centre and immoveable, and the earth and the rest of the planets to move round it in elliptical orbits. The heavens and stars are imagined to be at rest, and the diurnal motion which they seem to have from east to west, is imputed to the earth's motion from west to east.

COPPER. One of the six primitive metals, said to have been first discovered in Cyprus. *Pliny*. We read in the Scriptures of two vessels of fine copper (or brass), "precious as gold," 457 B.C. (*Ezra* viii. 27). The mines of Fahlun, in Sweden, are the most surprising artificial excavations in the world. In England, copper-mines were discovered in 1561, and copper now forms an immense branch of trade: there are upwards of fifty mines in Cornwall, where mining has been increasing since the reign of William III. In 1857, 75,832 tons of copper ore were imported, and 25,241 tons extracted. The Burra-Burra copper-mines, in S. Australia, were discovered in 1842. They have brought great prosperity to that colony. The

pound of coal per man per day, and the official report states the cost to be one halfpenny per man per week for the three daily meals.—Self-supporting *Cooking Depots* for the working classes were set up at Glasgow (by Mr. Thomas Corbett), Sept. 21, 1860; and proved successful in Manchester, London, and other places soon after.

* A memorial was presented to the king by the Royal Society in 1768, setting forth the advantages which would be derived to science if an accurate observation of the then approaching transit of Venus over the sun were taken in the South Sea. The ship *Endeavour* was, in consequence, prepared for that purpose, and the command of her given to lieutenant James Cook. He sailed in July, 1768, touched at Madeira and Rio de Janeiro, doubled Cape Horn, and after a prosperous voyage reached Otaheite, the place of destination, in April, 1769. By a comparison of the observations made on this transit (June 3, 1769) from the various parts of the globe on which it was viewed by men of science, the system of the universe has, in some particulars, been better understood; the distance of the sun from the earth, as calculated by this and the transit in 1761, was settled at 108,000,000 miles, instead of the commonly received computation of 95,000,000. *Butler*. It is now computed to be 95,298,260 miles (1865).

first ship to which a sheathing of copper was applied was his majesty's ship *Alarm*, at Woolwich, in 1761, "to preserve her from worms in southern climates;" it gave great satisfaction, and in 1780 all ships in the British navy were copper-bottomed.—About 1850 the electro-type process was first employed to face with copper printing types and casts from woodcuts.

COPPER MONEY. The Romans, prior to the reign of Servius Tullius, used rude pieces of copper for money. See *Coin*. In England, copper money was made at the instance of sir Robert Cotton, in 1609; but was first really coined (when Miss Stewart sat for the figure of Britannia) . . . 1665 Its regular coinage began in 1672, and it was largely issued in . . . 1689 In Ireland, copper was coined as early as 1339; in Scotland, in 1406; in France, in . . . 1580 Wood's coinage (*which see*) in Ireland commenced in . . . 1723 The copper coinage was largely manufactured at Birmingham, by Boulton and Watt, in . . . 1792

Penny and two-penny pieces were extensively issued, 1797. The half-farthing was coined in, but disused (*see Farthing*) . . . 1843 10,000, voted towards replacing the copper coinage . . . July, 1855
See *Bronze*.

COPPER-PLATE PRINTING was first invented in Germany, about 1450; and rolling-presses for working the plates about . . . 1545 Messrs. Perkins, of Philadelphia, invented a mode of engraving on soft steel, which, when hardened, will multiply copper-plates and fine impressions indefinitely (*see Engraving*) 1819

COPPERAS, a mineral composed of copper or iron combined with sulphuric acid (vitriol), found in copper-mines, commonly of a green or blue colour; first produced in England by Cornelius de Vos, a merchant, in 1587.

COPPERHEADS, a name given about 1863 to such members of the Democrat party in the United States as were in favour of peace with the South on any terms.

COPTS, in Egypt, the supposed descendants of the ancient Egyptians, mingled with Greeks and Persians. Their religion is a form of Christianity derived from the Eutychians.

COPYHOLDERS, who hold an estate by a copy of the rolls of a manor made by a steward of the lord's court. They were enfranchised by 5 Vict. c. 35, 1841. By the Reform Act in 1832, copyholders to the amount of 10*l.* became entitled to a vote for the county. The copyhold acts were amended by 21 & 22 Vict. c. 94 (1858).

INTERNATIONAL COPYRIGHT.

In 1838 and 1852 acts were passed to secure to authors, in certain cases, the benefits of international copyright (1 & 2 Vict. c. 59, and 15 Vict. c. 12), and conventions have, in consequence, been entered into with France, Prussia, &c.

* This act was confirmed by a memorable decision at the bar of the house of lords, and the claim of perpetual copyright was overruled, Feb. 22, 1774. The statute declared the author to have an exclusive right for 14 years, and if at the end of that term he were living, the right to return to him again for the same term of years. Later acts extended the author's right to 28 years, and if living at the end of that time, then to the remainder of his life.

† By this act, the right is to endure for the life of the author, and for seven years after his death; but if that time expire earlier than 42 years, the right is still to endure for 42 years, for which term also any work published after the author's death is to continue the property of the owners of the manuscript.

‡ The important question of a foreigner possessing a copyright in this country was finally decided in the negative by the house of lords, in August, 1854, which reversed the decision of the court of exchequer,

CORBIESDALE, Caithness (N. Scotland). Here, on April 27, 1650, the gallant marquess of Montrose was defeated by the Covenanters. He was taken soon after, treated with great contumely, and hanged at Edinburgh, on May 21.

CORCYRA (now *Corfu*, chief of the Ionian Isles), a colony founded by the Corinthians about 734 B.C. It had frequent wars with the mother country, one about the possession of Epidamnus (431 B.C.) led to the Peloponnesian war. It was subdued by the Spartans in 373, and by the Romans, 230. At the decline of the eastern empire it fell into the hands of the Venetians about A.D. 1149. The Turks attacked Corfu in 1716, but were gallantly repulsed. It was subdued by the Russian and Turkish fleets in 1799, and formed (with the other isles) into the Ionian republic. See *Ionian Isles*.

CORDELIERS, friars of the order of St. Francis d'Assisi (the Minorites) instituted about 1223. They are clothed in coarse grey cloth, with a small cowl and cloak of the same material, having a girdle of cord or rope, tied with three knots, and hence the name, which was first given to them by St. Louis of France, about 1227. Several members of the French revolutionary party, termed "Cordeliers," established at Paris in 1790, Hebert Cloots, &c., were executed March 24, 1794.

CORDOVA, the ancient Corduba, a Roman city in Spain, taken by the Goths in 572, and made the capital of an Arab kingdom by Abderahman in 757. It became eminent for its learned men, and was the birthplace of Seneca and Lucan under the Romans, and of the great Arabian physician Averrhoës. It was rescued from the Arabs by Ferdinand III., of Castile, in 1236, and was taken by the French in 1809; but abandoned by them in 1813.

CORFU. See *Coreyra*.

CORINTH (Greece), a city, said to have been built, 1520 B.C., on the ruins of Ephra. It was defended by an elevated fortress called Acrocorinth, surrounded with strong walls. Its situation was so advantageous, that Cicero named it the *Eye of Greece*, and declared, that of all the cities known to the Romans, Corinth alone was worthy of being the seat of a great empire.—For *Corinth*, in North America, see *United States*, 1862, 1863.

CORINTHIAN ORDER, the richest of the orders of ancient architecture, called by Scamozzi, the virginal order, is attributed to Callimachus, 540 B.C. See *Abacus*.

CORINTHIAN WAR, which began 395 B.C., received this name, because the battles were mostly fought in the neighbourhood of Corinth, by a confederacy of the Athenians, Thebans, Corinthians, and Argives, against the Lacedæmonians. It was closed by the peace of Antalcidas, 387 B.C. The most famous battles were at Coronea and Leuctra (*which see*).

CORK, S. Ireland, built in the 6th century. The principality of the M'Cartys was converted into a shire by king John, as lord of Ireland. The foundation of the see is ascribed to St. Barr, or Finbarr, early in the 7th century. About 1431, this see and that of Cloyne were canonically united; but on the death of bishop Syngé, in 1678, they were separated, the see of Ross having been added to Cork about a century before, 1582. No valuation is returned of this see in the king's books; but in a manuscript in Marsh's library, it is taxed 31

on an appeal by the defendant in the case of Boosey v. Jeffrey. (In 1831, Mr. Boosey purchased the copyright of Bellini's opera, *La Sonnambula*, from which Mr. Jeffrey published a cavatina. Six of the judges were for protecting foreign copyrights, and seven of a contrary opinion.)

CORK-TREE, *Quercus suber*, a species of the oak; part of its bark is the cork used for stopping bottles. The Egyptians made coffins of cork. The tree grows in great abundance on the Pyrenean mountains, and in other parts of Spain, in France, and in the north of New England. It was brought to England about 1690. A cork carpet company was formed in 1862.

CORN. The origin of its cultivation is attributed to Ceres, who, having taught the art to the Egyptians, was deified by them, 2409 B.C. *Arundelian Marbles*. The art of husbandry, and the method of making bread from wheat, and wine from rice, is attributed by the Chinese to Ching Nong, the successor of Fohi, and second monarch of China, 1998 B.C. *Univ. Hist.* Corn provided a common article of food from the earliest ages of the world, and baking bread was known in the patriarchal ages. See *Erodus* xii. 15. Wheat was introduced into Britain in the 6th century by Coll ap Coll Frewi. *Roberts's Hist. Anc. Britons*. The first importation of corn, of which we have a note, was in 1347. A law restricting it was made in 1361. Bounties were granted on its importation into England in 1686.—The new LONDON CORN EXCHANGE, Mark-lane, London, erected at an expense of 90,000*l.*, replacing one established in 1747, was opened June 24, 1828.

July 15, 1828
The act 5 Vict. c. 14, passed 20th April, 1842, the second "sliding scale act," regulated the duty on wheat as follows, with sliding duties, also, on other articles of corn:—

The CORN IMPORTATION Bill (introduced by sir Robert Peel), 9 & 10 Vict. c. 22 (by which the duty on wheat was reduced to 4*s.* when imported at or above 53*s.*, until 1st Feb. 1849; after which day the duty became 1*s.* per

quarter only, on all kinds of grain imported into the United Kingdom, at any prices), received the royal assent . . . June 26, 1846

CORNWALL, S.W. extremity of England, originally called *Kernou*, a term connected with the Latin *cornu*, a horn, in allusion to its numerous promontories or projecting points. On the retreat of the ancient Britons, Cornwall is said to have been formed into a kingdom, and to have existed many years under different princes, among whom were Ambrosius Aurelius, and the celebrated Arthur. It was erected into a dukedom by Edward III. March 17, 1337, and the heir to the crown of England, if a prince, is born duke of Cornwall, but is immediately afterwards created prince of Wales. The Cornish insurgents, under Thomas Hammoek, were defeated at Blackheath, June 22, 1497. A powerful insurrection on account of the establishing the Protestant liturgy in place of the mass, began in Cornwall and Devon in June, and was suppressed, after much bloodshed, in December, 1549. The last person

who spoke the Cornish dialect is said to have been Dolly Pentreath, who died aged 102 at Penzance in 1778. The prince and princess of Wales visited Cornwall in July, 1865. See *Stannary Courts*.

CORONATION. The first coronation by a bishop was that of Majocianus, at Constantinople, 457. Charlemagne was crowned emperor of the west by the pope, Leo III., Dec. 25, 800. The ceremony of anointing at coronations was introduced in England in 872, and into Scotland in 1097. The coronation of Henry III. took place, in the first instance, without a crown, at Gloucester, Oct. 28, 1216. A plain circle was used on this occasion in lieu of the crown, which had been lost with the other jewels and baggage of king John, in passing the marshes of Lynn, or the Wash, near Wisbeach. At the coronation of William and Mary, the bishop of London put the crown on the king's head, as Dr. Sancroft, archbishop of Canterbury, would not take the oaths to their majesties. George IV. was crowned July 19, 1821. William IV. crowned, with his queen, Sept. 8, 1831; and Victoria, June 28, 1838.

CORONATION CHAIR. In the cathedral of Cashel, formerly the metropolis of the kings of Munster, was deposited the *Lia Fail*, or Fatal Stone, on which they were crowned. In 513, Fergus, a prince of the royal line, having obtained the Scottish throne, procured the use of this stone for his coronation at Dunstaffnage, where it continued until the time of Kenneth II., who removed it to

Scone; and in 1206, it was removed by Edward I. from Scone to Westminster.

The **CORONATION OATH** was first administered to the kings of England by Dunstan (archb. of Canterbury), to Ethelred II., in 978. An oath, nearly corresponding with that now in use, was administered in 1377, and was altered in 1689.

CORONEA, BATTLES OF. 1. (or Chaeronea). The Athenians were defeated and their general Tolmides slain in a battle with the Bœotians at Coronea near Chaeronea, 447 B.C. 2. The Athenians, Thebans, Argives, and Corinthians having entered into a league, offensive and defensive, against Sparta, Agesilaus, after diffusing the terror of his arms, from his many victories, even into Upper Asia, engaged the allies at Coronea, a town of Boeotia, and achieved a great victory over them, 394 B.C.

CORONERS, officers of the realm in 925. Coroners for every county in England were first appointed by statute of Westminster, 4 Edw. I. 1276. *Stow*. They are chosen for life by the freeholders, and their duty is to inquire into the cause of violent or unnatural death, upon view of the body. Coroners were instituted in Scotland in the reign of Malcolm II., about 1004. By an act passed in 1843, coroners are enabled to appoint deputies to act for them in case of illness.—20,531 coroners' inquests were held in England and Wales in 1859; 21,178 in 1860; 21,038 in 1861; 50,591 in 1862; 22,757 in 1863; and 24,787 in 1864.

CORONETS, caps or inferior crowns, of various forms, that distinguish the rank of the nobility. The coronets for earls were first allowed by Henry III.; for viscounts by Henry VIII.; and for barons by Charles II. *Baker*. But authorities conflict. Sir Robert Cecil, earl of Salisbury, was the first of the degree of earl who wore a coronet, 1604. It is uncertain when the coronets of dukes and marquesses were settled. *Beaton*.

CORPORATIONS are stated by Livy to have been of very high antiquity among the Romans, by whom they were introduced into other countries. They were first planned by Numa, in order to break the force of the two rival factions of Sabines and Romans, by instituting separate societies of every manual trade and profession. *Plutarch*.

CORPORATIONS, MUNICIPAL, IN ENGLAND. Bodies politic, authorised by the king's charter to have a common seal, one head officer, or more, and members, who are able, by their common consent, to grant or receive in law any matter within the compass of their charter. *Cowel*. Corporations were formed by charters of rights granted by the kings of England to various towns, first by Edward the Confessor. Henry I. granted charters, 1100; and succeeding monarchs gave corporate powers, and extended them to numerous large communities throughout the realm, subject to tests, oaths, and conditions. *Blackstone*. The Corporation and Test act, passed in 1661, was repealed in May, 1828. The Corporation Reform act, for the regulation of municipal corporations in England and Wales, 5 & 6 Will. IV. c. 76 (1835). The Irish Municipal Corporation act, 4 Vict. c. 108, passed in 1840, was amended in 1861.

CORPULENCE. In Germany some fat monks have weighed eighteen stone. *Render*. Of modern instances known in this country was Mr. Bright, a tallow-chandler and grocer, of Maldon, in Essex, who died in the 29th year of his age. Seven persons of the common size were with ease enclosed in his waistcoat. He was buried at All Saints, Maldon, Nov. 12, 1750. Daniel Lambert, supposed to have been the heaviest man that ever lived, died

in his 40th year, at Stamford, in Lincolnshire, weighing ten stone more than Mr. Bright, June 21, 1809. He is said to have weighed 52 stone, 11 pounds. James Mansfield died at Debden, Nov. 9, 1856, aged 82, weighing 34 stone.*

CORPUS CHRISTI, a festival in the Roman catholic church, in honour of the doctrine of transubstantiation, kept on the Thursday after Trinity Sunday. It was instituted by pope Urban IV. between 1262 and 1264, and confirmed by the council of Vienne in 1311.

“**CORRELATION OF THE PHYSICAL FORCES**” is the title of a book by Mr. W. R. Grove, F.R.S., who in 1842 enunciated the theory of the correlation or mutual dependence and convertibility into each other of all the forces of nature (viz. heat, light, electricity, magnetism, chemical affinity, and motion).

CORRESPONDING SOCIETY OF LONDON, was formed about 1791 to spread liberal opinions and check the tyranny of the British government, then much alarmed by the French revolution. Horne Tooke and other members were tried and acquitted, Oct. 1794. See *Trials*, 1794. The meetings of the society at Copenhagen-fields and elsewhere, in Oct. and Nov. 1796, were termed treasonable.—On April 21, 1798, Messrs. O'Connor, O'Coigley, and others, were tried for corresponding with the French directory; and James O'Coigley was executed as a traitor (protesting his innocence) on June 7th.

CORROSIVE SUBLIMATE. See *Mercury*.

CORRUPT PRACTICES ACT, respecting elections for members of parliament, was passed in 1854, and continued in 1861.

CORSICA, an island in the Mediterranean Sea, called by the Greeks *Cyros*. The ancient inhabitants were savage, and bore the character of robbers, liars, and atheists, according to Seneca when he lived among them. Corsica was colonised by Phœceans 564 B.C., and afterwards held by the Carthaginians, from whom it was taken by the Romans, 231 B.C. In modern times, it was nominally dependent upon Genoa, until 1768, when it was ceded to France. During a revolt it was erected into a kingdom under Theodore, its first and only king, in 1736.† The celebrated Pascal Paoli was chosen for their general by the Corsicans, in 1753. He was defeated by the count de Vaux, and fled to England, 1769. The people acknowledged Geo. III. of England for their king, June 17, 1794, when sir Gilbert Elliott was made viceroy, who opened a parliament in 1795. A revolt was suppressed in June, 1796; and the island was relinquished by the British, Oct. 22, same year, when the people declared for the French, who still retain it. Napoleon I. was born at Ajaccio in Corsica on Aug. 15, 1769. A statue to his memory was inaugurated by prince Napoleon Jerome, May 15, 1865.

CORTES, the Spanish parliament, originating in the old Gothic councils. The cortes were assembled after a long interval of years, Sept. 24, 1810; and settled the new constitution, March 16, 1812. This constitution was set aside by Ferdinand VII., who banished many members of the assembly in May, 1814. The cortes were opened by him in 1820, and dissolved in 1823; again assembled in 1834, and have since been regularly convened. The cortes of Portugal assembled by virtue of don Pedro's charter, Oct. 30, 1826; they were suppressed by don Miguel in 1828, and restored in 1833.

CORUNNA (N.W. Spain). The British army, about 15,000 men, under the command of sir John Moore, had just accomplished a safe retreat when they were attacked by the French, whose force exceeded 20,000: the enemy were completely repulsed, but the loss of the British in the battle was immense, Jan. 16, 1809. Sir John was struck by a cannon-ball, which carried away his left shoulder and part of the collar-bone, leaving the arm hanging by the flesh; he died universally lamented. The remains of the army hastily embarked at Corunna, Jan. 17, under sir David Baird.

* In 1863, Mr. Wm. Banting published a letter on corpulence, recommending, from his own experience, as a remedy, great moderation in the use of sugar and starch in diet. 50,000 copies of this letter were speedily sold or given away.

† He came to England, where he was imprisoned in the King's Bench prison for debt, and for many years subsisted on the benevolence of private friends. Having been released by an act of insolvency, in 1756, he gave in his schedule the kingdom of Corsica as an estate to his creditors, and died the same year at his lodgings in Soho. The earl of Oxford wrote the following epitaph, on a tablet near his grave in St. Anne's church, Dean-street:—

“The grave, great teacher! to a level brings
Heroes and beggars, galley-slaves and kings.
But Theodore this moral learn'd ere dead;
Fate pour'd its lesson on his living head,
Bestow'd a kingdom and denied him bread.”

CORUS (or Corupedion), a plain in Phrygia, Asia Minor, where the aged Lysimachus was defeated by Seleucus, and slain, 281 B.C. These two were the only survivors of the warlike companions of Alexander the Great.

CORYPHEUS, the principal person of the chorus in the ancient tragedy. The name was given to Tysias, afterwards named Stesichorus, who first instructed the chorus to dance to the lyre, 556 B.C.

COSMOGRAPHY. See *Astronomy and Geography*.

COSSACKS, the warlike people inhabiting the confines of Poland, Russia, Tartary, and Turkey. They at first lived by plundering the Turkish galleys and the people of Nátolia; but were formed into a regular army by Stephen Bathori, in 1576, to defend the frontiers of Russia from the incursions of the Tartars. They joined the Russians in 1654, and in the great war of Europe against France (1813-15), they formed a valuable portion of the Russian army.

COSTA RICA, a republic in Central America, established in 1848. It has been much disturbed by the American filibusters. See *Nicaragua and America, Central*. On Aug. 14, 1859, the president Juan Mora was suddenly deposed, and Dr. José Montelegre made president. Population in 1861, 131,000.

COSTERMONGERS, itinerant dealers in fruit, vegetables, fish, &c., deriving their name, it is said, from *costard*, a favourite apple. The London costermongers are useful frequently in relieving the markets when glutted; and it was said, in 1860, that 3,000,000*l.* passed through their hands annually. Previous to fasting and thanksgiving days, they sell the appointed forms of prayers in great numbers. On Nov. 22, 1860, they held a meeting in order to represent to the city authorities the hardships they felt by the police restricting their means of livelihood.

COSTUME. See *Dress*.

COTTAGE. The term was originally applied to a small house without land, 4 Edw. I. 1275. "No man may build a cottage, except in towns, unless he lay four acres of land thereto," &c., 31 Eliz. 1589. This statute was repealed, 15 Geo. III. 1775. By returns to the tax office, in 1786, the number of cottages was 284,459. The number in 1800 was 428,214; the number in 1840 was about 770,000. In 1860 the public attention was much drawn to the deplorable state of cottages in many parts of the country, and the law of settlement was altered in 1865.*

COTTON, a vegetable wool, the produce of the *Gossypium*, a shrub indigenous in the tropical regions of India and America. Indian cotton cloth is mentioned by Herodotus, was known in Arabia in the time of Mahomet, 627, and was brought into Europe by his followers. It does not appear to have been in use among the Chinese till the 13th century; to them we are indebted for the cotton fabric termed nankeen. Cotton was the material of the principal articles of clothing among the Americans when visited by Columbus. It was grown and manufactured in Spain in the 10th century; and in the 14th century was introduced into Italy. Indian muslins, chintzes, and cottons were so largely imported into England in the 17th century, that in 1700 an act of parliament was passed, prohibiting their introduction. Cotton became the staple commodity of England in the present century. About 1841 the "cotton" or "Manchester" interest began to obtain political influence, which led to the repeal of the corn laws in 1846. See *Calico, Muslin, &c.*

PROGRESS OF THE COTTON MANUFACTURE IN ENGLAND.

Fustian and Velveteen made of cotton, about 1641.

Calico, Sheetting, &c. The fly-shuttle was invented by John Kay, of Bury, 1738; the drop box by Robert Kay, 1760; spinning by rollers (also attributed to John Wyatt) patented by Louis Paul, 1738; the spinning-jenny, by Hargreaves, 1767; the water-frame, by Arkwright, 1769; the power-loom, by Rev. Dr. Edmund Cartwright, 1785; the dressing machine, by Johnson and Radcliffe, 1802-4; another power-loom, by Horrocks, 1803-13. A combing machine was patented by Joshua Heilmann, in 1845.

British Muslin (totally superseding that of India) is due mainly to the invention of the MULE (which see) by Samuel Crompton, 1774-9; and to the self-acting mule of Mr. Roberts, 1825.

Calico Printing commenced 1764.

The Steam-Engine first applied to the cotton manufacture (by Boulton and Watt) 1785.

Bleaching by means of chloride of lime introduced by Mr. Tennant, of Glasgow, 1798.

Stockings. The stocking-frame was invented by William Lee, in 1589. *Cotton Stockings* were first

* The *Cottager's Stove* was designed by captain John Grant, registered Dec., 1849, and presented by him to the metropolitan association for improving the dwellings of the industrious classes. It requires no fixing, is extremely simple in its construction, and all the operations of cooking may be carried on with any description of fuel. 100 lb. of meat and 115 lb. of vegetables have been cooked in one of these stoves with less than 20 lb. of coal. See *Cookery*.

COTTON, *continued.*

made by hand about 1730; Jedidiah Strutt obtained a patent for Derby ribbed stockings in 1759; and Horton patented his knotted frame in 1776; Crompton's mule was employed in making thread for the stocking manufacture about 1770.

Cotton Lacc—Bobbin-net. The stocking-frame of Lee was applied to lace-making by Hammond, about 1768; the process perfected by John Heathcoat, 1809.

American Cotton. Previous to 1795, our cotton fibre came from the East and West Indies, the Levant, and a little from the United States. About 1786, the growth of cotton began in Georgia. In 1793, Eli Whitney, an American, invented the saw-gin, a machine by which cotton wool is separated from the pod and cleaned with great ease and expedition. This led to such increased cultivation that the United States soon exported 1,500,000 lb. of cotton; in 1795, 5,250,000 lb.; in 1820, 89,999,174 lb.; in 1830, 210,885,358 lb.; in 1840, 487,856,504 lb.; in 1847, 364,599,291 lb.; in 1859, 661,707,264 lb.; in 1860, 1,115,890,608 lb.; in 1861, 819,500,528 lb.

Cotton imported from other countries: In 1847, 110,208,324 lb.; in 1859, 264,281,808 lb.; in 1860, 215,048,144 lb.; in 1861, 437,481,208 lb.

Australian Cotton is said by Manchester manufacturers to be superior to the best American cotton, Jan., 1861. A company was formed at Manchester in Sept., 1860, to endeavour to obtain cotton from India, Africa, and other places. It arose out of the Cotton Supply Association, formed in 1857. Since 1861, the cultivation of cotton in India, Egypt, Italy, &c., has greatly increased.

Cotton Factories were regulated by acts of parliament passed in 1825, 1831, 1833, and 1844. The hours of labour were limited, and the employment of children under nine years of age prohibited. In 1846, 1724 cotton mills employed 197,500 persons. In 1862, the persons employed were stated to be 451,000: 315,000 in Lancashire.

In 1860, 12,419,096 cwt. of raw cotton was imported, of which 9,953,309 cwt. came from the United States, and 1,822,689 cwt. from India.

The supply of cotton from North America has nearly ceased, in consequence of the secession of the southern states from the union in 1860-61. In 1852, Mr. T. Bazley warned the country on the danger of trusting to this source. In May, 1862, he stated that through its failure the loss of the labouring classes was 12,000,000*l.* sterling a year, and that the loss, including the employing classes, might be estimated at nearly 40,000,000*l.* a year.

At a meeting of the noblemen and gentlemen connected with the cotton manufacturing districts at Bridgewater-house, St. James's, on July 19, 1862, the earl of Derby in the chair, 10,000*l.* were subscribed to the Cotton District Relief fund. The viceroy of Egypt, in London at the time, gave 1000*l.* and the queen gave 2000*l.* on July 24. Liberal subscriptions flowed in from all parts. On Aug. 28, the lord mayor had received 41,902*l.*

In the Lancashire district (population about 4,000,000)

there were receiving parish relief, Sept. 1861, 43,500 persons; in Sept., 1862, 163,438. *Earl of Derby*, Dec. 2, 1862.

In July, 1863, about the value of 700,000*l.* remained of the donations which had been received in money and goods, amounting to about 1,900,000*l.*

On Feb. 9, 1863, the "George Griswold" arrived, containing contributions of provisions, &c., from North America, for the relief of the sufferers in Lancashire.

The Union Relief Act (passed in 1862, and continued in 1863) gave much relief by enabling overseers to borrow money to be expended in public works to be executed by the unemployed workmen.

In Oct. 1864, much distress still existed, and fears were entertained for the approaching winter—90,000 more paupers than ordinary in cotton districts. *Times*, Jan. 18, 1865.

In June, 1865, Mr. Farnall, the special commissioner, was recalled by the poor-law board, and the famine was declared to be ended. 1,000,000*l.* had been expended in two years.

COTTONIAN LIBRARY, formed with great labour and judgment by sir Robert Cotton, 1600, *et seq.* It was with difficulty rescued from the fury of the republicans during the protectorate, and was secured to the public by a statute in 1700. It was removed to Essex-house in 1712; and in 1730 to Dean's-yard, Westminster, where on Oct. 23, 1731, a part of the books sustained damage by fire. The library was removed to the British Museum in 1757.

COUNCILS. King Alfred, in about 886, is said to have so arranged the business of the nation, that all resolutions passed through three councils. The first was a select council, to which those only high in the king's confidence were admitted; here were debated all affairs that were to be laid before the second council,—bishops and nobles appointed by the king like the present privy council. The third was a general assembly of the nation, called, in Saxon, Wittenagemot, to which quality and offices gave a right to sit, independent of the king. In these three councils we behold the origin of the cabinet and privy councils and the antiquity of parliaments. See *Cabinet, Common and Privy Councils*, &c.

COUNCILS OF THE CHURCH. The following are among the most memorable. Those numbered are the *General Councils*. *Sir Harris Nicolas* in his "Chronology of History" enumerates 1604 councils, and gives an alphabetical list.

Of the church at Jerusalem (<i>Acts xv.</i>)	50	by treaty between pope Calixtus II. and the emperor Henry V.	March 18 to April 5, 1123
Of the western bishops at Arles, in France, to suppress the Donatists; three fathers of the English church attended	314	X. Second Lateran: Innocent II. presided; preservation of temporalities of ecclesiastics, the principal subject; 1000 fathers of the church attended	April 20, 1139

At Clermont, convened by Urban II. to authorize the crusades: 310 bishops attended	1095		
IX. First Lateran: right of investiture settled			

COUNCILS, FRENCH REPUBLICAN. The council of ANCIENS was an assembly of revolutionary France, consisting of 250 members, instituted at Paris, Nov. 1, 1795, together with the council of FIVE HUNDRED: the executive was a Directory of FIVE. Bonaparte dispersed the council of Five hundred at St. Cloud, Nov. 9, 1799, declaring himself, Roger Ducos, and Siéyès, consuls *provisoires*. See *France*.

COUNSEL are supposed to be coeval with the *curia regis*. Advocates are referred to the time of Edward I., but earlier mention is made of them. Counsel who were guilty of deceit or collusion were punishable by the statute of Westminster, 13 Edw. I. 1284. Counsel were allowed to persons charged with treason by act 8 Will. III. 1696. The act to enable persons indicted for felony to make their defence by counsel, passed Aug. 1836. See *Barristers* and *King's Counsel*.

COUNT, from the Latin *comes*, a companion, and French *comte*; somewhat equivalent to the English earl, whose wife is still termed a countess. Count corresponds to the German *graf*. See *Champagne* and *Toulouse*.

COUNTERPOINT (in music), writing the chords to a melody. The earliest specimen of contrapuntal writing extant is by Adam de la Halle in the 12th century.

COUNTIES OR SHIRES. The division of this kingdom into counties began, it is said, with king Alfred; but some counties bore their present names above a century before. The division of Ireland into counties took place in 1562. Lord-lieutenants were appointed in 1549 in England and in 1831 in Ireland. Counties first sent members to parliament, before which period knights met in their own counties, 1285. CHANDOS CLAUSE, Sect. 20 of the Reform act, 2 Will. IV. c. 45 (1832), inserted by the motion of the marquis of Chandos. By it occupiers as tenants of land paying an annual rent of 50*l.* became entitled to a vote for the knight of the shire. It had the effect of increasing the number of tory voters, and in consequence several vain attempts have been made to repeal the clause.

COUNTRY PARTY. See *Court Party*.

COUNTY-COURTS* for the recovery of debts under 20*l.*, superseding courts of requests, were instituted in 1846 by 9 & 10 Vict. c. 95. The counties of England and Wales are divided into sixty districts, each district having a county-court, and a barrister as judge, and juries sworn when necessary. These courts having been found to work well, their jurisdiction was extended by 13 & 14 Vict. c. 61 (1850), to sums not exceeding 50*l.*, and their proceedings were facilitated in 1852 and 1854. There are now (1865) 59 county-courts in England and Wales. In 1850 the number of plaints entered at the courts of the sixty circuits was 306,793 for 1,265,115*l.*; in 1857, 744,652 plaints for 1,937,745*l.*; of the 217,173 causes tried, 4297 were for sums between 20*l.* and 50*l.* *Official Returns.* From 1847 to 1858 judgment was obtained in these courts for 8,309,236*l.* An act passed in 1865 conferred on these courts equity powers, like those of the court of chancery, in cases relating to sums under 500*l.*, to begin on Oct. 1, 1865.

COURIERS. Xenophon attributes the first couriers to Cyrus; and Herodotus says that they were common among the Persians. The Greeks or Romans had no regular couriers till the time of Augustus, when they travelled in cars, about 24 B.C. Couriers or posts are said to have been instituted in France by Charlemagne about A.D. 800. The couriers for letters were employed in the early part of the reign of Louis XI. of France, owing to this monarch's extraordinary eagerness for news. They were the first institution of the kind in Europe, 1463. *Hénault.* See *Post-office.*

COURLAND, a duchy of Livonia, subjected to Poland in 1582, conquered by Charles XII. of Sweden in 1701; afterwards restored to Sweden, but annexed to Russia in 1795.

COURT PARTY—COUNTRY PARTY, classes of politicians of fluctuating numbers and varying power in the parliaments of England, beginning about 1620. At the end of the 17th century the latter embodied toryism and high church principles with a strenuous maintenance of the assumed rights of "the land," as opposed to the innovations of whiggism and the corruptions of the trading interests. Its most distinguished statesman was sir Thomas Hanmer (the *Montalto* of Pope's *Satires*), who died in 1746. *Ashe.*

COURTRAI (Belgium). Here Robert, count of Artois, who had defeated the Flemings in 1297, was defeated and slain by them, July 11, 1302. The conflict was named the "Battle of Spurs," from the number of gilt spurs collected.

COURT BARON, an ancient court which every lord of a manor may hold by prescription in some part of the manor. It is supposed to have originated with the nobility. In it duties, heriots, and customs are received, and estates and surrenders are passed. Its jurisdiction was restricted in 1747 and 1833.

COURT LEET, an ancient court of record, belonging to a hundred, instituted for punishing encroachments, nuisances, and fraudulent weights and measures, and also offences against the crown. The steward is the judge, and all persons residing within the hundred (peers, clergymen, &c., excepted) are obliged to do suit within this court.

COURT OF HONOUR. In England the court of chivalry, of which the lord high constable was a judge, was called *Curia Militaris*, in the time of Henry IV., and subsequently the Court of Honour. In Bavaria, to prevent duelling, a court of honour was instituted in April, 1819. Mr. Joseph Hamilton for many years ardently laboured to establish a similar institution in Britain.

COURT OF SESSION, the highest civil tribunal in Scotland, was instituted by James V. by statute, May 17, 1532. It consisted originally of 14 judges and a president, and replaced a committee of parliament. In 1830 the number of judges was reduced; and the court now consists of the lord president, the lord justice clerk, and 11 ordinary judges (1865).

COURT OF REQUESTS (also called a Court of Conscience) was first instituted in the reign of Henry VII. 1493, and was remodelled by Henry VIII. in 1517. *Stow.* Established for the summary recovery of small debts under forty shillings; but in the city of London the jurisdiction extends to debts of five pounds. *Ashe.* The courts of requests in the principal towns of the kingdom were superseded in 1847 (those of the city of London only excepted) by the County-Courts (*which see*).

* COUNTY-COURTS, or schyremotes, are of such remote antiquity that their origin is lost. In the time of the Saxons they were the most important tribunals in this country. Alfred is said to have divided England into counties, and counties into hundreds; but the county-courts, the creation of which is generally attributed to him, in 896, seem to have existed at a period long anterior to his reign, and to have been an essential part of the Saxon judicial system.

COURTS OF JUSTICE were instituted at Athens, 1507 B.C. (see *Areiopagus*); by Moses, 1491 B.C. (*Exod.* xviii. 25). They existed under various denominations in Rome. For these realms, see *Chancery*, *Common Pleas*, *Exchequer*, *King's Bench*, &c. The citizens of London were privileged to plead their own cause in the courts of judicature, without employing lawyers, except in pleas of the crown, 41 Hen. III. 1257. *Stow*. The rights of the Irish courts were established by the British parliament in April, 1783.

COURTS MARTIAL are regulated by the Mutiny act, first passed in 1690.

COUTRAS (S.W. France). Here Henry of Navarre totally defeated the duc de Joyeuse and the royalists, Oct. 20, 1587.

COVENANTERS, a name particularly applied to those persons who in the reign of Charles I. took the solemn league and *covenant*, thereby mutually engaging to stand by each other in opposition to the projects of the king; it was entered into in 1638. The COVENANT or league between England and Scotland (the preceding one modified) was adopted and solemnly received by the parliament, Sept. 25, 1643,* and was accepted by Charles II. Aug. 16, 1650, but repudiated by him on his restoration in 1661, when it was declared to be illegal by parliament, and copies of it ordered to be burnt all over England. See *Cameronians*.

COVENT GARDEN (London), so called from having been the garden of St. Peter's convent. The square was built about 1633, and the piazza on the north side and the church were designed by Inigo Jones. The fruit and vegetable markets were rebuilt in 1829-30, from designs by Mr. Fowler (on about three acres of ground belonging to the duke of Bedford).

COVENT GARDEN THEATRE sprang out of one in Lincoln's-inn-fields, through a patent granted 14 Chas. II. 1662, to sir William Davenant, whose company was denominated the "duke's servants," as a compliment to the duke of York, afterwards James II. See under *Theatres*.—The present theatre by Barry was opened May 15, 1858. The *Floral Hall* adjoining it was opened in March 17, 1860, with the volunteers' ball.

COVENTRY ACT. Sir John Coventry, K.B., M.P., was maimed and had his nose slit in the streets of London, by sir Thomas Sandys and others, the adherents of the duke of Monmouth, Dec. 21, 1670. This outrage caused the Coventry act to be passed, to prevent malicious maiming and wounding, March 6, 1671: repealed in 1828.

COVENTRY (Warwickshire). Leofric, earl of Mercia, lord of Coventry, is said to have relieved it from heavy taxes, at the intercession of his wife Godiva, on condition of her riding naked through the streets, about 1057. Processions in her memory took place in 1851, and on June 23, 1862. A parliament was held here in the reign of Henry IV. called *parliamentum indoctum*, or the unlearned parliament, because lawyers were excluded; and in the reign of Henry VI. another met here afterwards called *parliamentum diabolicum*, from the acts of attainder passed against the duke of York and others. The town was surrounded with strong walls, three miles in circumference, and twenty-six towers, which were demolished by order of Charles II. in 1662. The ribbon-makers here suffered much from want of work in the winter of 1860-1.—The BISHOPRIC was founded by Oswy, king of Mercia, 656, and had the double name of Coventry and Lichfield, which was reversed by later bishops. It was so wealthy, that king Offa, by the favour of pope Adrian, made it archiepiscopal; but this title was laid aside on the death of that king. In 1075 the see was removed to Chester; in 1102 to Coventry; and afterwards to its original foundation, Lichfield, but with great opposition from the monks of Coventry. Coventry has lately merged into the bishopric of Lichfield. *Beatson*. See *Lichfield*.

COW-POCK INOCULATION. See *Small Pox*, and *Vaccination*.

CRACOW (a city in Austrian Poland). The Poles elected Cracus for their duke, who built Cracow with the spoils taken from the Franks, 700 *et seq.* Cracow was taken by Charles XII. in 1702. Taken and retaken several times by the Russians and other confederates. The sovereign was crowned at Cracow until 1764. Kosciusko expelled the Russians from the city, March 24, 1794; but it surrendered to the Prussians, June 15, same year,

* It consisted of six articles: 1, the preservation of the reformed church in Scotland, and the reformation of religion in England and Ireland; 2, the extirpation of popery, prelacy, schism, &c.; 3, the preservation of the liberties of parliament and the king's person and authority; 4, the discovery and punishment of all malignants, &c.; 5, the preservation of "a blessed peace between these kingdoms;" 6, the assisting all who enter into the covenant: "This will we do as in the sight of God."

and in 1795 was awarded to Austria. Cracow was formed into a republic in 1815. Occupied by 10,000 Russians, who followed here the defeated Poles, Sept. 1831. Its independence was extinguished : and it was seized by the emperor of Austria, and incorporated with his empire, Nov. 16, 1846, which was protested against by England, France, Sweden, and Turkey. See *Poland*. A dreadful fire laid the greater part of the city in ashes, July 18, 1850.

CRANES are of very early date, for the engines of Archimedes may be so called. In 1857 a crane had been erected at Glasgow capable of lifting 50 tons.

CRANIOLOGY (or PHRENOLOGY), names given to the study of the external form of the human skull, as indicative of mental powers and moral qualities. Dr. Gall, the first propounder, was a German physician, born March, 1758. His first observations were among his schoolfellows. Afterwards he studied the heads of criminals and others, and eventually reduced his ideas to a system, marking out the skull like a map. His first lecture was given at Vienna in 1796 ; but in 1802 the Austrian government prohibited his teaching. In 1800 he was joined by Dr. Spurzheim ; and in 1810-12 they published at Paris their great work on the "Anatomy and Physiology of the Nervous System, and of the Brain in particular." Gall died in 1828. Whatever opinion may be entertained of phrenology, there is no doubt that the researches of Gall and Spurzheim have contributed greatly to physiological science, animal and mental. Combe's "Phrenology," first published in 1819, is the popular English work on this subject. Phrenological societies were formed early in London and Edinburgh.

CRANMER, LATIMER, AND RIDLEY, Martyrdom of, see *Persecutions*, note.

CRANON, Thessaly, N. Greece. The Macedonians under Antipater and Craterus defeated the confederated Greeks, twice by sea, and once by land, near Cranon. The Athenians demanded peace, and Antipater put their orators to death, among whom was Hyperides, who, that he might not betray the secrets of his country when under torture, cut out his tongue, 322 B.C. Demosthenes is said to have taken poison shortly after. *Dufresnoy*.

CRAONNE, (N. France). Here Victor and Ney defeated the Prussians under Blucher, after a severe contest, March 7, 1814.

CRAPE, a light kind of stuff like gauze, made of raw silk gummed and twisted on the mill. Its manufacture is of very early date, and it is said some crape was made by St. Badour, when queen of France, about 680. It was first made at Bologna.

CRAYFORD (Kent). Hengist the Saxon is said to have defeated the Britons here, 457.

CRAYONS, coloured substances made into paste, and dried into pencils, were known in France about 1422 ; and were improved by L'Oriot, 1748.

CREASOTE, or KREASOTE (discovered by Reichenbach about 1833), a powerful anti-septic and coagulator of albuminous tissue, is obtained from the destructive distillation of wood and other organic matters. It is successfully applied to the preservation of meat, timber, &c.

CREATINE (from the Greek *kreas*, flesh), the chemical principle of flesh, was discovered in 1835 by E. Chevreul, and has been fully investigated by Liebig and Gregory.

CREATION OF THE WORLD. The date given by the English bible, and by Usher, Blair, and others, is 4004 B.C. There are about 140 different dates assigned to the Creation, varying from 3616 years to 6984. Dr. Hales fixes it at 5411.

CRECY, or CRESSY (N. France), where Edward III. and his son, Edward the Black Prince, and an army of about 36,000, obtained a great victory over Philip, king of France, with about 130,000, Aug. 26, 1346. John, king of Bohemia (nearly blind) ; James, king of Majorca ; Ralph, duke of Lorraine (sovereign princes) ; and a number of French nobles, together with 30,000 private men, were slain, while the loss of the English was very small. The crest of the king of Bohemia (three ostrich feathers, with the motto *Ich Dien*—in English, "I serve,") has since been adopted by princes of Wales.

CRÉDIT FONCIER. A plan of providing loans to landowners was introduced by Frederick the Great of Prussia, in 1763, in some of the Prussian provinces, as the best method of alleviating the distresses of the landed interest caused by his wars. The system consists of lending money to landowners on the security of their estates, and providing the loan capital by the issue of debentures charged upon the aggregate mortgaged estates.

There are two modes of carrying out this scheme : (1) by means of an association of land-owners ; (2) by means of a proprietary public company. The former obtains in Eastern Prussia, but the latter is exclusively found in Western Europe. *Crédit Foncier* companies have been founded in Hamburg (1782), Western Prussia (1787), Belgium (1841), France (1852), England (1863). Similar companies are now formed, or in course of formation, in all the states of Europe, in India, and in our colonies and dependencies. *Henriques*.

CRÉDIT MOBILIER : a joint-stock company with this name was established at Paris, Nov. 18, 1852, by Isaac and Émile Pereire, and others. It takes up or originates trading enterprises of all kinds, applying to them the principle of *commandite*, or limited liabilities ; and is authorised to supersede or buy in any other companies (replacing their shares or bonds in its own scrip), and also to carry on the ordinary business of banking. The funds were to be obtained by a paid-up capital of 2½ millions sterling, the issue of obligations at not less than 45 days' date or sight, and the receipt of money on deposit or current account. The society apparently prospered ; but is, nevertheless, considered by experienced persons as a near approach to Law's bank of 1716. In Sept. 1857, several of the directors failed ; and in May, 1858, no dividend was paid. The system still exists, and many companies based on its principles were established in London in 1863.

CREEDS. See *Confessions of Faith*.

CREMERA, BATTLE OF. See *Fabii*.

CREMONA (N. Italy), a city founded by the Romans, 221 B.C. It became an independent republic in 1107, but was frequently subjugated by its neighbours, Milan and Venice, and partook of their fortunes. In 1859 it became part of the kingdom of Italy.

CRESCENT, a symbol of sovereignty among the Greeks and Romans, and the device of Byzantium, now Constantinople, whence the Turks adopted it. The crescent has given name to three orders of knighthood ; founded by Charles I. of Naples, 1268 ; by René of Anjou, in 1448 ; by the sultan Selim, in 1801 ; the last is still in existence.

CRESTS are ascribed to the Carians. There are several representations of Richard I. (1189), with a crest on the helmet resembling a plume of feathers. The English kings had generally crowns above their helmets ; that of Richard II. 1377, was surmounted by a lion on a cap of dignity. See *Crecy*. Alexander III. of Scotland, 1249, had a plume of feathers ; and the helmet of Robert I. was surmounted by a crown, 1306 ; and that of James I. by a lion, 1424. In the 15th and 16th centuries, the crest was described to be a figure placed upon a wreath, coronet, or cap of maintenance. *Gwillim*.

CRETE, now **CANDIA** (*which see*).

CREVANT-SUR-YONNE (N. France). John Stuart, earl of Buchan, with a French army, was besieging this place in July, 1423, when it was relieved by the earl of Salisbury with an army of English and Burgundians ; after a severe contest, the French were totally defeated.

CREVELDT, near Cleves (W. Prussia). Here, on June 23, 1758, prince Frederick of Brunswick defeated the French under the count of Clermont.

CRICKET, an ancient English national game, said to be identical with "club ball" played in the 14th century. The present rules of the game were laid down in 1774 by a committee of noblemen and gentlemen, including the duke of Dorset and sir Horace Mann. In 1861 the All England Eleven gained and lost games in Australia.

CRIME. About 1856 it was computed that a fifteenth part of the population of the United Kingdom lived by crime. The increase in education and manufactures is gradually reducing this proportion. From 1848 to 1865 there has been no commitment for political offences, such as treason or sedition. See *Executions* and *Trials*.

CRIME, *continued.*

The Criminal Justice act of 1855 authorises justices, with the consent of the prisoners, to pass sentence for short periods, instead of committing them to trial.

In 1856, the expenses for criminal prosecutions were 194,912*l.* 4*s.* 8*d.* 16 persons were executed for murder in 1856 (four foreigners), 14 in 1857, 11 in 1858 (four foreigners), and 9 (four for wife-murder) in 1859. 2,666 persons were liberated on *tickets-of-leave* in 1856. On Feb. 17, 1857, of 126 persons thus liberated, 58 were believed to be living honestly. But in 1861, 1862, and 1863, the system was considered to have failed through the numerous crimes committed by *ticket-of-leavers*; it was modified by the Penal Servitude act, in 1864.

"Judicial Statistics" of crime, police, and law, with a report, were first published by government, in 1857.

CRIMEA, or CRIM TARTARY, a peninsula in the Euxine or Black Sea, the ancient *Taurica Chersonesus*, colonised by the Greeks about 550 B.C. The Milesians founded the kingdom of Bosphorus, now Kertch, which about 108 B.C. formed part of the dominions of Mithridates, king of Pontus, whose descendants continued to rule the country under Roman protection till the irruption of the Goths, Huns, &c., about A.D. 258. About 1237, it fell into the hands of the Mongols under Genghis Khan; soon after the Venetians established commercial stations, with a lucrative trade, but were supplanted by the Genoese, who were permitted to rebuild and fortify Kaffa, about 1261. In 1475 Mahomet II. expelled the Genoese, and subjected the peninsula to the Ottoman yoke; permitting the government to remain in the hands of the native khans, but closing the Black sea to Western Europe. In 1774, by the intervention of the empress Catherine II., the Crimea recovered its independence: but on the abdication of the khan in 1783, the Russians took possession of the country, after a war with Turkey, and retained it by a treaty of peace in 1792. The Crimea (now Taurida), was divided into eight governments in 1802. War having been declared against Russia by England and France, March 28, 1854, large masses of troops were sent to the East, which, after remaining some time at Gallipoli, and other places, sailed for Varna, where they disembarked May 29th. An expedition against the Crimea having been determined on, the allied British, French, and Turkish forces, amounting to 58,000 men (25,000 British), commanded by lord Raglan and marshal St. Arnaud, sailed from Varna, Sept. 3rd, and landed on the 14th, 15th, and 16th, without opposition, at Old Fort, near Eupatoria, about 30 miles from Sebastopol. On the 20th they attacked the Russians, between 40,000 and 50,000 strong (under prince Menschikoff), entrenched on the heights of Alma, supposed to be unassailable. After a sharp contest the Russians were totally routed. See *Alma* and *Russo-Turkish War*. Peace was proclaimed in April, 1856, and the allies quitted the Crimea July 12 following.

CRIMESUS, a river in Sicily, near which Timoleon defeated the Carthaginians, 339 B.C.

CRIMINAL LAWS OF ENGLAND. Their great severity, pointed out by sir Samuel Romilly, sir James Mackintosh, and others, about 1818, was considerably mitigated by sir R. Peel's acts, passed 1826-8. The criminal law was consolidated in six acts passed in 1861.

CRIMPING-HOUSES were used to entrap persons into the army; hence the name of "crimp sergeant." In a riot in London, some of these receptacles were destroyed by the populace, in consequence of a young man who had been enticed into one being killed in endeavouring to escape, Sept. 16, 1794.

CRINOLINE (a French word, meaning stuff made of *crin*, hair) is the modern name of the "fardingale" of the time of queen Elizabeth, hoop-like petticoats made of whalebone, &c., revived in France and England since 1855. They have frequently occasioned loss of life, by coming in contact with fire and machinery. In No. 116 of the *Tatler*, published Jan. 5, 1710, is an amusing trial of the hoop-petticoat then in fashion.

CRIPPLEGATE (London), was so-called from the lame beggars who sat there, so early as the year 1010. The gate was new built by the brewers of London, in 1244; and was pulled down and sold for 91*l.* in July, 1760. The poet Milton was buried in the church near it, Nov. 12, 1674. See *London Gates*.

CRISPIN and CRISPIANUS are said to have been two saints, born at Rome, from whence they travelled to Soissons, in France, to propagate the Christian religion. Not to be chargeable to others, they worked as shoemakers; but the governor of the town discovering them to be Christians, ordered them to be beheaded, about 288. On this account, the shoemakers chose them for their tutelar saints. Their day is Oct. 25.

CRITICS. The first society of them was formed 276 B.C. *Blair*. Of this class were

Varro, Cicero, Apollonius, and many distinguished men. In modern times, the *Journal des Savans* was the earliest work of the system of periodical criticism, as it is now known. It was originated by Denis de Sallo, ecclesiastical counsellor in the parliament of France, and was first published at Paris, May 30, 1655, and is still continued. The first work of this kind in England was the *Review* of Daniel Defoe (the term being invented by himself), published in Feb. 1703. The *Waies of Literature* was commenced in 1714, and was discontinued in 1722. See *Reviews*.*

CROATIA was conquered by Coloman, king of Hungary, in 1102, and was with that country united to Austria in 1526. The Croatian diet was abolished in Nov. 1861.

CROCKERY-WARE. See *Earthenware*.

CROCODILES were fed well and revered as divinities by the Egyptians. The emperor Augustus is said to have collected twenty-five at one time in his amphitheatre, where they were killed by gladiators. A fossil crocodile was found at Doddridge, Gloucestershire, in 1806.

CROIX, ST., a W. India Island, purchased from the French by Christian VI., king of Denmark, in 1733; taken by sir Alexander Cochrane, Dec. 22, 1807; restored in 1814.

CROPREDY-BRIDGE, near Banbury, Oxfordshire. Here the royalists defeated sir William Waller and the army of the parliament, June 29, 1644.

CROSIER, a staff surmounted by a cross, borne before an archbishop. The pastoral staff or bishop's staff, with which it is often confounded, was in the form of a shepherd's crook, intended to admonish the prelate to be a true spiritual shepherd. The bearing a crosier before ecclesiastics is mentioned in the life of St. Cesarea of Arles, about 500.

CROSS. That on which the Redeemer suffered on Mount Calvary, was said to have been found at Jerusalem, deep in the ground with two others, by St. Helena, May 3, 328; Christ's being distinguished from those of the thieves by a sick woman being cured by touching it. It was carried away by Chosroes, king of Persia, on the plundering of Jerusalem; but was recovered by the emperor Heraclius (who defeated him in battle) Sept. 14, 615, and that day has since been commemorated as "the festival of the Exaltation of the Cross," established in 642.—It is asserted by church writers that a shining cross, two miles in length, was seen in the heavens by Constantine, and that it led him to adopt it on his standards, with the inscription "*In hoc signo vinces*;" "in this sign thou shalt conquer." With these he advanced to Rome, where he vanquished Maxentius, Oct. 27, 312. *Lenglet*.

Signing with the Cross was first practised by Christians to distinguish themselves from the Pagans, about 110; and in the time of Tertullian, 260, it was deemed efficacious against poison, witchcraft, &c.

Crosses in churches and chambers were introduced about 431; and set up on steeples about 568
Maids of the Cross were a community of young women who made vows of poverty, chastity, and obedience, instituted in . . . 1265

Crosses in honour of queen Eleanor were set up in the places where her hearse rested, between 1206 (when she died) and . . . 1307
 Crosses and idolatrous pictures were removed from churches, and crosses in the streets demolished by order of parliament . . . 1641
 The order of *Ladies of the Star of the Cross* was instituted by the empress Eleonora de Gonzaga, queen of Leopold I., in . . . 1668

CROSSED CHEQUES. See *Drafts*.

CROTONA (S. Italy), a city founded by the Achæan Greeks about 710 B.C. Here Pythagoras taught about 520 B.C.

CROWS. An act passed for their destruction in England (which breeds more of them, it is said, than any other country in Europe), 24 Hen. VIII. 1532. Crows were anciently employed as letter-bearers, as carrier-pigeons are now.

CROWN. An Amalekite brought Saul's crown to David, 1056 B.C. (2Sam. i.) The first Roman who wore a crown was Tarquin the Elder, 616 B.C. The crown was first a fillet tied round the head; afterwards it was formed of leaves and flowers, and also of stuffs adorned with jewels. See *Tiara*.

* The legality of fair criticism was established in the English courts, in Feb., 1794, when an action that excited great attention, brought by an author against a reviewer for a severe critique upon his work, was determined in favour of the defendant, on the principle that criticism is allowable, however sharp, if just, and not malicious.

CROWN, *continued.*

The crown of Alfred had two little bells attached (872); it is said to have been long preserved at Westminster, and may have been that described in the parliamentary inventory taken in 1649.

Athelstan's crown resembled an earl's coronet, 929. William I. wore his crown on a cap, adorned with points, 1066.

Richard III. introduced the crosses, 1483.

Henry VII. introduced the arches, 1485.

The crown of Charles II., made in 1660, is the oldest existing in our day. See *Blood's Conspiracy*.

The crown and regalia of England were pledged to the city of London by Richard II. for 2000*l.* in 1386. See the king's receipt on redeeming them. *Rumer*.

The *Imperial State Crown of England* was made by Rundell and Bridges, in 1838, principally with jewels taken from old crowns. It contains 1 large ruby, 1 large sapphire, 16 sapphires, 11 emeralds, 4 rubies, 1363 brilliants, 1273 rose diamonds, 147 table diamonds, 4 drop-shaped pearls, and 273 pearls. *Professor Tennant*.

CROWN LANDS. The revenue arising from those in England is now nearly all subject to parliament, which annually provides for the support of the sovereign and government. The annual revenue now arising from crown lands is about 284,500*l.* The revenues of the duchies of Cornwall and Lancaster belong to the prince of Wales, and accumulate during his minority. Henry VII. (1485) resumed those which had been given to their followers by the sovereigns of the house of York. The hereditary estates of the crown were largely bestowed on their courtiers by the sovereigns—especially by the Stuarts.

CROWNS AND HALF-CROWNS were coined in England by Edward VI. in 1553. None were coined in 1861, and they will gradually be withdrawn from circulation.

CRUCIFIXION. A mode of execution common among the Syrians, Egyptians, Persians, Carthaginians, Greeks, and Romans, esteemed the most dreadful on account of the shame attached to it; it was usually accompanied by other tortures. Ariarathes of Cappadocia, aged 80, when vanquished by Perdiccas, was discovered among the prisoners, and by the conqueror's orders was flayed alive, and nailed to a cross, with his principal officers, 322 B.C. Jesus Christ was crucified April 3, A.D. 33 *Bible*. (April 15, A.D. 29, *Clinton*; March 28, A.D. 31, *Hales*). Crucifixion was ordered to be discontinued by Constantine, 330. *Lenglet*. See *Death, Punishment of*.

CRUELTY TO ANIMALS, ROYAL SOCIETY FOR THE PREVENTION OF, was instituted in 1824. Through its exertion hundreds of cases of cruelty are annually prosecuted. Acts for the protection of animals were passed in 1835 and 1839. A similar society exists in Paris. In 1860 both societies endeavoured to repress vivisection (physiological experiments on living animals).

CRUSADES (French *Croisades*), wars undertaken by the Christian powers to drive the infidels from Jerusalem and the adjacent countries, called the Holy Land. They were projected by Peter Gautier, or Peter the Hermit, an enthusiastic French officer of Amiens, who turned pilgrim. Having travelled in the Holy Land, on his return, he deplored to pope Urban II. that infidels should be in possession of the city where Christ had taught. Urban convened a council of 310 bishops at Clermont in France, at which the ambassadors of the chief Christian potentates assisted, and gave Peter the fatal commission to excite all Europe to a general war, 1094. The first crusade was published; an army of 300,000 men was raised, Peter had the direction of it, and Godfrey de Bouillon the command, 1095. *Voltaire*. The warriors wore a red cross upon the right shoulder, with the name of Croisés, Crossed, or Crusaders; their motto was *Volonté de Dieu*, "God's will."—The French government are publishing the Western Historians of the Crusades in a magnificent form (1844-60).

I. Crusade (1096) ended by Jerusalem being taken by assault, July 15, 1099, and in establishing Godfrey de Bouillon as king.

II. Preached by St. Bernard in 1146, headed by emperor Conrad II., and Louis VII. of France. Crusaders defeated; Jerusalem lost in 1187.

III. Emperor Frederick Barbarossa, &c., in 1188, joined by Philip II. of France and Richard I. of England, in 1190. Glorious, but fruitless.

IV. 1195, by emperor Henry VI.; successful till his death in 1197.

V. Proclaimed by Innocent III., 1198. Baldwin, count of Flanders, attacked the Greeks, and took Constantinople in 1202. His companions returned.

VI. In 1228, by emperor Frederick II., who obtained possession of Jerusalem on a truce for ten years.

In 1240, Richard, earl of Cornwall, arrived at Palestine, but soon departed.

VII. By Louis IX. (St. Louis), who was defeated and taken prisoner at Mansourah, April 5, 1250; released by ransom; truce of ten years.

VIII. And last, in 1270, by the same prince, who died on his way of a contagious disease, at Carthage, in Africa. Other princes followed him, among others prince Edward, afterwards our Edward I. In 1291, the sultan took Acre, and the Christians were driven out of Syria.

CRYOPHORUS, an instrument (invented by Dr. Wollaston about 1812) to demonstrate the relation between evaporation at low temperatures and the production of cold.

CRYPTOGRAPHIC MACHINE, for carrying on secret correspondence, patented 1860.

CRYSTALLOGRAPHY is the science relating to the symmetrical forms assumed by substances passing from the liquid to the solid state. Romé de Lisle published his "Essai de Cristallographie," in 1772; but René-Just Haüy is justly regarded as the founder of the modern school of crystallography (1801). *Whevell*. Dana, Dufresnoy, and Miller, are eminent modern writers on this subject.

CRYSTAL PALACE, HYDE PARK, LONDON. See *Exhibition of 1851*.

CRYSTAL PALACE, SYDENHAM. The Exhibition building of 1851 having been surrendered to Messrs. Fox & Henderson on Dec. 1, 1851; the materials were sold for 70,000*l.* to a company (formed by Mr. Leach), who soon after commenced erecting the present Crystal Palace on its present site, near Sydenham in Kent (300 acres having been purchased for the purpose) under the direction of sir Joseph Paxton, Messrs. Owen Jones, Digby Wyatt, and other gentlemen engaged in the erection of the preceding structure. The proposed capital of 500,000*l.* (in 100,000 shares of 5*l.* each) was increased in Jan. 1853 to a million pounds. In addition to the permanent exhibition, there are extensive gardens, with magnificent fountains, &c., illustrations of zoology, geology, botany, ethnology, &c.

CUBIT, a measure of the ancients, by which the ark of Noah was measured (B.C. 2448). *Holden*. The Hebrew sacred cubit was two English feet, and the great cubit eleven English feet. Originally, it was the distance from the elbow, bending inwards, to the extremity of the middle finger. *Calmet*.

CUCUMBERS, noticed by Virgil and other ancient poets, were brought to England from the Netherlands about 1538.

CUDDALORE (India), on the coast of the Carnatic, was acquired by the English in 1681. It was reduced by the French in 1758, but was recaptured in 1760 by sir Eyre Coote. Again lost in 1781, it underwent a destructive siege by the British under general Stuart, in 1783, which was continued until peace was signed, when it reverted to them, 1784.

CUIRASS, a part of armour much in use by the Greeks and Romans. *Tacitus*. The skins of beasts, and afterwards tanned leather, formed the cuirass of the Britons until the Anglo-Saxon era. It was afterwards made of iron and brass, and covered the warrior from neck to waist before and behind. The cuirass was worn by the heavy cavalry in the reign of Henry III. 1216 *et seq.** Napoleon had several regiments of cavalry wearing cuirasses.

CULDEES (said to derive their name from *cultores Dei*, worshippers of God,) monks of simple and peaceful lives in Scotland and Ireland in early times. They had their principal seat at St. Andrew's; and it is said that in 1185 at Tipperary there was a Culdean abbey whose monks were "attached to simple truth and pure Christian worship, and had not yet conformed to the reigning superstition." They were eventually subjected to the papal yoke.

CULLEN'S-WOOD (Ireland): a horrible slaughter of the English by the Irish took place at a village near Dublin, on Easter or *Black Monday*, so called from this massacre, March 30, 1209. The English were a colony from Bristol inhabiting Dublin, whence they went to divert themselves at Cullen's-wood, when the O'Byrnes and O'Tooles fell upon them, and destroyed 500 men, besides women and children.

CULLODEN, near Inverness, where the English, under William, duke of Cumberland, defeated the Scottish rebels headed by the young Pretender, the last of the Stuarts, April 16, 1746. The Scots lost 2500 men in killed upon the field, or in the slaughter which occurred in the pursuit, while the loss of the English did not far exceed 200. After the battle, the duke's army practised great cruelties upon the vanquished and the defenceless country people. *Smollett*. Prince Charles fled, and wandered among the wilds of Scotland for six months, while 30,000*l.* were offered for taking him, and the troops of the conqueror were constantly in search. He at length escaped from Uist to Morlaix, and died at Rome in 1788.

CULVERINS, ordnance so called from the French *coulevrine*, introduced into England from a French model in 1534. It was originally five inches and a quarter diameter in the bore, and carried a ball of eighteen pounds. *Bailey*.

CUMBERLAND, a N.W. county of England, was granted to Malcolm I. of Scotland in 945, by king Edmund, "on condition that he should be his fellow-worker." It was seized by William I., but restored to Malcolm III., "who became his man," 1072. William the Lion, after his defeat at Alnwick, resigned Cumberland to Henry II., and it was finally annexed to England in 1237.

CUMÆ (S. Italy), an old Greek colony, 1050 B.C., said to have been the residence of the ancient Sibyl, was taken by the Samnites 420 B.C., and annexed and enfranchised by the Romans, 338 B.C.

CUMBERLAND, THE. See *Naval Battles*, 1811.

CUNAXA, in Mesopotamia, near the Euphrates, where Cyrus the younger was defeated and slain by his brother Artaxerxes II., against whom he had conspired (B.C. 401), narrated in Xenophon's *Anabasis*. His Greek auxiliaries in the battle were successful. See *Retreat of the Greeks*.

CUNEIFORM INSCRIPTIONS (from *cuneus*, Latin for a wedge), in characters resembling arrow-heads, found at Babylon, Behistun, &c., have lately been deciphered by English and foreign scholars, who date some of them as far back as 2000 B.C. This is impugned by other scholars. See *Assyria*, *Babylon*, *Behistun*.

* The use of cuirasses and helmets, as well as the use of bows and arrows, which had been hardly known under the first race of the kings of France, became a military law under the second race. (*Capit. of Charlem.*) Chivalry at this time began to be introduced; the knight, who was called *Miles*, held a rank in the army, independently of his military rank. Reign of Louis V., year 987. *Hénault*.

CUNNERSDORF (in Prussia), **BATTLE OF**. The king of Prussia, with 50,000 men, attacked the Austrian and Russian army of 90,000 in their camp, and at first gained considerable advantages; but pursuing them too far, the Austrians and Russians rallied, and gained a complete victory. The Prussians lost 200 pieces of cannon and 20,000 men in killed and wounded, Aug. 12, 1759.

CUPOLA SHIPS. See *Navy of England*.

CUPPING, a mode of blood-letting. The skin is scarified by lancets, and a glass cup in which the air has been rarified by flame, is immediately applied to it, when the blood usually flows into the cup. This operation was well known to the ancients, and is described by Hippocrates (B.C. 413) and Celsus (B.C. 20), who highly commend it. It was common in England about 1820, but is not much employed in the present day.

CURACOA, an island in the Caribbean sea, settled by the Spaniards about 1527, was seized by Holland in 1634. In 1800, the French having settled on part of this island, quarrelled with the Dutch, who surrendered it to a single British frigate. It was restored to the Dutch in 1802; taken from them by the British in 1807, and again restored in 1814.

CURATES were of early appointment as coadjutors in the Romish church, and are mentioned in England in the 7th century. Among the acts passed for the relief of this laborious class of the clergy, are the 12th Anne, 1713, and 36th, 53rd, and 58th Geo. III., and especially the beneficent act 2 Will. IV. Oct. 1831. It appeared by parliamentary reports on ecclesiastical revenues, that there were in 1831, 5230 curates in England and Wales, whose stipends amounted to 424,695*l*. The greatest number of curates in one diocese was Lincoln, 629; and the smallest that of St. Asaph, 43.

CURFEW BELL (from the French *couvre feu*), was introduced into England by Will. I. 1068. On the ringing of the curfew at eight o'clock in the evening all fires and candles were to be extinguished under a severe penalty. *Rapin*. The curfew was abolished 1 Hen. I. 1100. A curfew bell was rung at West Ham so lately as Nov. 1859.

CURRENTS, from *Corinth*, whence, probably, the tree was first brought to us about 1533. The name is also given to a small kind of dried grape, brought from the Levant and Zante. The duty on these currants (44*s*. 4*d*. per cwt. in 1834) has been reduced to 7*s*. The hawthorn currant (*Ribes Oxycanthoides*) came from Canada in 1705.

CURRENCY ACTS. Those of sir Robert Peel were passed in 1819 and in 1844.

CURTATONE, near Mantua, N. Italy. Here the Austrians, under Radetzky, crossed the Mincio, May 28, 1848, and defeated the Italians after a severe conflict.

CUSHEE PIECES, invented by Richard Leake, the master-gunner of the *Royal Prince* man-of-war, renowned for bravery shown in the engagement with the Dutch admiral Van Tromp, in 1673.

CUSTOM is a law, not written (*lex non scripta*), established by long usage and consent, and it is distinguished from *lex scripta*, or the written law. It is the rule of law when it is derived from 1189 downwards. Sixty years' custom is binding in the civil law, and forty years' in ecclesiastical cases.

CUSTOMS were collected upon merchandise in England, under Ethelred II. in 979. The king's claim to them by grant of parliament was established 3 Edw. I. 1274. The customs were farmed to sir Thomas Smith for annual sums varying from 14,000*l*. to 50,000*l*. in the reign of Elizabeth. *Stow*. They were farmed by Charles II. for 390,000*l*. in 1666. *Davenant*. In 1671 commissioners were appointed. The customs were consolidated by Mr. Pitt in 1787. Between 1820 and 1830 so many reductions and consolidations were made in the customs department, that above a quarter of a million was saved in salaries, though the work has enormously increased.—Acts consolidating the customs duties were passed in 1853, 1854, and 1860, whereby the number of articles in the tariff and the amount of the customs were greatly reduced. See *Revenue*. Custom-house officers and officers of excise were disqualified from voting for the election of members of parliament, in 1782.

CUTLERY. See *Steel.*

CUTTING-OUT MACHINES. Wearing apparel was first cut out by machinery in England in the factory of Messrs. Hyams in 1853. The machine, invented by Mr. Frederick Osbourn, consists of a reciprocating vertical knife working through a slot in the table that supports the pile of cloth to be cut. The cloth being pressed up to the edge of the knife by the attendant, the knife will sever it in the direction of the lines marked on the upper layer. This system of cutting out is now generally adopted in the slop-work trade, and, with the aid of the sewing-machine (*which see*), has tended greatly to improve the condition of the persons employed in the manufacture of wearing apparel for the home and foreign markets.

CYANOGEN, a colourless gas (composed of nitrogen and carbon), irritating to the nose and eyes, derived from Prussian blue, was discovered by Gay Lussac in 1814.

CYCLE of the sun is the twenty-eight years before the days of the week return to the same days of the month. That of the moon is nineteen lunar years and seven intercalary months, or nineteen solar years. The cycle of Jupiter is sixty years, or sexagenary. The Paschal cycle, or the time of keeping Easter, was first calculated for the period of 532 years by Victorius, 463. *Blair.* See *Metonic Cycle*, *Calippic Period*.

CYCLONES, circular whirlwinds, or hurricanes, common in the East and West Indian and Chinese seas, varying from 200 to 500 miles in diameter. Many details respecting them will be found in Reid's "Law of Storms," first published in 1838. By the great cyclone of Oct. 5, 1864, immense damage was done on sea and land. About 100 ships are said to have been lost, and about 60,000 persons perished, and whole towns were nearly destroyed. See *Calcutta*. Captain Watson, of the "Clarence," observing the barometer falling, and foretelling the approach of the cyclone, saved his ship by steering out of its range.

CYCLOPÆDIA. See *Encyclopædia*.

CYCLOPEAN MASONRY, a term given to very ancient buildings in Greece, Italy, and Asia Minor, probably the work of the Pelasgi, more than 1000 B.C.

CYMBAL, the oldest known musical instrument, was made of brass, like a kettle-drum. Xenophon mentions the cymbal as invented by Cybele, who, we are told, used it in her feasts, about 1580 B.C.

CYMRI or **KYMRI** (hence Cambria), the name of the ancient Britons who belonged to the great Celtic family, which came from Asia and occupied a large part of Europe about 1500 B.C. About A.D. 640 Dyvnwal Moelmuad reigned "*King of the Cymry.*" See *Wales*.

CYNICS, a sect of philosophers founded by Antisthenes (about 396 B.C., *Diog. Laert.*, *Clinton*), who professed to condemn all worldly things, even all sciences, except morality; were very free in reprehending vice; lived in public, and practised great obscenities without blushing. Diogenes was one (died 323 B.C.).

CYNOSCEPHALÆ (*dogs' heads*, so named from the shape of the heights), in Thessaly, where Pelopidas and the Thebans defeated Alexander tyrant of Phæræ and the Thessalians, 364 B.C. (Pelopidas being slain); and where the consul Flaminius totally defeated Philip V. of Macedon, 197 B.C., and ended the war.

CYPRESS, *Cupressus Sempervirens*, a tree originally found in the isle of Cyprus. The Athenians buried their heroes in coffins made of this wood, of which many of the Egyptian mummy-chests were also fabricated. The ancients planted it in cemeteries. The cypress was brought to England about 1441. The deciduous cypress, or *Cupressus disticha*, came from North America before the year 1640.

CYPRUS, an island in the Mediterranean, was divided among several petty kings till the time of Cyrus of Persia, who subdued them. It was taken by the Greeks 477 B.C., and ranked among the proconsular provinces in the reign of Augustus. Conquered by the Saracens, A.D. 648; but recovered by the Greeks, in 957. Cyprus was reduced by Richard I. of England, in 1191. He gave it to Guy de Lusignan, who became king in 1192, and whose descendants reigned till the last, Catherine de Cornaro, sold it to the Venetians, 1489, from whom it was taken by the Turks, 1571. They still retain it.

CYR, Sr., near Versailles, where a conventual college for ladies was founded by Madame De Maintenon, in 1686. It is now a military college.

CYRENAIC SECT, founded by Aristippus the Elder, 365 B.C. They maintained the doctrine that the supreme good of man in this life is pleasure, particularly that of the senses; and said that even virtue ought to be commended only because it gave pleasure.

CYRENE (N.W. Africa), a Greek colony, founded by Battus about 630 B.C. Aristæus, who was chief of the colonists here, gave the city his mother's name. It was also called Pentapolis, on account of its five towns; namely, Cyrene, Ptolemais, Berenice, Apollonia, and Arsinoë. It was conquered by Ptolemy Soter I., who placed many Jews here (286 B.C.). Cyrene was left by Ptolemy Apion to the Romans, 97 B.C. It is now a desert. Some Cyrenaic sculptures were placed in the British Museum in July, 1861.

CYZICUS (Asia Minor). In the Peloponnesian war, the Lacedæmonian fleet under the command of Mindarus, assisted by Pharnabazus, the Persian, was encountered by the Athenians under Alcibiades, and defeated with great slaughter, near Cyzicus. Mindarus was slain 410 B.C. *Plutarch*. 408 B.C. *Lenglet*.

CZAR. Ivan Basilowitz, having severely defeated the Tartars, took the title of Tzar or Czar about 1482. The eldest son is called Czarowitz, and the empress Czarina.

D.

DACIA, a Roman province, part of Hungary, and the adjoining provinces, after many contests finally subdued by Trajan, 106, when Decebalus, the Dacian leader, was killed. Dacia was abandoned to the Goths by Aurelian, in 270; subdued by the Huns, 376; by Scythians, 566; by Charlemagne, and by the Magyars, in the 9th century.

DAGHISTAN (S.W. Asia), was conquered by the czar Peter, 1723; restored to Persia, 1735; but re-annexed to Russia by Alexander I., 1813.

DAGUERRETYPE PROCESS, invented by Daguerre, 1838. See *Photography*.

DAHLIA. This beautiful flower was brought from Mexico, of which it is a native, in the present century. It was first cultivated by the Swedish botanist, professor Dahl, and soon became a favourite in England. In 1815, about two months after the battle of Waterloo, it was introduced into France, and the celebrated florist André Thouine suggested various practical improvements in its management. The botanist Georgi shortly before introduced it at St. Petersburg; hence the dahlia is known in Germany as the *Georgina*.

DAHOMÉY, a negro kingdom, West Africa, became known to Europeans early in the last century, when Trudo Andati or Guadjor Trudo, a man of energy and talent, was king. He died in 1732, and was succeeded by a series of cruel tyrants: a large part of whose revenue was derived from the slave trade. Abbeokuta, which was a robber's cave in 1825, is now a strong-walled populous town, inhabited by free blacks; and is consequently opposed by the king of Dahomey. His army has been severely defeated in its attacks on this place, and in one on March 16, 1864, a great number of his Amazons were slain. During the last few years this kingdom has been visited by Captain Burton and other travellers, who have described the sanguinary customs of the royal court.

DAHRA (Algeria). On June 18, 1845, above 500 Kabyles at war with the French were suffocated in a cave by smoke, the fire having been kindled by order of general Pelissier, afterwards duke of Malakoff. They had fired on the messenger bearing an offer of a truce. The massacre was condemned by marshal Soult, the minister of war, but justified by marshal Bugeaud.

DAKOTA (North America) was organised as a territory of the United States on March 2, 1861.

DALECARIANS (Sweden), revolted against Christian of Denmark, 1521, and placed Gustavus Vasa on the throne of Sweden.

DALMATIA, an Austrian province, N.E. of the Adriatic Sea, was finally conquered by the Romans, 34 B.C. The emperor Diocletian erected his palace at Spalatro, and retired there, A.D. 305. Dalmatia was held in turns by the Goths, Hungarians, and Turks, till its cession to Venice in 1699. By the treaty of Campo Formio in 1797 it was given to Austria. In 1805 it was incorporated into the kingdom of Italy, and gave the title of duke to marshal Soult, but in 1814 it reverted to Austria.

DALTONISM. See *Colour*, note.

DAMASCUS (Syria), a city in the time of Abraham, 1913 B.C. (*Gen.* xiv.), consequently one of the most ancient in the world, now the capital of a Turkish pachalic.

DAMASK LINENS AND SILKS, first manufactured at Damascus, have been beautifully imitated by the Dutch and Flemish. The manufacture was brought to England by artisans who fled from the persecutions of the duke of Alva, 1571-3. The Damask Rose was brought here from the south of Europe by Dr. Linacre, physician to Henry VIII., about 1540.

DAMIENS' ATTEMPT. Louis XV. of France was stabbed with a knife in the right side by Damiens, a native of Arras, Jan. 5, 1757. The culprit endured the most excruciating tortures, and was then broken on the wheel, March 28.

DAMIETTA (Lower Egypt), was built about 1250. Here, it is said, was first manufactured the cloth termed *dimity*.

DAMON AND PYTHIAS (or Phintias), Pythagorean philosophers. When Damon was condemned to death by the tyrant Dionysius of Syracuse, about 387 B.C., he obtained leave to go and settle some domestic affairs, on the promise of returning at the appointed time of execution, and Pythias became surety for the performance of his engagement. When the fatal hour approached, Damon did not appear, and Pythias surrendered himself, and was led away to execution; but at this critical moment Damon returned to redeem his pledge. Dionysius was so struck with their fidelity that he remitted the sentence and entreated them to permit him to share their friendship.

DANAI: an ancient name of the Greeks derived from Danaus king of Argos, 1474 B.C.

DANCE OF DEATH. The triumph of death over all ranks of men was a favourite subject with the artists of the middle ages, and appears in rude carvings and pictures in various countries. The *Chorea Machabæorum* or *Danse Macabre* was the first printed representation, published by Guyot Marchand, a bookseller of Paris, in 1485. Holbein's celebrated *Dance of Death* (concerning the authorship of which there has been much controversy), was printed at Lyons in 1538, and at Basil, 1594. Since then many editions have appeared; one with an introduction and notes was published by Mr. Russell Smith in 1849.—The term *Dance of Death* was also applied to the frenzied movements of the Flagellants, who had sometimes skeletons depicted on their clothing, about the end of the 14th century.†

* Abd-el-Kader visited England in August, 1865.

† The *Dancing Mania*, accompanied by aberration of mind and distortions of the body, was very prevalent in Germany in 1374, and in the 16th century in Italy, where it was termed *Tarantism*, and erroneously supposed to be caused by the bite of the *Tarantula* spider. The music and songs employed for its cure are still preserved.

DANCING to the measure of time was invented by the Curetes, 1534 B.C. *Eusebius*. The Greeks were the first who united the dance to their tragedies and comedies. Pantomimic dances were first introduced on the Roman stage, 22 B.C. *Usher*. Dancing by cinque paces was introduced into England from Italy, A.D. 1541. In modern times the French were the first who introduced *ballets analogues* in their musical dramas. The country dance (*contredanse*) is of French origin, but its date is not precisely known. *Spelman*. The waltz and quadrille were introduced into England about 1813. See *Morice Dances*.

DANE-GELD, or **DANEGETL**, a tribute paid to the Danes to stop their ravages in this kingdom; first raised by Ethelred II. in 991, and again in 1003; and levied after the expulsion of the Danes to pay fleets for clearing the seas of them. The tax was suppressed by Edward the Confessor in 1051; revived by William the Conqueror, 1068; and formed part of the revenue of the crown, until abolished by Stephen, 1136. Every hide of land, *i.e.* as much as one plough could plough, or as *Bede* says, maintain a family, was taxed at first 1s., afterwards as much as 7s. Camden says that once 24,360*l.* was raised.

DANES. See *Denmark*. During their attacks upon Briton and Ireland they made a descent on France, where, in 895, under Rollo, they received presents under the walls of Paris. They returned and ravaged the French territories as far as Ostend in 896. They attacked Italy in 903. Neustria was granted by the king of France to Rollo and his Normans (North-men), hence Normandy, in 911. The invasions of England and Ireland were as follows:—

First hostile appearance of the Danes	783	Ravage Cornwall, Devon, and Dorset	982
They land near Purbeck, Dorset	787	And ravage Essex and Suffolk	990

DANNEWERKE, or **Dannawirke**, a series of earthworks, considered almost impregnable, stretching across the long narrow peninsula of Schleswig, Holstein, and Jutland—said to have been constructed during the “stone age,” long before the art of metal-working. It was rebuilt in 937 by Thyra, queen of Gormo the old, for which she was named “Dannabod,” the pride of the Danes. It was repaired by Olaf Tryggvesson between 995 and 1000. The retreat of the Danes from it Feb. 5, 1864, occasioned much dissatisfaction in Copenhagen.

DANTE'S DIVINA COMMEDIA was first printed in 1472. He was born May 14, 1265, and died at Ravenna, Sept. 14, 1321. A festival in his honour, at Florence, was opened by the king, May 14, 1865, when a large statue of Dante by Pazzi of Ravenna was uncovered.

DANTZIC (N. Germany), a commercial city in 997; but according to other authorities, built by Waldemar I. in 1165. Poland obtained the sovereignty of it in 1454. It was seized by the king of Prussia, and annexed in 1793. It surrendered to the French, May, 1807; and by the treaty of Tilsit was restored to independence, under the protection of Prussia and Saxony. Dantzic was besieged by the allies in 1812; and surrendered to them,

Jan. 1, 1814. By the treaty of Paris it again reverted to the king of Prussia. By an inundation here, owing to the Vistula breaking through its dykes, 10,000 head of cattle and 4000 houses were destroyed, and a vast number of lives lost, April 9, 1829.

DANUBE (German, Donau; anciently Ister, in its lower part). Except the Wolga, the largest river in Europe, rising in the Black Forest and falling into the Black Sea. Its navigation has been considered an object of great importance, from the time of Trajan to the present time. Part of Trajan's bridge at Gladova still remains. It was destroyed by Adrian, to prevent the barbarians entering Dacia. Steam navigation was projected on this river by count Szenechi in 1830, and in that year the first steam-boat was launched at Vienna, and the Austrian company was formed shortly after. The Bavarian company was formed in 1836. Charlemagne, in the 8th century, contemplated uniting the Danube and Rhine by a canal. At the peace of 1856 the free navigation of the Danube was secured.

DANUBIAN PRINCIPALITIES; WALLACHIA and MOLDAVIA: capitals, Bucharest and Jassy. United, as **ROUMANIA**, under the government of prince Alexander Couza in 1859. Population of the two 1860, 4,200,000. These provinces formed part of the ancient Dacia, which was conquered by Trajan about 106, and abandoned by Aurelian about 270. For some time after they were alternately in the possession of the barbarians and the Greek emperors; and afterwards of the Hungarians. In the 13th century they were subdued by the Turks, but permitted to retain their religious customs, &c.

DARDANELLES, THE, are two castles (Sestos, in Romania, and Abydos, in Natolia), commanding the entrance of the strait of Gallipoli, built by the sultan Mahomet IV. in 1659, and named Dardanelles from the contiguous town Dardanus.—The passage of the Dardanelles was achieved by the British squadron under sir John Duckworth, Feb. 19, 1807; but the admiral was obliged to repass them, which he did with great loss, March 2, following, the castles of Sestos and Abydos hurling down stones of many tons weight, upon the British ships. The allied English and French fleets passed the Dardanelles at the sultan's request, Oct. 1853. See *Hellespont*.

DARIC, a Persian gold coin, issued by Darius, hence its name, about 538 B.C. About 556 cents. *Knowles*. It weighed two grains more than the English guinea. *Dr. Bernard*.

DARIEN, ISTHMUS OF, central America, discovered by Columbus, 1494. About 1694, William Paterson, founder of the Bank of England, published his plan for colonising Darien. In consequence a company was formed in 1695 and three ill-fated expeditions sailed there in 1698 and 1699, from Scotland, where 400,000*l.* had been raised. The first consisted of 1200 young men of all classes, besides women and children. The enterprise not having been recognised by the English government, the settlements were threatened by the Spaniards, to whom they were finally surrendered, March 30, 1700. Paterson and a few survivors from famine and disease, had set off shortly before the arrival of the second expedition. Several years after, a sum of 398,085*l.* was voted by parliament to the survivors as "Equivalent money." A sum of money was also voted to Paterson; but the bill was rejected in the house of lords. See *Panama*.

DARK AGES, a term applied to the period of time called the *Middle Ages*; according to Hallam, comprising about 1000 years—from the invasion of France by Clovis, 486, to that of Naples by Charles VIII. 1495. During this time learning was at a low ebb.

DARMSTADT. See *Hesse Darmstadt*.

DARTFORD (Kent). Here commenced the insurrection of Wat Tyler, 1381. A convent of nuns, of the order of St. Augustin, endowed here by Edward III., 1355, was converted by Henry VIII. into a royal palace. The first paper-mill in England was erected at Dartford by sir John Spielman, a German, in 1590 (*Stow*), and about the same period was erected here the first mill for splitting iron bars. The powder-mills here were blown up four times between 1730 and 1738. Various explosions have since occurred, in some cases with loss of life to many persons : Oct. 12, 1790 ; Jan. 1, 1795 ; and more recently.

DARTMOUTH (Devon). Burnt by the French in the reigns of Richard I. and Henry IV. In a third attempt (1404), the invaders were defeated by the inhabitants, assisted by the valour of the women. The French commander, Du Chastel, three lords, and thirty-two knights were made prisoners. In the war of the parliament, Dartmouth was taken after a siege of four weeks, by prince Maurice, who garrisoned the place for the king (1643) ; but it was retaken by general Fairfax by storm in 1646.

DATES were affixed to grants and assignments 18 Edw. I. 1290. Before this time it was usual at least to pass lands without dating the deed of conveyance. *Lewis*. Numerous instruments of assignment enrolled among our early records establish this fact. The date is determined by the names of the parties, particularly that of the grantor : the possession of land was proof of the title to it. *Hardie*. A useful glossary of the dates given in old charters and chronicles will be found in Nicolas's "Chronology of History."

DAUPHIN. It is a vulgar error to suppose that, by the treaty of 1343, which gave the full sovereignty of Dauphiny to the kings of France, it was stipulated that the eldest son of the king should bear the title of dauphin. So far from it, the first dauphin named in that treaty was Philip, second son of Philip of Valois. *Hénault*. The late duke of Orleans, eldest son of Louis-Philippe, was not called the dauphin.

DAVID'S, ST. (S.W. Wales), the ancient Menapia, now a poor decayed place, but once the metropolitan see of Wales, and archiepiscopal. When Christianity was planted in Britain, there were three archbishops' seats appointed, viz. London, York, and Caerleon upon Usk, in Monmouthshire. That at Caerleon being too near the dominions of the Saxons, was removed to Menew, and called St. David's, in honour of the archbishop who removed it, 519. St. Sampson was the last archbishop of the Welsh ; for he, withdrawing himself on account of a pestilence to Dôle, in Brittany, carried the pall with him ; but his successors preserved the archiepiscopal power, although they lost the name. In the reign of Henry I. these prelates were forced to submit to the see of Canterbury. *Beatson*. Present income 4500*l*.

RECENT BISHOPS OF ST. DAVID'S.

1800. Lord George Murray, died June 3, 1803.

1803. Thomas Burgess, translated to Salisbury, June 1825.

1825. John Banks Jenkinson, died July 7, 1840.

1840. Connop Thirlwall (PRESENT bishop, 1865.)

DAVID'S DAY, ST., March 1, is annually commemorated by the Welsh, in honour of St. David. Tradition states that on St. David's birthday, 540, a great victory was obtained by the Welsh over their Saxon invaders ; that the Welsh soldiers were distinguished by order of St. David by a leek in their cap.

DAVIS'S STRAIT (N. America), discovered by the English navigator, John Davis, on his voyage to find a N. W. passage, between 1585 and 1587. He made two more voyages for the same purpose, and afterwards performed five voyages to the East Indies. In the last he was killed by Japanese pirates, in the Indian seas, on the coast of Malacca, Dec. 27, 1605.

DAY. Day began at sunrise among most of the northern nations, and at sunset among the Athenians and Jews. Among the Romans, day commenced at midnight, as it now does among us. The Italians in many places, at the present time, reckon the day from sunset to sunset, making their clocks strike twenty-four hours round, instead of dividing the day, as is done in all other countries, into equal portions of twelve hours. This mode is but partially used in the larger towns of Italy ; most public clocks in Florence, Rome, and Milan, being set to the hour designated on French or English clocks. The Chinese divide the day into twelve parts of two hours each. Our civil day is distinguished from the astronomical day, which begins at noon, is divided into twenty-four hours (instead of two parts of twelve

hours), and is the mode of reckoning used in the Nautical Almanack. At Rome, day and night were first divided in time by means of water-clocks, the invention of Scipio Nasica, 158 B.C.

DEACONS (literally *servants*), an order of the Christian priesthood, which took its rise from the institution of seven deacons by the Apostles, which number was retained a long period in many churches, about 53. (*Acts* vi.) The original deacons were Stephen, Philip, Prochorus, Nicanor, Timon, Parmenas, and Nicolas. The qualifications of a deacon are mentioned by St. Paul (65), 1st *Timothy* iii. 8—14.

DEACONESSES, or ministering widows, are mentioned in early Christian history. Their qualifications are given in 1 *Tim.* v. 9, 10 (65). Their duties were to visit the poor and sick, assist at the agapæ or love feasts, admonish the young women, &c. The office was discontinued in the Western church in the 5th and 6th centuries, and in the Greek church about the 12th, but has been recently revived in Germany.

DEAD, PRAYERS FOR, began about 190. *Eusebius*. See *Prayer*.

DEAD WEIGHT LOAN acquired its name from its locking up the capital of the Bank of England, which in 1823 advanced 11,000,000*l.* to the government (to construct new ordnance, &c.). The latter engaged to give an annuity of 585,740*l.* for 44 years; which ceases in 1867.

DEAF AND DUMB. The first systematic attempt to instruct the deaf and dumb was made by Pedro de Ponce, a Benedictine monk of Spain, about 1570. Bonet, also a monk, published a system at Madrid in 1620. Dr. Wallis published a work in England on the subject in 1650. The first regular academy for the deaf and dumb in Britain was opened in Edinburgh in 1773. In modern times the abbé de l'Épée (1712-89), and his friend and pupil the abbé Sicard of Paris (1742—1822); the rev. Mr. Townsend and Mr. Baker, of London; Mr. Braidwood of Edinburgh; and surgeon Orpen, of Dublin, have laboured with much success in promoting the instruction of the deaf and dumb. The asylum for deaf and dumb children was opened in London through the exertions of Mr. Townsend, in 1792; one in Edinburgh by Mr. J. Braidwood, in 1810; and one in Birmingham by Mr. T. Braidwood, in 1815. The asylum at Claremont, Dublin, was opened in 1816. In 1851, there were in Great Britain, 12,553 deaf and dumb out of a population of 20,959,477.

DEAN, FOREST OF, Gloucestershire. Anciently it was wooded quite through, and of great extent; and in the last century, though much curtailed, was twenty miles in length and ten in breadth. It was famous for its oaks, of which most of our former ships of war were made. The memorable riots in this district, when more than 3000 persons assembled in the forest, and demolished upwards of fifty miles of wall and fence, throwing open 10,000 acres of plantation, took place on June 8, 1831.

DEATH, PUNISHMENT OF. The ancients inflicted death by crucifixion, and even women suffered on the cross. Mithridates, a Persian soldier, who boasted that he had killed Cyrus the Younger, at the battle of Cunaxa, was by order of Artaxerxes Mnemon eighteen days in a state of torture exposed to the action of the sun. Drowning in a quagmire was a punishment among the Britons, about 450 B.C. *Stow*. Maurice, the son of a nobleman, was hanged, drawn, and quartered for piracy, the first execution in that manner in England, 25 Hen. III. 1241. The punishment of death was abolished in a great number of cases by sir R. Peel's acts, 4 to 10 Geo. IV. 1824-9; and by the criminal law consolidation acts of 1861, was confined to treason and wilful murder. See *Ravalliac*, *Boiling*, *Burning*, *Hanging*, *Forgery*, and *Execution*. A parliamentary commission respecting capital punishment was appointed early in 1864. Capital punishment was restricted in Italy in April, 1865.

DEATHS, REGISTERS OF. See *Bills of Mortality* and *Registers*.

DEBT. See *National Debt*, *Bankrupts* and *Insolvents*. Debtors have been subjected to imprisonment in almost all countries and times; and until the passing of the later bankrupt laws and insolvent acts, the prisons of these countries were crowded with debtors to an extent that is now scarcely credible. It appears by parliamentary returns that in the eighteen months, subsequent to the panic of Dec. 1825, as many as 101,000 writs for debts were issued from the courts in England. In the year ending 5th Jan. 1830, there were 7114 persons sent to the several prisons of London; and on that day, 1547 of the number were yet confined. On the 1st of Jan. 1840, the number of prisoners for debt in England and Wales was 1732; in Ireland the number was under 1000; and in Scotland under 100. The operation of statutes of relief, and other causes, considerably reduced the number of imprisoned

debtors. When the new Bankruptcy Act (abolishing imprisonment for debt except when fraudulently contracted) came into operation, in Nov. 1861, a number of debtors who had been confined, were released.* Arrest of Absconding Debtors bill, 14 & 15 Vict. c. 52, 1852. See *Arrest and King's Bench*.

DEBUSCOPE, an instrument of French origin, somewhat similar to the kaleidoscope, said to be useful for devising patterns for calico-printers, &c., made its appearance in 1860.

DECAMERONE (10 days). See *Boccaccio*.

DECAPITATION. See *Beheading*.

DECEMBER (from *decem*, ten), the tenth month of the year of Romulus, commencing in March. In 713 B.C. Numa introduced January and February before March, and thenceforward December became the twelfth of the year. In the reign of Commodus, A.D. 181—192, December was called by the way of flattery, Amazonius, in honour of a courtesan whom that prince had loved, and had painted like an Amazon. The English commenced their year on the 25th December, until the reign of William the Conqueror. See *Year*.

DECEMVIRI, or Ten Men, who were appointed to draw up a code of laws, and to whom for a time the whole government of Rome was committed, 451 B.C. The laws they drew up were approved by the senate and general assembly of the people, written on ten metallic tables, and set up in the place where the people met (*comitium*), 450 B.C. The Decemviri at first ruled well, but the tyranny of Appius Claudius towards Virginia occasioning an insurrection, they were forced to resign; and consuls were again appointed, 449 B.C.

DECENNALIA, festivals instituted by Augustus, 17 B.C., celebrated by the Roman emperors every tenth year of their reign, with sacrifices, games, and largesses. *Livy*. And celebrated by Antoninus Pius, A.D. 148. They do not appear to have been continued after the reigns of the Cæsars.

DECORATIVE ART. The true principles of decoration enunciated by A. W. Pugin, in his "Designs," published in 1835, have since been greatly advanced by Owen Jones, Redgrave, and others. Owen Jones's elaborate "Grammar of Ornament" was published in 1856. A Decorative Art society, founded in 1844, existed for a short time only.

DE COURCY'S PRIVILEGE, that of standing covered before the king, granted by king John, to John de Courcy, baron of Kingsale, and his successors, in 1203. He was the first nobleman created by an English sovereign, 27 Hen. II. 1181; and was entrusted with the government of Ireland, 1185. The privilege has been exercised in most reigns, and was allowed to the baron of Kingsale by Will. III., Geo. III., and by Geo. IV. at his court held in Dublin, in Aug. 1821. The present baron is the 29th in succession.

DECRETALS. The decretals formed the second part of the canon law, or collection of the pope's edicts and decrees and the decrees of councils. The first of these acknowledged to be genuine is a letter of Siricius to Himerus, the bishop of Spain, written in the first year of his pontificate, 385. *Howel*. Certain false decretals were used by Gregory IV. in 837. The decretals of Gratian, a Benedictine (a collection of canons), were compiled in 1150. *Henault*. Five books were collected by Gregory IX. 1227; a sixth by Boniface VIII. in 1297; the Clementines by Clement V. in 1313; employed by John XXII. in 1317; the Extravagantes range from 1422 to 1483.

DEDICATION of the Jewish tabernacle took place 1490 B.C.; of the temple, 1004 B.C.; of the second temple, 515 B.C. The Christians under Constantine built new churches and dedicated them with great solemnity, in A.D. 331, *et seq.* The dedication of BOOKS (by authors to solicit patronage or testify respect) began in the time of Mæcenas, 17 B.C. He was the friend and counsellor of Augustus Cæsar, and a patron of genius and learning; hence it is customary to style any nobleman, imitating his example, a Mæcenas.

DEED, a written contract or agreement. The formula, "I deliver this as my act and deed," occurs in a charter of 933. *Fosbrooke*. Deeds in England were formerly written in the Latin and French languages: the earliest known instance of the English tongue having been used is the indenture between the abbot of Whitby and Robert Bustard, dated at York in 1343. See *English*.

* Imprisonment for debt still continues. In 1863 nearly 18,000 persons were imprisoned by order of the county courts: average time, 15 days, amount of debt, 3*l.* 10*s.*

DEFAMATION. The jurisdiction of the ecclesiastical courts on this subject was abolished by 18 & 19 Vict. c. 41 (1855).

DEFENCE OF THE REALM ACT was passed in Aug. 1860, in consequence of the unsettled state of Europe, aggravated by the doubtful policy of the emperor Napoleon. See *Fortification*.

DEFENDER OF THE FAITH (*Fidei Defensor*), a title of the British sovereign, conferred by Leo X. on Henry VIII. of England, for his tract on behalf of the Church of Rome, then accounted *Domicilium fidei Catholicae*, against Luther, in Oct. 11, 1521.

DEFENDERS, a faction in Ireland, which arose out of a quarrel between two residents of Market-hill, July 4, 1784. Each was soon aided by a large body of friends, and many battles ensued. On Whit-Monday, 1785, an armed assemblage of one of the parties (700 men), called the *Nappagh Fleet*, prepared to encounter the *Bawn Fleet*, but the engagement was prevented. They subsequently became religious parties, Catholic and Presbyterian, distinguished as *Defenders* and *Peep-o'-day-boys*: the latter were so named because they usually visited the dwellings of the Defenders at daybreak in search of arms. *Sir Richard Musgrave*.

DEGREES. Eratosthenes attempted to determine the length of a geographical degree about 250 B.C. *Snellius*. See *Latitude* and *Longitude*. *Collegiate degrees* are coeval with universities. Those in medicine are traced up to A.D. 1384: in music to 1463. In Oct. 1863, women were permitted to compete for degrees.

DEI GRATIA. See *Grace of God*.

DEIRA, a part of the Anglo-Saxon kingdom of Northumbria. See *Britain*.

DEISM OR THEISM (Greek, *theos*, Latin, *deus*, God), the belief in a God. About the middle of the 16th century some gentlemen of France and Italy termed themselves *deists*, to disguise their opposition to Christianity by a more honourable appellation than that of Atheism (*which see*). Deists reject revelation, and profess to go by the light of nature, believing that there is a God, a providence, vice, and virtue, and an after-state of punishments and rewards: they are sometimes called *free-thinkers*. The most distinguished deists were Herbert, baron of Cherbury, in 1624; Hobbes, Tindal, Morgan, lord Bolingbroke, Gibbon, Hume, Holcroft, Paine and Godwin.

DELAWARE, one of the United States of North America, named after lord de la Warre, governor of Virginia, who entered the bay 1610. It was settled by Swedes, sent there by Gustavus in 1627.

DELEGATES, COURT OF. Appeals to the pope in ecclesiastical causes having been forbidden (see *Appeals*), those causes were for the future to be heard in this court, established by stat. 24 Henry VIII. 1533; soon afterwards the pope's authority was superseded altogether in England. *Stow*. This court was abolished; and appeals now lie to the Judicial Committee of the Privy Council, as fixed by 3 & 4 Will. IV. c. 41 (1833). See *Archives*.

DELFT (S. Holland), a town founded by Godfrey le Bossu, about 1074; famous for the earthenware known by its name; first manufactured here about 1310. The sale of Dutch delft greatly declined after the introduction of potteries into Germany and England. Delft was an important place during the struggle against Spain. The renowned Grotius was born here, April 10, 1583; and here the great William prince of Orange was assassinated, July 10, 1584, by Gerard.

DELHI, the once great capital of the Mogul empire, and chief seat of the Mahomedan power in India; it was taken by Timour in 1398. It is now in decay, but contained a million of inhabitants in 1700. In 1739, when Nadir Shah invaded Hindostan, he entered Delhi; 100,000 of the inhabitants perished by the sword, and plunder to the amount of 62,000,000*l.* sterling is said to have been collected. The same calamities were endured in 1761, on the invasion of Abdalla king of Candahar. In 1803, the Mahrattas, aided by the French, took Delhi; but were afterwards defeated by general Lake, and the aged Shah Aulum, emperor of Hindostan, was restored to his throne with a pension. See *India*, 1803. On May 10, 1857, a mutiny arose in the sepoy regiments at Meerut. It was soon checked; but the fugitives fled to Delhi, and combined with other troops there, seized on the city; proclaimed a descendant of the Mogul as king, and committed the most frightful atrocities. The rebels were anxious to possess the chief magazine, but after a gallant defence it was exploded by order of lieutenant Willoughby, who died of his wounds shortly after. The other heroes in this exploit were lieutenants Forrest and Rayner, and the gunners Buckley and Scully. Delhi was shortly after besieged by the British, but was not taken till Sept. 20,

following. The final struggle began on the 16th ; brigadier (since sir Archdale) Wilson being the commander. Much heroism was shown ; the gallant deaths of Salkeld and Home at the explosion of the Cashmere gate created much enthusiasm. The old king and his sons were captured soon after : the latter were shot, and the former after a trial was sent for life to Rangoon. See *India*, 1857.

"DELICATE INVESTIGATION," THE, into the conduct of the princess of Wales (afterwards queen of England, as consort of George IV.), was commenced by a committee of the privy council, under a warrant of inquiry, dated May 29, 1806. The members were lord Grenville, lord Erskine, earl Spencer and lord Ellenborough. The inquiry, of which the countess of Jersey, sir J. and lady Douglas, and other persons of rank were the prompters, and in which they conspicuously figured, led to the publication called "The Book ;" afterwards suppressed. The charges against the princess were disproved in 1807, and again in 1813 ; but not being permitted to appear at court, she went on the continent in 1814.

DELIUM, Bœotia, N. Greece, the site of a celebrated temple of Apollo. Here, in a conflict between the Athenians and the Bœotians, in which the former were defeated, Socrates the philosopher is said to have saved the life of his pupil Xenophon, 424 B.C.

DELLA CRUSCA ACADEMY of Florence merged into the Florentine in 1582.—THE DELLA CRUSCA SCHOOL, a term applied to some English persons residing at Florence, who wrote and printed a quantity of inferior sentimental poetry and prose in 1785. They came to England where their works were popular for a short time, but were severely satirised by Gifford in his "Baviad and Mæviad" (1794-5).

DELOS, a Greek isle in the Ægean sea. Here the Greeks, during the Persian war, 477 B.C., established their common treasury, which was removed to Athens, 461.

DELPHI (N. Greece), celebrated for its enigmatical oracles delivered by the Pythia, in the temple of Apollo, which was built, some say, by the council of the Amphictyons, 1263 B.C. The priestess delivered the answer of the god to such as came to consult the oracle, and was supposed to be suddenly inspired. The temple was burnt by the Pisistratidæ, 548 B.C. A new temple was raised by the Alcæonidæ. The Persians (480 B.C.) and the Gauls (279 B.C.) were deterred from plundering the temple by awful portents. It was, however, robbed and seized by the Phocians, 357 B.C., which led to the sacred war, and Nero carried from it 500 costly statues, A.D. 67. The Pythian games were first celebrated 586 B.C. The oracle was consulted by Julian, but silenced by Theodosius.

DELPHIN CLASSICS, a collection of thirty-nine of the Latin authors in sixty volumes, made for the use of the dauphin (*in usum Delphini*) son of Louis XIV., and published in 1674-91. Ausonius was added in 1730. The duc de Montausier, the young prince's governor, proposed the plan to Huet, bishop of Avranches, the dauphin's preceptor ; and he, with other learned persons, including Madame Dacier,* edited all the Latin classics except Lucan. Each author is illustrated by notes and an index of words. An edition of the Delphin Classics, with additional notes, &c., was published by Mr. Valpy of London, early in the present century.

DELUGE. The deluge was threatened in the year of the world 1536 ; and began Dec. 7, 1656, and continued 377 days. *Genesis* vi. vii. viii. The ark rested on Mount Ararat, May 6, 1657 ; and Noah left the ark Dec. 18 following. The year corresponds with that of 2348 B.C. *Blair*. The following are the epochs of the deluge, according to Dr. Hales :—

Septuagint . . . B.C. 3246	Persian . . . B.C. 3103	Clinton . . . B.C. 2482	Petavius . . . B.C. 2329
Jackson 3170	Hindoo 3102	Playfair 2352	Strauchius . . . 2293
Hales 3155	Samaritan . . . 2998	Usher & Eng. Bible 2348	Hebrew 2288
Josephus . . . 3146	Howard 2698	Marsham 2344	Vulgar Jewish . . 2104

In the reign of Ogyges, king of Attica, 1764 B.C., a deluge so inundated Attica, that it lay waste for nearly 200 years. *Blair*. Buffon thinks that the Hebrew and Grecian deluges were the same, and arose from the Atlantic and Bosphorus bursting into the valley of the Mediterranean.†

The deluge of Deucalion, in Thessaly, is placed 1503 B.C. according to *Eusebius*. It was often confounded by the ancients with the general flood ;

but considered to be merely a local inundation, occasioned by the overflowing of the river Peneus, whose course was stopped by an earthquake between the mounts Olympus and Ossa. Deucalion, who then reigned in Thessaly, with his wife Pyrrha, and some of their subjects, are stated to have saved themselves by climbing up mount Parnassus.

* This beautiful and gifted woman translated *Callimachus* at the age of 23 ; and also *Anacreon*, *Sappho*, *Plautus*, *Terence*, and *Homer*. She died in 1720.

† A general deluge was predicted to occur in 1524, and arks were built ; but the season happened to be a fine and dry one.

DEMERARA AND ESSEQUIBO, colonies in Guiana, South America, founded by the Dutch, 1580, were taken by the British, under major-general Whyte, April 22, 1796, but were restored at the peace of 1802. They again surrendered to the British under general Grinfield and Commodore Hood, Sept. 1803, and became English colonies in 1814.

DEMOCRATS, advocates for government by the people themselves (*demos*, *people*, and *kratein*, *to govern*), a term adopted by the French republicans in 1790 (who termed their opponents *aristocrats*, from *aristos*, *bravest* or *best*). The name *Democrats* was adopted by the pro-slavery party in N. America (the southern states), and the abolitionists were called *Republicans*. Into these two great parties a number of smaller ones were absorbed at the presidential election in 1856. In 1860, the Republicans formed "Wide-awake" clubs for electioneering purposes, and succeeded in getting their candidate, Abraham Lincoln, elected president, Nov. 4. See *United States*, 1860.

DENAIN (N. France). Here marshal Villars, by his skill, defeated the Imperialist army, July 12, 1712.

DENARIUS, the chief silver coin among the Romans, weighing the seventh part of a Roman ounce, and value $7\frac{1}{2}d.$ sterling, first coined about 269 B.C., when it exchanged for ten ases (see *As*). In 216 B.C. it exchanged for sixteen ases. A pound weight of silver was coined into 100 denarii. *Digby*. A pound weight of gold was coined into twenty denarii aurei in 206 B.C.; and in Nero's time into forty-five denarii aurei. *Lempriere*.

DENIS, St., an ancient town of France, near Paris, famous for its abbey and church, the former abolished at the revolution: the latter the place of sepulture of the French kings, from its foundation, by Dagobert, in 613; is a small beautiful Gothic edifice. On the 12th October, 1793, the republicans demolished most of the royal tombs, and emptied the leaden coffins into the dunghills, melting the lead for their own use. By a decree of Bonaparte, dated Feb. 20, 1806, the church (which had been turned meanwhile into a cattle-market!) was ordered to be cleansed out and redecored as "the future burial place of the emperors of France." On the return of the Bourbons, more restorations were effected, and when the duc de Berri and Louis XVIII. died, both were buried there.

DENMARK (N. Europe). The most ancient inhabitants were Cimbri and Teutones, who were driven out by the Jutes or Goths. The Teutones settled in Germany and Gaul; the Cimbrians invaded Italy, where they were defeated by Marius. The peninsula of Jutland obtains its name from the Jutes; and the name of Denmark is supposed to be derived from *Dan*, the founder of the Danish monarchy, and *mark*, a German word signifying country. For their numerous invasions of Britain, &c., see *Danes*. Population of the kingdom of Denmark in 1860, 1,600,551; of the duchies of Schleswig, Holstein, and Lauenburg, 1,004,473; of the colonies, 120,283. By the treaty of peace, signed Oct 30, 1864, the duchies were taken from Denmark. Schleswig and Holstein were to be made independent, and Lauenburg was to be incorporated, by its desire, with Prussia. For the result, see *Gastein*.

1863. Christian IX. son of William, duke of Sleswig-Holstein-Sonderburg-Glücksburg; Nov. 15 (succeeded by virtue of the protocol of London, May 8, 1852, and of the law of the Danish succession, July 31, 1853). He was born

April 8, 1818; married princess Louisa of Hesse-Cassel, May 26, 1842. [He is descended from Christian III. and she from Frederick V.; both from George II. of England.]

DENNEWITZ (Prussia), where a remarkable victory was obtained by marshal Bernadotte (afterwards Charles XIV., king of Sweden), over marshal Ney, Sept. 6, 1813. The loss of the French exceeded 13,000 men, several eagles, and much cannon, &c.; of the allies, 6000. The defeat of Napoleon at Leipsic, on the 18th of October following, closed his disastrous campaign.

DENOMINATIONS, THE THREE (presbyterians, congregationalists or independents, and baptists), were organised in 1727 as an association, with the privilege of direct appeal to the reigning sovereign of Great Britain.

DEODAND (Latin, "*to be given to God*"): formerly, anything (such as a horse, carriage, &c.), which had caused the death of a human being became forfeit to the sovereign or lord of the manor, and was to be sold for the benefit of the poor. The forfeiture was abolished by 9 & 10 Vict. c. 62 (1846).

D'EON, CHEVALIER, who had acted in a diplomatic capacity in several countries, and been minister plenipotentiary from France in London, was affirmed to be a *female*, at a trial at the King's Bench in 1771, in an action to recover wagers as to his sex. He subsequently wore female attire: but at his death it was fully manifested that he was of the male sex.

DEPARTMENTS. See *France*.

DEPTFORD (near London). The hospital here was incorporated by Henry VIII., and called the Trinity-house of Deptford Strond; the brethren of Trinity-house hold their corporate rights by this hospital. Queen Elizabeth dined at Deptford on board the *Pelican*, the ship in which Drake had made his first voyage round the globe, April 4, 1581. The Deptford victualling-office was burnt Jan. 16, 1748-9; the store-house, Sept. 2, 1758; the red-house, Feb. 26, 1761; and the king's-mill, Dec. 1, 1755. DERRICKS are lofty, portable, crane-like structures, used on land and water for lifting enormous loads, and in some cases depositing them at an elevation. They are extensively used in the United States, and were introduced into England as floating derricks for raising sunken vessels, by their inventor, A. D. Bishop, in 1857.

DERRY (N. Ireland), a bishopric first planted at Ardfrath; thence translated to Maghera; and in 1158 to Derry. The cathedral, built in 1164, becoming ruinous, was rebuilt by a colony of Londoners, who settled here in the reign of James I., The see is valued in the king's books at 250*l.* sterling; but it has been one of the richest sees in Ireland. *Beatson*. The see of Raphoe was united to Derry, 1834. See *Bishops; Londonderry*.

DESIGN, SCHOOLS OF, established by government, began at Somerset-house, London, in 1837.

DESPARD'S CONSPIRACY. Colonel Edward Marcus Despard, a native of Ireland, and Broughton, Francis, Graham, Macnamara, Wood, and Wrattan, conspired to seize the king's person on the day of his meeting parliament, Jan. 16, 1803, to destroy him and overturn the government. A special commission was issued on Feb. 7, and they suffered death on the top of Horse-monger-lane gaol, Southwark, Feb. 21, 1803. Between thirty and forty persons of inferior order (some soldiers in the foot-guards) were taken into custody on Nov. 16, 1802, for this conspiracy, which caused great consternation at the time.

DETROIT (N. America), the oldest city in the west, was built by the French about 1670.

DETTINGEN (Bavaria), BATTLE OF, June 16, 1743, between the British, Hanoverian, and Hessian army (52,000), commanded by king George II. of England and the earl of Stair, and the French army (60,000), under marshal Noailles and the duc de Grammont. The French passed a defile, which they should have merely guarded. The duc de Grammont with his cavalry charged the British foot with great fury, but was received with such intrepidity, that he was obliged to give way, and to repossess the Maine, losing 5000 men.

DEVONPORT. See *Dockyards and Plymouth*.

DEVONSHIRE AND PITT ADMINISTRATION, formed Nov. 16, 1756, and resigned April 5, 1757.

First lord of the treasury, William, duke of Devonshire.*Chancellor of the exchequer*, hon. Henry Bilson Legge.*Lord president*, earl Granville.*Privy seal*, earl Gower.*Secretaries of state*, earl of Holderness and Wm. Pitt (afterwards earl of Chatham, the virtual premier).

George Grenville, earl of Halifax, dukes of Rutland and Grafton, earl of Rochfort, viscount Barrington, &c. The great seal in commission.

DEW, the modern theory respecting its formation was put forth by Dr. Wells in his treatise published in 1814.

DIADEM, the band or fillet worn by the ancients instead of the crown, and consecrated to the gods. At first it was made of silk or wool, set with precious stones, and was tied round the temples and forehead, the two ends being knotted behind, and let fall on the neck. Aurelian was the first Roman emperor who wore a diadem, 272. *Tillemont*.

DIALS. Invented by Anaximander, 550 B.C. *Pliny*. The first dial of the sun seen at Rome was placed on the temple of Quirinus by L. Papirius Cursor, when time was divided into hours, 293 B.C. *Blair*. In the times of the emperors almost every palace and public building had a sun-dial. They were first set up in churches in A.D. 613. *Lenglet*. Dial of Ahaz, *Isaiah xxxviii*. 8.

DIALYSIS, an important method of chemical analysis, depending on the different degrees of diffusibility of substances in liquids, was made known in 1861, by its discoverer, professor Thomas Graham, the Master of the Mint.

DIA-MAGNETISM, the property possessed by certain bodies of behaving differently to iron, when placed between two magnets. The phenomena, previously little known, were reduced to a law by Faraday in 1845.

DIAMONDS were first brought to Europe from the East, where the mine of Sumbulpoor was the first known, and where the mines of Golconda were discovered in 1534. This district may be termed the realm of diamonds. The mines of Brazil were discovered in 1728. From these last a diamond, weighing 1680 carats, or fourteen ounces, was sent to the court of Portugal, and was valued by Mr. Romeo de l'Isle at the extravagant sum of 224 millions; by others it was valued at 56 millions; its value was next stated to be $3\frac{1}{2}$ millions, but its true value (it not being brilliant) was 400,000*l*.

The great **RUSSIAN** diamond weighs 193 carats, or 1 oz. 12 dwts. 4 gr. troy. The empress Catherine II. offered for it 104,166*l*. 13*s*. 4*d*. besides an annuity for life to the owner of 104*l*. 13*s*. 4*d*. which was refused; but it was afterwards sold to Catherine's favourite, count Orloff, for the first-mentioned sum, without the annuity, and was by him presented to the empress on her birthday, 1772; it is now in the sceptre of Russia.

The **PIRT** diamond weighed 136 carats, and after cutting 106 carats: it was sold to the king of France for 125,000*l*. in 1720.

The **PIGOTT** diamond was sold for 9500 guineas, May 10, 1802.

The diamond called the **MOUNTAIN OF LIGHT**, or **KOHINOOR**, was found in the mines of Golconda, in 1550, and is said to have belonged in turn to Shah Jehan, Aurungzebe, Nadir Shah, the Afghan rulers, and afterwards to the Sikh chief Runjeet Singh. Upon the abdication of Dhuleep Singh, the last ruler of the Punjab, and the annexation of his dominions to the British empire, in 1849, the Kohinoor was surrendered to the queen. It was accordingly brought over and presented to her, July 3, 1850. It was shown in the Great Exhibition, 1851. Its original weight was nearly 800 carats, but it was reduced by the unskilfulness of the artist, Hortensio Borghese, a Venetian, to 279 carats. A general idea may be formed of its shape and size by conceiving it as the pointed half (rose cut) of a small hen's egg. The value is scarcely computable, though two millions sterling have been mentioned as a justifiable price, if calculated by the scale employed in the trade. This diamond was re-cut in London in 1852, and now weighs 102*½* carats.

The **SANCI** diamond, which belonged to Charles the Bold, duke of Burgundy, was bought by sir C. Jejeebhoy from the Demidoff family for 20,000*l*. in Feb. 1865.

A diamond, termed the **STAR OF THE SOUTH**, was brought from Brazil in 1855, weighing 254*½* carats, half of which was lost by cutting.

INFLAMMABILITY OF DIAMONDS.

Boetius de Boot conjectured that the diamond was inflammable, 1609. *Boyle*.

Discovered that when exposed to a high temperature it gave an acrid vapour, in which a part of it was dissipated, 1673. *Boyle*.

Sir Isaac Newton concluded from its great refracting power, that it must be combustible, 1675.

Averani demonstrated, by concentrating the rays of the sun upon it, that the diamond was exhaled in vapour, and entirely disappeared, while other precious stones merely grew softer, 1695.

It has been ascertained by Guyton, Davy, and others, that although diamonds are the hardest of all known bodies, they yet contain nothing more than pure charcoal, or carbon. Diamonds were charred by the intense heat of the voltaic battery—by M. Dumas, in Paris, and by Professor Faraday, in London, in 1848.

DIAMOND NECKLACE AFFAIR.—In 1785, Böhmer, the court jeweller of France, offered the queen, Marie Antoinette, a diamond necklace, for 64,000*l*. The queen desired the necklace, but feared the expense. The countess de la Motte (of the ancient house of Valois) forged the queen's signature, and by pretending that the queen had an attachment for him, persuaded the cardinal de Rohan, the queen's almoner, to conclude a bargain with the jeweller for the necklace for 56,000*l*. De la Motte thus obtained the necklace and made away with it. For this she was tried in 1786, and sentenced to be branded on the shoulders and imprisoned for life. She accused in vain the celebrated Italian adventurer, Cagliostro, of complicity in the affair, he being then intimate with the cardinal. She made her escape and came to London, where she was killed by falling from a window-sill, in attempting to escape an arrest for debt.—De Rohan was tried and acquitted, April 14, 1786. The public in France at that time suspected the queen of being a party to the fraud. Talleyrand wrote at the time, "I shall not be surprised if this miserable affair overturn the throne."

DIANA, TEMPLE OF (at Ephesus), long accounted one of the seven wonders of the world, was built at the common charge of all the Asiatic states, 552 B.C. The chief architect was Ctesiphon; and Pliny says that 220 years were employed in completing this rich temple. It was 425 feet long, 225 broad, and was supported by 127 columns (60 feet high, each weighing 150 tons of Parian marble), furnished by so many kings. It was set on fire, on the night of Alexander's nativity, by an obscure individual named Eratosthratus, who confessed on the rack, that the sole motive which had prompted him to destroy so magnificent an edifice was the desire of transmitting his name to future ages, 356 B.C. The temple was rebuilt, but again burnt by the Goths, in their naval invasion, A.D. 256 or 262. *Univ. Hist.*

DICE. The invention of dice is ascribed to Palamedes, of Greece, about 1244 B.C. The game of Tali and Tessera among the Romans was played with dice. Stow mentions two

entertainments given by the city of London, at which dice were played.* Act to regulate the licences of makers, and the sale of dice, 9 Geo. IV. 1828.

DICHROSCOPE, an optical apparatus, described by the inventor, professor Dové of Berlin, in 1860, who intended it to represent interferences, spectra in different coloured lights, polarisation of light, &c.

DICTATORS were supreme and absolute magistrates of Rome, appointed to act in critical times. Titus Lartius Flavius, the first dictator, was appointed, 501 B.C. This office became odious by the usurpations of Sylla and Julius Cæsar; and after the death of the latter, the Roman senate, on the motion of the consul Antony, passed a decree, which for ever forbade a dictator to exist in Rome, 44 B.C., but Augustus became perpetual dictator, 27 B.C., as *Imperator*.

DICTIONARY. A standard dictionary of the Chinese language, containing about 40,000 characters, most of them hieroglyphic, or rude representations, somewhat like our signs of the zodiac, was perfected by Pa-out-she, who lived about 1100 B.C. *Morrison*.

The oldest Greek dictionary is the *Onomastikon* of Julius Pollux, written about 120 B.C.; a Latin one was compiled by Varro, born B.C. 116
The first noted polyglot dictionary, perhaps the first, is by Ambrose Calepini, a Venetian friar, in Latin; he wrote one in eight languages. *Niceron*. about A.D. 1500
John E. Avenar's *Dictionarium Hebraicum* was published at Wittenberg in 1589. Buxtorf's great work, *Lexicon Hebraicum*, &c., appeared 1621
The *Lexicon Heptaglotton* was published by Edmund Castell, in 1659
The great dictionary of the English language, by Samuel Johnson, the "Leviathan of Literature," appeared in 1755
Francis Grose's Dictionary of the Vulgar Tongue was compiled in 1768
The following academies have published large dictionaries of their respective languages: the French academy, first in 1694; the Spanish, 1726; the Italian academy (della Crusca), 1729; and the Russian 1789-94

Schwan's great German-French dictionary appeared in 1782
Richardson's English dictionary appeared in 1836
Lempriere's Classical dictionary, which first appeared in 1788, is now superseded by Dr. W. Smith's classical series 1842-57
The Philological Society of London issued "proposals for a new English dictionary" 1859
The great German dictionary, by Jacob and Wilhelm Grimm 1854 *et seq.*
Mr. Hensleigh Wedgwood's Dictionary of English Etymology 1859-62
Smith's Dictionary of the Bible was published 1860-3
The earliest known English-Latin dictionary is the *Promptorium Parvulorum*, compiled by Galfridus Grammaticus, a preaching friar of Norfolk, in 1440; and printed by Pynson, as *Promptorium Parvulorum*, in 1499. A new edition, carefully edited by Mr. Albert Way, from MSS. was published by the Camden Society 1843-65

See *Encyclopædia*.

DIDYMIUM, a rare metal, discovered by Mosander in 1841. It appears to be always associated with lanthanum and cerium.

DIEPPE (N. France). This town was bombarded by an English fleet, under admiral Russell, and laid in ashes, July 1694. It was again bombarded in 1794; and again, together with the town of Granville, by the British, Sept. 14, 1803.

"**DIES IRÆ**" ("Day of Wrath"), a Latin mediæval hymn on the day of judgment, is ascribed to various authors, amongst others to pope Gregory the Great (died about 604); St. Bernard (died 1153); but is generally considered to have been composed by Thomas of Celano (died 1255), and to have been used in the Roman service of the mass before 1385.

DIET OF THE GERMAN EMPIRE (in which the supreme court of authority of the empire may be said to have existed) was composed of three colleges: one of electors, one of princes, and one of imperial towns, and commenced with the edict of Charles IV. 1356. See *Golden Bull*. Diets otherwise constituted had long previously been held on important occasions. The diet of Wurtzburg, which proscribed Henry the Lion, was held in 1180; that of Worms, at which Luther was present, in 1521; that of Spire, to condemn the Reformers, in 1529; and the famous diet of Augsburg, in 1530. The league of the German princes, called the Confederation of the Rhine, fixed the diet at Frankfort, July 12, 1806. Germany was governed by a diet of 38 members, having votes varying from four to one each, till 1864, when Schleswig and Holstein were included. Diets were held in 1848 and 1850, at Frankfort (*which see*).

* In 1357, the kings of Scotland and France, being prisoners, and the king of Cyprus on a visit to Edward III., a great tournament was held in Smithfield, and afterwards Henry Picard, mayor of London, "kept his hall against all comers that were willing to play at dice and hazard. The lady Margaret, his wife, did keepe her chamber to the same intent." The mayor restored to the king of Cyprus 50 marks which he had won from him, saying, "My lord and king, be not aggrieved; for I covet not your gold; but your play," &c. *Stow*.

"*DIEU-DONNÉ*," the name given in his infancy to *Louis le Grand*, king of France, because the French considered him as the gift of Heaven; the queen, his mother, having been barren for 23 years previously, 1638. *Voltaire*. One of the popes of Rome, who obtained the tiara in 672, was named *Adeodatus* or God's gift, and had the character of a pious and charitable pontiff.

DIEU ET MON DROIT ("God and my right"), the royal motto of England, was the parole of the day, given by Richard I. of England to his army at the battle of Gisors, in France, Sept. 20, 1198, when the French army was signally defeated. "*Dieu et mon droit*" appears to have been first assumed as a motto by Henry VI. (1422—1461).

DIFFERENTIAL ENGINE. See *Calculating Machine*.

DIFFUSION OF GASES. For our present knowledge of the laws regulating this phenomenon, which performs so important a part in respiration and other natural processes, we are greatly indebted to the researches of professor T. Graham, published in the *Philosophical Transactions of the Royal Society* for 1850.

DIFFUSION OF USEFUL KNOWLEDGE SOCIETY, which published a number of books relating to history, science, and literature, and a useful atlas, ridiculed as the "Sixpenny Sciences," in a cheap form, was established in 1827, by Lord Brougham, Mr. William Tooke, Mr. Charles Knight, and others. It patronised the publication of the *Penny Magazine* and the *Penny Cyclopædia*. The Royal Institution of Great Britain was established in 1800, for "the Promotion, Diffusion, and Extension of Science and Useful Knowledge."

DIGEST. The first collection of Roman laws under this title was prepared by Alfenus Varus, the civilian, of Cremona, 66 B.C. *Quintil*. The Digest, so called by way of eminence, was the collection made by order of the emperor Justinian, 529: it made the first part of the Roman law and the first volume of the civil law. Quotations from it are marked with a ff. *Pardon*. A digest of the statute law of England is now strongly recommended (1865).

DIGITS. Any whole number under 10: 1, 2, &c., are the nine digits. Arithmetical figures were known to the Arabian Moors about A.D. 900; and were introduced by them into Spain in 1050, and thence into England about 1253. In astronomy, the digit is a measure used in the calculation of eclipses, and is the twelfth part of the luminary eclipsed. See *Figures*.

DILETTANTI, SOCIETY OF, was established in 1734 by several noblemen and gentlemen (viscount Harcourt, lord Middlesex, duke of Dorset, &c.), who had travelled and who were desirous of encouraging a taste for the fine arts in Great Britain. The society published, or aided in publishing, *Stuart's Athens* (1762—1816), *Chandler's Travels* (1775-6), and several other finely illustrated works, having aided the authors in their investigations. The members dine together from time to time at the Thatched-house tavern, St. James's.

DIMITY. See *Damietta*.

DIOCESE. The first division of the Roman empire into dioceses, at that period civil governments, is ascribed to Constantine, 323; but Strabo remarks that the Romans had the departments called dioceses long before. In England the principal dioceses are coeval with the establishment of Christianity; of 28 dioceses, 20 are suffragan to the diocese of Canterbury, and six to that of York. See *Bishops*, and the sees severally.

DIOCLETIAN ERA (called also the era of Martyrs, on account of the persecution in his reign) was used by Christian writers until the introduction of the Christian era in the 6th century, and is still employed by the Abyssinians and Copts. It dates from the day on which Diocletian was proclaimed emperor at Chalcedon, Aug. 29, 284.

DIOPTRIC SYSTEM. See *Lighthouses*.

DIORAMA. This species of exhibition, which had long been admired at Paris, was first opened in London by MM. Bouton and Daguerre, Sept. 29, 1823. The diorama differs from the panorama in this respect, that, instead of a circular view of the objects represented, it exhibits the whole picture at once in perspective. It was not successful commercially, and was sold in 1848. The building in Regent's Park was purchased by sir S. M. Peto, in 1855, to be used as a Baptist chapel. It is the handsomest dissenters' chapel in London.

DIPHThERIA (from the Greek *diphthera*, a membrane), a disease which has the essential character of developing a false membrane on any integument, particularly on the

mucous membrane of the throat. It was so named by Bretonneau of Tours in 1820. From its prevalence in Boulogne, it has been termed the Boulogne sore-throat; many persons were affected with it in England at the beginning of 1858.

DIPLOMACY, the art of managing the relations of foreign states by means of ambassadors, envoys, consuls, &c. See *Ambassadors*. New regulations for the British diplomatic service were issued Sept. 5, 1862.

DIPLOMATICS, the foreign term for the science of Paleography or ancient writings. Valuable works on this subject have been compiled by Mabillon (1681), De Vaines (1774), Astle (1781), De Wailly (1838), and other antiquaries.

“**DIRECTORY FOR THE PUBLIC WORSHIP OF GOD**” was drawn up at the instance of the parliament by an assembly of divines at Westminster in 1644, after the suppression of the Book of Common Prayer. The general hints given were to be managed with discretion; for the Directory prescribed no form of prayer or manner of external worship, and enjoined the people to make no responses except *Amen*. It was adopted by the parliament of Scotland in 1645, and many of its regulations are still observed.

DIRECTORY, THE FRENCH, established by the constitution of Aug. 22, 1795, and nominated Nov. 1, was composed of five members (MM. Lipeaux, Letourneur, Rewbel, Barras, and Carnot). It ruled in conjunction with two chambers, the Council of Ancients and Council of Five Hundred (*which see*). It was deposed by Bonaparte, who, with Cambacérès and Siéyès, assumed the government as three consuls, the first as chief, Nov. 10, 1799. See *Consuls*.

DIRECTORY, the first **LONDON**, is said to have been printed in 1677. The “Post-office Directory” first appeared in 1800.

DISCIPLINE, ECCLESIASTICAL, originally conducted according to the divine commands in *Matt.* xviii. 15, *1 Cor.* v., *2 Thess.* iii. 6, and other scripture texts, was gradually changed to a temporal character, as it now appears in the Roman and Greek churches. The “First Book of Discipline” of the presbyterian church of Scotland was drawn up by John Knox and four ministers in Jan. 1560-1. The more important “Second Book” was prepared with great care in 1578 by Andrew Melville and a committee of the leading members of the general assembly. It lays down a thoroughly presbyterian form of government, defines the position of the ecclesiastical and civil powers, &c.

DISCOUNT. See *Bank of England*.

DISPENSARIES, to supply the poor with medical advice and medicines, began in London with the Royal General Dispensary, established in St. Bartholomew’s Close, in 1770. It relieved about 20,000 persons in 1861. See *Low’s Charities*.

DISPENSATIONS, ECCLESIASTICAL, were first granted by pope Innocent III. in 1200. These exemptions from the discipline of the church, with indulgences, absolutions, &c., led eventually to the Reformation in Germany in 1517, and in England in 1534, *et seq.*

DISPENSING POWER OF THE CROWN (for setting aside laws), asserted by some of our sovereigns, especially by James II. in 1686, was abolished by the bill of rights, 1689. However it has been on certain occasions exercised, as in the case of embargoes upon ships, the Bank Charter act, &c. See *Indemnity*.

DISSECTION. See *Anatomy*.

DISSENTERS, the modern name of the *Puritans* and *Nonconformists* (*which see*). In 1851, in London alone, the number of chapels, meeting-houses, &c., for all classes of dissenters amounted to more than 554. (The Church of England had 458; Roman Catholics, 35.) The great act (9 Geo. IV. c. 17) for the relief of dissenters from civil and religious disabilities was passed May 9, 1828. By this act, called the Corporation and Test Repeal act, so much of the several acts of preceding reigns as imposed the necessity of receiving the sacrament of the Lord’s Supper as a qualification for certain offices, &c., was repealed. By 6 & 7 Will. IV. c. 85 (1836), dissenters acquired the right of solemnising marriages at their own chapels or at a registry office. See *Worship*.

DISTAFF, the staff to which hemp, flax, wool, or other substances to be spun is fastened. The art of spinning with it at the small wheel, first taught to English women by Anthony Bonavisa, an Italian. *Stow*. The distaff is used as an emblem of the female sex.

DISTILLATION, and the various chemical processes dependent on the art, are generally believed to have been introduced into Europe by the Moors about 1150; their brethren of Africa had them from the Egyptians. See *Alcohol, Brandy*. The distillation of spirituous liquors was in practice in Great Britain in the 16th century. *Burns*. The processes were improved by Adam of Montpellier in 1801. M. Payen's work (1861) contains the most recent improvements. 118 licences to distillers were granted in the year ending March 31, 1858, for the United Kingdom.

DIVINATION. In the Scriptures and ancient authors different kinds of divination are mentioned. See *Augury, Delphi, Magi, Witchcraft, &c.*

DIVINE RIGHT OF KINGS, the absolute and unqualified claim of sovereigns to the obedience of their subjects, a doctrine which is totally foreign to the genius of the English constitution, was defended by many persons of otherwise opposite opinions, *e.g.*, by Hobbes the free-thinker (1642), by Salmasius (1640), by sir Robert Filmer, in his *Patriarcha* in 1680, and by the High Church party generally about 1714; but opposed by Milton (1651), Algernon Sydney, and others.

DIVING-BELL (first mentioned, though obscurely, by Aristotle, about 325 B.C.) was used in Europe about A.D. 1509. It is said to have been used on the coast of Mull, in searching for the wreck of part of the Spanish Armada, before 1662. Halley (about 1721) greatly improved this machine, and was, it is said, the first who, by means of a diving-bell, set his foot on the ground at the bottom of the sea. Smeaton made use of the diving-bell in improving Ramsgate harbour, 1779-88. Mr. Spalding and his assistants going down in a diving-bell in Ireland were drowned, June 1, 1783. The *Royal George* man-of-war, which was sunk off Portsmouth in 1782, was first surveyed by means of a diving-bell in May, 1817. Latterly it has been employed in submarine surveys. The first diving-belle was the wife of captain Morris, at Plymouth, who descended in one a few years ago.

DIVINING ROD (*virgula divina, baculatorius*), formed of wood or metal, was formerly believed, even by educated persons, to have the property of indicating the position of minerals and springs of water. Instances were alleged in 1851 by Dr. H. Mays, in his work on "Popular Superstitions."

DIVINITY. See *Theology*.

DIVORCE FOR ADULTERY (of early institution). It was permitted by the law of Moses (*Deut.* xxiv. 1), 1451 B.C., but was forbidden by Christ except for adultery (*Math.* v. 31). It was put in practice by Spurius Carvilius Ruga at Rome, 234 B.C. At this time morals were so debased that 3000 prosecutions for adultery were enrolled. Divorces are of two kinds; one, *à vinculo matrimonii* (total divorce); the other, *à mensâ et thoro* (from board and bed). Divorces were attempted to be made of more easy obtainment in England in 1539. The bill to prevent women marrying their seducers was brought into parliament in 1801. In April, 1853, the commissioners on the law of divorce issued their first report.* By 20 & 21 Vict. c. 85 (1857), the jurisdiction of the ecclesiastical courts respecting divorce, &c., was abolished, and the Divorce and Matrimonial Causes court was instituted, to consist of three judges, the judge of the Probate court to be one (if possible). On May 10, 1858, a full court sat, viz. lord Campbell, chief baron Pollock, and sir Cresswell Cresswell, judge of the Probate court, when five marriages were dissolved. The above-mentioned act was amended by acts passed in 1858-60, in consequence of the increase of the business of the court. See *Marriage*. An act respecting divorces in Scotland was passed in 1861. Sir Cresswell Cresswell died in July, 1863, and sir James P. Wilde was appointed his successor in Sept. following.

DIZIER, St. (N.E. France). Here a siege was sustained for six weeks against the army of the emperor Charles V., 1544. The allies here defeated the French under Napoleon, Jan. 27 and March 26, 1814.

DOBRUDSCHA, the N.E. corner of Bulgaria; in 1854, the scene of the earlier incidents of the Russo-Turkish war (*which see*).

DOCETÆ, a sect of the 1st century, said to have held that Jesus Christ was god, but that his body was an appearance, not a reality.

* In 1857, there had been in England, since the Reformation, 317 divorces by act of parliament; in Scotland, by the law, 174 divorces since 1846. From the establishment of the divorce court, to March, 1859, 37 divorces had been granted out of 288 petitions; from Nov. 1860 to July, 1861, 164. They are now very frequent.

DOCKS OF ENGLAND. They are said to be the most extensive and finest in the world. The following are the principal commercial docks:—

Commercial Docks, Rotherhithe, originated about 1660.	East India Docks were commenced in 1803; and opened Aug. 4, 1806.
West India Docks were commenced, Feb. 3, 1800; and were opened Aug. 27, 1802, when the "Henry Addington" West Indianman, first entered them, decorated with the colours of the different nations of Europe.	St. Katherine's Docks began May 3, 1827; and 2500 men were daily employed on them until they were opened, Oct. 25, 1828.
London Docks were commenced June 26, 1802, and opened Jan. 20, 1805.	Victoria Docks (in Plaistow marshes) were completed in 1855.
	Magnificent docks at Liverpool and Birkenhead erected, 1810-57.

DOCK-YARDS, ROYAL. There are seven chief dock-yards in England and Wales, and others in various of our colonies.

Woolwich was an extensive one in 1509.	at Chatham in 1667. A fire occurred at Sheerness dock-yard, on board the <i>Camperdown</i> , Oct. 9, 1840.
Deptford dock-yard founded about 1513.	Milford-Haven dock-yard, 1790; removed to Pembroke in 1814.
Chatham dock-yard was founded by queen Elizabeth.	The Dock-yard battalions have been named since 1847.
Portsmouth dock-yard established by Henry VIII.	
Plymouth dock, now Devonport,* about 1680.	
Sheerness dock-yard was built by Charles II. after the insult of the Dutch, who burnt our men-of-war	

DOCTOR. Doctor of the Church was a title given to Athanasius, Basil, Gregory, Nazianzen, and Chrysostom in the Greek church; and to Jerome, Augustin, Ambrose, and Gregory the Great, in the Romish church, 373, *et seq.* In later times the title has been conferred on certain persons with distinguishing epithets: viz. Thomas Aquinas (Angelicus), Bonaventura (Seraphicus), Alexander de Hales (Irrefragabilis), Duns Scotus (Subtilis), Roger Bacon (Mirabilis), William Ocean (Singularis), Joseph Gerson (Christianissimus), Thomas Bradwardine (Profundus), and so on. Doctor of the law, was a title of honour among the Jews. The degree of doctor was conferred in England, 8 John, 1207. *Spelman.* Some give it an earlier date, referring it to the time of the Venerable Bede and John de Beverley, the former of whom, it is said, was the first that obtained the degree at Cambridge about 725.

DOCTORS' COMMONS, the college for the professors of civil and canon law residing in London; the name of commons is given to it from the civilians communing together, as in other colleges. It was founded by Dr. Henry Hervie in 1568; but the original college was destroyed in the great fire of 1666; in 1672 it was rebuilt on the old site.† After the great fire, and until 1672, the society held its courts at Exeter house in the Strand. It was incorporated by charter in June, 1768. *Crooke.* Till 1857 the causes taken cognizance of here were blasphemy, divorces, bastardy, adultery, penance, tithes, mortuaries, probate of wills, &c. See *Ecclesiastical Courts, Civil Law, &c.*

DOCTRINAIRES, a name given since 1814 to a class of politicians in France (Guizot, due de Broglie and others), who upheld the constitutional principles, as opposed to arbitrary monarchical power. The party came into office in 1830 under Louis Philippe, and fell with him in 1848. The term has been applied in this country to the writers in the "Westminster Review" (1824, *et seq.*), Bentham, Molesworth and others.

DODONA, EPIRUS. The temple of Jupiter here, renowned for its oracle, was destroyed by the Etolians, 219 B.C.

DODSON'S ACT (brought forward by Mr. John G. Dodson, and passed Aug. 1, 1861) provides that votes for electing members of parliament for the universities may be recorded by means of polling papers.

DOG. Buffon considers the shepherd's dog as "the root of the tree," assigning as his reason that it possesses from nature the greatest share of instinct. The Irish wolf-dog is

* Great fire in the dock-yard at Devonport, by which the *Talavera*, of 74 guns, the *Imogene* frigate, of 28 guns, and immense stores, were destroyed; the relics and figure heads of the favourite ships of Boscawen, Rodney, Duncan, and other naval heroes, which were preserved in a naval museum, were also burnt, Sept. 27, 1840; the loss was estimated at 200,000*l.*

† In February, 1568, Dr. Henry Hervie, dean of the arches and master of Trinity-hall (a seminary founded at Cambridge chiefly for the study of the civil and canon laws) procured from the dean and chapter of the diocese of London a lease of Montjoy-house and other buildings in the parish of St. Benet, Paul's wharf, for the accommodation of the society. The courts over which he presided, the prerogative court of Canterbury, that of the bishop of London, and also the court of admiralty (except for criminal cases), were thenceforward holden in the buildings thus assigned, and the whole place, for an obvious reason, received the appellation of "Doctors' Commons." *Crooke's English Civilians.*

supposed to be the earliest dog known in Europe, if Irish writers be correct. Dr. Gall mentions that a dog was taken from Vienna to England; that it escaped to Dover, got on board a vessel, landed at Calais, and, after accompanying a gentleman to Mentz, returned to Vienna. Statute against dog stealing, 10 Geo. III. 1770. Dog-tax imposed, 1796, and again in 1808; now (1865) 12s. a year. The employment of dogs in drawing carts, &c., in London was abolished, 1839; in the United Kingdom, 1854. *Dog shows* have been held in London in 1861, 1862, 1863, 1864, and 1865, latterly at the Agricultural Hall, Islington.

DOG-DAYS. The canicular or dog-days, commence on the 3rd of July and end on the 11th of August. The rising and setting of Sirius or the dog-star* with the sun has been erroneously regarded as the cause of excessive heat and of consequent calamities.

DOGE, the title of the duke of Venice, which state was first governed by a prince so named, Anafesto Paulilio, or Paoluccio, 697. See *Venice*. The Genoese chose their first doge, Simone Boccanegra, in 1339. *Muratori*.

DOGERBANK (German Ocean). Here a gallant but indecisive battle was fought between the British, under admiral sir Hyde Parker, and the Dutch, Aug. 5, 1781.

DOGGET'S COAT AND BADGE. The annual rowing match upon the Thames, thus called, originated in this way: Mr. Thomas Dogget, an eminent actor of Drury-lane, on the first anniversary of the accession to the throne of George I., Aug. 1, 1715, gave a waterman's coat and silver badge to be rowed for by six young watermen in honour of the day, and bequeathed at his death a sum of money, the interest whereof was to be appropriated annually, for ever, to the same purpose. The candidates start, at a signal given, at that time of the tide when the current is strongest against them, and row from the Old Swan, London Bridge, to the White Swan at Chelsea.

DOIT. A silver Scottish penny, of which twelve were equal to a penny sterling. Some of those struck by Charles I. and II. are in the cabinets of the curious. The circulation of "doydekyms" (small Dutch coins) was prohibited by statute in 1415.

DOLLAR, the German *thaler* (the *h* not sounded). Stamped Spanish dollars were issued from the Mint in March, 1797, but called in Oct. following. The dollar is the principal silver coin in the United States of North America.

DOM-BOC or DOOM-BOOK (*Liber Judiciales*), the code of law compiled by king Alfred from the West-Saxon collection of Ina and other sources. Alfred reigned from 871 to 901.

DOMES-DAY BOOK or DOOM'S-DAY (*Liber Censualis Angliae*), a book of the general survey of England, commenced in the reign of William I. 1080 (some say 1085), and completed in 1086. It was intended to be a register whereby to determine the right in the tenure of estates; and from it the question whether lands be ancient demesne or not, is sometimes still decided. The book is still preserved in the Chapter-house, Westminster-abbey, fair and legible, consisting of two volumes, a greater and lesser, wherein all the counties of England, except Northumberland, Durham, Westmoreland, and Cumberland, are surveyed. "This Dome's-day book was the tax-book of King William." *Camden*. It was printed in four vols. folio, with introductions, &c., 1783—1816. The taxes were levied according to this survey till 13 Hen. VIII., 1522, when a more accurate survey was taken, called by the people the New Doom's-Day Book. Photographic copies of various counties have been published since 1861.

DOMINGO, St., a city in Hayti, the seat of the Dominican republic, independent from 1844-61. It has been much troubled by the emperors of Hayti, especially by Faustin I., dethroned in 1858. Its last president, General José Valverde, was elected in 1858. Population 200,000. See *Hayti*. In March, 1861, a number of Spanish emigrants landed in St. Domingo; a cry for its annexation to Spain was raised, and St. Domingo was incorporated with that monarchy, May 20, 1861. An insurrection against the Spaniards broke out on Aug. 18, 1863, and the rebels had gained nearly all the island in Nov. when the Spanish government proclaimed it in a state of blockade. A Spanish force was sent and several conflicts ensued, in which the insurgents were generally worsted. In Dec. 1864 the British government recognised the Haytians as belligerents; and in 1865 the Spanish government retired from the contest.

* Mathematicians assert that Sirius, or the dog-star, is the nearest to us of all the fixed stars; and they compute its distance from our earth at 2,200,000 millions of miles. They maintain that a sound would not reach our earth from Sirius in 50,000 years; and that a cannon-ball, flying with its usual velocity of 480 miles an hour, would consume 523,211 years in its passage thence to our globe.

DOMINICA (W. Indies), discovered by Columbus in his second voyage, on Sunday, Nov. 3, 1493. It was taken by the British in 1761, and was confirmed to them by the peace of 1763. The French took Dominica in 1778, but restored it at the subsequent peace in 1783. It suffered great damage by a tremendous hurricane in 1806.

DOMINICAL LETTER, noting the Lord's day, or Sunday. The seven days of the week, reckoned as beginning on the 1st of Jan. are designated by the first seven letters of the alphabet, A, B, C, D, E, F, G; and the one of these which denotes Sunday is the Dominical letter. If the year begin on Sunday, A is the Dominical letter; if on Monday, G; on Tuesday, F; and so on. Generally to find the Dominical letter call New Year's day A, the next B, and go on thus until you come to the first Sunday, and the letter that answers to it is the Dominical letter; in leap years count two letters. The letter for 1865 is A, for 1866, G.

DOMINICAN REPUBLIC. See *Domingo*.

DOMINICANS, formerly a powerful religious order (called in France, Jacobins, and in England *Black friars*), founded in order to put down the Albigenses and other heretics by St. Dominic, approved by Innocent III. in 1215, and confirmed by Honorius III. in 1216, under St. Austin's rules and the founder's particular constitution. In 1276 the corporation of London gave the Dominicans two whole streets near the Thames, where they erected a large convent, whence that part is still called Blackfriars.

DONATISTS, an ancient puritanical sect, formed about 313—318, by an African bishop, Donatus, who was jealous of Cæcilian, bishop of Carthage: it became extinct in the 7th century. The Donatists held that the Father was above the Son, and the Son above the Holy Ghost; and that there was no virtue in the form of the Church. Their discipline was severe, and those who joined their sect were re-baptized.

DONKEY SHOW. An exhibition of donkeys and mules belonging to the upper and lower classes took place at the Agricultural Hall, Islington, in Aug. 1864.

DON QUIXOTE, by Saavedra Miguel de Cervantes (born 1547; died 1616). The first part of this work appeared in 1605, and the second part in 1608. It is said that upwards of 12,000 copies of the first part were circulated before the second could be made ready for the press. *Watts*.

DOOM'S-DAY BOOK. See *Dome's-day Book*.

DORADO. See *El Dorado*.

DORCHESTER (now a village near Oxford) was once a bishopric, said to have been founded about 636. The first Bishop, Birinus, was called the apostle of the West Saxons. In 1070, Remigius, its last prelate, transferred it to Lincoln (*which see*).—Much excitement was caused by six labourers of Dorchester (in Dorsetshire) being sentenced to transportation, March 17, 1834, for administering illegal oaths.

DORIANS, a people of Greece, claimed their descent from Dorus, son of Hellen. See *Greece*. Their return to the Peloponnesus took place 1104 B.C. They sent out many colonies. To them we owe the Doric architecture, the second of the five orders. It is lighter than the Tuscan.

DORT, or **DORDRECHT**, an ancient town in Holland, where the independence of the thirteen provinces was declared in 1572, when William prince of Orange was made stadtholder. Here happened an awful inundation of the Meuse in 1421, through the breaking down the dykes. In the territory of Dordrecht 10,000 persons perished; and more than 100,000 round Dullart, in Friesland, and in Zealand. In the last two provinces upwards of 300 villages were overflowed, and the tops of their towers were long after seen rising out of the water. A Protestant synod was held at Dort in 1618 and 1619; to which deputies were sent from England, and the reformed churches in Europe, to settle the difference between the doctrines of Luther, Calvin, and Arminius, principally upon points of justification and grace. This synod condemned the tenets of Arminius.

DOUAY (N. France), the Roman Duacum, was taken from the Flemings by Philip the Fair in 1297; restored by Charles V. in 1368. It reverted to Spain, from whom it was taken by Louis XIV. in 1667. It was captured by the duke of Marlborough in 1710; and retaken by the French next year. This town gives its name to the Roman Catholic edition of the Bible in use, by the consent of the popes, as the only authorised English version;

its text is explained by the notes of Roman Catholic divines. The Old Testament was first published by the English college at Douay in 1609; the New had been published at Rheims in 1582. The English college for Roman Catholics was founded in 1568 by William Allen, afterwards cardinal. *Dodd.*

DOURO, a river (separating Spain and Portugal), which, after a desperate struggle between Wellington's advanced guard under Hill, and the French under Soult, was successfully crossed by the former on May 12, 1809. So sudden was the movement, that Wellington at 4 o'clock sat down to the dinner prepared for the French general. *Alison.*

DOVER (Kent), the Roman Dubris. Near here Julius Cæsar made his first landing in England, Aug. 26, 55 B.C. Its original castle is said to have been built by him soon after; but this is disputed. The works were strengthened by Alfred and succeeding kings, and rebuilt by Henry II. The earliest named constable is Leopoldus de Bertie, in the reign of Ethelred II., followed by earl Godwin, Odo the brother of William I., &c. In modern times, this office, and that of warden of the Cinque Ports, has been frequently conferred on the prime minister for the time being,—*c.g.*, lord North, Mr. Pitt, lord Liverpool, and the duke of Wellington: the earl of Dalhousie, late governor-general for India, was appointed in Jan. 1853, and died Dec. 19, 1860. Lord Palmerston, appointed constable March, 1861, died Oct. 18, 1865.

The priory was commenced by archbishop Corboyl, or Corbois, about 1130
At Dover, king John resigned his kingdom to Pandolf, the pope's legate May 13, 1213
The pier was projected by Henry VIII. in 1533
Charles II. landed here from his exile, May 25, 1660
The foot barracks were burnt down by an accidental fire July 30, 1800

A large part of the cliff fell, Nov. 27, 1810; and Jan. 13, 1853
Railway to London opened May 6, 1854
A telegraph wire laid down experimentally between Dover and Calais (see *Submarine Telegraph*), Aug. 28, 1850; telegraph opened, Nov. 13, 1851

DOWER, the gifts of a husband for a wife before marriage (*Genesis* xxxiv. 12). The portion of a man's lands or tenements which his wife enjoys for life after her husband's death. By the law of king Edmund, a widow was entitled to a moiety of her husband's lands or tenements for her life, 941. The widows of traitors, but not those of felons, are debarred their dower by statute 5 Edw. VI. 1551. The last dower act passed in 1833.

DOWN (N.E. Ireland), BISHOPRIC OF. An ancient see, whose first bishop was St. Calan, in 499. At the instance of John de Courcy, the conqueror of Ulster, the cathedral, although previously consecrated to the Trinity, was dedicated to St. Patrick about 1183. The sepulchre of St. Patrick (who was buried here in 493, in the abbey of Saul, founded by himself) brought this place into great repute. The see was united with that of Connor in 1441 (see *Connor*); and the see of Dromore was united to both by the provisions of the Irish Church Temporalities act, 3 & 4 Will. IV. c. 37, Aug. 14, 1833. The cathedral of Downpatrick was destroyed by lord Grey, lord deputy of Ireland; for this and other crimes he was impeached and beheaded in 1541. *Beatson.*

DRACO'S LAWS (enacted by him when archon of Athens, 621 B.C.), on account of their severity, were said to be written in blood. Idleness was punished with as much severity as murder. This code was set aside by Solon's, 594 B.C.

DRAFTS (or cheques). In 1856, drafts crossed with a banker's name were made payable only to or through the same banker. This act was passed in consequence of a decision to the contrary in the case of *Carlton v. Ireland*, Dec. 12, 1855. In 1858 the crossing was made a material part of a cheque, but bankers are not held responsible when the crossing does not plainly appear,* and a penny stamp was ordered to be affixed to drafts on bankers, commencing May 25.

DRAGOONS. The name is supposed to have been derived from dragon, "because mounted on horseback with lighted match he seemeth like a fiery dragon." *Meyrick.* The DRACONARI were horse-soldiers, who bore dragons for ensigns. The first regiment of dragoons was raised in England, it is believed, in 1681. "King Charles II. at the Restoration established a regiment of Life Guards, to which he added a regiment of *Horse Guards*, and two regiments of Foot Guards; and a third regiment of Foot Guards was raised at Coldstream, on the borders of Scotland." *Captain Curling.*

* In the case of *Simmonds v. Taylor*, May, 1858, it was decided, on appeal to the court of exchequer, that the crossing formed no part of the draft. The crossing had been erased, and the money paid to the holder of the draft who had stolen it.

DRAINAGE OF LAND, in England, is of early date—remains of British works being still extant in the Fens district. The truly national works began in 1621, when Cornelius Vermuyden, the Dutch engineer, was invited to England. Amidst much opposition, he and his successors drained the districts termed the Great Levels. See *Levels*. In the present century great progress has been made in drainage. In 1861 was passed “an act to amend the laws relative to the drainage of land for agricultural purposes.” See *Sowers*.

DRAKE'S CIRCUMNAVIGATION. Sir Francis Drake sailed from Falmouth Dec. 13, 1577, and sailing round the globe, returned to England, after many perilous adventures, Nov. 3, 1580. He was vice-admiral under lord Howard, high admiral of England, in the conflict with the Spanish Armada, July 19, 1588.

DRAMA, ANCIENT. Both tragedy and comedy began with the Greeks.

The first comedy performed at <i>Athens</i> , by Susrion and Dolon, on a movable scaffold . . . B.C.	562	Anaxandrides was the first dramatic poet who introduced intrigues upon the stage; he composed about 100 plays, of which 10 obtained the prize; he died . . . B.C.	340
The chorus introduced . . .	556	Subsequently came satires, accompanied with music set to the flute; and afterwards plays were represented by Livius Andronicus, who, abandoning satires, wrote plays with a regular and connected plot. He first gave singing and dancing to different performers; he danced himself, and gave the singing to a younger exhibitor . . .	240
Tragedy first represented at Athens by Thespis, on a waggon (<i>Arant. Marb.</i>) . . .	536	The greatest ancient dramatic writers were—Greek, <i>Æschylus</i> , Sophocles, Euripides (tragedy), and Aristophanes (comedy), 525—427; Latin, Plautus and Terence (comedy), 184—160; Seneca (tragedy) . . . 7 B.C.—A.D.	65
Thespis of Icaria, the inventor of tragedy, performed at Athens “ <i>Alceſtis</i> ,” and was rewarded with a goat (<i>Pliny</i>) . . .	”		
<i>Æschylus</i> introduced suitable dresses and a stage . . .	486		
The drama was first introduced into <i>Rome</i> on occasion of a plague which raged during the consulate of C. Sulpicius Peticius and C. Licinius Stolo: the magistrates, to appease the incensed deities, instituted the games called the “ <i>Scenici</i> ,” which were amusements entirely new; actors from Etruria danced, after the Tuscan manner, to the flute . . .	364		

DRAMA, MODERN, arose early in the rude attempts of minstrels and buffoons at fairs in France, Italy, and England. Stories from the Bible were represented by the priests, and were the origin of sacred comedy. *Warton*.

Gregory Nazianzen, an early father of the Church, is said to have constructed a drama on the Passion of Christ, to counteract the profanities of the heathen stage, about . . .	364	A licence granted to Shakespeare and his associates in . . .	1603
Fitzstephen, in his “ <i>Life of Thomas à Becket</i> ,” asserts that—“ <i>London had for its theatrical exhibitions holy plays, and the representation of miracles, wrought by holy confessors; he died about</i> . . .	1190	Plays were opposed by the Puritans in 1633, and were afterwards suspended until the Restoration, in . . .	1660
The Chester Mysteries were performed about . . .	1270	Two companies of regular performers were licensed by Charles II., Killigrew's and Sir William Davenant's. The first was at the Bull, Vere-street, Clare-market, which was immediately afterwards removed to Drury-lane; the other in Dorset-gardens, 1662. Till this time, boys performed women's parts; but Mrs. Coleman (the first female on the stage) had performed <i>Ianthe</i> , in Davenant's “ <i>Siege of Rhodes</i> ,” in . . .	1656
Plays were performed at Clerkenwell by the parish clerks, and “ <i>miracles</i> ” were represented in the fields, in . . .	1397	Sir William Davenant introduced operas, and both companies united, 1684, and continued together till 1694, when a schism under Betterton led to the opening of a theatre in Lincoln's-inn-fields, the parent of Covent-garden . . .	1695
Allegorical characters were introduced in the reign of Henry VI. . . .		Act for the revision of plays and for licensing them previously to being performed . . .	1737
Individual characters were introduced in Henry VII.'s reign. . . .		Author's Dramatic Copyright Protection act, 3 Will. IV. c. 15 . . .	June, 1833
Skelton and others wrote “ <i>Moralities</i> ” about . . .	1500	See <i>Theatres, Covent-garden, Drury-lane, and Copyright</i> .	
The first regular drama acted in Europe was the “ <i>Sophonisba</i> ” of Trissino, at Rome, in the presence of pope Leo X. (<i>Voltaire</i>) . . .	1515		
The first royal licence for the drama in England was to master Burbage, and four others, servants to the earl of Leicester, to act plays at the Globe, Bankside . . .	1574		
Shakespeare began to write about . . .	1590		

DRAMATIC COLLEGE, for the benefit of distressed actors and their children, was proposed July 21, 1858, at the Princess's theatre, by Messrs. C. Dickens, Thackeray, C. Kean, B. Webster, and others. Mr. Henry Dodd's offer of land and money, with certain stipulations, was declined. The Queen is the patron. The first stone of the building was laid by the Prince Consort, June 1, 1860; and on Sept. 29, 1862, seven annuitants were installed. The central hall was opened by the Prince of Wales, June 5, 1865.

* The Coventry, Chester, Townley, and other mysteries have been printed during the present century.

DRAPIER'S LETTERS, by dean Swift, published in 1724, against *Wood's Halfpence* (*which see*).

DREAMS are mentioned in Scripture, *e.g.*, Joseph's and Pharaoh's, 1715 B.C. (*Gen.* xxxvii. and xli.), and Nebuchadnezzar's, 603 and 570 B.C. (*Daniel* ii. and iv.). The first attempt to interpret dreams and omens is ascribed to Amphietyon of Athens, 1497 B.C. A remarkable modern instance is attested in the life of Thomas, lord Lyttelton.*

DRED SCOTT CASE. See *United States*, 1857.

DREPANUM (Sicily). Near this place the Carthaginian admiral Adherbal totally defeated the Roman fleet under P. Claudius, 249 B.C.

DRESDEN, termed the German Florence, became the capital of Saxony in 1548. Peace of Dresden, between Saxony, Prussia, and the queen of Hungary, confirming the treaties of Berlin and Breslau, signed Dec. 25, 1745. Dresden was taken by Frederick of Prussia in 1756; by the Austrians in 1759; and bombarded in vain by Frederick, in July, 1760. Here severe contests took place between the allied army under the prince of Schwarzenberg, and the French army commanded by Napoleon, Aug. 26 and 27, 1813. The allies, 200,000 strong, attacked Napoleon in his position at Dresden, and the event had nearly proved fatal to them, but for an error in the conduct of general Vandamme. They were defeated with dreadful loss, and were obliged to retreat into Bohemia; but Vandamme pursuing them too far, his division was cut to pieces, and himself and all his staff made prisoners. In this battle, general Moreau received his mortal wound, while in conversation with the emperor of Russia. Marshal St. Cyr, and 25,000 French troops, surrendered Dresden to the allies, Nov. 11, 1813. During a political commotion, the king of Saxony resigned the royal authority, and prince Frederick, his nephew, was declared regent, Sept. 9, *et seq.* 1830. See *Saxony*. An insurrection here on May 3, 1849, was repressed on the 6th.†

DRESS. The attire of the Hebrew women is censured in *Isaiah* iii., about 760 B.C. Excess in dress among the early Romans was restrained by sumptuary laws; and also in England by numerous statutes, in 1363, 1465, 1570, &c. (*see Cap*); and in the reign of Elizabeth, 1574.‡ *Stow*. Fairholt's "*Costume in England*" contains a history of dress with numerous illustrations derived from MSS., the works of Strutt, &c. A "Dress-making Company" was established in London, Feb. 6, 1865, with the view of improving the condition of the workwomen.

DREUX (N.W. France). Here Montmorenci defeated the Huguenots under Condé, Dec. 19, 1562.

DRINKING-FOUNTAINS. Many were erected in Liverpool in 1857. An association for their erection in London was formed in April, 1859, by lord John Russell, the earl of Carlisle, Mr. S. Gurney, and others. The first of the numerous fountains since erected is that near St. Sepulchre's church, Skinner-street, on April 21, 1859. The magnificent fountain in Victoria-park, London, was inaugurated by the donor, Miss Burdett Coutts, June 8, 1862.

DRILLING-MACHINES, in agriculture. One was invented by Jethro Tull, early in the last century.

* Lord Lyttelton dreamt that a young female, dressed in white, solemnly warned him of his dissolution in three days from that time. On the third day his lordship had a party to spend the evening with him, and about the time predicted, he observed to the company present, that "he believed he should jockey the ghost;" but in a few minutes afterwards he was seized with a sudden faintness, carried to bed, and rose no more. He died in 1779, aged 35. Some assert that he committed suicide.

† The fine porcelain ware known as Dresden china was invented by M. Boeticher, at the time an apothecary's boy, about 1700. Hard porcelain was made there in 1709. Services of this ware have cost many thousands of pounds each. A costly service, each piece exquisitely painted, with battles, &c., was presented to the duke of Wellington by the king of Prussia, in 1816, and was the finest in England.

‡ Sir Walter Raleigh, we are told, wore a white satin-pinked vest, close-sleeved to the wrist, and over the body a brown doublet finely flowered, and embroidered with pearls, and in the feather of his hat a large ruby and pearl drop at the bottom of the sprig in place of a button. His breeches, with his stockings and ribbon garters, fringed at the end, all white; and buff shoes, which, on great court days, were so gorgeously covered with precious stones as to have exceeded the value of 6600*l.*: and he had a suit of armour of solid silver, with sword and belt blazing with diamonds, rubies, and pearls. King James's favourite, the duke of Buckingham, could afford to have his diamonds tacked so loosely on, that when he chose to shake a few off on the ground, he obtained all the fame he desired from the pickers-up, who were generally *les Dames de la Cour*. We may here mention a novel dress, the BLOOMER COSTUME, introduced into America in 1849, by Mrs. Ann Bloomer, and worn there by many of the women. It resembled male attire, being an open-fronted jacket and loose trousers, the latter wide like those of the Turk, but gathered in at the ankles. The Bloomer dress was first adopted by a few females in the western parts of London, in August, 1851; but though it was recommended by some American ladies in popular lectures, it was soon afterwards totally discontinued.

DROGHEDA (Central Ireland, E.), formerly Tredagh, a place of great importance, having the privilege of coining money. In the reign of Edward VI., an act, yet unrepealed, was passed for the foundation of a university here. The town was besieged several times in the contests between 1641 and 1691. Cromwell took it by storm, and put the governor, sir A. Aston, and the whole of the garrison, to the sword, Sept. 11, 1649. More than 3000 men, most of them English, perished. It surrendered to William III. in 1690.

DROMORE, BISHOPRIC OF (N.E. Ireland), founded by St. Coleman, first bishop, about 556. By an extent returned 15 James I., this see was valued in the king's books at 50*l*. Jeremy Taylor was bishop of Down and Connor in 1660, and of this see in 1661. Dromore has been united to Down through the Irish Church Temporalities act, 1833.

DROWNING, as a punishment, is very ancient. The Britons inflicted death by drowning in a quagmire, before 450 B.C. *Stow*. It is said to have been inflicted on eighty intractable bishops near Nicomedia, A.D. 370; and to have been adopted as a punishment in France by Louis XI. The wholesale drownings of the royalists in the Loire at Nantes, by command of the brutal Carrier, Nov. 1793, were termed *Noyades*. He was condemned to death in Dec. 1794. Societies for the *recovery of drowning persons* were first instituted in Holland, in 1767. The second society is said to have been formed at Milan, in 1768; the third in Hamburg, in 1771; the fourth at Paris, in 1772; and the fifth in London, in 1774. The motto of the Royal Humane Society in England is: *Lateat scintillula forsan*—"A small spark may perhaps lie hid."

DRUIDS. Priests, among the ancient Germans, Gauls, and Britons, so named from their veneration for the oak (Brit. *derue*). They administered sacred things, were the interpreters of the gods, and supreme judges. They headed the Britons who opposed Cæsar's first landing, 55 B.C., and were exterminated by the Roman governor, Suetonius Paulinus, A.D. 61.

DRUM: the invention is ascribed to Bacchus, who, according to Polyænus, "gave his signals of battle with cymbals and drums." It was brought by the Moors into Spain, 713. *Le Clerc*. The drum, or drum-capstan, for weighing anchors, was invented by sir S. Morland, in 1685. *Anderson*.

DRUMMOND LIGHT. See *Time-light*.

DRUMCLOG (W. Scotland). Here the Covenanters defeated Graham of Claverhouse, on June 1, 1679. An account of the conflict is given by Walter Scott, in "Old Mortality."

DRUNKARDS were to be excommunicated in the early church, 59 (1 *Cor.* vii.) In England, a canon law forbade drunkenness in the clergy, 747. Constantine, king of Scots, punished it with death, 870. By 21 James I., c. 7, 1623, a drunkard was liable to a penalty of five shillings, or six hours in the stocks.

DRURY-LANE THEATRE derives its origin from a cock-pit, which was converted into a theatre in the reign of James I. It was rebuilt, and called the Phoenix; and Charles II. granted an exclusive patent to Thomas Killigrew, April 25, 1662. The actors were called the king's servants, and ten of them, who were called gentlemen of the great chamber, had an annual allowance of ten yards of scarlet cloth, with a suitable quantity of lace. The theatre, with sixty adjoining houses, was burnt down in 1672; and a new edifice was built in its room by sir Christopher Wren, in 1674. The interior was rebuilt by Mr. Adams, and was re-opened Sept. 23, 1775. The Drury-lane Theatrical Fund was originated by David Garrick in 1777. In 1791, the theatre was pulled down; it was rebuilt and opened March 12, 1794. It was totally destroyed by fire, Feb. 24, 1809; and was rebuilt and opened Oct. 10, 1812. See *Theatres* and *Drama*.

DRUSES, a warlike people dwelling among the mountains of Lebanon, derive their origin from a fanatical Mahometan sect which arose in Egypt about 996, and fled to Palestine, to avoid persecution. They now retain hardly any of the religion of their ancestors: they do not practise circumcision, pray, or fast, but eat pork and drink wine. In the middle of 1860, in consequence of disputes (in which doubtless both parties were to blame), the Druses attacked their neighbours the Maronites (*which see*), whom they massacred, it was said, without regard to age or sex. Peace was made in July; but in the meantime a religious fury seized the Mahometan population of the neighbouring cities, and a general massacre of Christians ensued. See *Damascus* and *Syria*. Fual Pacha with Turkish troops; and general Hautpoul with French auxiliaries, invaded Lebanon in Aug. and Sept. The Druses surrendered, giving up their chiefs, several of whom were tried and condemned to die, in Jan. 1861.

DUBLIN, capital of Ireland, anciently called Asheled, said to have been built 140. It obtained its present name from Alpinus, a lord or chief among the Irish, whose daughter, Auliana, having been drowned at the ford where now Whitworth-bridge is built, he changed the name to Auliana, by Ptolemy called Eblana (afterwards corrupted into Dublana), that she might be had in remembrance. Alpinus is said to have made this place his residence, about 155, when he brought "the then rude hill into the form of a town." See *Ireland*.

DUBLIN, ARCHBISHOPRIC OF. It was united to Glendalagh in 1214. It is supposed that the bishopric of Dublin was founded by St. Patrick, in 448. Gregory, bishop in 1121, became *archbishop* in 1152. George Browne, an Augustine friar of London (deprived by queen Mary in 1554), was the first Protestant archbishop of this see. Dublin has two cathedrals, Christ Church, and St. Patrick's. The revenue was valued, in the king's books, 30 Hen. VIII. at 534*l.* 15*s.* 2*d.* Irish. Kildare, on its last avoidance, was annexed to Dublin, 1846. See *Bishops*.

DUCAT, a coin so called because struck by dukes. *Johnson*. First coined by Longinus, governor of Italy. *Procopius*. First struck in the duchy of Apulia, 1140. *Du Cange*. Coined by Robert, king of Sicily, in 1240.

DUELLING took its rise from the judicial combats of the Celtic nations. The first duel in England, William count of Eu and Godfrey Baynard, took place 1006. Duelling in civil matters was forbidden in France, 1305. The present practice of duelling arose in the challenge of Francis I. to the emperor Charles V. 1528. The fight with small swords was introduced into England, 29 Eliz. 1587. Proclamation that no person should be pardoned who killed another in a duel, 30 Charles II. 1679.* Duelling was checked in the army, 1792; and has been almost abolished in England, by the influence of public opinion aided by the prince consort. A society "for the discouraging of duelling" was established in 1845. See *Battel, Wager of, and Combat*.

DUKE, Latin *dux*, a title first given to generals of armies. In England, during Saxon times, the commanders of armies were called dukes, *duces*. *Camden*. In *Genesis xxxvi.* some of Esau's descendants are termed *dukes*. *Duke-duke* was a title given to the house of Sylvia, in Spain, on account of its possessing many duchies.

Edward the Black Prince made duke of Cornwall	1337	duke of Rothesay, a title which afterwards belonged to the king's eldest son, 1398, and is now borne by the prince of Wales.
Robert de Vere was created marquess of Dublin and duke of Ireland, 9 Rich. II.	1385	Cosmo de Medici created <i>grand-duke</i> of Tuscany, the first of the rank, by pope Pius V. . 1569
Robert III. created David, prince of Scotland,		

DULWICH COLLEGE (Surrey), called God's-gift College, founded by Edward Alleyn, an eminent comedian, was completed and solemnly opened Sept. 13, 1619. Alleyn was its first master, and died in 1626. A fine gallery to contain the Bourgeois collection of pictures, bequeathed by sir Francis Bourgeois, was annexed in 1813. In 1857, an act was passed by which the college was reconstituted. Two schools were established; and the number of the almspeople increased. In 1860 the annual income was 11,482*l*.

DUMB. See *Deaf and Dumb*.

DUMBLANE OR DUNBLANE (Perth), near which took place a conflict called the battle of Sheriffmuir, between the royalist army and the Scots rebels, the former commanded by the duke of Argyle, and the latter by the earl of Mar, Nov. 13, 1715. Both sides claimed the victory.

DUNBAR (Haddington). Here the Scottish army and John Baliol were defeated by the earl of Warrene, and Scotland was subdued, April 27, 1296. Here also Cromwell obtained a signal victory over the Scots, in arms for Charles II., Sept. 3, 1650.

DUNCIAD, the celebrated satirical poem by Alexander Pope, was published in 1728.

DUNDALK (Louth, Ireland). In 1318, at Foughard near this place, was defeated and slain Edward Bruce, who had invaded Ireland in 1315. The walls and fortifications of Dundalk were destroyed in 1641. It was taken by Cromwell in 1649. The first cambric manufacture in Ireland was established in this town by artisans from France in 1727.

DUNDEE (E. Scotland), on the Tay. The site was given by William the Lion (reigned 1165—1214), to his brother David, earl of Huntingdon, who built or strengthened the castle, and erected a large church, the tower of which, 156 feet high, still remains. The town was taken by the English in 1385; pillaged by Montrose, 1645; stormed by Monk in 1651; and was visited by queen Victoria in 1844. It has thriven since 1815, through its extensive linen manufactories; at one of these (Edwards's) a steam explosion took place on April 15, 1859, when twenty persons were killed. Claverhouse, viscount Dundee (killed 1689), had a house here. •The Baxter park, the gift of sir David Baxter, was opened by earl Russell, Sept. 9, 1863. Population in 1861, 90,425.

DUNGAN-HILL (Ireland). Here the English army, commanded by colonel Jones, signally defeated the Irish, of whom 6000 are said to have been slain, while the loss on the side of the English was inconsiderable, July 10, 1647.

DUNKELD (Perthshire) was made a bishopric by David I. in 1127; the ancient Culdee church, founded by king Constantine III., becoming the cathedral. The beautiful bridge over the Tay, erected by Thos. Telford, was opened in 1809.

DUNKIRK (N. France), founded in the 7th century, was taken from the Spaniards by the English and French, and put into the hands of the English, June 1658. It was sold by Charles II. for 500,000*l.* to Louis XIV., Oct. 17, 1662. Dunkirk was one of the best fortified ports in the kingdom; but all the works were demolished in conformity with the treaty of Utrecht in 1713. The French resumed the works, but they were ordered to be demolished at the peace of 1763; in 1783 they were again resumed. The English attempted to besiege this place; but the duke of York, who commanded, was defeated by Hoche, and forced to retire with loss, Sept. 7, 1793. It was made a free port in 1816.

DUNMOW (Essex), famous for the tenure of the manor (made by Robert Fitz-Walter, 1244), "that whatever married couple will go to the priory, and kneeling on two sharp-pointed stones, will swear that they have not quarrelled nor repented of their marriage within a year and a day after its celebration, shall receive a fitch of bacon."*

DUNSINANE (Perthshire). On the hill was fought the battle between Macbeth the thane of Glamis, and Siward, earl of Northumberland, 1054. Edward the Confessor had sent Siward on behalf of Malcolm III., whose father Duncan, the thane and usurper had murdered. Macbeth was defeated, and it was said was pursued to Lumphanan, in Aberdeenshire, and there slain, 1056.

DÜPPEL or **DYBBÖL**. See under *Denmark*, 1864.

DUPPLIN (Perthshire). Here Edward Baliol and his English allies totally defeated the Scots under the earl of Mar, Aug. 11,^e 1332, and obtained the crown for three months.

DURBAR, an East Indian term for an audience-chamber or reception. On Oct. 18, 1864, a most remarkable durbar was held at Lahore by the viceroy of India, sir John Lawrence, at which 604 of the most illustrious princes and chieftains of the north-west province, were present, magnificently clothed.

DURHAM, an ancient city, the *Dunholme* of the Saxons, and *Durême* of the Normans. The bishopric was removed to Durham from Chester-le-street in 995; whither it had been transferred from Lindisfarne or Holy Island, on the coast of Northumberland, in 634, in

* The earliest recorded claim for the bacon was in 1445, since when to 1855 it had only been demanded five times. The last claimants previous to 1855 were John Shakeshanks and his wife, who established their right to it, June 20, 1751; they made a large sum by selling slices of the fitch to those who were witnesses of the ceremony, there being 5000 persons present. The claim was revived on July 19, 1855, when fitches were awarded to Mr. and Mrs. Barlow, of Chipping Ongar, and the Chevalier Chatelaine and his lady. The lord of the manor opposed the revival, but Mr. W. Harrison Ainsworth, the novelist, and some friends, defrayed the expense, and superintended the ceremonials. Endeavours have been made to perpetuate the custom. A fitch was awarded in 1860.

consequence of the invasion of the Danes. The bones of St. Cuthbert, the sixth bishop, were brought from Lindisfarne, and interred in Durham cathedral. The palatine privileges, granted to the bishop by the Danish Northumbrian prince Guthrum, were taken by the crown in June 1836. Durham was ravaged by Malcolm of Scotland in 1070, and was occupied by the Northumbrian rebels in 1569; and by the Scots in 1640. In 1650 Cromwell quartered his Scotch prisoners in the cathedral. Near Durham on Oct. 17, 1346, was fought the decisive battle of Neville's cross (*which see*). This see, deemed the richest in England, was valued in the king's books at 2821*l.* Present income, 8000*l.* The college, founded in 1290, was abolished at the Reformation. In 1657 Cromwell established a college, which was suppressed at the Restoration. The present *University* was established in 1831, opened in 1833, and chartered in 1837. Certain reformed ordinances, recommended by a commission, were set aside in 1863.

DURHAM LETTER. See *Papal Aggression*.

DUTCH REPUBLIC. See *Holland*.

DUUMVIRI, two Roman patricians appointed by Tarquin the Proud 520 B.C. to take care of the books of the Sibyls, which were supposed to contain the fate of the Roman empire. The books were placed in the Capitol, and secured in a chest under the ground. The number of keepers was increased to ten (the Decemviri) 365 B.C., afterwards to fifteen; the added five called *quinque viri*.

DWARFS: ANCIENT. Philetas of Cos, distinguished about 330 B.C., as a poet and grammarian, was so diminutive that he always carried leaden weights in his pockets, to prevent his being blown away by the wind. He was preceptor to Ptolemy Philadelphus. *Ælian*. Julia, niece of Augustus, had a dwarf named Coropas, two feet and a hand's breadth high; and Andromeda, a freed-maid of Julia's, was of the same height. *Pliny*. Aug. Cæsar exhibited in his plays a man not two feet in stature. *Sueton*. Alypius of Alexandria, a logician and philosopher, was but one foot five inches and a half high; "he seemed to be consumed into a kind of divine nature." *Vos. Instit.*

MODERN DWARFS.—John d'Estrix, of Mechlin, was brought to the duke of Parma, in 1592, when he was 35 years of age, having a long beard. He was skilled in languages, and not more than three feet high.

Jeffrey Hudson, an English dwarf, when a youth of 18 inches high, was served up to table in a cold pie, before the king and queen, by the duchess of Buckingham, in 1626. He challenged Mr. Crofts, who had offended him, to fight a duel, but the latter came to the ground armed only with a squirt. This led to another meeting, when the dwarf shot his antagonist dead, 1653.

Count Borowlaski, a Polish gentleman, of great accomplishments and elegant manners, well known

in England, where he resided many years, was born in Nov. 1739. His growth was at one year of age, 14 inches; at six, 17 inches; at twenty, 33 inches; and at thirty, 39. He had a sister, named Anastasia, seven years younger than himself, and so much shorter that she could stand under his arm. He visited many of the courts of Europe, and died in England, at the great age of 98, in 1837. Charles Stratton (termed general Tom Thumb), an American, was exhibited in England, 1846. In Feb. 1863, in New York, when 25 years old and 31 inches high, he married Lavinia Warren, aged 21, 32 inches high. He, his wife, and child, and commodore Nutt, another dwarf, came to England in Dec. 1864, and remained there some time.

DYEING is attributed to the Tyrians, about 1500 B.C. The English sent their goods to be dyed in Holland, till the art was brought to them in 1608. "Two dyers of Exeter were flogged for teaching their art *in the north*" (of England), 1628. A statute against abuses in dyeing passed in 1783. The art has been greatly improved by chemical research. A discovery of Dr. Stenhouse in 1848, led to M. Marnas procuring *mauve* from lichens; and Dr. Hofmann's production of aniline from coal-tar, has led to the invention of a number of beautiful dyes (mauve, magenta red, &c.). See *Aniline*.

EAGLE, an ancient coin of Ireland, made of a base metal, and current in the first years of Edward I. about 1272; was so named from the figure impressed upon it. The *American* gold coinage of eagles, half eagles, and quarter eagles, began Dec. 6, 1792; an eagle is of the value of 10 dollars, or about two guineas.—The *standard of the eagle* was borne by the Persians, at Cunaxa, 401 B.C. The Romans carried gold and silver eagles as ensigns, and sometimes represented them with a thunderbolt in their talons, on the point of a spear, 102 B.C. Charlemagne added the second head to the eagle for his arms, to denote that the empires of Rome and Germany were united in him, A.D. 802. The eagle was the standard of Napoleon I., and is that of Napoleon III.; as well as of Austria, Russia, and Prussia.—The **WHITE EAGLE**, an order of knighthood, was instituted in 1325, by Uladislau, king of Poland; that of the **BLACK EAGLE** in 1701, by the elector of Brandenburg, Frederick I., on his being crowned king of Prussia; and that of the **RED EAGLE** in 1705 and 1712 by George, prince of Brandenburg-Anspach.

EARL, or *comes*, introduced at the conquest, superseded the Saxon eardorman, and continued the highest rank in England, until Edward III. created dukes in 1337 and 1351, and Richard II. created marquesses (1385), both above earls. Alfred used the title of earl as a substitute for king. William Fitz-Osborn was made earl of Hereford by William the Conqueror, 1066. Gilchrist was created earl of Angus, in Scotland, by king Malcolm III. in 1037. Sir John de Courcy created baron of Kinsale and earl of Ulster in Ireland, by Henry II. 1181.

EARL MARSHAL of England, the eighth great officer of state. This office, until it was made hereditary, always passed by grant from the king. Gilbert de Clare was created lord marshal by king Stephen, 1135. The last lord marshal was John Fitz-Allan, lord Maltravers. *Camden*. Richard II. in 1397 granted letters patent to the earl of Nottingham by the style of *earl marshal*. In 1672, Charles II. granted to Henry lord Howard the dignity of hereditary earl marshal. The earl marshal's court was abolished in 1641. (See *Howard*.)

EARL MARISCHAL of Scotland was an officer who commanded the cavalry, whereas the constable commanded the whole army; but they seem to have had a joint command, as all orders were addressed to "our constable and marischal." The office was never out of the Keith family. It was reserved at the Union, and when the heritable jurisdictions were bought, it reverted to the crown, being forfeited by the rebellion of George Keith, earl marischal, in 1715.

EARRINGS were worn by Jacob's children, 1732 B.C. (*Gen.* xxxv. 4).

EARTHQUAKES. Anaxagoras supposed that earthquakes were produced by subterraneous clouds bursting out into lightning, which shook the vaults that confined them, 435 B.C. *Diog. Laert.* Kircher, Des Cartes, and others, supposed that there were many vast cavities under ground which have a communication with each other, some of which abound with waters, others with exhalations, arising from inflammable substances, as nitre, bitumen, sulphur, &c. Dr. Stukeley and Dr. Priestley attributed earthquakes to electricity. It appears probable that steam generated by subterraneous heat contributes to occasion them. An elaborate Catalogue of Earthquakes, with commentaries on the phenomena, by R. and J. W. Mallet, was published by the British Association in 1858-9. In 1860 the velocity of their propagation was estimated by Mr. J. Brown at between 470 and 530 feet per second. The following are quoted from the best sources :*

* Mrs. Somerville states that about 255 earthquakes have occurred in the British isles; all slight. To avoid the effects of a shock predicted by a madman, for the 8th of April, 1750, thousands of persons, particularly those of rank and fortune, passed the night on the 7th in their carriages and in tents in Hyde-park.

EAST ANGLES. This kingdom (the sixth of the Heptarchy) was commenced by Uffa, 575, and ended with Ethelbert in 792. See *Britain*. The ancient see founded by St. Felix, who converted the East Angles in 630, was removed to Norwich (*which see*).

EAST INDIES, &c. See *India*.

EAST SAXONS. See *Britain*.

EASTER, the festival observed by the church in commemoration of Our Saviour's resurrection, so called in England from the Saxon goddess *Eostre*. It was instituted about 68, and the day for its observance in England was fixed by St. Austin, in 597. After much contention between the eastern and western churches it was ordained by the council of Nice, 325, to be observed on the same day throughout the whole Christian world. "Easter-day is the Sunday following that fourteenth day of the calendar moon which happens upon or next after the 21st March: so that, if the said fourteenth day be a Sunday, Easter-day is not that Sunday but the next." Easter-day may be any day of the five weeks which commence with March 22 and end with April 25. The dispute between the old British church and the new Anglo-Saxon church respecting Easter was settled about 664.—Easter Sunday, in 1866, April 1; in 1867, April 21; in 1868, April 12.

EASTER ISLAND, in the Pacific Ocean, was discovered by Davis in 1686; it was visited by Roggewein, in 1722, and from him obtained the name it now bears; it was visited by captain Cook, in 1774. At the south-east extremity is the crater of an extinguished volcano, about two miles in circuit and 800 feet deep.

1347. John Cantacuzenus abdicates.
1355. John Paleologus, restored.
1391. Manuel Paleologus, his son : succeeded by his son and colleague,
1425. John Paleologus II. The throne claimed by his three brothers.
1448. Constantine Paleologus XII. (XIII. or XIV. some of the other emperors being called *Constantine* by some writers) killed, when Constantinople is taken, May 29, 1453.

EBIONITES, heretics, in the 2nd century, who seem to have been a branch of the Nazarenes, were of two kinds : one believed that our Saviour was born of a virgin, observed all the precepts of the Christian religion, but added the ceremonies of the Jews; the other believed that Christ was born after the manner of all mankind, and denied his divinity. *Pardon.* Photinus revived the sect in 342.

EBONITE (vulcanised india-rubber). See *Caoutchouc*.

EBRO, a river in Spain—the scene of a signal defeat of the Spaniards by the French, under Lannes, near Tudela, Nov. 23, 1808; and also of several important movements of the allied British and Spanish armies during the Peninsular war (1809 and 1813).

ECCLESIASTICAL COMMISSIONS. One was appointed by queen Elizabeth, 1584; by James I. in Scotland, 1617; by the English parliament in 1641; and by James II. to coerce the universities in 1687. The present Ecclesiastical Commissioners (bishops, deans, and laymen) were appointed in 1835, and incorporated in 1836.

ECCLESIASTICAL COURTS. There existed no distinction between lay and ecclesiastical courts in England until after the Norman conquest, 1066. See *Arches and Consistory Courts*. Till the establishment of the Divorce and Probate courts (*which see*) in 1857, the following were the causes cognisable in ecclesiastical courts: blasphemy, apostasy from

Christianity, heresy, schism, ordinations, institutions to benefices, matrimony, divorces, bastardy, tithes, incests, fornication, adultery, probate of wills, administrations, &c.

ECHOES. The time which elapses between the utterance of a sound and its return must be more than one-twelfth of a second, to form an echo. The whispering gallery of St. Paul's is a well-known example.

ECKMÜHL (Bavaria), the site of a battle between the main armies of France (75,000) and Austria (40,000); Napoleon and marshal Davoust (hence prince d'Eckmühl) defeated the archduke Charles, April 22, 1809.

ECLECTICS (from Greek, *eklego*, I choose), ancient philosophers (called *Analogetici*, and also *Philalethes*, or the lovers of truth), who, without attaching themselves to any sect, chose what they judged good from each: of them was Potamon of Alexandria, about A.D. 1. *Dryden*. Also a Christian sect, who considered the doctrine of Plato conformable to the spirit of Christianity.

ECLIPSE (the race-horse). See *Races*.

ECLIPSES. Their revolution was first calculated by Calippus, the Athenian, 336 B.C. The Egyptians said they had accurately observed 373 eclipses of the sun, and 832 of the moon, in the period from Vulcan to Alexander, who died 323 B.C. The theory of eclipses is said to have been known to the Chinese before 120 B.C. The first eclipse recorded happened March 19, 721 B.C., at 8h. 40m. P.M., according to Ptolemy; it was lunar, and was observed with accuracy at Babylon. A list of eclipses to the year A.D. 2000 is given in "*L'Art de Vérifier les Dates*."

ECONOMIC MUSEUM (or Museum of Domestic and Sanitary Economy), at Twickenham, open free, was established chiefly by the agency of Mr. Thos. Twining, in 1860. It originated from the Paris exhibition of 1855.

ECUADOR. See *Equator*.

EDDAS, two books containing the Scandinavian mythology (or history of Odin, Thor, Frea, &c.), written about the 11th and 12th centuries. Translations have been made into French, English, &c. MSS. of the Eddas exist at Copenhagen and Upsal.

EDDYSTONE LIGHT-HOUSE, off the port of Plymouth, erected by the Trinity-house to enable ships to avoid the Eddystone rock. It was commenced under Mr. Winstanley, in 1696; was finished in 1699; and was destroyed in the dreadful tempest of Nov. 27, 1703, when Mr. Winstanley and others perished. It was rebuilt by act of parliament, 4 Anne, 1706, and all ships were ordered to pay one penny per ton inwards and outwards towards

* Mr. Airy thinks the date should be 610; others say 603 or 584, B.C. It is the one recorded by Herodotus as interrupting a battle between the Medes and Lydians.

supporting it. This light-house was burnt in 1755; and one on a better plan, erected by Mr. Smeaton, was finished Oct. 9, 1759. The woodwork of this, burnt in 1770, was replaced by stone.

EDESSA (now Orfat), a town in Mesopotamia, said by some to have been built by Nimrod; by Appian, to have been built by Seleucus. It became famous for its schools of theology in the 5th century, and in 1184, when it was taken by the Saracens, it contained fifteen large churches. Its kings or rulers were named Abgarus and Mannus.

EDGEHILL FIGHT (Oct. 23, 1642), Warwickshire, between the royalists and the parliament army, was the first engagement of importance in the civil war. Charles I. was present. Prince Rupert commanded the royalists, and the earl of Essex the parliamentarians. The earl of Lindsay, who headed the royal foot, was mortally wounded, and taken prisoner. The king lost 5000 dead. Owing to the great loss on both sides the action proved indecisive, though the parliament claimed the victory.

EDICTS, public ordinances and decrees, usually set forth by sovereigns; the name originated with the Romans. The PERPETUAL EDICT: Salvius Julianus, of Milan, a civilian at Rome (the author of several treatises on public right), was employed by the emperor Adrian to draw up this body of laws for the Prætors, promulgated 132.

EDICT OF NANTES, by which Henry IV. of France granted toleration to his Protestant subjects, April 13, 1598, was confirmed by Louis XIII. in 1610, and by Louis XIV. in 1652. It was revoked by Louis XIV. Oct 22, 1685. This unjust and impolitic act cost France 50,000 Protestant families, and gave to England and Germany thousands of industrious artisans who carried with them the art of manufacturing silks, settled in Spitalfields, where their descendants yet remain; others planted themselves in Soho and St. Giles's and pursued the art of making crystal glasses and various fine works in which they excelled; among these, jewellery, then little understood in England.

EDINBURGH, the metropolis of Scotland, derives its name—in ancient records *Dun Elin*, “the hill of Edin”—from its castle, founded or rebuilt by Edwin, king of Northumbria, who having greatly extended his dominions, erected it for the protection of his newly acquired territories from the incursions of the Scots and Picts, 626. But it is said the castle was first built by Camelon, king of the Picts, 330 B.C. It makes a conspicuous appearance, standing at the west end of the town, on a rock 300 feet high, and, before the use of great guns, was a fortification of considerable strength.

EDINBURGH, BISHOPRIC OF, was created by Charles I. when that monarch was in Scotland in 1633; and William Forbes, one of the ministers of Edinburgh, was made first bishop. The king allotted the parishes of the shires of Edinburgh, Linlithgow, Haddington, and a part of Berwick and of Stirlingshire, to compose the see. The sixth and last prelate was Alexander Ross, who was ejected on the abolition of episcopacy, at the period of the revolution, in 1689. Edinburgh became a post-revolution bishopric in 1720. See *Bishops*.

EDINBURGH UNIVERSITY. A college was commenced by the town council of Edinburgh, in 1581, for which queen Mary had given the site of ancient religious houses, and Robert Reid, bishop of Orkney, the funds in 1558. In 1582 the university was chartered by James VI. afterwards James I. of England. The first principal was appointed in 1585. The foundation-stone of the new buildings was laid by Francis, lord Napier, grand-master of the masons of Scotland, Nov. 16, 1789. In 1845, the library contained upwards of 80,000 volumes, besides numerous curious and rare MSS. and documents.

EDOM. See *Idumæa*.

EDUCATION, the art of developing the physical, intellectual, and moral faculties of man, has occupied the greatest minds in all ages, such as Plato, Aristotle, Cicero, Quintilian, Bacon, Milton, Locke, Rousseau, &c. In England the earliest schools for the lower classes were those attached to the monasteries; for the higher classes halls and colleges were gradually founded (see *Oxford* and *Cambridge*).

William of Wykeham planted the School at Winchester, whence arose his colleges at that place and Oxford 1373
Eton College was founded by Henry VI. 1440
In the thirty years following the reformation

education was greatly promoted, and many grammar schools were erected and endowed by Edward VI. and Elizabeth 1535-65
Westminster school founded by Elizabeth 1560

EDUCATION, *continued*.

- Sheriff, 1567; of Harrow school, by John Lyon 1571
- Queen Anne was the zealous friend of education. While princess, she founded the Grey-coat school, Westminster, in 1698, and cordially supported the setting up parochial charity schools (one of which had been established in 1688 at St. Margaret's, Westminster).
- Nearly 2000 of these schools were established in Great Britain and Ireland, principally by the instrumentality of the Society for the Promotion of Christian Knowledge 1741
- Mr. Robert Raikes originated *Sunday Schools* about 1781
- In 1833 there were 16,828 of these schools, with 1,548,890 scholars.
- Sunday School Union was formed in 1802
- Joseph Lancaster, a young Quaker, began to instruct the children of the poor 1796
- He had 90 pupils before he was 18 years old, and 1000 pupils in 1798
- To provide teachers he invented the monitorial system. In consequence of his exertions the present British and Foreign School Society was founded with the name of the "Royal Lancasterian Institution," &c. 1805
- This being unexclusive, was followed by the institution of the Church of England "National Society for Educating the Poor," on Dr. Bell's system 1811
- Infant Schools* began about 1815
- The Charity Commission, appointed at the instance of Mr. (now lord) Brougham, published their reports on Education, in 37 volumes folio 1819-40
- Irish National School System (to accommodate both Roman Catholics and Protestants) organised mainly by archbishop Whately and the Roman Catholic archbishop Murray 1831
- In 1834, the government began annual grants (the first 20,000*l.*), which continued till 1839, when the Committee of the Privy Council on Education was constituted for the distribution of the money. Three most magnificent works on Egypt have been published: in France (commenced by Napoleon, and the savans who accompanied him to Egypt), *Description de l'Égypte*, 1809-22; in Italy, Rosellini's *Monumenti dell' Egitto*, 1832-44; and in Prussia, Lepsius' *Denkmäler aus Ägypten*, 1848-56. All these are in the Library of the Royal Institution of Great Britain, London.

EGYPT, *continued.*

it 260 years (<i>Usher</i>); the dynasty of Shepherd kings begins	B.C.	2080	Egypt again reduced by Ochus, king of Persia, and its temples pillaged (<i>Usher</i>)	B.C.	350
The Lake of Moeris constructed by him	1938	Alexander the Great enters Egypt, wrests it from the Persians, and builds Alexandria (<i>Blair</i>)	332

The dynasty of <i>Saites</i> (<i>Blair</i>)	781	Alexander I.	107		
Sebacon (the Ethiopian) invades Egypt, subdues the king, Bocchoris, whom he orders to be roasted alive (<i>Usher</i>)	737	Ptolemy VIII. restored	89		
The Dodekarchy (12 rulers) expelled by Psammetichus the Powerful	650	Revolt in Upper Egypt; Thebes destroyed after a siege of three years (<i>Diod. Siculus</i>)	82		
He invests Azoth, which holds out for 19 years, the longest siege in the annals of antiquity (<i>Usher</i>)	647	Alexander II. and Cleopatra I.	81		
Necho begins the famous canal between the Arabic gulf and the Mediterranean sea (<i>Blair</i>)	610	Ptolemy IX. Auletes	80		
This canal abandoned, after costing the lives of 120,000 men (<i>Herodotus</i>)	609	Berenice and Tryphæna	58		
Nebuchadnezzar of Babylon deposes Apries	581	Auletes restored, 55; leaves his kingdom to Ptolemy and Cleopatra (<i>Blair</i>)	51		
Apries taken prisoner and strangled in his palace (<i>Diod. Siculus</i>)	571	During a civil war between Ptolemy and Cleopatra II., Alexandria is besieged by Cæsar, and the library nearly destroyed by fire (<i>Blair</i>)	47		
The philosopher Pythagoras comes from Samos into Egypt, and is instructed in the mysteries of Egyptian theology (<i>Usher</i>)	535	Cæsar defeats the king, who, in crossing the Nile, is drowned; and the younger Ptolemy and Cleopatra reign	46		
The line of the Pharaohs ends in the murder of Psammetichus by Cambyes (<i>Blair</i>)	526	Cleopatra poisons her brother, and reigns alone She appears before Marc Antony, to answer for this crime. Fascinated by her beauty, he follows her into Egypt	43		
Dreadful excesses of Cambyes; he puts the children of the grandees, male and female, to death, and makes the country a waste (<i>Herodotus</i>)	524	Antony defeated by Octavius Cæsar at the battle of Actium (<i>Blair</i>)	40		
He sends an army of 50,000 men across the desert to destroy the temple of Jupiter Ammon, but they all perished in the burning sands (<i>Justin</i>)	"	Octavius enters Egypt; Antony and Cleopatra kill themselves; and the kingdom becomes a Roman province	30		
Egypt revolts from the Persians; again subdued by Xerxes (<i>Blair</i>)	487	Egypt wrested from the eastern emperor Heraclius, by Omar, caliph of the Saracens	A.D. 639		
A revolt under Inarus (<i>Blair</i>)	463	Saladin establishes the dominion of the Mamelukes	1171		
Successful revolt under Amyrtæus, who is proclaimed king (<i>Lenglet</i>)	414	Selim I. emperor of the Turks, takes Egypt	1517		
		It is governed by beys till a great part of the country is conquered by the French, under Bonaparte	1799		

* The epoch of the reign of Sesostris is very uncertain: Blair makes it fall 133 years later. As to the achievements of this monarch, they are supposed to have been the labours of several kings attributed by the Egyptian priests to Sesostris alone, whose very existence, indeed, is doubted.

EGYPT, *continued.*

The invaders dispossessed by the British, and the Turkish government restored . . .	1801	Stopford, Nov. 3; the Egyptians quit Syria, Nov. 21 <i>et seq.</i>	1840
Mehemet Ali massacres the Mamelukes, and obtains the supreme power . . .	1811	Peace restored by treaty; Mehemet is made hereditary viceroy of Egypt, but is deprived of Syria . . .	July 15, 1841
Arrival of Belzoni, 1815; he removes young Memnon, 1816; explores the ancient temples, &c. . .	1817	Ibrahim Pacha dies (see <i>Suez</i>) . . .	Nov. 10, 1848
Formation of the Mahmoud canal, connecting Alexandria with the Nile . . .	1820	The Suez canal begun . . .	1858
Mehemet Pacha revolts and invades Syria . . .	1831	Malta and Alexandria telegraph opened Nov. 1, 1861	
His son Ibrahim takes Acre, May 27; over-runs Syria, and defeats the Turks at Konieh, Dec. 21, 1832		The viceroy Saïd visits Italy, France, and England, May to Sept.; returns to Alexandria, Oct. 1, 1862	
He advances on Constantinople, which is entered by Russian auxiliaries, April 3; the war ends with the convention of Kutayah, May 4, 1833		Sultan of Turkey visits Egypt . . .	April 7-17, 1863
Mehemet again revolts, claiming hereditary power; Ibrahim defeats the Turks at Nezib, June 24, 1839		Greatly increased cultivation of cotton in Egypt, 1863-64	
England, Austria, Russia, and Prussia undertake to expel Ibrahim from Syria; Napier bombards Beyrout, Sept. 10; Acre taken by the British and Austrian fleets, under sir R.		At the demand of the sultan, the viceroy sends troops to repress the insurgents in Arabia, May, 1864	
		HEREDITARY VICEROYS (nearly independent). 1806. Mehemet Ali Pacha; abdicated Sept. 1848; dies Aug. 2, 1849	
		1848. Ibrahim (adopted son), Sept.; dies Nov. 10, 1848.	
		" Abbas (his son), Nov. 10; dies July 14, 1854.	
		1854. Saïd (brother), July 14; dies Jan. 18, 1863.	
		1863. Ismail (brother), Jan. 18.	

EGYPTIAN ERA. The old Egyptian year was identical with the era of Nabonassar, beginning Feb. 26, 747 B.C., and consisted of 365 days only. It was reformed 30 B.C., at which period the commencement of the year had arrived, by continually receding to the 29th of Aug., which was determined to be in future the first day of the year. To reduce to the Christian era, subtract 746 years 125 days.

EHRENBREITSTEIN (Honour's broadstone), a strong Prussian fortress on the Rhine, formerly belonged to the electors of Treves. It was often besieged. It surrendered to the French general Jourdain, Jan. 24, 1799. The fortifications were destroyed on its evacuation, Feb. 9, 1801, at the peace of Luneville. The works have been restored since 1814.

EIDER, a river, separating Schleswig from Holstein, was passed by the Austrians and Prussians, Feb. 4, 1864.

EIKÔN BASILIKĒ ("the Portraiture of His Sacred Majesty in his Solitudes and Sufferings"), a book of devotion formerly attributed to king Charles I., but now generally believed to have been written partially, if not wholly, by bishop Gauden, and possibly approved by the king: it was published in 1648, and sold with great rapidity.

EISENACH DECLARATION. See *Germany*, 1859. **EISTEDDFODD.** See *Bards*.

ELBA, ISLE OF (on the coast of Tuscany), taken by lord Nelson in 1796; but abandoned 1797. Elba was conferred upon Napoleon (with the title of emperor) on his relinquishing the throne of France, April 5, 1814. He secretly embarked hence with about 1200 men in hired feluccas, on the night of Feb. 25, 1815, and landed in Provence, March 1, to recover the Imperial crown. See *France*, 1815. Elba was resumed by the grand duke of Tuscany, July, 1815.

ELDERS (in Greek, *presbuteroi*), in the early church equivalent with *episcopoi*, or bishops (see 1 *Tim.* iii. and *Titus* i.), who afterwards became a distinct and superior order. Elders in the Presbyterian churches are laymen.

EL DORADO (the "Gilded Man"). When the Spaniards had conquered Mexico and Peru, they began to look for new sources of wealth, and having heard of a golden city ruled by a king or priest, smeared in oil and rolled in gold dust (which report was founded on a merely annual custom of the Indians), they organised various expeditions into the interior of South America, which were accompanied with disasters and crimes, about 1560. Raleigh's expeditions in search of gold in 1596 and 1617 led to his fall.

ELEATIC SECT, founded at Elea in Sicily, by Xenophanes, of Colophon, about 535 B.C. He had been banished to Sicily on account of his wild theory of God and nature. He supposed that the stars were extinguished every morning and rekindled at night; that eclipses were occasioned by a partial extinction of the sun; that there were several suns and moons for the convenience of the different climates of the earth, &c. *Strabo*. Zeno (about 364) was an Eleatic.

ELECTOR PALATINE. See *Palatinate*.

ELECTORS for members of parliament for counties were obliged to have forty shillings a-year in land, 8 Hen. VI. 1429. Among the acts relating to electors are the following: Act depriving excise and custom-house officers and contractors with government of their votes, 1782. Act to regulate polling, 1828. Reform in parliament act (see *Reform Bill*), 1832. County elections act, 1836. See *Bribery*. The forty shilling freeholders in Ireland lost their privilege in 1829. By Dodson's act, passed in 1861, university electors are permitted to vote by sending balloting papers.

ELECTORS OF GERMANY. The empire became electoral about 619. In the 13th century seven princes (the archbishops of Mentz, Treves, and Cologne, the king of Bohemia, the electors of Brandenburg and Saxony, and the elector Palatine), who possessed the greatest power, assumed the exclusive privilege of nominating the emperor. *Robertson*. An eighth elector (Bavaria) was made in 1648; and a ninth (Hanover) in 1692. The number was reduced to eight in 1777; and was increased to ten at the peace of Luneville, in 1801. On the dissolution of the German empire, the crown of Austria was made hereditary, 1804-1806. See *Germany*.

ELECTRICITY,—from the Greek *ēlektron*, electrum, amber. The electrical properties of rubbed amber are said to have been known to Thales, 600 B.C. See *Magnetism*.

FRICITIONAL OR STATIC ELECTRICITY.

Gilbert records that other bodies besides amber generate electricity when rubbed, and that all substances may be attracted . . . 1600
 Otto von Guericke constructs the first electric machine (a globe of sulphur), about . . . 1647
 Boyle publishes his electrical experiments . . . 1676
 Stephen Grey, aided by Wheeler, discovered that the human body conducts electricity, that electricity acts at a distance (motion in light bodies being produced by frictional electricity at a distance of 666 feet), the fact of electric induction, and other remarkable phenomena . . . 1720-36
 Dufay originates his dual theory of two electric fluids: one *vitreous*, from rubbed glass, &c., the other *resinous*, from rubbed amber, resin, &c.; and showed that two bodies similarly electrified repel each other, and attract bodies oppositely electrified, about . . . 1733
 The Leyden jar (vial or bottle) discovered by Kleist, 1745, and by Cuneus and Muschenbroek, of Leyden; Winckler constructed the Leyden battery . . . 1746
 Desaguliers classifies bodies as electrics and non-electrics . . . 1742
 Important researches of Watson, Canton, Beccaria, and Nollet . . . 1740-7
 Franklin announces his theory of a single fluid, terming the vitreous electricity *positive*, and the resinous *negative*, 1747; and demonstrates the identity of the electric spark and lightning, drawing down electricity from a cloud by means of a kite* . . . June, 1752
 Professor Riehmman killed at St. Petersburg, while repeating Franklin's experiments Aug. 1753
 Beccaria publishes his researches on atmospheric electricity, 1758; and Æpinus his mathematical theory . . . 1759
 Electricity developed by fishes investigated by Ingenhousz, Cavendish, and others, about . . . 1773
 Lichtenberg produces his electrical figures . . . 1777
Electro-statics: Coulomb applies the torsion balance to the measurement of electric force 1785
Electro-chemistry—water decomposed by Cavendish, Fourcroy, and others . . . 1787-90
 Discoveries of Galvani and Volta (see *Voltaic Electricity*, below) . . . 1791-3
 Ørsted, of Copenhagen, discovers electro-magnetic action (see *Electro-Magnetism*, below) . . . 1819
Thermo-Electricity (currents produced by heat) discovered by Seebeck: it was produced by

heating pieces of copper and bismuth soldered together, 1823; the thermo-electrometer invented by Snow Harris, 1827; the thermo-multiplier constructed by Melloni and Nobili, 1831. [Marcus constructed a powerful thermo-electric battery in 1865.]
 Faraday produces a spark by the sudden separation of a coiled keeper from a permanent magnet (see *Magneto-Electricity*, below) . . . 1831
 Wheatstone calculates the velocity of electricity, on the double fluid theory, to be 288,000 miles a second; on the single fluid theory, 576,000 miles a second . . . 1834
 Armstrong discovers, and Faraday explains, the electricity of high pressure steam, which produces the hydro-electric machine . . . 1840
ELECTRIC MACHINES. Otto von Guericke obtained sparks by rubbing a globe of sulphur, about 1647; Newton, Boyle, and others used glass, about 1675; Hawksbee improved the machine, about 1709; Bose introduced a metallic conductor, 1733; Winckler contrived the cushion for the rubber, 1741; Gordon employed a glass cylinder, 1742; for which a plate was substituted about 1770; Canton introduced amalgam for the rubber, 1751; Van Marum constructed an electric machine at Haarlem, said to have been the most powerful ever made. 1785; Dr. H. M. Noad set up at the Panopticon, Leicester-square, London, a very powerful electric machine and Leyden battery [in possession of Mr. Edwin Clark, 1862]. . . . 1855
 The *Hydro-Electric* machine, by Armstrong, was constructed . . . 1840
 The **ELECTROPHORUS**, a useful apparatus for obtaining frictional electricity, was invented by Volta in 1775, and improved by him in . . . 1782
ELECTROMETER and **ELECTROSCOPE**, as the terms signify, are apparatus for ascertaining the presence and quantity of electrical excitation. Pith-balls were employed in various ways as electroscopes by Gilbert, Canton, and others. Dr. Milner invented an electrometer similar to Peltier's, 1783. The gold leaf electrometer was invented by rev. A. Bennet, 1789, and improved by Singer, about 1810; Lane's discharging electrometer is dated 1767; Henley's, 1772; Bohnenberger's electro-scope, 1820; Peltier's induction electrometer, about 1848

* In 1748, at a pic-nic, he "killed a turkey by the electric spark, and roasted it by an electric jack before a fire kindled by the electric bottle."—*Penny Cyclopædia*.

GALVANISM, OR VOLTAIC-ELECTRICITY, AND ELECTRO-MAGNETISM.	
Sulzer noticed a peculiar sensation in the tongue when silver and lead were brought into contact with it and each other . . .	1762
Madame Galvani observed the convulsion in the muscles of frogs when brought into contact with two metals, in 1789; and M. Galvani, after studying the phenomena, laid the foundation of the galvanic battery . . .	1791
Volta announced his discovery of the "Voltaic pile," composed of discs of zinc and silver, and moistened card . . .	1800
By the voltaic pile, Nicholson and Carlisle decompose water, and Dr. Henry decomposes nitric acid, ammonia, &c. . .	"
Behrens forms a dry pile of 80 pairs of zinc, copper, and gilt paper . . .	1805
By means of the large voltaic battery of the Royal Institution, London, Davy decomposes the alkali potash, and evolves the metal potassium . . .	Oct. 6, 1807
Zamboni constructs a dry pile of paper discs, coated with tin on one side and peroxide of manganese on the other . . .	1809
Children's battery fuses platinum, &c. . .	"
Davy exhibits the voltaic arc . . .	1813
Wollaston's thimble battery ignites platinum wire . . .	1815
Galvanometers invented by Ampère and by Schweigger, 1820; by Cumming, 1821; De la Rive, 1824; Ritchie (torsion), 1830; Joule (magnetic), 1843. . .	
Ohm enunciates his formulæ relating to the galvanic current . . .	1827
Improvement in constructing the voltaic battery made by Wollaston, 1815; Becquerel, 1829; Sturgeon, 1830; J. F. Daniell, 1836; Grove (nitric acid, &c.), 1839; Jacobi, 1840; Smee, 1840; Bunsen (carbon, &c.), 1842; Grove (gas battery), 1842. . .	
Faraday demonstrates the nature of electro-chemical decomposition, and the principle that the quantity and intensity of electric action of a galvanic battery depends on the size and number of plates employed . . .	1834
Wheatstone invents his electro-magnetic chronoscope . . .	1840
ELECTRO-MAGNETISM begins with Ersted's discovery of the action of the electric current on the magnetic needle, 1819; proved by Ampère, who exhibits the action of the voltaic pile upon the magnetic needle, and of terrestrial magnetism upon the voltaic current; he also arranges the conducting wire in the form of a helix or spiral, invents a galvanometer, and imitates the magnet by a spiral galvanic wire . . .	1820
Arago magnetised a needle by the electric current, and attracted iron filings by the connecting wire of a galvanic battery . . .	"
Induction of electric currents discovered by Faraday and announced . . .	1831
Faraday discovers the electro-magnetic rotative force developed in a magnet by voltaic electricity, 1831; experiments on the induction of a voltaic current . . .	1834
Sturgeon makes a bar of soft iron magnetic by surrounding it with coils of wire, and sending an electric current through the wire . . .	1837
Becquerel invents an electro-magnetic balance . . .	1837
Breguet uses electro-magnetic force to manufacture mathematical instruments, about . . .	1854
MAGNETO-ELECTRICITY (the converse of Ersted's discovery of electro-magnetism), discovered by Faraday, who produced an electric spark by suddenly separating a coiled keeper from a permanent magnet; and found that an electric current existed in a copper disc rotated between the poles of a magnet . . .	1831
The Magneto-Electric machine arose out of Faraday's discovery, and was first made at Paris by Pixii, 1832; and in London by Saxton . . .	1833
Ruhmkorff's magneto-electric induction coil constructed, about . . .	1850
ELECTRIC TELEGRAPH.*	
The transmission of electricity by an insulated wire was shown in the middle of the last century, by Watson and others. . .	
Telegraphic arrangements were devised by Lesage, 1744; Befancourt, 1787; Cavallo, 1795; Salva, 1796; Sœmmering, exhibited, Aug. 29, 1809; Ronalds . . .	1816
Ampère invents his telegraphic arrangement, employing the magnetic needle and coil, and the galvanic battery . . .	1820
F. Ronalds publishes an account of his electric telegraph . . .	1823
Professor Wheatstone constructs an electro-magnetic apparatus, by which 30 signals are conveyed through nearly four miles of wire, . . .	June, 1836
Telegraphs invented by Schilling, Gauss, and Weber (magneto-electric), 1833; by Steinheil and by Masson, 1837; by Morse . . .	1837
The magnetic needle telegraph patented by W. F. Cooke and C. Wheatstone . . .	June 12, "
Mr. Cooke set up the telegraph line on the Great Western Railway, from Paddington to West Drayton, 1838-9; on the Blackwall line, 1840; and in Glasgow . . .	1841
Professor Wheatstone's alphabetical printing telegraph patented . . .	"
The first telegraph line in America set up from Washington to Baltimore . . .	1844
The murderer Tawell apprehended by means of the telegraph . . .	1845
The electric telegraph company established (having purchased Cooke and Wheatstone's telegraphic inventions) . . .	1846
Gutta-percha suggested as an insulator by Faraday . . .	1847
Over-house electric telegraphs (first erected at Paris) set up between their premises in the City and West-end by Messrs. Waterlow, in 1857; extended throughout London . . .	1859-62
House's printing telegraph, 1846; Bain's electro-chemical telegraph, 1846; Hughes's system, 1855; the American combination system (of the preceding), which can convey 2000 words an hour, adopted by the American telegraph company . . .	Jan. 1859
Wheatstone's automatic printing telegraph patented . . .	1860
Professor Charles Wheatstone, in 1840, drew plans of a projected submarine telegraph between Dover and Calais. In 1847, Mr John Watkins Brett submitted a similar plan to Louis Philippe without success; but in 1850, he obtained permission from Louis Napoleon	

* The Electric Telegraph may be said to have run a race with Time, and beaten him. New Orleans is westward of New York, and the clocks are thus later in the former city than in the latter, in proportion to the difference of longitude. When the *Atlantic* made her first return voyage from Liverpool, a brief abstract of her news was telegraphed to New Orleans at a few minutes *after* noon (New York time); it reached its destination at a few minutes *before* noon (New Orleans time), and was published in the New Orleans papers on the evening of the very day when the ship arrived at New York; the evening papers of New York and New Orleans gave the same news at the same hour (April, 1850).

ELECTRICITY, *continued.*

to make a trial. This took place on Aug. 28, 1850. The connecting wires (27 miles long) were placed on the government pier in Dover harbour, and in the *Goliath* steamer were coiled about 30 miles in length of telegraphic wire, enclosed in a covering of gutta-percha, half an inch in diameter. The *Goliath* started from Dover, unrolling the telegraphic wire as it proceeded, and allowing it to drop to the bed of the sea. In the evening the steamer arrived on the French coast, and the wire was run up the cliff at cape Grisnez to its terminal station, and messages were sent to and fro between England and the French coast. But the wire, in settling into its place in the sea-bottom, crossed a rocky ridge, and snapped in two, and thus the enterprise for that time failed. New arrangements were soon made, and on a scale of greater magnitude; and the telegraph was opened, Nov. 13, 1851. On that day the opening and closing prices of the funds in Paris were known on the London stock exchange within business hours, and guns were fired at Dover by communication from Calais.

Communications were complete between Dover and Ostend, and between Portpatrick and Donaghadee, in May, 1853; Holyhead and Howth, June, 1854; Paris and Bastia, Nov. 1854; London and Constantinople, May, 1858; Cromer and Emden, 1858; Aden and Suez, May, 1859; Malta and Alexandria, Sept. 28, 1861; England and Bombay, opened March 1, 1865 (engineer, sir C. T. Bright); Marsala, Sicily, and La Calle, Algeria. June 21, 1865

ATLANTIC TELEGRAPH. A plan to unite Europe and America by telegraph was entered at the government registration office in June, 1845, by Mr. J. Watkins Brett, who made proposals to the government, which were not accepted. This plan was attempted to be carried out by a company in 1857 and 1858, with the concurrence of the British and American governments. 2500 miles of wire were manufactured, and tested in March, 1857. The laying it down commenced at Valentia, in Ireland, on August 5. The vessels employed were the *Niagara* and *Susquehanna* (American vessels), and the *Leopard* and *Agamemnon* (British vessels). After sailing a few miles the cable snapped. This was soon repaired; but on Aug. 11, after 300 miles of wire had been paid out, it snapped again, and the vessels returned to Plymouth. In 1858, a second attempt to lay the cable failed through a violent storm, on June 20-21; but the third voyage was successful. On Aug. 5, the junction between the two continents was completed by the laying down of 2050 miles of wire from Valentia, in Ireland, to Newfoundland. The first two messages, on Aug. 5, were from the queen of England to the president of the United States, and his reply. This event caused great rejoicing in both countries; but, unfortunately, the insulation of the wire gradually became more faulty, and on Sept. 4 the power of transmitting intelligence utterly ceased. A new company was formed, 1860. The *Great Eastern* steamer, engaged to lay down 2300 miles of wire, with 25,000 tons burden, sailed for Valentia, Ireland, from the Thames, July 15, 1865; commanded by capt. Anderson, accompanied by professor Wm. Thomson and Mr. Cromwell F. Varley, to superintend the paying out the cable. After connecting the wire with the land, the *Great Eastern* sailed from Valentia, July 23. Telegraphic communication with the vessel (interrupted by two faults, due to defective insulation, caused by pieces of metal pressed

into the gutta percha coating, which were immediately repaired) finally ceased on Aug. 2. The apparatus for raising the wire proving insufficient, the vessel returned, and arrived at the Medway Aug. 19, 1865

It was stated that there are in work 15,000 miles of electric telegraph wire in Great Britain; 80,000 on the continent of Europe; and 48,000 in America; and altogether about 150,000 miles laid down in the world. July, 1862
Bonelli's typo-electric telegraph, made known and company established, 1860; and adopted between Liverpool and Manchester, 1863; promised revival. June, 1864

An "electric telegraph" conference, at which 16 states (not Great Britain) were represented, met first at Paris. March, 1865

ELECTRIC CLOCK, &c. Professor Wheatstone invented an electro-magnetic telegraph clock in 1840. Clocks worked by electricity, invented by Mr. Alexander Bain, Mr. Shepherd, and others, appeared in the exhibition of 1851. An electric clock, with four dials, illuminated at night, was set up in front of the office of the electric telegraph company, in the Strand, London, July, 1852. A time ball was set up by Mr. French, in Cornhill, in 1856. In 1860, Mr. C. V. Walker so connected the clock of the Greenwich observatory with that of the South-eastern station, London, that they could be controlled by electricity.

ELECTRIC LIGHT. Apparatus for regulating the electric light were devised in 1846, and shown by Staite and Petrie in 1848; by Foucault soon after. Jules Dubosq's *Electric Lamp* (the most perfect of the kind) appeared at the Paris exhibition in 1855; and was first employed by professor Tyndall, at the Royal Institution, London, for illustrating lectures on light and colours, in 1856. The works of new Westminster bridge were illuminated by Watson's electric light, in 1858. M. Serrin, of Paris, exhibited his improved electric lamp, in 1862. The *Magneto-Electric light* (the most brilliant artificial light yet produced), by means of apparatus devised by professor Holmes, was successfully tried in 1858 and 1859, at the South Foreland light-house, Dover. In April, 1861, the French government ordered eight lighthouses on their coast to be illuminated by electric light. MM. Dumas and Benoit constructed an *electric safety lamp* in. 1862

ELECTRIC LOOM. M. Bonelli, of Turin, in 1854, devised a plan of employing magnets and electro-magnets in weaving, thereby superseding the tedious and costly Jacquard system of cards. His loom was set up in London in 1859, and lectured upon at the Royal Institution by professor Faraday, on June 8, 1860

ELECTRO-PHYSIOLOGY was not much cultivated after the discoveries of Galvani in 1790, till about 1830, when the researches of Matteucci commenced; all the phenomena of electro-physiology or animal electricity being considered by Volta as due to an ordinary electric current. Fowler experimented on animals with galvanism, 1793; and Aldini, 1796, who produced muscular contractions in a criminal recently executed, 1803; Ure did the same, 1818; Du Bois Reymond lectured on animal electricity at the Royal Institution, and showed the existence of an electric current, developed by action of the human muscles. in 1855

ELECTRO-INT. Mr. Palmer, of Newgate-street, London, patented inventions by which engravings may not only be copied from other engraved plates, but the engraving itself

actually produced, by electrical agency, and one process he termed *glyphography*. 1841-2
ELECTRO-TYPE or DEPOSIT. Mr. Spencer, in England, and professor Jacobi, in Russia, made the first successful experiments in this art in 1837 and 1838. Since then, Mr. A. Smee and others have perfected the processes. In 1840, Mr. Rob. Murray applied black-lead to non-metallic bodies as a conducting surface. In 1840, Mr. Ruolz and Mr. Elkington applied it to gilding and silver plating. Since 1850, printing-types and woodcuts, and casts from them, have been electrotyped with copper,

and the process is now largely adopted in the arts.

Messrs. C. Wheatstone and F. A. Abel experiment on the application of electricity to military purposes in 1861

The Electro-block company established, 1860; by their processes the enlargement and reduction of engravings, obtained by india-rubber, can be immediately transferred to a lithographic stone, and multiplied at pleasure. Leech's engravings, so enlarged, were coloured by himself, and exhibited in 1862

ELEGY. Elegiac verse was the first variation from the hexameter or epic measure, as used for various subjects by Tyrtæus and other early poets. The elegies of Ovid and Catullus are celebrated. Gray's "Elegy, written in a country churchyard," was published in 1749.

ELEMENTS were formerly reckoned as four: earth, air, fire, and water. The chemical elements now are about 51 (1865).

ELEPHANT, in the earliest times trained to war. The history of the Maccabees informs us, that "to every elephant they appointed 1000 men armed with coats of mail, and 500 horse: and upon the elephants were strong towers of wood, &c." The elephants in the army of Antiochus were provoked to fight by showing them the "blood of grapes and mulberries." The first elephant said to have been seen in England was one of enormous size, presented by the king of France to our Hen. III., in 1238. *Paker's Chron.* But Polyænus states that Cæsar brought one to Britain 54 B.C., which terrified the inhabitants greatly.

ELEUSINIAN MYSTERIES. The institution of these celebrated religious ceremonies at Athens, are generally attributed to Eumolpus, 1356 B.C. If any one revealed them, it was supposed that he had called divine vengeance upon him, and he was put to death. They were introduced from Eleusis into Rome, and lasted about 1800 years, and were at last abolished by Theodosius the Great, A.D. 389. The laws were—1. To honour parents; 2. To honour the gods with the fruits of the earth; 3. Not to treat brutes with cruelty. Cicero makes the civilisation of mankind one of the beneficial effects of the Eleusinian mysteries.

ELGIN MARBLES were derived chiefly from the Parthenon, a temple of Minerva, on the Acropolis at Athens, of which they formed part of the frieze and pediment, the work of Phidias under the government of Pericles, about 500 B.C. Thomas lord Elgin began the collection of these marbles during his mission to the Ottoman Porte, in 1802; they were purchased of him by the British government for 35,000*l.* and placed in the British Museum, in 1816.*

ELIS, a Greek state termed the "Holy Land," in the Peloponnesus, founded by the Heraclidæ, 1103 B.C. Here Iphitus revived the Olympic games, 884, which were regularly celebrated after Corebus gained the prize in 776. The city of Elis was surrendered to the Spartans in a war, 399. Elis joined the Achæan league, 274; and with the rest of Geece was subjugated by the Romans in 146 B.C.

ELL (so named from *ulna*, the arm) was fixed at 45 inches, by king Henry I. in 1101. The old French ell, or *aune*, was 46.790 inches.

ELLISON GALLERY. In April, 1860, Mrs. Elizabeth Ellison presented to the South Kensington Museum a series of 50 original water-colour drawings, by the first masters.

ELOPEMENT. A wife who departs from her husband, loses her dower by the statute of Westm. 1285—unless her husband, without coercion of the church, be reconciled to her. Earlier laws punished elopement with death when adultery followed.

ELPHIN (Ireland). St. Patrick founded a cathedral near Elphin, "by a river issuing from two fountains," in the 5th century, and placed over it St. Asicus, whom he created bishop, and who soon after filled it with monks. After many centuries, Roscommon, Ardarn, Drumlive, and others of less note, were also annexed to Elphin, which became one of the richest sees in

* The ship conveying them was wrecked near Cerigo. Mr. W. R. Hamilton, who was on board, remained several months at Cerigo, and succeeded in recovering them from the sea.

Ireland. It is valued in the king's book, by an extent returned 28 Eliz., at 103*l.* 18*s.* sterling. The see was united to Kilmore in 1841, under the provisions of the Church Temporalities act, passed Aug. 1833.

ELY, an island in Cambridgeshire, on which a church was built about 673, by Etheldreda, queen of Egfrid, king of Northumberland; she also founded a religious house, filled it with virgins, and became herself first abbess. The Danes ruined the convent about 870; but a monastery was built in 879, and filled with monks, on whom king Edgar and succeeding monarchs bestowed great privileges and grants of land; whereby the abbey of Ely became the richest in England. Richard, the eleventh abbot, wishing to free himself from the bishop of Lincoln, made great interest with Henry I. to get Ely erected into a bishopric, 1108. His successor Hervæus was the first prelate, 1109. It is valued in the king's books at 2134*l.* 18*s.* 5*d.*, present stated income, 5500*l.*

RECENT BISHOPS OF ELY.

1781. James York, died Aug. 26, 1808.
1808. Thomas Dampier, died May 13, 1812.
1812. Bowyer Edw. Sparke, died April 4, 1836.

1836. Joseph Allen, died March 20, 1845.
1845. Thomas Turtton, died Jan. 7, 1864.
1864. Edward Harold Browne (PRESENT bishop).

ELZEVIRS, a celebrated family of printers, in Holland, whose reputation is based on fine pocket editions of the classics. Their first book is dated 1683.

EMANCIPATION. See *Roman Catholics* and *Slavery*.

EMBALMING. The ancient Egyptians believing that their souls, after many thousand years, would reinhabit their bodies, if these were preserved entire, embalmed the dead. Some of the bodies, called *mummies*, buried 3000 years ago, are perfect to this day. "The physicians embalmed Israel," 1689 B.C. *Gen.* i. 2. See *Mummies*.*

EMBANKMENTS of earth were erected by the ancients, for preservation from their enemies and the inundations of the tide. Those of the Egyptians are described by Herodotus and Strabo. To the Romans are attributed the first dykes of Holland, and the embankments of Romney Marsh, considered to be the oldest in Britain. In 1250 Henry III. issued a writ enforcing the support of these valuable works; and his successors followed his example. James I. greatly encouraged the embankment of the Thames. Sir W. Dugdale's "History of Embanking" first appeared in 1662. See *Drainage* and *Levees*. Since 1830, many millions of pounds have been expended in embankments for railways.

EMBARGO, from the Spanish *embargar*, to detain, applied to the restraining ships from sailing. This power is vested in the crown, but is rarely exercised except in extreme cases, and sometimes as a prelude to war. The most memorable instances of embargo were those for the prevention of corn going out of the kingdom in 1766; and for the detention of all Russian, Danish, and Swedish ships in the several ports of the kingdom, owing to the armed neutrality, Jan. 14, 1801. See *Armed Neutrality*.

EMBER WEEKS, ordained in the Christian church in the 3rd century, to implore the blessing of God on the produce of the earth by prayer and fasting, in which penitents used to sprinkle the ashes (embers) of humiliation on their heads. In the English church the *Ember days* are the Wednesday, Friday, and Saturday, after—the first Sunday in Lent, Whit-sunday, Sept. 14 (Holy Cross), and Dec. 13 (St Lucia).

EMBROIDERY is usually ascribed to the Phrygians; but we learn from Homer, and other ancient authors, that the Sidonians particularly excelled in this species of needlework. Mention is made of this art in 1491 B.C. *Exodus* xxxv. 35, and xxxviii. 23. See *Bayeux Tapestry*. Embroidery is now done by machinery. The first embroidery machine is said to have been invented by John Duncan of Glasgow in 1804. Heilman's machine was exhibited in Paris in 1834.

EMERALD, a precious stone, of a green colour, found in the East and in Peru. It has been erroneously alleged that there were no true emeralds in Europe before the conquest of Peru; but there is one in the Paris Museum, taken from the mitre of pope Julius II. who died in 1513, and Peru was not conquered till 1545.

* The most perfect specimens of *modern embalming* are preserved in the museum of the royal college of surgeons, one being the body of the wife of Van Butchell, preserved by John Hunter by injecting camphorated spirits of wine, &c., into the arteries and veins; and the other, the body of a young woman, who died about 1780 of consumption, in the Lock hospital. The method of embalming royal personages in modern times is fully described in "Hunter's Posthumous Works." He died in 1793.—During the American war (1861-5) many soldiers' bodies were embalmed and sent home.

EMIGRANTS. The French aristocracy and clergy began to leave their country in July, 1789, at the breaking out of the revolution : their estates were confiscated in Dec. A large number returned in 1802, after the peace of Amiens. Many were indemnified after the restoration in 1815.

EMIGRATION. Phœnician and Greek emigrants colonised the coasts of the Mediterranean and the Black Sea (see *Magna Græcia, Marseilles, &c.*). The discovery of America opened a vast field for emigration, which was restrained by Charles I. in 1637. It has been greatly encouraged since 1819. Regulations for emigration were made in 1831, and in Jan. 1840, the Colonial Land and Emigration Board was established.

EMINENCE, a title conferred upon cardinals by pope Urban VIII. Jan. 10, 1631, as more honourable than "Excellency." Previously cardinals had the title of *Illustrissimi*. *Ashe*. The grand-master of Malta also obtained this title. *Pardon*.

EMIR, a title of the caliphs among the Turks and Persians, first awarded to the descendants of Mahomet's daughter Fatima, about 650. *Ricaut*. To such only was originally given the privilege of wearing the green turban.

EMLY, an Irish see, said to have been founded by St. Patrick. Emly was called Imelacabhair : St. Ailbe was the first bishop in 448. It is now an inconsiderable village. In 1568, the see was united to Cashel. See *Cashel*.

EMPALEMENT. This mode of executing criminals, mentioned by Juvenal, and often inflicted in Rome, is still used in Turkey and Arabia. In England the dead bodies of murderers were sometimes staked in this manner, previously to being buried.

EMPEROR, from *Imperator* (ruler), a title conferred on victorious Roman generals, and taken by Julius Cæsar as perpetual dictator, B.C. 46.

EMPIRICS, a sect of physicians, formed in the 3rd century before Christ, who contended that all reasoning respecting the animal economy was useless, and that experience and observation alone were the foundation of medicine. The sect adopted the principles of Aeron of Agrigentum, who flourished about 430 B.C.

ENAMELLING was practised by the Egyptians, Chinese, and other nations, and was known in England in the time of the Saxons. At Oxford is an enamelled jewel, which belonged to Alfred, and which, as appears by the inscription, was made by his order, in his reign, about 887. Limoges enamelled ware was popular in the 16th century. On June 19, 1862, Madame Rachel sued captain Carnegie for 92*sl.* for *enamelling his wife's face* : and was non-suited. See *Mosaic*.

ENCÆNIA, Greek festivals kept on days on which cities were built and temples consecrated; and in later times, as at Oxford, at the celebrations of founders and benefactors. *Oldisworth*. They were the origin of church-wakes in England, about 600. They were also feasts celebrated by the Jews on the 25th of the ninth month, in commemoration of the Maccabees cleansing the temple which had been polluted by Antiochus Epiphanes, 131 B.C.

ENCAUSTIC PAINTING, the art of enamelling or painting by fire. *Bailey*. Painting with burnt wax is said to have been known to Praxiteles about 360 B.C. This art, after having been lost, was revived by M. Bachelier, 1749, by count Caylus, 1765, and by Miss Greenland, 1785 and 1792.

ENCRATITES, followers of Tatian, about 170, denounced marriage, and abstained from flesh, and from wine even at the Lord's supper.

ENCUMBERED ESTATES ACT, passed in July 1849, to enable owners of land, or of a lease of land, subject to encumbrance, to apply to commissioners appointed under it to direct a sale of such property. These commissioners held their first court in Dublin, Oct. 24, 1849, and their last July 28, 1858. A new court was established under the Landed Estates act (1858). The number of estates sold up to 1858 was 2380, producing twenty-two millions of pounds. In 1854 a similar act was passed for the West Indies.

ENCYCLOPÆDIA, or **CYCLOPÆDIA**, a general dictionary of art, science, and literature. This name has been given to a work by Abulpharagius in the 13th century. Alsted's *Encyclopædia* appeared in 1620, *Hofmann's Lexicon Universale* in 1677, and Bayle's *Dictionnaire* in 1696. The earliest English encyclopedia is the *Lexicon Technicum* of John Harris, 1704; supplements, 1710, 1741.

ENDOSMOSIS. M. Dutrochet, about 1826, found that if two fluids, gases or vapours, of unequal density, are separated by an animal or vegetable membrane, the denser will attract the less dense through the medium. This property he called *endosmose*, when the attraction is from the outside to the inside, and *exosmose*, when it operates from the inside to the outside. By this discovery many natural phenomena are more clearly understood. *Brandé*.

ENGEN, Baden. Here Moreau defeated the Austrians, May 3, 1800.

ENGHIEN, or **STEENKIRK** (S.W. Belgium). Here the British under William III. were defeated by the French under marshal Luxemburg, July 24, 1692.—A victory obtained here by the great Condé first gave the ducal title to a prince of the house of Bourbon Condé. Their descendant, the duc d'Enghien, was seized in Baden by order of Bonaparte, conveyed to Vincennes, and, after a hasty trial, shot by torch-light, immediately after condemnation, March 20, 1804. The body was exhumed, March 20, 1816.

ENGINEERS. This name is of modern date, as engineers were formerly called Trench-masters. Sir William Pelham officiated as Trench-master in 1622. The chief engineer was called camp-master general in 1634. Captain Thomas Rudd had the rank of chief engineer to the king about 1650. The corps of engineers was formerly a civil corps, but was made a military force, and directed to rank with the artillery, April 25, 1787. It has a colonel-in-chief, 16 colonels-commandant, and 16 colonels. *Civil Engineering* began to be eminent in the middle of the last century, when Smeaton began the Eddystone lighthouse, and Brindley the Bridgewater canal. Since then the Rennies, Telford, the Stephensons and Brunels, Locke, and others have constructed the breakwaters, docks, bridges, railways, tunnels, &c., which are the marvel of our age.

ENGLAND, so named by order of Egbert, first king of England, in a general council held at Winchester, 829. This appellation had been used as far back as 688, but had never been, until then, ratified by any assembly of the nation. It came from *Angles*, a tribe of Saxons, and *land*, the Saxon for country. See *Anglo-Saxons*. England and Wales were united 1283; Scotland was united under the same sovereign in 1603, and the same legislation in 1707, when the three were styled Great Britain. Ireland was incorporated with them, by the act of legislative union, Jan. 1, 1801, and the whole was called the United Kingdom of Great Britain and Ireland. For previous history see *Britain*, and for further details, population, revenue, &c., see separate articles. *Histories of England*, by Rapin (in English), 1725-31; Thomas Carte, 1747-55; David Hume, 1755-62; Tobias Smollett, 1757-65; John Lingard, 1819-30; Charles Knight, 1856-62.

The REGNAL-DATES are those given by sir H. Nicolas. The early Norman and Plantagenet kings reckoned their reigns from the day of their coronation; the later Plantagenets from the day after the death of their predecessor. With Edward VI. began the present custom of beginning the reign on the death of the preceding sovereign.

ROYAL ARMS OF ENGLAND.

William I. William II. and Henry I.—two lions or leopards passant: Stephen—sagittarius, the archer of the signs of the Zodiac (*Traditional*). Henry II. to Edward II. Three lions passant. Edward III. and his successors quartered the preceding with fleurs de lys, the arms of France. Henry V. used only 3 fleurs de lys. Mary I. quartered the preceding with the arms of her husband Philip II. of Spain.

UNITED KINGDOM.

James I. and his successors combined the arms of

England and France (1st and 4th quarter); 2nd, the lion rampant of Scotland; 4th, the harp of Ireland.

George I. George II. and George III. introduced the arms of Brunswick.

In 1801 the arms of France were omitted. In 1816 the arms were modified through Hanover being made a kingdom.

Victoria. In 1837 the arms of Hanover were omitted and the arms are now: 1st and 4th quarters, 3 lions passant for England; 2nd, lion rampant for Scotland; 3rd, harp for Ireland.

ENGRAVING on signets is mentioned *Exod.* xxviii. 11., B.C. 1491. Engraving on plates and wood began about the middle of the 15th century. Engraving on glass was perfected by Bourdier, of Paris, 1799. The copyright to engravings has been protected by several statutes; among the principal are the acts 16 & 18 Geo. III. 1775 and 1777; and the acts 7 & 8 Vict. Aug. 6, 1844, and 15 Vict. May 28, 1852. A process of enlarging and reducing engravings by means of sheets of vulcanised india-rubber, was shown by the electro-printing block company in 1860. See *Lithography* and *Photo-Galvanography*.*

ENGRAVING ON COPPER. Prints from engraved copper-plates made their appearance about 1450, and were first produced in Germany. Masso, surnamed Finiguerra, is considered to have been the first Italian engraver, about 1440. The earliest date known of a copper-plate engraving is 1461. Rolling-presses for working the plates were invented in 1545. Of the art of *etching* on copper by means of *aqua-fortis*, Francis Mazzuoli, or Parmegiano, is the reputed inventor, about 1532. *De Piles*. Etching was practised by Albert Durer. The etching club was established in 1838.

ENGRAVING ON WOOD, long known in China, began in Europe with the *brief mahlers*, or manufacturers of playing-cards, about 1400. (See *Printing*.) The art is referred by some to a Florentine, and by others to Reuss, a German; it was greatly improved by Durer (1471-1528) and Lucas Van Leyden (1497). It was much improved in England by Bewick and his brother, and pupils, Nesbitt, Anderson, &c., 1789, *et seq.* The earliest wood engraving

which has reached our times is one representing St. Christopher carrying the infant Jesus over the sea; it bears date 1423.

ENGRAVING ON SOFT STEEL, to be hardened afterwards, was introduced into England by Messrs. Perkins and Heath, of Philadelphia, 1819.

MEZZOTINTO is said to have been discovered by col. de Siegen, who engraved a portrait of princess Amelia of Hesse in mezzotinto in 1643; it was improved by prince Rupert in 1648; sir Christopher Wren further improved it in 1662.

Aquatinta, by which a soft and beautiful effect is produced, was invented by the celebrated French artist, St. Non, about 1662; he communicated his invention to Le Prince. Barabbe of Paris was distinguished for his improvements in this kind of engraving, 1763. *Chiar'-oscuro* engraving originated with the Germans, and was first practised by Mair, one of whose prints bears date 1491. (See *Zinc*, &c.)

ENLISTMENT. No persons enlisting as soldiers or sailors are to be sworn in before a magistrate in less than twenty-four hours after, and then they are at liberty to withdraw upon their returning the enlistment or bounty money, and 21s. costs. Enlistment is now entirely voluntary. In 1847 the term of enlistment was limited to ten years for the infantry, and twelve years for the cavalry, artillery, and royal marines.

ENNISKILLEN (N.W. Ireland). This town made an obstinate defence against the army of Elizabeth, 1595, and against James II., 1689. 1500 Enniskilleners met general M'Carthy with 6000 men (of whom 3000 were slain, and nearly all the rest made prisoners), they losing but twenty men, July 30, 1689. The dragoon regiment, the "Inniskillingers," is recruited here.

ENOCH, Book of, an apocryphal work, quoted by the fathers, disappeared about the 8th century. A MS. Ethiopic version was found in Abyssinia by Bruce, and brought to England in 1773. Of this archbishop Lawrence published an English translation in 1821, and the Ethiopic text in 1838.

ENTAIL of estates began with the statute of Westminster, 1285. Subsequent legislation broke the entail in cases of treason (1534), when the estate is to revert to the crown, and of bankruptcy (1833 and 1849), when it is to be sold.

ENTOMOLOGY, the science of insects, mainly based upon the arrangement of Linnæus, 1739. Ray's "Method of Insects" was published in 1705. The Entomological Society of London was instituted in 1833.

* In "Lyra Germanica," published in 1861, are illustrations engraved upon blocks photographed from negatives taken by John Leighton, F.S.A.

ENVELOPES for letters came into general use shortly after the establishment of the penny postal system in 1840. Machinery for their manufacture was patented by Mr. George Wilson in 1844; and by Messrs. E. Hill and Warren de la Rue in 1845.

ENVOYS AT COURTS, in dignity below ambassadors, enjoy the protection, but not the ceremonies of ambassadors. Envoys Extraordinary are of modern date. *Wicquefort*. The court of France denied to them the ceremony of being conducted to court in the royal carriages, 1639.

EPACT (Greek, *added*) is the excess of the solar month above the lunar synodical month, 1 day, 11 hours, 15 minutes, 57 seconds, the lunar month being only 29 days, 12 hours, 44 minutes, 3 seconds; and the excess of the solar year above the lunar synodical year (nearly 11 days), the lunar year being 354 days. The number of the Gregorian epact for 1865, is 3; for 1866, 14; for 1867, 25.

EPHESUS (in Asia Minor), a city founded by the Ionians about 1043 B.C. It was subdued by Cyrus in 544 B.C.; it revolted from the Persians 501 B.C. and was destroyed by an earthquake in A.D. 17. Paul preached here A.D. 55, 56 (*Acts* xviii. xix.). His epistle to the Ephesians is dated A.D. 64. See *Diana, Temple of*, and *Seven Churches*. The third general council was held here in 431.

EPHORI, powerful magistrates of Sparta, five in number, said to have been first created by Theopompus to control the royal power, about 757 B.C.

EPICUREAN PHILOSOPHY. Epicurus of Gargettus, near Athens, about 300 B.C., taught that the greatest good consists in peace of mind springing from virtue, as tending to prevent disquiet; but the name epicurean is given to those who derive happiness from sensual pleasure.

EPIGRAMS derive their origin from the inscriptions placed by the ancients on their tombs. Marcus Valerius Martialis, the celebrated Latin epigrammatist, who flourished about A.D. 83, is allowed to have excelled all others ancient or modern. The following Latin epigram on the miracle of Our Saviour, in turning water into wine at Cana (*John* iii.) is given as an example:—

"Vidit et erubuit lympa pudica Deum." "The modest water saw its God, and blushed." *Crashaw*, d. 1650.

EPIPHANY (appearance), a feast (Jan. 6), vulgarly called Twelfth Day, celebrates the manifestation of the Saviour, by the appearance of the star which conducted the Magi to the place where he was to be found; instituted 813. *Wheatly*.

EPIRUS (Northern Greece). Its early history is very obscure.

EPISCOPACY. See *Bishops*.

EPITAPHS were inscribed on tombs by the Jews, Greeks, and Romans. Mr. T. J. Pettigrew published a collection entitled "Chronicles of the Tombs," in 1857.

EPITHALAMIUM, a nuptial song at marriage. Tisias, the lyric poet, is said to have been the first writer of one. He received the name of Stesichorus, from the alterations made by him in music and dancing. 536 B.C. *Bossuet*.

EPOCHA, a point of time made remarkable by some event, from which subsequent years are reckoned by historians and chronologers. See *Eras*.

EPSOM (Surrey). The mineral springs were discovered in 1618. The races began about 1711, and have been held annually since 1730.

EQUATOR (or **ECUADOR**), a South American republic, founded in 1831, when the Columbian republic was divided into three; the other two being Venezuela and New Granada. The population of Equator is about 1,040,400, of which 76,000 are in Quito, the capital. General Franco, president, Aug. 21, 1859; defeated in battle by general Flores, Aug. 1860. President (elected in 1861) G. G. Moreno.

EQUINOX. When the sun in his progress passes through the equator in one of the equinoctial points, the day and night are equal all over the globe. This occurs twice in the year; about March 21, the *vernal* equinox, and Sept. 22, the *autumnal* equinox. The equinoctial points move backwards about 50 seconds yearly, requiring 25,000 years to accomplish a complete revolution. This is called the *precession* of the equinoxes, which is said to have been observed by the ancient astronomers.

EQUITY, COURTS OF, are those of the lord chancellor, the vice-chancellors, and the master of the rolls, their office being to correct the operations of the literal text of the law, and supply its defects by reasonable construction not admissible in a court of law. The supreme court of session in Scotland combines the functions of law and equity. In 1865 equity powers were conferred on the county courts for cases respecting sums under 500*l*.

ERAS. Notices of the principal eras will be found in their alphabetical order; a few only need be mentioned here.

Era of <i>Nabonassar</i> , after which the astronomical observations made at Babylon were reckoned, began Feb. 26, B.C.	747	The Romans reckoned from the building of their city, 753 B.C.; and afterwards from the 16th year of the emperor Augustus (see <i>Cæsars</i>), which reckoning was long used by the Spaniards.	
Era of the <i>Seleucideæ</i> (used by the Maccabees), commenced	312	The Mahometans began their era from the <i>Hegira</i> , or flight of their prophet from Mecca,	A.D. 622
The <i>Olympiads</i> belong to the Grecians, and date from the year 776 B.C.; they subsequently reckoned by indictions, the first beginning A.D. 313; these, among chronologers, are still used. (See <i>Indictions</i> .)		See <i>Calendar, Creation, Anno Domini</i> .	

ERASTIANISM, the opinions of Thomas Lieber (latinised *Erastus*), a German physician (1523-84), who taught that the church had no right to exclude any person from church ordinances, or to inflict excommunication, &c. Persons who acknowledge the jurisdiction of the civil power in spiritual matters and the law of patronage, are now termed *Erastians*.

ERASURES. By order of sir John Romilly, master of the rolls, in 1855, no document corrected by erasure with the knife is to be henceforth received in the court of chancery. The errors must be corrected with the pen.

ERFURT (Central Germany), was founded in 476; and its university established about 1390. Erfurt was ceded to Prussia in 1802. It capitulated to Murat, when 14,000 Prussian troops surrendered, Oct. 16, 1806. In this city Napoleon and Alexander met, and offered peace to England, Sept. 27, 1808. The French retreated to Erfurt from Leipsic, Oct. 18, 1813. A German parliament met here in March and April, 1850.

ERICSSON'S CALORIC ENGINE. See *Heat*, note.

ESCHEATS. Land or other property that falls to a lord within his manor by forfeiture or death. The escheator observes the rights of the king in the county whereof he is escheator. *Correl*. In London a court of escheats was held before the lord mayor to recover the property of a bastard who died intestate, for the king; such a court had not been held in the city for 150 years before—July 16, 1771. *Phillips*.

ESCURIAL (or *Escorial*, 25 miles N.W. of Madrid), the magnificent palace of the sovereigns of Spain, was commenced by Philip II. in 1563 and completed in 1586, at a cost of 6,000,000 of ducats. It is built in the form of a gridiron in honour of St. Lawrence, on whose day (Aug. 10, 1557) the Spaniards gained the victory of St. Quentin. According to Francisco de los Santos, the total length of all its rooms and apartments, is above 120 English miles. Alvarez de Colmenar asserts that there are 14,000 doors, and 11,000 windows.

ESPARTO, a Spanish grass, a species of *stipa*, now largely employed in paper-making, was first imported into this country, as we are informed, in 1857.

ESPIERRES (or Point-à-Chin, Flanders). The French, under Pichegru, here attacked the allied English and Austrian army (100,000 men) commanded by the duke of York, and were repulsed after a long and desperate engagement, losing many killed and wounded, and prisoners, and several pieces of cannon, May 22, 1794.

ESPRIT, SAINT (or Holy Ghost), the title of an order of knighthood, founded by Henry III. of France in 1578; and abolished in 1791.

ESQUIRES, among the Greeks and Romans, were armour-bearers to, or attendants on, a knight. *Blount*. In England, the king created esquires by putting about their necks the collar of SS, and bestowing upon them a pair of silver spurs. The distinction of esquire was first given to persons of fortune, not attendant upon knights, 1345. *Stow*.

"ESSAYS AND REVIEWS," by six clergymen and one layman of the church of England (the Revs. Drs. Fred. Temple and Rowland Williams, professor Baden Powell, H. B. Wilson, Mark Pattison, and professor B. Jowett, and Mr. C. W. Goodwin) were published in an 8vo vol. in March, 1860.*

ESSENES, an ascetic Jewish sect at the time of Christ.

ESSEX, KINGDOM OF. See *Britain*. ESSLING, BATTLE OF. See *Asperne*.

ESTE, HOUSE OF. Boniface, count of Lucca and duke of Tuscany, about 811, is said to have descended from Odoacer, king of Italy. From Boniface sprang Albert Azzo II., marquess of Italy and lord of Este, born about 996, who married first Cunegonda of the house of Guelf, by whom he had Guelf, duke of Bavaria, the ancestor of the house of Brunswick (see *Bavaria* and *Brunswick*); and secondly Gersonda, by whom he had Fulk, the ancestor of the Estes, dukes of Ferrara and Modena.

ETCHING. See *Engraving*.

ETHER was known to the earliest chemists. Nitric ether was first discovered by Kunkel, in 1681; and muriatic ether, from the chloride of tin, by Courtanvaux, in 1759. Acetic ether was discovered by count Lauraguais, same year; and hydriotic ether was first prepared by Gay-Lussac. The phosphoric ether was obtained by M. Boullay. The discovery that by *inhaling ether* the patient is rendered unconscious of pain, is due to Dr. Charles T. Jackson, of Boston, U. S. Mr. Thomas Morton, of the same place, first introduced it into surgical practice, under Dr. Jackson's directions (1846). See *Chloroform* and *Amylene*. The term "ether" was applied to the transparent celestial space by the German astronomer Encke, about 1829, when studying the elements of Pons' comet, discovered in 1818.

ETHICS (Greek term for *Morals*). The works of Plato, Aristotle, and Confucius contain ancient systems. The New Testament is the code of Christian ethics. Paley's *Moral Philosophy* appeared in 1785, and Whewell's *Elements of Morality* in 1845.

ETHIOPIA. The name was applied anciently rather vaguely to countries the inhabitants of which had *sun-burnt* complexions, in Asia and Africa; but it is now considered to apply properly to the modern Nubia, Sennaar, and northern Abyssinia. Many pyramids exist at Napata, the capital of Meroë, the civilised part of ancient Ethiopia.

ETHNOLOGY, a branch of anthropology, is defined as the science "which determines the distinctive characters of the persistent modifications of mankind, their distribution, and the causes of the modifications and distribution." The study of the relations of the different divisions of mankind to each other is of recent origin. Balbi's *Ethnographic Atlas* was

* The book did not excite much attention at first, but having been severely censured for heterodox views by nearly all the bishops and many of the clergy, it created much excitement in 1861, and was condemned by convocation June 24, 1864. The ecclesiastical court sentenced the Revs. R. Williams and H. B. Wilson to suspension for one year, and costs, Dec. 15, 1862; but on appeal the sentence was reversed by the judicial committee of the privy council, Feb. 8, 1864. The most remarkable amongst the works put forth in opposition (in 1862) are the "Aids to Faith," edited by the bishop of Gloucester (W. Thomson, now abp. of York), and "Replies to Essays and Reviews," edited by the bishop of Oxford (S. Wilberforce).

published in 1826, and Dr. Prichard's great work, *Researches on the Physical History of Mankind*, 1841-7. The Ethnological Society, established in 1843, publishes its transactions. Dr. R. G. Latham's works, on the Ethnology of the British Empire, appeared in 1851-2.

ETHYL, a colourless gas, with a slightly ethereal odour, a compound of carbon and hydrogen, first obtained in the free state by professor Edw. Frankland in 1849. It is one of the compound radicles. Many of its compounds take fire on exposure to the air.

ETNA, MOUNT (Sicily). Here were the fabled forges of the Cyclops: and it is called by Pindar the pillar of heaven. Eruptions are mentioned by Diodorus Siculus as happening 1693 B.C., and Thucydides speaks of three eruptions as occurring 734, 477, and 425 B.C. There were eruptions, 125, 121, and 43 B.C. *Livy*.

Eruptions, 1329, 1408, 1444, 1536, 1537, 1564, and in 1669, when tens of thousands of persons perished in the streams of lava which rolled over the whole country for forty days.

Eruptions in 1766, 1787, 1809, 1811, and in May, 1830, when several villages were destroyed, and showers of lava reached near to Rome.

The town of Bronte was destroyed. Nov. 18, 1832
Violent eruption occurred in Aug. & Sept. 1852
The last eruption began on Feb. 7, and ceased in July, 1865

ETON COLLEGE (Buckinghamshire), founded by Henry VI. in 1440, and designed as a nursery to King's College, Cambridge. John Stanberry, confessor to Henry VI. (bishop of Bangor, in 1448), was the first provost. Besides about three hundred noblemen's and gentlemen's sons, there were seventy king's scholars on the foundation, who, when properly qualified, are elected, on the first Tuesday in August, to King's college, Cambridge, and are removed there when there are vacancies, according to seniority. In Dec. 1860 there were in all 820 scholars. See *Cambridge*. The establishment of the *Montem* is nearly coeval with the college. It consisted in the procession of the scholars, arrayed in fancy dresses, to Salt-hill once in three years; the donations collected on the road (sometimes as much as 800*l*.) were given to the senior or best scholar, their captain, for his support while studying at Cambridge. The *montem* was discontinued in 1847. The regatta has taken its place.

ETRURIA (or TUSCIA, hence the modern name Tuscany), an ancient province of Italy, whence the Romans, in a great measure, derived their laws, customs, and superstitions. Herodotus asserts that the country was conquered by a colony of Lydians. The subjugation of this country forms an important part of early Roman history. It was most powerful under Porsena of Clusium, who attempted to reinstate the Tarquins, 506 B.C. Veii was taken by Camillus, 396 B.C. A truce between the Romans and Etrurians for forty years was concluded 351 B.C. The latter and their allies were defeated at the Vadimonian lake 283 B.C., and totally lost their independence about 265 B.C. The vases and other works of the Etruscans still remaining, show the degree of civilisation to which they had attained. See *Tuscany*.—*Etruria*, the site of Mr. Wedgwood's porcelain works, &c., was founded in 1771.

EUBŒA, the largest island in the *Ægean* sea. Two of its cities, Chalcis and Eretria, were very important, till the former was subdued by Athens, 506 B.C. and the latter by the Persians, 490. After the Persian war, Eubœa became wholly subject to Athens, being its most valuable foreign possession. It revolted in 445, but was soon subdued by Pericles. After the battle of Charonea, 338, it became subject to Macedon. It was made independent by the Romans in 194; but was afterwards incorporated in the province of Achaia. It now forms part of the kingdom of Greece.

EUCLID, ELEMENTS OF. Euclid was a native of Alexandria, and flourished there about 300 B.C. The *Elements* are not wholly his; for many of the invaluable truths and demonstrations they contain were derived from Thales, Pythagoras, Endoxus, and others. Euclid was the first to reduce them to regular order, and probably interwove many theorems of his own. The *Elements* were first printed at Basil by Simon Grynaeus, in 1533.

EUDIOMETER, an apparatus to ascertain the purity of atmospheric air, or the quantity of oxygen gas or vital air contained in it, was invented by Dr. Priestley, in 1772.

EUNUCHS are first mentioned among the Egyptian and Assyrian nations. The first princess who employed them was Semiramis, queen of Assyria, about 2007 B.C. Eunuchs frequently attained to political power in the late Eastern Empire.

EUPATORIA (KOSLEFF), a sea-port on the west coast of the Crimea. After the allied French, English, and Turkish armies landed in the Crimea, Sept. 14, 1854, a detachment under captain Brock occupied this place, which was afterwards reinforced by the Turks. It

was attacked Feb. 17, 1855, by 40,000 Russians under Liprandi. The latter were repulsed with the loss of 500 men by the Turks, whose loss was only 50, among which, however, was Selim Pasha, the commander of the Egyptian contingent.

EUPHUISM, an affected style of language, prevalent in the time of Elizabeth, arose from "Euphues; the Anatomy of Wit," by John Lyly, published in 1581.

EUROPE, the smallest of the three divisions of the old continent; area, nearly 3,800,000 square miles; population, 270,000,000 (1861). For the history, see *Greece, Rome*, and the modern kingdoms.

EURYMEDON, a river in Pamphylia, near which Cimon, son of Miltiades, destroyed the fleet of the Persians at Cyprus, and defeated their land forces, 466 B.C.

EUSTACE, ST. (Lower Canada). The rebels were defeated here, Dec. 19, 1837, and compelled to surrender their arms. Their chiefs fled.

EUSTATIA, ST., a West India island, settled by the Dutch, 1632; taken by the French in 1689; by the English in 1690; again by the British forces under Rodney and Vaughan, Feb. 3, 1781. It was recovered by the French under the marquis de Bouillé, Nov. 26, same year; captured by the British, 1801, 1810; restored to the Dutch, 1814.

EUTYCHIANS, so called from Eutyches, an abbot of Constantinople, who asserted in 446 that there was but one nature in Christ, the human having been absorbed in the divine. This doctrine was condemned by councils—at Constantinople in 448, and at Chalcedon in 451. It has been also called *Monophysite* (of one nature), and *Jacobite*, from Jacobus Baradaeus, its zealous defender in the 6th century. It is the form of Christianity now existing among the Copts and Armenians.

EUXINE. See *Black Sea*.

EVANGELICAL, a term applied to a portion of the clergy of the Church of England (also called the low church), who profess to preach the gospel more purely than their brethren, termed the high church party. See *Church of England*.

EVANGELICAL ALLIANCE, founded by sir Culling Eardley Smith and others at Liverpool in 1845, with the view of promoting unity among all denominations of protestant Christians against Romanism and infidelity. It holds annual meetings. It met in Sept. 1857, at Berlin, where it was well received by the king. The 19th meeting was held at Hull, Oct. 3, 1865.

EVANGELISTS, preachers of the "gospel," or good news. See *Gospels*.

EVENING SCHOOLS for adults of the lower classes were strongly recommended by bishop Hinds in 1839, and by the committee of the Privy Council on Education in 1861. One was set up at Bala in Wales by the Rev. T. Charles in 1811.

EVESHAM (Worcestershire), where prince Edward, afterwards Edward I., defeated the barons headed by Simon de Montfort, earl of Leicester, Aug. 4, 1265, when the earl, his son Henry, and most of his adherents were slain. Henry III. at one period of the battle was on the point of being cut down by a soldier who did not know his rank, but was saved by his timely exclamation, "Do not kill me, soldier; I am Henry of Winchester, thy king!" This victory broke up the combination of the barons.

EVIL MAY-DAY (May 1, 1517), thus called on account of the violence of the apprentices and populace, directed against foreigners, particularly the French. "The rioters were headed by one Lincoln, who, with 15 others, was hanged; and 400 more in their shirts, and bound with ropes, and halters about their necks, were carried to Westminster, but they crying 'mercy, mercy!' were all pardoned by the king (Henry VIII.), which clemency gained him much love." *Delaune*.

EXAMINATIONS of persons preliminary to their employment in the civil service has been enforced since 1855. Mr. Gladstone in 1862 said that the present might be termed the "age of examinations."

EXARCHS, appointed by the Byzantine emperors of the East, to govern central Italy after its conquest by Belisarius and Narses, 548.—They ruled from 568 to 752, when Eutychus, the last, was overcome by Astolpus the Lombard.

EXCHANGE. One called *Collegium Mercatorum*, existed at Rome, 493 B.C. The Exchange at Amsterdam was reckoned the finest structure of the kind in the world. Many edifices of this name in the United Kingdom are magnificent. See *Royal Exchange* and *Bills of Exchange*.

EXCHEQUER, an institution of great antiquity, consisting of officers whose functions are financial and judicial: the chancellor of the exchequer, the financial officer, formerly sat in the court of exchequer above the barons. The first chancellor was Eustace de Fauconbridge, bishop of London, in the reign of Henry III. about 1221. Sir Robert Walpole was the last chancellor of the exchequer who acted judicially (in 1735). The exchequer stopped payment from Jan. to May 24th, Charles II. 1673. *Stow*. The English and Irish exchequers were consolidated in 1816. See *Chancellors of the Exchequers*, and *Tally Office*.

EXCHEQUER BILLS. The government securities, so called, said to have been invented by Montague, afterwards earl of Halifax, were first issued in 1697, and first circulated by the bank in 1796. These bills, of which more than twenty millions sterling are often in circulation, are in effect accommodation notes of government, that are issued in anticipation of taxes, at daily interest; and, being received for taxes, and paid by the bank in lieu of taxes, in its dealings with the exchequer, they usually bear a premium.* The highest amount in circulation was 56,974,780*l.* in 1817; the lowest, 16,008,700*l.* in 1854.

EXCHEQUER BONDS, a species of public securities, introduced by Mr. W. E. Gladstone, in 1853, have not been well received.

TELLERS OF THE EXCHEQUER. Besides chamberlains of the exchequer, clerks of the pells, and auditor of the exchequer (offices which have all been discontinued since their last avoidance in Oct. 1826, or by surrender or abolition, in Oct. 1834), there

were the four lucrative offices of *tellers of the exchequer*, also abolished, Oct. 10, 1834.†

COMPTROLLER-GENERAL OF THE EXCHEQUER. This office was created on the abolition of the offices of the auditor and the four tellers of the exchequer, and the clerk of the pells, mentioned in the preceding paragraph. The first comptroller-general was Sir John Newport, appointed Oct. 11, 1834.—34,438*l.* *per annum* have been saved to the state by the retrenchments in this department of the government.

COURT OF EXCHEQUER CHAMBER. Erected by Edward III. in 1357. It was remodelled by Elizabeth, in 1584, and then made to comprise the judges of all the courts. This court is for error from the judgments of the courts of queen's bench, common pleas, and exchequer of pleas in actions commenced therein. Re-modelled by act 11 Geo. IV. & 1 Will. IV. c. 70 (July 23, 1830).

The exchequer office, Westminster, was instituted by Henry IV. in 1399.

EXCHEQUER, COURT OF. Instituted by William I. on the model of the Transmarine Exchequer of Normandy, in 1079; according to some authorities, by Henry I. It included the common pleas until they were separated, 16 John, 1215. *Coke's Reports*. The exchequer is so named from a chequered cloth which anciently covered the table where the judges and chief officers sat.‡ Here are tried all causes relating to the king's revenue; such as are concerning accounts, disbursements, customs, and fines imposed, as well as all matters at common law between subject and subject. The judges are styled barons. *Beaton*. There are a chief and four puisne barons: the fifth judge having been added July 23, 1830. The office of Cursitor Baron was abolished in 1856, by 18 & 19 Vict. c. 86.

CHIEF BARONS OF THE EXCHEQUER.

1689. Sir Robert Atkins.	April 10.
1695. Sir Edward Ward.	June 10.
1714. Sir Samuel Dodd.	Nov. 22.
1716. Sir Thomas Bury.	June 11.

1723. Sir Robert Eyre.	Dec. 5.
1725. Sir Geoffrey Gilbert.	June 1.
1726. Sir Thomas Pengelly.	Oct. 29.

* Robert Aslett, a cashier of the bank of England, was tried in 1803 at the Old Bailey for embezzling exchequer bills, and found *not guilty*, on account of the invalidity of the bills, though the actual loss to the bank amounted to 342,697*l.* Mr. Beaumont Smith was tried for forging exchequer bills to the amount of 350,000*l.*; pleaded guilty, and was sentenced to transportation, Dec. 4, 1841.

† John Jeffreys Pratt, earl and marquess Camden, was appointed a teller of the exchequer, when a commoner, in 1780, and held the appointment until his death, in 1840. During nearly half of this long term he relinquished the income arising from the office, amounting in the whole to upwards of a quarter of a million sterling, and placed it at the service of the state, as it annually accrued.

‡ In process of time the court of exchequer became gradually enlarged in its jurisdiction, until at length it was not merely a revenue court and one at common law between subject and subject, but one in which suits in equity were also instituted. In fact, until the act 5 Vict. c. 5 (1841), the court of exchequer possessed a triple jurisdiction; but by this statute its equity business was transferred to the court of chancery.

EXCISE. The system was established in England by the Long Parliament in 1643, duties being levied on wines, beer, &c., and tobacco, to support the parliamentary forces against Charles I. It was continued under Charles II. The present system was settled about 1733. The duty was arbitrarily levied upon liquors and provisions. The old excise office was built on the site of Gresham college in 1774; the present is at Somerset-house. The officers of excise and customs were deprived of their votes for returning members to parliament in 1782. In 1849 the board of excise was incorporated with that of stamps and taxes, under the name of "the Inland Revenue office." Notwithstanding the abolition of the excise duty upon numerous articles, and the reduction of duty upon various others, of late years, the total excise revenue, so far from having decreased, has progressively advanced (1847 and 1861 excepted) in its aggregate annual amount. Additional excise duties were charged by 17 & 18 Vic. c. 27, July 3, 1854. The excise duties were further modified in 1860. See *Revenue*.

EXCLUSION BILL (to exclude the duke of York, afterwards James II., from the throne), was passed by the commons, but rejected by the lords in 1679. The revival of the question led to the dissolution of parliament in 1681.

EXCOMMUNICATION, or separation from Christian communion, founded on *Matt.* xviii. 17; 1 *Cor.* v., &c., was originally instituted to preserve the purity of the church. The Roman church excommunicated by *Bell, Book, and Candle* (*which see*). See *Interdict*.

Gregory VII. excommunicated the emperor Henry IV., and absolved his subjects from their allegiance 1077
 Innocent III. excommunicated John of England, placing the country under an interdict 1208-14
 Gregory IX. excommunicated the emperor Frederic II. four times between 1228-45
 Louis XII. of France was excommunicated by Julius II. 1510; Francis I. by Leo X. 1521;

Henry VIII. of England by Clement VII. in 1527, and by Paul III. in 1535; and Elizabeth by Paul IV. 1558
 The emperor of France, the king of Sardinia, and others, were virtually excommunicated (but not by name) on account of the annexation of the Romagna by Sardinia,

EXECUTIONS. See *Crime*. In the reign of Henry VIII. (38 years) it is shown that no less a number than 72,000 criminals were executed. *Stow*. In the ten years between 1820 and 1830, there were executed in England alone 797 criminals; but as our laws became less severe, the number of executions decreased. In the three years ending 1820, the executions in England and Wales amounted to 312; in the three years ending 1830, they were 178; in the three years ending 1840, they were 62. The place of execution in London

(formerly generally at Tyburn) has been in front of Newgate since 1783. The dissection of the bodies of executed persons was abolished in 1832.

EXETER (Devonshire), said to have been early honoured with the name of *Augusta* from having been occupied by the second Augustan legion commanded by Vespasian: its present name is derived from *Evecestre*, "the castellated city of the Exe." It was for a considerable time the capital of the West Saxon kingdom. The BISHOPRIC anciently constituted two sees, Devonshire (founded about 909) and Cornwall. The church of the former was at Crediton, of the latter at Bodmin. In 1046 the sees were united. St. Petroc was the first bishop of Cornwall, before 900; Cudolphus, the first bishop of Devonshire, 905; and Leofric, the first bishop of Exeter, in 1049. The cathedral originally belonged to a monastery founded by Athelstan: Edward the Confessor removed the monks to his new abbey of Westminster, and gave their church for a cathedral to the united see 1049; valued in the king's books at 500*l. per annum*. Present stated income 2700*l.*

EXETER CHANGE (London), was built by Walter Stapleton, bishop of Exeter and lord treasurer in 1319, beheaded by order of the queen-regent, Isabella, in 1326. It was entirely demolished at the period of the Strand improvements, in 1829. The new Exeter Change, built by the marquiss of Exeter near its site, and running from Wellington-street to Catherine-street, with a passage, on each side of which are shops for fancy articles, was opened in 1845. It was pulled down in 1863, and the ground now forms part of the site of the Strand Music-hall.

EXETER COLLEGE (Oxford) was founded by Walter Stapleton, bishop of Exeter, in 1314. The college buildings consist of a handsome quadrangle in the later Gothic style.

EXETER HALL (Strand, London), erected in 1830-1 for the meetings of religious, scientific, and other institutions, concerts, oratorios, and musical societies, a large and magnificent apartment with a splendid orchestra and organ, and having rooms attached for committees, &c. See under *Music*. Religious services were held here in 1856 by the Rev. C. Spurgeon, and in 1857 by ministers of the Church of England, on Sundays.

EXHIBITION of 1851. The original idea of a *National Exhibition** is attributed to Mr. F. Whishaw, secretary of the Society of Arts in 1844. It was not taken up till 1849, when prince Albert, president of the society, said, "Now is the time to prepare for a Great Exhibition, an exhibition worthy of the greatness of this country; not merely national in its scope and benefits, but comprehensive of the whole world; and I offer myself to the public as their leader, if they are willing to assist in the undertaking." See *Crystal Palace*.

Royal commission appointed . . . Jan. 3, 1850
A subscription list opened, headed by the queen for 100*l*.

Civic banquets in support of the plan, at London, March 21, 22; and at York . . . Oct. 25, "

The building† commenced . . . Sept. 26, "

Many persons admitted to it in Jan.; it is virtually transferred to the royal commissioners by the contractors, Messrs. Fox and Henderson . . . Feb. 1851

Reception of goods began Feb. 12, and the sale of season tickets . . . Feb. 25, "

The Exhibition opened by her majesty, May 1, "

The number of exhibitors exceeded 17,000, of whom 2918 received prize medals and 170 council medals. The articles exhibited in arts, manufactures, and the various produce of countries, defy calculation.

The palace continued open above 23 weeks, altogether 144 days (May 1 to Oct. 15), within which time it was visited by 6,170,000 persons, averaging 43,536 a day, whose admis-

sion at the respective prices of one pound, half-a-crown, and one shilling, amounted to 505,707*l*. including season tickets, leaving a surplus, after payment of expenses, of about 150,000*l*.

The greatest number of visitors in one day was 109,760 (Oct. 8); and at one time (2 o'clock, Oct. 7) were 93,000; these persons were assembled at one time, not in an open area, like a Roman amphitheatre, but (it should be recollected) within a windowed and floored and roofed building. There is no like vast assemblage recorded in either ancient or modern annals, as having been gathered together, it may be said in *one room*.

The Exhibition was closed to the public, Oct. 11, 1851

A memorial statue of the prince consort, by Joseph Durham, placed in the gardens of the Royal Horticultural Society, uncovered in the presence of the prince and princess of Wales . . . June 10, 1863

EXHIBITION of 1862. A proposal in 1858 for another Great Exhibition, to be held in 1861, was withdrawn in consequence of the war in Italy in 1859, &c. The scheme was revived in April 1860, when the prince-consort engaged to guarantee 10,000*l*. if 240,000*l*. should be subscribed for by other persons.

A charter granted to the following commissioners: Earl Granville, the marquiss of Chandos, C. W. Dilke, jun., and Thomas Fairbairn . . . Feb. 22, 1861

The guarantee fund amounted to 349,000*l*. in Nov. 1860, and to 452,300*l*. on . . . Aug. 22, 1862

The building,† erected at South Kensington, by Messrs. Kelk and Lucas, according to a design by capt. Fowke, made over to the commissioners on . . . Feb. 12, "

The Exhibition was opened by the duke of Cambridge and a distinguished company on . . . May 1, "

The fine arts department included a noble collection of paintings and sculptures.

The jurors' awards of medals were announced in the building on . . . July 11, 1862

The Exhibition was closed on Nov. 1, when the total number of visitors (exclusive of attendants) had been 6,117,450.

The Exhibition re-opened on Nov. 3 for the sale of goods exhibited; was finally closed on . . . Nov. 15, "

The success of the Exhibition was much impaired by the decease of the prince consort, Dec. 14, 1861, and the breaking out of the civil war in the United States of America. The foreign exhibitors in 1851 were 6566; in 1862, 16,456.

* Industrial exhibitions began with the French; *Expositions* having been organised and opened at Paris in 1793, 1801, 1802, 1806, 1819, 1823, 1827, 1834, 1839, 1844, and 1849, the last, being the eleventh, exceeding all the preceding in extent and brilliancy. The first exhibition of the kind in this country was the National Repository, opened under royal patronage in 1828, near Charing-cross. It was not successful. Other exhibitions were opened at Manchester in 1837, at Leeds in 1839, and at Birmingham in 1849. Exhibitions have since been held at Cork, Dublin, Manchester, New York, Paris, Montreal, Florence, Constantinople, Bayonne, &c. (*which see*).

† The palace, with the exception of the flooring and joists, was entirely of glass and iron. It was designed by Mr. (since sir Joseph) Paxton (who died June 8, 1865), and the contractors were Messrs. Fox and Henderson, to whom it was agreed to pay 79,800*l*., or 150,000*l*. if the building were permanently retained. It cost 176,030*l*. 13*s*. 8*d*. Its length was 1851 feet, corresponding with the year; the width 493 feet, with an additional projection on the north side, 936 feet long, by 48 wide. The central portion was 120 feet wide and 64 feet high, and the great avenues ran east and west through the building; the transept near the centre was 72 feet wide and 108 feet high. The entire area was 772,784 square feet, or about 19 acres. Four galleries ran lengthways, and others round the transept. The ground-floor and galleries contained 1,000,000 square feet of flooring. There were altogether 4000 tons of iron in the structure, and 17 acres of glass in the roof, besides about 1500 vertical glazed sashes.

‡ The main building occupied about 16 acres of ground, and the annexes 7 acres. The south front was 1150 feet long and 55 feet high, and over the east and west fronts rose the two domes 260 feet high. The

EXODUS (Greek, *way out*), a term applied to the departure of the Israelites from Egypt 1491 B.C.; and described in the book of *Exodus*. Chronologers vary in the date of this event: the LXX. give 1614; Hales, 1648; Wilkinson, 1495; Bunsen, 1320 or 1314.

EX OFFICIO INFORMATIONs are those filed by the attorney-general, *by virtue of his office*, without applying to the court where they are filed for leave, or giving the defendant an opportunity of showing cause why they should not be filed. *Cabinet Lawyer*. They were used by the Liverpool administration about 1817—19. William Hone was tried on criminal information, Dec. 18-20, 1817, and acquitted. The British bank directors were thus tried, 1857.

EXPEDITIONS, BRITISH. Many are described under their respective heads: *e.g.* :—

France, near Port l'Orient	Oct. 1, 1746	Ferrol, in Spain	Aug. 1800
Cherbourg	Aug. 7, 1758	Egypt (<i>Abercrombie</i>)	March, 1801

EXPENDITURE. See under *Revenue*.

EXPORTS. Edward III. by his encouragement of trade turned the scale so much in favour of English merchandise, that by a balance taken in his time, the exported commodities amounted to 294,000*l.* and the imported to only 38,000*l.* See *Revenue*. The declared value is of much less amount than the official.

EXTREME UNCTION. See *Anointing*.

EYLAU (Prussia), where on Feb. 7, 8, 1807, the French defeated the Russians, in one of the most bloody contests of the war. Napoleon commanded in person. Both armies by this and other battles were so much reduced, that the French retired to the Vistula, and the Russians on the Pregel. The victor lost 15,000 men; the Russian loss in slain alone was 20,000.

EYRE (old French for *ire*, to go). The itinerant court of justices, the justices in eyre, was instituted by Henry II. 1176; and when the forest laws were in force, its chief justice had great dignity. These justices were to go their circuit every third year, and punish all abuses committed in the king's forests. The last instance of a court being held in any of the forests is believed to have been in 1671. *Beatson*.

FABII. A noble and powerful family at Rome, who derived their name from *faba*, a bean, because some of their ancestors cultivated this pulse; they were said to be descended from Fabius, a supposed son of Hercules, and were once so numerous that they took upon themselves to wage war against the Veientes. They came to a general engagement near the Cremera, in which all the family, consisting of 306 men, were slain in a sudden attack, 477 B.C. There only remained one, whose tender age had detained him at Rome, and from him arose the noble Fabii in the following ages. Fabius *Cunctator* (the delayer) kept Hannibal in check for some time without coming to an engagement, 217, 216 B.C.

interior was decorated by Mr. John G. Crace. The building was given up to Messrs. Kelk and Lucas on Dec. 31, 1862, the house of commons having refused to purchase it for 80,000*l.* July 2, 1863; and the pulling down commenced on July 6. The domes and other parts of the structure were purchased for erection in Alexandra-park, Muswell-hill, near London (north).

FABLES. "Jotham's fable of the trees (*Judges ix.*, about 1209 B.C.) is the oldest extant, and as beautiful as any made since." *Addison*. Nathan's fable of the poor man (2 *Sam. xii.*, about 1034 B.C.) is next in antiquity. The earliest collection of fables extant is of eastern origin, and preserved in the Sanscrit. The fables of Vishnoo Sarma, called *Pilpay*, are the most beautiful, if not the most ancient in the world. *Sir William Jones*. The well-known *Æsop's fables (which see)*, supposed to have been written about 565 or 620 B.C., were versified by Babrius, a Greek poet, about 130 B.C. (*Coray*), and turned into prose by Maximus Planudes, a Greek monk, about 1320, who added other fables and appended a worthless life of *Æsop*. The fables of Lafontaine (1700) and Gay (1727) are justly celebrated.

FACTIONS, among the Romans, were parties that fought on chariots in the circus, and who were distinguished by their colours, as green, blue, red, and white; to which Domitian added two others, gold and scarlet, about 90. At Constantinople, the higher ranks took part in the games, and the emperors and people generally favoured one colour.*

FACTORIES, supplied with machinery for producing manufactures, have immensely increased in this country since 1815. The Factory act, regulating the hours of labour, &c., was passed in 1833. No child is to be employed under nine years of age, except in silk factories. Similar acts have been passed since.

FAIRLOP OAK, with a trunk 48 feet in circumference, the growth of five centuries, in the forest of Hainault, Essex, was blown down in Feb., 1820. Beneath its branches a fair was annually held on the first Friday in July, which originated with the eccentric Mr. Day, a pump and block maker of Wapping, who, having a small estate in the vicinity, annually repaired here with a party of friends, to dine on beans and bacon.

FAIROAKS, near the Chickahominy, Virginia, the site of two sanguinary indecisive battles between the Confederates, under general Joseph Johnson, and the Federal army of the Potomac, under general McClellan, May 31, and June 1, 1862.

FAIRS AND WAKES, of Saxon origin, were instituted in England by Alfred, 886. *Spelman*. Wakes were established by order of Gregory VII. in 1078, and termed *Feria*, at which the monks celebrated the festival of their patron saint: the vast resort of people occasioned a great demand for goods, wares, &c. Fairs were established in France about 800 by Charlemagne, and encouraged in England about 1071 by William the Conqueror.

FALCONRY in England cannot be traced with certainty until the reign of king Ethelbert, the Saxon monarch, 850. *Pennant*. The grand seignior at one time kept six thousand falcons in his service. Recents attempts have been made to revive falconry.

FALCZI, PEACE OF, concluded between Russia and Turkey, July 2, 1711, the Russians giving up Azoph and all their possessions on the Black Sea to the Turks. The Russians were saved from imminent destruction by the address of Catherine the empress. In 1712 the war was renewed, and terminated by the peace of Constantinople, April 16, 1712.

FALERNIAN WINE, celebrated by Virgil and Horace, was the produce of Falernus, or, as called by Martial, Mons Massicus, in Campania. Horace in his *Odes* boasts of having drunk Falernian wine that had been, as it were, born with him, or which reckoned its age from the same consuls, 14 B.C. The Opimian wine is said to have been kept for 200 years.

FALKIRK (Stirlingshire, Scotland), the site of a victory by the English under Edward I. over the Scots, commanded by Wallace, part of whose forces deserted him. It is said from 20,000 to 40,000 of the latter were slain, July 22, 1298. A battle was fought here between the royal forces and prince Charles Stuart, in which the former were defeated, Jan. 17, 1746.

FALKLAND ISLANDS, a group in the South Atlantic, belonging to Great Britain. Seen by Americus Vesputius; and visited by Davis, 1592. Taken possession of by France, 1764. The French were expelled by the Spaniards; and in 1771, Spain gave up the sovereignty to England. Not having been colonised by us, the republic of Buenos Ayres assumed a right to these islands, and a colony from that country settled at Port Louis; but owing to a dispute with America, the settlement was destroyed by the latter in 1831. In 1833 the British flag was hoisted at Port Louis, and a British officer has since resided there. *M'Culloch*.

* In Jan. 532, a conflict took place, when about 30,000 lives were lost, and Justinian was mainly indebted for his life and throne to the heroism of his empress Theodora, formerly a courtesan. The blues and greens united for a day or two against the emperor, taking *Nika!* (overcome) for a watchword, from which the sedition has been named. The blues soon repented, and massacred nearly all the greens. The games were suppressed for a time.

FAMILY COMPACT. See *Bourbon*.

FAMILY OF LOVE, a society, called also Philadelphians, from the love they professed to bear to all men, even the most wicked. They assembled at Brew-house yard, Nottingham. Their founder was named David George, an Anabaptist, of Holland, who propagated his doctrine in Switzerland, where he died in 1556. After this event the tenets of the society were declared to be impious, and George's body and books were ordered to be burned by the hangman. See also *Agapemonians*.

FAMINES. The famine of the seven years in Egypt began 1708 B.C. *Usher*; *Blair*.

FAN. The use of the fan was known to the ancients; *Cape hoc flabellum, et ventulum huic sic facito*. "Take this fan, and give her thus a little air." *Terence, Eunuchus*, B.C. 166.—Fans, together with muffs, masks, and false hair, were first devised by the harlots in Italy, and were brought to England from France. *Stow*. The fan was used by females to hide their faces at church. *Pardon*. In the British Museum are fan-handles and other articles of Egyptian manufacture, used anciently by women.

FARCE, a short comic drama, usually of one or two acts. One by Otway is dated 1677. The best English farces (by Foote, Garrick, Bickerstaff, &c.) appeared from about 1740 to 1780. These species of dramatic entertainment originated in the droll shows which were exhibited by charlatans and their buffoons in the open street. See *Drama*.

FARNESE FAMILY became important through the elevation of Alexander Farnese to the papacy as Paul III. He gave his natural son Peter the duchy of Parma, and his descendants ruled there till the death of Antony without issue in 1731. Alexander prince of Parma was governor of the Netherlands in 1579.

FARRINGDON-MARKET, erected by the corporation of London, near the old Fleet-market, was opened Nov. 20, 1829.

FARTHING, an early English coin. Farthings in silver were coined by king John; the Irish farthing of his reign is of the date of 1210, and is valuable and rare. Farthings were coined in England in silver by Henry VIII. First coined in copper by Charles II. 1665; and again in 1672, when there was a large coinage of copper money. Half-farthings were first coined in the reign of Victoria, 1843. See *Queen Anne's Farthings*.

FASTS, observed by most nations from the remotest antiquity; by the Jews (2 *Chron.* xx. 3); by the Ninevites (*Jonah* iii.). A fast was observed by the Jews on the great day of atonement, *Lev.* xxiii. 1490 B.C. The first Christian ministers were ordained with fasting (45), *Acts* xiii. 2. Annual fasts, as that of Lent, and at other stated times, and on particular occasions to appease the anger of God, began in the Christian church, in the second century, 138. The Mahometan fast is termed *Ramadan* (which see). Fast days are appointed by the Reformed churches in times of war and pestilence (as March 21, 1855), for the Russian war, and Oct. 7, 1857, for the Indian mutiny). See *Abstinence*.

FÈRE-CHAMPENOISE (France). Here the French army under Marmont, Mortier, and Arrighi, were surprised and defeated by the Austrians under the prince of Schwartzenberg, March 25, 1814, after a heroic resistance. Paris surrendered to the allies six days after.

FÈRIÆ LATINÆ were solemn festivals at Rome, instituted by Tarquin the Proud, about 534 B.C. The principal magistrates of forty-seven towns of Latium assembled on a mount near Rome, where they and the Roman authorities offered a bull to Jupiter Latialis.

FERMENTATION, by Gay-Lussac, termed one of the most mysterious processes in nature : he showed that in the process, 45 lbs. of sugar are resolved into 23 of alcohol and 22 of carbonic acid. His memoir appeared in 1810. In 1861 Pasteur brought forward evidence to show that fermentation depends on the presence of minute organisms in the fermenting fluid, and that the source of all such organisms is the atmosphere.

FERNs (Ireland), an ancient bishopric, once archiepiscopal. St. Eden was seated here in 598. Leighlin and Ferns were united in 1600 ; and by the Church Temporalities' act, passed Aug. 1833, both were united to the bishopric of Ossory. See *Ossory*.—**FERNs**, an order of cryptogamous plants, now much cultivated in Wardian cases, *which see*, and also *Nature-Printing*.

FEROZESHAH (India). The British, commanded by sir Hugh Gough, attacked the entrenchments of the Sikhs, and carried by storm their first line of works, Dec. 21, 1845 ; but night coming on, the operations were suspended till daybreak next day, when their second line was stormed by general Gilbert, and 74 guns captured. The Sikhs advanced to retake their guns, but were repulsed with great loss, and retreated towards the Sutlej, Dec. 22 ; and recrossed that river unmolested, Dec. 27. The British loss was reckoned at 2415.

FERRARA, a city in the Papal States, formerly part of the Exarchate of Ravenna, under the emperors of the East. It was subdued by the Lombards in the 8th century, and taken from them about 752 by Pepin, who gave it to pope Stephen II. About 1208 it fell into the hands of the house of Este (*which see*), and became the principal seat of the literature and fine arts in Italy. Pope Clement VIII. obtained the long-claimed sovereignty in 1598, on the death of the duke Alphonso II., the last legitimate male of the Este family. His illegitimate nephew, Caesar, became duke of Modena. The French under Massena took Ferrara in 1796 ; but it was restored to the pope in 1814. An Austrian garrison held it from 1849 ; it retired in June, 1859, and the people rose and declared for annexation to Sardinia, which was accomplished in March, 1860.

FERRARS' ARREST. In March, 1542, Mr. George Ferrars, a member of parliament, being in attendance on the house, was taken in execution by a sheriff's officer for debt, and committed to the Compter prison. The house despatched their serjeant to require his release, which was resisted, and an affray taking place, his mace was broken. The house in a body repaired to the lords to complain, when the contempt was adjudged to be very great, and the punishment of the offenders was referred to the lower house. On another messenger being sent to the sheriffs by the commons, they delivered up the senator, and the civil magistrates and the creditor were committed to the Tower, the inferior officers to Newgate, and an act was passed releasing Mr. Ferrars from liability for the debt. The king, Henry VIII., highly approved of all these proceedings, and the transaction became the basis of that rule of parliament which exempts members from arrest. *Holished*.

FERRO, the most western of the Canary isles, from whose west point some geographers have taken their first meridian, was known to the ancients, and was re-discovered in 1402.

FERROL (N.W. Spain). Upwards of 10,000 British landed near Ferrol under the command of sir James Pulteney, in Aug. 1800. They gained possession of the heights ; notwithstanding which the British general, despairing of success, on account of the strength of the works, re-embarked his troops. His conduct, which was in opposition to the opinion of his officers, was very much condemned in England. The French took seven sail of the line here, Jan. 27, 1809.

FESCENNINE VERSES were rude extemporary dialogues, frequently licentious, in favour among the ancient Etruscans, and still popular in Italy.

FESTIVALS. See *Fests*.

FÊTE DE DIEU, a feast of the Roman church in honour of the real presence in the Lord's Supper, kept on the Thursday after Trinity Sunday. See *Corpus Christi*. Berengarius,

archbishop of Angers, was opposed to the doctrine of transubstantiation when it was propagated, and to atone for his crime a yearly procession was made at Angers, which was called *la fête de Dieu*, 1019.

FÊTE DE VERTU, an annual assemblage, chiefly of young persons, to whom were adjudged rewards for industry and virtue. These fêtes, held at Nuncham, in Oxfordshire, begun by lady Harcourt in 1789, continued till her death.

FEUDAL LAWS. The tenure of land by suit and service to the lord or owner was introduced into England by the Saxons, about 600. This slavery was increased in 1068. The kingdom was divided into baronies, which were given on condition of the holders furnishing the king with men and money. The vassalage, restored, but limited by Henry VII., 1495, was abolished by statute 1660. The feudal system was introduced into Scotland by Malcolm II. in 1008, and the hereditary jurisdictions were finally abolished in that kingdom, 1746-7. The feudal laws, established in France by Clovis I. about 486, were discountenanced by Louis XI. in 1470.

FEUILLANTS, a religious order founded by Jean de la Barrière in 1577 at the abbey of Feillant, near Toulouse, and settled in Paris in 1587. The Feuillant club, formed in Paris by La Fayette and others in 1789, to counteract the intrigues of the Jacobins, was so named from the convent, where they met. A body of Jacobins burst into their hall and obliged them to separate, Dec. 25, 1791; and the club was broken up in 1792.

FEZ (in the ancient *Mauritania*, Africa), founded by Edris, a descendant of Mahomet, about 787, was long capital of the kingdom of Fez. After long-continued struggles, it was annexed to Morocco about 1550. Leo Africanus describes it as containing more than seven hundred temples, mosques, and other public edifices, in the 12th century.

FICTIONS. See *Romances*.—**FICTIONS IN LAW** were invented by the lawyers in the reign of Edward I. as a means of carrying cases from one court to another, whereby the courts became checks to each other. *Hume*. Lord Mansfield, in the court of King's Bench, emphatically declared, that "NO FICTION OF LAW SHALL EVER SO FAR PREVAIL AGAINST THE REAL TRUTH, AS TO PREVENT THE EXECUTION OF JUSTICE," May 31, 1784.

FIEF. See *Feudal Laws*.

FIELD OF MARCH AND MAY. See *Champ*. **FIELD OF THE CLOTH OF GOLD**, a plain near Ardes, near Calais, in France, on which Henry VIII. met Francis I. of France, June, 7-25, 1520. The nobility of both kingdoms displayed their magnificence, and many involved themselves in debt. Paintings of the embarkation and interview are at Windsor castle.

FIERY CHAMBER. See *Chambre Ardente*.

FIESCHI'S ATTEMPT ON LOUIS-PHILIPPE. See *France*, 1835.

FIFTH-MONARCHY MEN about 1645 supposed the period of the Millennium to be just at hand, when Jesus should descend from heaven, and erect the fifth universal monarchy. They proceeded so far as to elect Jesus Christ king at London. Cromwell dispersed them, 1653. *Kearsley*. Another rising with loss of life was suppressed in Jan. 1661.

FIG-TREE (*Ficus Carica*). Brought from the south of Europe, before 1548. The Botany-Bay Fig, *Ficus Australis*, brought from N.S. Wales in 1789.

FIGURES. See *Arithmetic*, and *Digits*.

FILES are mentioned (1 *Sam.* xiii. 21) B.C. 1093. The manufacture of them has attained to great perfection, by means of file-cutting machinery. That set up by Mr. T. Greenwood of Leeds, in 1859, was invented by M. Bernot of Paris. It is said that the price of files made by it are reduced from 3*d.* to 4*d.* per dozen.

FILIBUSTERS, a name given to the freebooters who plundered the coasts of America in the 17th century. See *Buccaneers* and *Nicaragua*.

FILTERERS. A plan for purifying corrupted water was patented by Wm. Wollcott in 1675. Other modes followed. James Peacock's method of filtration was patented in 1791.

FINE ARTS. See *Arts*, *Paintings*, *Sculpture*, *Engraving*, &c.

FINES AND RECOVERIES, conferring the power of breaking ancient entails and alienating estates, began in the reign of Edward IV., but was not, properly speaking, law, till Henry VII., by correcting some abuses that attended the practice, gave indirectly a sanction to it, 1487. Fines and recoveries were abolished in 1833.

FINLAND, a Russian grand-duchy, in the middle of the 12th century was conquered by the Swedes, who introduced Christianity. It was several times conquered by the Russians (1714, 1742, and 1808), and restored (1721 and 1743); but in 1809 they retained it by treaty. See *Abo*. Its political constitution was confirmed by the czar in 1809, 1825, and 1855. Population in 1862, 1,746,229.

FINNIAN. See *Fenians*.

FIRE is said to have been first produced by striking flints together. The poets supposed that fire was stolen from heaven by Prometheus. Heraclitus about 596 B.C. maintained that the world was created from fire, and deemed to be a god omnipotent.

FIRE-ANNIHILATOR, an apparatus invented by Mr. T. Phillips, and made known by him in 1849. When put in action, steam and carbonic acid are formed, which extinguish flame. It was not successful in practice.

FIRE-ARMS. (See *Artillery and Cannon*.) The first small fire-arms were a species of cannon, borne by two men. See *Revolver*.

Fire-arms made at Perugia, in Italy	1364	All these were of very rude construction, being first discharged by a lighted match, afterwards, about 1517, by a wheel-lock, then by the flint.
Employed by the Burgundians in the defence of Arras	1414	The match-lock and wheel-lock superseded by the flint-lock, about
Edward IV., when he landed at Ravenspur, is said to have been accompanied by 300 Flemings, armed with hand-guns	1471	The rev. Mr. Forsythe patented the percussion principle of igniting gunpowder in muskets by means of detonating powder.
At the battle of Morat, the Swiss are said to have had 10,000 men armed with fire-arms	1476	Percussion caps came into use between 1820 & 1830
Fire-arms were used at the siege of Berwick	1521	The old musket (<i>Brown Bess</i>) was superseded by the Enfield rifle, which is likely to give way to Lancaster's smooth-bored rifle
The petronel (from <i>poitrine</i> , the chest) or arquebus came into use, 1480; and the musket employed in the armies of the emperor Charles V. about	"	1858

SMALL ARMS OF THE BRITISH SERVICE, 1854.

Percussion musket; pattern, 1842.	Enfield rifle musket, adopted for the service in 1853, after experiments at the royal manufactory, Enfield Lock.
Regulation rifle musket; pattern, 1851.	Artillery carbine; pattern, 1842.

FIRE-BRIGADE was established in London in 1832 by Mr. R. Bell Ford, director of the Sun fire-office. It then had 80 men and 19 stations. In 1863 it had 130 men and 20 stations. In May, 1862, a commission recommended the establishment of a Police fire-brigade, which was effected by an act of parliament in 1865. It was to be supported by a $\frac{1}{2}d.$ rate and by contributions from government and from the insurance offices.

FIRE-DAMP INDICATOR, is a small apparatus, about the size of a chronometer, invented by Mr. G. F. Ansell, and patented by him in 1865, by which the presence of very small quantities of fire-damp or light carburetted hydrogen gas may be detected in mines. It is an application of the law of the diffusion of gases.

FIRE-ENGINES are said to have been invented by Ctesibius 250 B.C. They are mentioned by Pliny, A.D. 70. A "Water-bow" was patented by Thos. Grent in 1632, one was constructed by John Vander Heyden, about 1663. Bramah's engine was patented in 1793, and many others since. Mr. John Braithwaite constructed a steam fire-engine in 1830. A trial of steam fire-engines took place at the Crystal Palace, Sydenham, on July, 1, 2, 3, 1863; when prizes were awarded to a large one by Merryweather and a small one by Shand and Mason.

FIRE-ESCAPES have been patented by David Marie (1766), Joachim Smith (1773), and by many other persons. The Royal Society for the Protection of Life from Fire was first established in 1836; its object was not fully attained till 1843, when it was re-organised, beginning with six escape stations in London; in March, 1859, it possessed 67. In 1861 it was stated that 84 lives had been saved by the conductors. In 1858, 504 fires had been attended, and 57 persons rescued. Versmann's composition for rendering washing dresses *fire-proof* was published about 1860.

FIRE INSURANCE. See *Insurance*.

FIRE-SHIPS were first used in the 13th century. Among the most formidable contrivances of this kind ever used, was an explosion vessel to destroy a bridge of boats at the siege of Antwerp, in 1585. The first use of them in the British navy was by Charles, lord Howard of Effingham, in the engagement of the Spanish Armada, July, 1588. *Rapin*.

FIRE-WATCH, or Fire-Guard of London, was instituted Nov. 1791.

FIRE-WORKS* are said to have been familiar to the Chinese in remote ages. They were invented in Europe at Florence about 1360; and were exhibited as a spectacle in 1588.

Macaulay states that the fire-works let off in England at the peace of Ryswick, in 1697, cost 12,000*l*. Very grand fire-works were let off from a magnificent building erected in the Green-park, London, at the peace of Aix-la-Chapelle, signed April 30, 1748. At an exhibition of fire-works in Paris, May 31, 1770, in honour of the marriage of the dauphin, afterwards Louis XVI., nearly 1000 persons perished by pressure and drowning, through a panic.

The display of fireworks, under the direction of sir Wm. Congreve, on the celebration of the general peace, and to commemorate the centenary accession of the family of Brunswick to the British throne, surpassed all previous exhibitions, Aug. 1, 1814.

A grand display of this kind (at a cost of 10,000*l*.) to celebrate the peace with Russia, May 29, 1856.

FIRES IN LONDON. The conflagration of a city, with all its tumult of concomitant distress, is one of the most dreadful spectacles which this world can offer to human eyes. *Dr. Johnson.* See *Santiago, Liverpool, &c.* (1862).

In consequence of explosions frequently occurring at fire-work makers (particularly one on July 12, 1858, at Mr. Bennett's, in the Westminster-road, Lambeth, when five lives were lost, and about 300 persons seriously injured, and much property destroyed), it was determined to enforce 9 & 10 Will. III. c. 7 (1697), an act to prevent the throwing and forming of squibs, serpents, and other fire-works. An act regulating the making of fire-works was passed in 1860.

FIRE-WORSHIPPERS. See *Parsees.*

FIRST-FRUITS were offerings which made a large part of the revenues of the Hebrew priesthood. First-fruits (called *ANNATES*, from *annus*, a year), in the Roman church, originally the profits of one year of every vacant bishopric, afterwards of every benefice, were first claimed by pope Clement V. in 1306, and were collected in England in 1316: but chronologers differ on this point. The exaction was submitted to till the 26th of Hen. VIII. 1534, when the first-fruits were assigned, by act of parliament, to the king and his successors. Mary gave up the Annates once more to the popes (1555); but Elizabeth resumed them (1559). They were granted, together with the tenths, to increase the incomes of the poor clergy, by queen Anne, in 1703. The offices of First-fruits, Tenths, and queen Anne's Bounty were consolidated by 1 Vict. c. 20, 1838. See *Augmentation of Poor Livings*. Annates were long resisted in France, but not totally suppressed till 1789.

FISHERIES. Laws for their protection were enacted by Edward I. in 1284, and by his successors. The rights of the English and French fishermen were defined by treaty in 1839. See *Herring, Whale, and Newfoundland Fisheries*.

 The British Society of Fisheries established in London in 1786
 The Irish Fishery Company formed in Dec. 1818
 In 1849, two peasants, Remy and Gehin, obtained medals for their exertions in cultivating fish in France, and the government

set up an establishment for this purpose at Huningue, under M. Coumes.

In 1860 great progress had been made by M. Coste and others.

Commissions to examine into British fisheries were appointed in 1860, and acts to amend the law relating to fisheries in Great Britain and Ireland were passed in 1861-2-3

The subject has excited since much attention in Britain.

In April, 1863, Mr. Ponders placed in the Thames 76,000 young fish (salmon, trout, char, and grayling); and on April 17, Mr. Frank Buckland demonstrated the importance of fish culture before the members of the Royal Institution, London.

FISHGUARD (Pembroke). On Feb. 22, 1797, 1400 Frenchmen landed near this place. On Feb. 24, they surrendered to lord Cawdor, and some countrymen, armed with scythes and pitchforks.

FITZWILLIAM MUSEUM (Cambridge), founded by Richard viscount Fitzwilliam, who died in 1816, and bequeathed his collection of books, pictures, &c., to the university, with 100,000*l.* to erect a building to contain them. This was begun by G. Basevi in 1837, and finished by Cockerell some years after.

FIVE HUNDRED, COUNCIL OF, established by the new French constitution, Aug. 22, 1795, was unceremoniously dissolved by Napoleon Bonaparte, Nov. 10, 1799.

FIVE-MILE ACT, an oppressive statute passed in the 17th year of Chas. II., Oct. 1665. It obliged non-conformist teachers, who refused to take the non-resistance oath, not to come within five miles of any corporation where they had preached since the act of oblivion (unless they were travelling), under the penalty of 50*l.* They were relieved by Will. III. in 1689.

FLAG. The flag acquired its present form in the 6th century, in Spain; it was previously small and square. *Ashe*. It is said to have been introduced there by the Saracens, before whose time the ensigns of war were extended on cross pieces of wood. *Pardon*. The flag at sea denotes to what country a ship belongs, and the rank of its commander. The *honour-of-the-flag salute* at sea was exacted by England from very early times; but it was formerly yielded by the Dutch in 1673, at which period they had been defeated in many actions. Louis XIV. obliged the Spaniards to lower their flag to the French, 1680. *Hénault*. After an engagement of three hours between Tourville and the Spanish admiral Papachin, the latter yielded by firing a salute of nine guns to the French flag, June 2, 1688. *Idem*. See *Salute at Sea* and *Union Jack*.

FLAGELLANTS. A fatal plague gave raise to this fanatic sect. *Hénault*. They established themselves at Perouse, about 1268. They maintained that there was no remission of sins without flagellation, and publicly lashed themselves. Clement VI. declared them heretics in 1349; and 90 of them and their leader, Conrad Schmidt, were burnt, 1414. In 1574, Henry III. of France became a flagellant for a short time.

FLANDERS, the principal part of the ancient Belgium, which was conquered by Julius Cæsar, 51 B.C. It became part of the kingdom of France in 843, and was governed by counts subject to the king, from 862 till 1369, the first being Baldwin, *Bras de Fer*, who is said to have introduced the cloth manufacture. In 1204, Baldwin IV. became emperor at Constantinople. In 1369, Philip duke of Burgundy married Margaret, the heiress of count Louis II. After this, Flanders was subjected alternately to Burgundy (1384), Austria (1477), and Spain (1555). In 1580 it declared its independence, but afterwards returned to its allegiance to the house of Austria. In 1713 it was included in the empire of Germany. France obtained a part of Flanders by treaty in 1659 and 1679. See *Burgundy*, *Netherlands*, and *Belgium*.

FLAT-BUSH, BATTLE OF. See *Long Island*.

FLATTERY CAPE (W. coast of North America), so named by captain Cook, because at a distance it had the deceptive appearance of a harbour, 1778.

FLAVIAN CÆSARS were the Roman emperors Vespasian, Titus, and Domitian, who reigned 69—96.

FLAX was brought from Egypt to Gaul about 1 B.C.; and was ordered to be grown in England, by statute 24 Hen. VIII., 1533. For many ages the core was separated from the flax, the bark of the plant, by the hand. A mallet was next used; but the old methods of breaking and scutching the flax yielded to a water-mill which was invented in Scotland about 1750. See *Hemp*. In 1851, chevalier Claussen patented a method of "cottoning" flax.

FLEECE. See *Golden Fleece*.

FLEET-PRISON MARKET, &c. (London), were built over the small river Fleta, now used as a common sewer. In the reign of Henry VII. this river was navigable to Holborn-bridge; and the obelisk in Fleet-street denotes the extent of it in 1775. The *prison* was founded in the first year of Richard I., and was allotted for debtors, 1640, and persons were committed here who had incurred the displeasure of the Star Chamber, and for contempt of the court of Chancery. It was burnt by the prisoners, June 7, 1780.* It was pulled down in 1845 (and the debtors removed to the Queen's Bench prison). The site was sold to the London, Dover, and Chatham railway company for 60,000*l.* on June 2, 1864. *Fleet-market*, originally formed in 1737, was removed, and the site named Farringdon-street in 1829. A new (Farringdon) market was opened Nov. 20, 1829. The granite obelisk in Fleet-street, to the memory of alderman Waithman, was erected June 25, 1833.

FLEUR-DE-LIS, the emblem of France, said to have been brought from heaven by an angel to Clovis, he having made a vow that if he proved victorious in a pending battle with the Alemanni near Cologne, he would embrace Christianity, 496. It was the national emblem till the revolution in 1789, when the tricolor (white, red, and blue) was adopted.

FLEURUS (Belgium), the site of several battles: (1.) On Aug. 30, 1622, between the Catholic league under Gonzales de Cordova, and the Protestant union (indecisive). (2.) When the prince of Waldeck was defeated by Luxembourg, July 1, 1690. (3.) Between the allies under the prince of Coburg, and the French revolutionary army commanded by Jourdan. The allies, with an army of 100,000 men, had for their object the relief of Charleroi, when they were met on the plains of Fleurus, and signally defeated. Between 8000 and 10,000 were killed, wounded, and taken prisoners; and Jourdan was enabled to form a junction with the French armies of the Moselle, the Ardennes, and the north. In this memorable battle the French made use of a balloon to reconnoitre the enemy's army, an experiment which it is said contributed to the success of the day, June 26, 1794. (4.) The battle of Ligny (*which see*) is also called the battle of *Fleurus*.

FLIES. There was an extraordinary fall of these insects in London, covering the clothes of passengers in the streets, 1707. *Chamberlain*. In the United States of America the *Hessian fly*, from the notion of its having been brought there by the Hessian troops in the service of England in the war of independence; ravaged the wheat in 1777. Before and during the severe attack of cholera at Newcastle in Sept. 1853, the air was infested with small flies.

FLINTS, in form like arrow-heads, and considered by him to have been shaped by human hands, were found in 1847, near Amiens, by M. Boucher de Perthes. His theory, which gives a much higher antiquity to man than is usually received, was much opposed; but latterly has been received by some eminent geologists. Many have been since discovered in other countries; in Java, in 1865.

FLOATING BATTERIES. See *Batteries*, and *Gibraltar, Siege of*, 1781.

* **FLEET MARRIAGES.** Illicit marriages were celebrated here to an amazing extent. Between the 10th of October, 1704, and Feb. 12, 1705, there were celebrated 2954 marriages in the Fleet, without licence or certificate of banns. 20 or 30 couple were sometimes joined in one day, and their names concealed by private marks, if they chose to pay an extra fee. Penman, at a later period, describes the daring manner in which this nefarious traffic was carried on. He says, that in walking by the prison in his youth, he has been often accosted with, "Sir, will you please to walk in and be married?" And he states that painted signs, of a male and female hand conjoined, with the inscription, "Marriages performed within," were common along the building. This glaring abuse was put an end to by the marriage act in 1753.

upwards of 10,000 of his army were slain; while the English, who were commanded by the earl of Surrey, lost only persons of small note.

FLOGGING. Wm. Cobbett in 1810, and John Drakard in 1811, were punished for publishing censures on flogging in the army. By orders issued Nov. 9, 1859, this mode of punishment was very much diminished in the army (see *Army*); and on Dec. following it was ordered that first-class seamen should not be flogged, except after a trial. In 1863, flogging was made a punishment for attempts at garrotting.

FLOODS. See *Inundations*.

FLORAL HALL, adjoining Covent-garden theatre, is a large conservatory, 220 feet long, 75 feet wide, and 55 feet high, erected from designs by Mr. E. M. Barry, and was opened with the volunteers' ball, March 7, 1860. It was opened as a flower-market, May 22, 1861.

FLORALIA, annual games at Rome in honour of Flora, instituted about 752, but not celebrated with regularity till about 174 B.C.

FLORENCE (*Florentia*), capital of Tuscany (*which see*). It is said to have been founded by the soldiers of Sylla (80 B.C.), and enlarged by the Roman Triumviri. This city is truly the seat of the arts. In its palaces, universities, academies, churches, and libraries, are to be found the rarest works of sculpture and painting in the world. The Florentine academy and *Accademia della Crusca* (established 1582) were instituted to enrich literature and improve the language of Tuscany; the latter was so named, because it rejects like *bran* all words not purely Tuscan: both are now united under the former name.

FLORES, or Isle of Flowers (one of the Azores, *which see*), discovered by Vanderberg in 1439; and settled by the Portuguese in 1448.

FLORIDA, a peninsula, one of the southern states of North America, first discovered by Sebastian Cabot in 1497. It was visited by Ponce de Leon, the Spanish navigator, April 2, 1512, in a voyage he had absurdly undertaken to discover a fountain whose waters had the property of restoring youth to the aged who tasted them! Florida was conquered by the Spaniards under Ferdinand de Soto in 1539; but the settlement was not fully established until 1565. It was plundered by sir Francis Drake in 1585; and by Davis, a buccaneer, in 1665. It was invaded by the British in 1702; and again by general Oglethorpe in 1740; ceded to the British crown in 1763; taken by the Spaniards in 1781; and guaranteed to them in 1783. Revolution in 1810, when the American government took means for occupying the country; and after a tedious negotiation it was finally ceded* by Spain to the United States in 1820-21; and admitted into the Union in 1845, from which it seceded in Dec. 1860. Reunited in 1865. See *United States*.

FLORIN, a coin first made by the Florentines. A *florin* was issued by Edward III. which was current in England at the value of 6s. in 1337. *Camden*. This English coin was called floren after the Florentine coin, because the latter was of the best gold. *Ashe*. The florin of Germany is in value 2s. 4d.; that of Spain, 4s. 4½d.; that of Palermo and Sicily, 2s. 6d.; that of Holland, 2s. *Ayliff*. A silver coinage of florins (value 2s.) was issued by proclamation of queen Victoria, August, 1849.

FLOWERS. Our present common flowers were for the most part introduced into England from the reign of Henry VII. to that of Elizabeth (1485—1603). The art of preserving flowers in sand was discovered in 1633. A mode of preserving them from the effects of frost in winter, and hastening their vegetation in summer, was invented in America, by Geo. Morris,

* In 1801, the American government purchased Louisiana from the French, of which they contended West Florida formed a part. On the revolution, and in consequence of this purchase, Spain, unable to defend the country, ceded the whole of Florida to the United States, to which it was finally annexed after the negotiation above mentioned.

in 1792. A very great number have been introduced from America, Australia, the Cape, &c., during the present century.

FLUORESCENCE. When the invisible chemical rays of the blue end of the solar spectrum are sent through uranium glass, or solutions of quinine, horse-chestnut bark, or stramonium datura, they become luminous. This phenomenon was termed "fluorescence" by its discoverer, professor Stokes, in 1852. See *Calorescence*.

FLUORINE, a gaseous element, obtained from fluor spar; first collected over mercury by Priestley. Its property of corroding all vessels is so great that it is separated with great difficulty. It was named by Ampère in 1810. Its chemical history was further elucidated by Davy (1809), Berzelius (1824), and succeeding chemists. The corroding property of fluoric acid was employed in the arts in 1760, by Schwankhard of Nuremberg. *Gmelin*.

FLUSHING, SIEGE OF. See *Walcheren Expedition*.

FLUTE, a most ancient instrument, known to the Greeks. It has been improved by Böhm in Germany, and in London by Richard Potter, 1785; Rudall and Rose 1832, and others. The English flute or *flageolet* was patented by Wm. Bainbridge in 1803, with improvements in 1810 and 1819.

FLUXIONS, a branch of the higher mathematics, invented by Newton, 1665, similar to the differential calculus described by Leibnitz, 1684. The finest applications of the calculus are by Newton, Euler, La Grange, and La Place. The first elementary work on fluxions in England is a tract of twenty-two pages in *A New Short Treatise of Algebra, together with a Specimen of the Nature and Algorithm of Fluxions*, by John Harris, M.A. London, 1702.

FLYING, ARTIFICIAL, has been attempted in all ages.* Friar Bacon maintained the

* In Greek mythology, it is said that Daedalus attached wings of wax to the body of his son Icarus, who, neglecting the advice of his father, flew so high that the sun melted his wings, and he fell into the sea.

possibility of the art of flying, and predicted it would be a general practice, 1273. Bishop Wilkins says (1651), it will yet be as usual to hear a man call for his *wings* when he is going on a journey, as it is now to hear him call for his boots! Borelli (about 1670) showed the futility of these speculations. About 1800, sir George Cayley experimented on the subject, and in 1843 Mr. Henson invented a flying machine; but nothing has been devised capable of serving a practical purpose.

FOG SIGNALS. In 1862, much attention was paid to the subject by the Royal Commission on Light-houses, &c. The use of bells, steam-trumpets, a battery of whistles blown by steam, the transmission of sound through water, the sirene, &c., were considered.

FONTAINEBLEAU, near the Seine, France. The royal palace, founded by Robert le Pieux about 999, enlarged and adorned by successive kings, was completed by Louis Philippe, 1837-40. Fontainebleau was entered by the Austrians Feb. 17, 1814. Here Napoleon resigned his dignity, April 4, and bade farewell to his army, April 5, 1814.

FONTENOY, near Tournay, in Belgium, the site of a battle on April 30 (May 11, N.S.), 1745, between the French, commanded by marshal Saxe, and the English, Hanoverians, Dutch, and Austrians, commanded by the duke of Cumberland.* The battle was fought with great obstinacy, and the carnage on both sides was considerable, the allies losing 12,000 men, and the French nearly an equal number of lives; but the allies were compelled to retire. Marshal Saxe (ill of the disorder of which he afterwards died) was carried about to all the posts in a litter, assuring his troops that the day would be their own.

FONTHILL ABBEY, Wiltshire, founded in 1796, the mansion of Wm. Beckford, author of "Vathek," and son of alderman Beckford. He died in 1844. Within this edifice (which alone cost 273,000*l.*) were collected most costly articles of vertu, the rarest works of the old masters, and the finest specimens of the arts. The sale of the abbey and its contents to Mr. Farquhar took place in 1819; 7200 catalogues at a guinea each were sold in a few days. On Dec. 21, 1825, the lofty tower fell, and in consequence the remaining buildings were sold.

FONTS. Formerly the baptistery was a small place partitioned off in a church, within which a large font was placed, where the persons to be baptized (frequently adults) were submerged. Previously, lakes and rivers were resorted to for immersion. Fonts are said to have been set up about 167.

FOOLS, FESTIVALS OF, were held at Paris on the 1st of January, where we are told all sorts of absurdities and indecencies were committed, from 1198 to 1438. Fools or licensed jesters were kept at court in England (and at other courts in Europe), and were tolerated up to the time of Charles I. 1625.

FORBES MACKENZIE'S ACT (16 & 17 Vict. c. 67) "for the better regulation of public-houses in Scotland," was passed in 1853, and is said to be much evaded. It permits grocers to sell spirits, &c., as usual, but forbids drinking on the premises, which is to be confined to places duly licensed. Much dram-drinking previously took place in grocers' shops.

FORCE. See *Conservation and Correlation*.

FOREIGNERS. See *Alien*.

FOREIGN ENLISTMENT ACT, 59 Geo. III. c. 69 (1819), forbids British subjects to enter the service of a foreign state, without licence from the king or privy council, and also the fitting out or equipping ships for any foreign power to be employed against any power with which our government is at peace. (See *Trials*, 1862, 1863.) In 1606, Englishmen were forbidden to enter foreign service, without taking an oath not to be reconciled to the pope. The act was suspended in 1835 on behalf of the *British Legion* (which see).

which has received his name. (*Ovid*, Met. viii. 195.) Archytas is said to have made an artificial flying dove, about 400 B.C.

The king Louis XV. and the dauphin were present at this great battle. The success of the British at the commencement of it is still quoted by military men as the best illustration of the extraordinary power of a column. The advance of the Austrians during several hours at the battle of Marengo (fought June 14, 1800) was compared to it by Bonaparte.

FOREIGN LEGION. Foreigners have frequently been employed as auxiliaries in the pay of the British government. (See *Hessians*.) An act (18 & 19 Vict. c. 2) for the formation of a Foreign Legion as a contingent in the Russian war (1855), was passed Dec. 23, 1854.* The queen and prince Albert reviewed 3500 soldiers, principally Swiss and Germans, at Shorncliffe, Aug. 9, 1855. On the peace in 1856, many were sent to the Cape of Good Hope; but not prospering, returned.

FOREIGN OFFICE was established at the re-arrangement of the duties of secretaries of state in 1782. It has the exclusive charge of British interests and subjects in foreign countries. The secretary for foreign affairs negotiates treaties, selects ambassadors, consuls, &c., for foreign countries, and grants passports. The new foreign office, building in the Italian style (designed by Gilbert Scott), was begun in 1864.

FOREIGN ORDERS. No British subject is permitted to accept a foreign order from the sovereign of any foreign country, or wear the insignia thereof, without her Majesty's consent.—Regulations published in London Gazette, May 10, 1855.

FORESTALLING was forbidden by statutes (in 1350, 1552, &c.), all repealed in 1844.

FORESTS. There were in England, even in the last century, as many as 68 forests, 18 chases, and upwards of 780 parks. The New Forest in Hampshire was made by William I., who for that purpose destroyed 36 parishes, pulled down 36 churches, and dispeopled the country for 30 miles round, 1079-85. *Stow.*†

FORESTS, CHARTER OF THE, *Charta de Foresta*, granted by Henry III. in 1217, was found in *Magna Charta*, granted by king John, June 15, 1215.

FORFARSHIRE STEAMER, on its passage from Hull to Dundee, on Sept. 6, 1838, was wrecked in a violent gale, and thirty-eight persons out of fifty-three perished. The Outer-Fern Lighthouse keeper, James Darling, and his heroic daughter Grace, ventured out in a tremendous sea in a coble, and rescued several of the passengers.

FORGERY. The forging deeds, or giving forged deeds in evidence, was made punishable by fine, by standing in the pillory, having both ears cut off, the nostrils slit up and seared, the forfeiture of land, and perpetual imprisonment, 5 Eliz. 1562. Since the establishment of paper credit, a multitude of statutes have been enacted.‡

FORKS were in use on the continent in the thirteenth and fourteenth centuries. *Voltaire*. This is reasonably disputed. In Fynes Moryson's *Itinerary*, reign of Elizabeth, he says, "At Venice each person was served (besides his knife and spoon) with a fork to hold the meat while he cuts it, for there they deem it ill manners that one should touch it with his hand." Thomas Coryate describes, with much solemnity, the manner of using forks in

* The endeavour to enlist for this legion, in 1854, in the United States, gave great offence to the American government. Mr. Crampton, our envoy, was dismissed May 28, 1856, in spite of all the judicious pacific efforts of lord Clarendon. Lord Napier was sent out as our representative in 1857.

† The commissioners appointed to inquire into the state of the woods and forests, between 1787 and 1793, reported the following as belonging to the crown, viz.:—In Berkshire, Windsor Forest and Windsor Great and Little Park. In Dorset, Cranburn Chase. In Essex, Waltham or Epping and Hainault Forest. In Gloucestershire, Dean Forest. In Hampshire, the New Forest, Alice Holt, Woolmer Forest, and Bere Forest. In Kent, Greenwich Park. In Middlesex, St. James's, Hyde, Bushy, and Hampton-court Parks. In Northamptonshire, the forests of Whittlebury, Salcey, and Rockingham. In Nottingham, Sherwood Forest. In Oxford, Whichwood Forest. In Surrey, Richmond Park. Several of these have been disforested since 1851, viz., Hainault, Whichwood, and Whittlebury.

‡ It appears, from official returns, that the first forger on the bank of England was Richard William Vaughan, a linen-draper of Stafford, in 1758, before which time, from the establishment of the bank, a period of sixty-six years, no attempt at this species of forgery had been made. Vaughan employed a number of artists on different parts of the notes fabricated, which had all the appearance of being genuine. The criminal had filled up twenty of the notes, and had deposited them in the hands of a young lady of high respectability, whom he was on the point of marrying, as a proof of his being a man of substance. Bank-notes having been in circulation so long previously, and none having been before counterfeited, no suspicion of these notes was entertained. One of the artists was the informer and accuser.

Italy, and adds, "I myself have thought it good to imitate the Italian fashion since I came home to England," 1608. Two-pronged forks at Sheffield were made soon after. Three-pronged forks are much more recent. Silver forks came into use in England about 1814.

FORMA PAUPERIS. A person having a just cause of suit, certified as such, yet so poor that he cannot meet the cost of maintaining it, has an attorney and counsel assigned him on his swearing that he is not worth 5*l.*, by stat. 11 Henry VII. 1495.—This act has been remodelled, and now persons may plead *in forma pauperis* in the courts of law.

FORMIC ACID. Its artificial production by Pelouze in 1831 is considered an event in the progress of organic chemistry.

FORT ERIE (Upper Canada). This fortress was taken by the American general Browne, June 3, 1814. After several conflicts it was evacuated by the Americans, Nov. 5, 1814.

FORTH AND CLYDE CANAL was commenced July 10, 1768, under the direction of Mr. Smeaton, and opened July 28, 1790. A communication is formed between the eastern and western seas on the coast of Scotland.

FORTIFICATION. The Phœnicians were the first people to fortify cities. Apollodorus says that Perseus fortified Mycenæ, where statues were afterwards erected to him. The modern system was introduced about 1500. Albert Durer first wrote on the science of fortification in 1527; and great improvements were made by Vauban (1707) and others. The fortifications of Paris, the most recent work claiming notice, were completed in 1846. See *Paris*. In Aug. 1860, the British parliament passed an act for the expenditure of 2,000,000*l.* in one year upon the fortifications of Portsmouth, Plymouth, Pembroke, and Portland, the Thames, Medway, and Sheerness, Chatham, Dover, and Cork, and on the purchase of a central arsenal establishment; the estimated expense being 9,500,000*l.*

FORTUNE-TELLING is traced to the early astrologers, by whom the planets Jupiter and Venus were supposed to betoken happiness. The Sibyllæ were women who flourished in different parts of the world, and who were said to have been inspired by Heaven. See *Sibyls* and *Gipsies*. In England the laws against fortune-telling were at one time very severe. A declaration was published in France, Jan. 11, 1680, of exceeding severity against fortune-tellers and poisoners, under which several persons suffered death. *Hénault*. Fortune-tellers, although liable by the act of 1824 to be imprisoned as rogues and vagabonds, still flourish in England.

FORTY-SHILLING FREEHOLDERS. See *Freeholders*.

FOTHERINGAY CASTLE (Northamptonshire), built about 1400. Here Richard III. of England was born in 1450; and here Mary queen of Scots was tried, Oct 11-14, 1586, and beheaded, Feb. 8, 1587. It was demolished by her son, James I. of England, in 1604.

FOUGHARD, near Armagh, N. Ireland. Here Edward, brother of Robert Bruce, after invading Ireland in 1315, was defeated by sir John Berningham in 1318. Bruce was killed by Roger de Maupis, a burgess of Dundalk.

FOUNDLING HOSPITALS. A species of foundling hospital was set up at Milan in 787, and in the middle ages most of the principal cities of the continent possessed one. The French government in 1790 declared foundlings to be the "children of the state."

Foundling hospital at Moscow, founded by Catherine II. in 1763; about 12,000 children are received annually.

Foundling hospitals are recent in England; none existed when Addison wrote in . . . 1713
London foundling hospital, projected by Thomas Coram, a sea-captain, incorporated by charter in Oct. 1739; opened, June 2, 1756

It succours about 500 infant children; Coram's statue was put up in . . . 1856

Foundling hospital in Dublin instituted in 1704.

In this charity there had been received, according to parliamentary returns; in the thirty years preceding Jan. 1825, as many as 52,150 infants; of these, 14,613 had died infants—25,859 were returned as dead from the country, where they were out nursing—730 died in the infirmary after returning—322 died grown children—total deaths, 41,524; so that 10,626 only escaped this fate. Owing to this mortality, and from certain moral considerations, the internal department was closed by order of government . . . March 31, 1835

FOUNTAINS are apparatus, natural or artificial, by which water is made to spring upwards. The fountain of Hero of Alexandria was invented about 150 B.C. Among the remarkable fountains at Rome are the Fontana di Trevi, constructed for pope Clement XII. in 1735; the Fontana Paolina, erected for pope Paul V. in 1612; and Fontana dell' Acqua Felice, called also the Fountain of Moses. The fountains in the palace gardens at Versailles, made for Louis XIV., and the Grand Jet d'Eau, at St. Cloud, are exceedingly beautiful.

There are above 100 public fountains in Paris, the most striking being the Château d'Eau on the Boulevard St. Martin (by Girard, 1811), and that at the Palais Royal. London is not remarkable for fountains; the largest are those in Trafalgar-square, which were constructed in 1845, after designs by sir Charles Barry. There are beautiful fountains at Chatsworth, in Derbyshire, the seat of the duke of Devonshire. The magnificent fountains at the Crystal Palace, Sydenham, were first publicly exhibited on June 18, 1856, in the presence of the queen and 20,000 spectators.

FOURIERISM, a social system devised by M. Charles Fourier (who died in 1837). The Phalanstery (or association of 400 persons living in one edifice) was to be so arranged as to give the highest amount of happiness at the lowest cost. All attempts to realise the system have failed; caused, it is said, by the smallness of the scale on which they were tried.

FOX-GLOVE. The canary fox-glove (*Digitalis Canariensis*), from the Canary islands, 1698. The Madeira fox-glove came here in 1777. The fox-grape shrub (*Vitis Vulpina*), from Virginia, before 1656.

FRANCE was known to the Romans by the name of *Gaul* (*which see*). In the decline of their power it was conquered by the Franks, a people of Germany, then inhabiting Franconia, where they became known about 240. These invaders gave the name to the kingdom (*Franken-ric*, Franks' kingdom); but the Gauls, being by far the most numerous, are the real ancestors of the modern French. The present constitution is chiefly based upon the plebiscitums of Dec. 21, 22, 1851; and Nov. 21, 22, 1852. For the dynastic changes, see list of sovereigns, p. 316. Previous to the revolution, France was divided into 40 governments. In 1790 it was divided into 83, and subsequently into 130 departments, including Corsica, Geneva, Savoy, and other places, chiefly conquests. In 1815 the departments were reduced to 86; in 1860 they were raised to 89 by the acquisition of Savoy and Nice.* For details of important events, see separate articles.

KINGS OF FRANCE.

MEROVINGIAN RACE.

- Pharamond (his existence doubtful).
- 428. Clodion the Hairy; his supposed son: king of the Salic Franks.
- 447. Meroveus, or Mérovée; son-in-law of Clodion.
- 458. Childeric; son of Mérovée.
- 481. Clovis the Great, his son, and the real founder of the monarchy. He left four sons, who divided the empire:
- 511. Childebert; Paris.

- 511. Clodomir; Orleans.
- Thierry; Metz; and
- Clotaire; Soissons.
- 534. Theodebert; Metz.
- 548. Theodebald, succeeded in Metz.
- 558. Clotaire; now sole ruler of France. Upon his death the kingdom was again divided between his four sons: viz.,
- Charibert, ruled at Paris.
- Gontram, in Orleans and Burgundy.

 613. Theodebert II.; Metz.
 613. Clotaire II.; became sole king.
 628. Dagobert the Great, son of Clotaire II.; he divided the kingdom, of which he had become sole monarch, between his two sons:
 638. Clovis II. has Burgundy and Neustria,
 Sigebert II. has Austrasia.
 656. Clotaire III., son of Clovis II.
 670. Childeric II.; he became king of the whole realm of France; assassinated, with his queen and his son Dagobert, in the forest of Livri. *Hénault*.
 [At this time Thierry III. rules in Burgundy and Neustria, and Dagobert II., son of Sigebert, in Austrasia. Dagobert is assassinated, and Thierry reigns alone. *Hénault*.]
 691. Clovis III. Pepin, mayor of the palace, rules the kingdom in the name of this sovereign, who is succeeded by his brother,
 695. Childbert III., surnamed the Just; in this reign Pepin also exercises the royal power.
 711. Dagobert III., son of Childbert.
 716. Chilperic II. (Daniel); he is governed, and at length deposed, by Charles Martel, mayor of the palace, whose sway is now unbounded.
 719. Clotaire IV., of obscure origin, raised by Charles Martel to the throne; dies soon after, and Chilperic is recalled from Aquitaine, whither he had fled for refuge. *Hénault*.
 720. Chilperic II. restored; he shortly afterwards dies at Noyon, and is succeeded by
 " Thierry IV., son of Dagobert III., surnamed *de Chelles*; died in 737. Charles Martel now reigns under the new title of "duke of the French." *Hénault*.
 737. Interregnum, till the death of Charles Martel, in 741; and until

 1316. Philip V. the Long (on account of his stature); brother of Louis; died Jan. 3,
 1322. Charles IV., the Handsome; brother; died Jan. 31, 1328.
- HOUSE OF VALOIS.
1328. Philip VI., de Valois, grandson of Philip the Hardy (called the Fortunate); died Aug. 23.
 1350. John II., the Good; son; died suddenly in the Savoy in London, April 8,

* This great prince wore only a plain doublet in winter, made of an otter's skin, a woollen tunic, fringed with silk, and a blue coat or casack; his hose consisted of transverse bands or fillets of different colours. He would march with the greatest rapidity from the Pyrenean mountains into Germany, and from Germany into Italy. The whole world echoed his name. He was the tallest and the strongest man of his time. In this respect he resembled the heroes of fabulous story; but he differed from them, as he thought that force was of use alone to conquer, and that laws were necessary to govern. Accordingly, he enacted several laws after the form observed in those days, that is, in mixed assemblies, composed of a number of bishops and the principal lords of the nation. *Eginhart*.

FRANCE, *continued.*

1364. Charles V., surnamed the Wise; son; died Sept. 16.
 1380. Charles VI., the Beloved; son; died Oct. 21.

FRENCH EMPIRE.†

[Established by the senate May 18, 1804.]

1804. Napoleon (Bonaparte) I.; born Aug. 15, 1769. He married, first, Josephine, widow of Alexis, vicomte de Beauharnais, March 8, 1796 (who was divorced Dec. 16, 1800, and died May 29, 1814); 2nd, Maria-Louisa of Austria, April 2, 1810 (she died Dec. 17, 1847). He renounced the thrones of France and Italy, and accepted the isle of Elba for his retreat, April 5, 1814; again appeared in France, March 1, 1815; was defeated at Waterloo; finally abdicated in favour of his infant son, June 22, 1815; banished to St. Helena, where he dies, May 5, 1821. (See note, p. 312).

BOURBONS RESTORED.

1814. Louis XVIII. (*comte de Provence*), brother of Louis XVI.; born Nov. 17, 1755; married

* On Monday, the 21st of January, 1793, at eight o'clock in the morning, this unfortunate monarch was summoned to his fate. He ascended the scaffold with a firm air and step; and raising his voice, he said, "Frenchmen, I die innocent of the offences imputed to me. I pardon all my enemies, and I implore of Heaven that my beloved France—" At this instant the inhuman Santerre ordered the drums to beat, and the executioners to perform their office. When the guillotine descended, the priest exclaimed, "Son of St. Louis! ascend to heaven." The bleeding head was then held up, and a few of the populace shouted "*Vive la République!*" The body was interred in a grave that was immediately afterwards filled up with quick lime, and a strong guard was placed around until it should be consumed. *Hist. French Revolution.*

NEW REPUBLIC, 1848.

The revolution commenced in a popular insurrection at Paris, Feb. 22, 1848. The royal family escaped

by flight to England, a provisional government was established, monarchy abolished, and France declared a republic.

Charles-Louis-Napoleon Bonaparte, declared by the National Assembly (Dec. 15) PRESIDENT of the republic of France; and proclaimed next day, Dec. 20; elected for ten years, Jan. 15, 1852.

FRENCH EMPIRE REVIVED.

- [1821. Napoleon II.* (Napoleon-Joseph), son of Napoleon I. and Maria Louisa, archduchess of Austria; born March 20, 1811; created king of Rome. On the abdication of his father he was made duke of Reichstadt, in Austria; and died at the palace of Schoenbrunn, July 22, 1832, aged 21.]

1852. Napoleon (Charles-Louis) III., Dec. 2 (formerly president), the PRESENT (1865) emperor of the French. (See *note*, p. 318.)

Empress: Eugénie-Marie (a Spaniard, formerly countess of Téba), born May 5, 1826; married Jan. 29, 1853.

Heir: Napoleon-Eugène-Louis-Jean-Joseph, born March 16, 1856.

[On Dec. 18, 1852, the succession, in default of issue from the emperor, was determined in favour of prince Jérôme-Napoleon and his heirs male.]

FRANCE, ISLE OF. See *Mauritius*.

FRANCHE COMTÉ, successively part of the kingdom and duchy of Burgundy and the kingdom of France, was given to Philip II. of Spain as the dowry of Isabella of France, whom he married in 1559. It was conquered and retained by Louis XIV. in 1674.

FRANCHISE. A privilege or exemption from ordinary jurisdiction; and anciently an asylum or sanctuary where the person was secure. In Spain, churches and monasteries were, until lately, franchises for criminals, as they were formerly in England. See *Sanctuaries*. In 1429 the ELECTIVE FRANCHISE for counties was restricted to persons having at least 40s. a year in land, and resident. See *Reform*.

FRANCIS' ASSAULT ON THE QUEEN. John Francis, a youth, fired a pistol at queen Victoria, as she was riding down Constitution-hill, in an open barouche, accompanied by prince Albert, May 30, 1842. The queen was uninjured. Previous intimation having reached the palace of the intention of the criminal, her majesty had commanded that none of the ladies of her court should attend her. Francis was condemned to death, June 17 following, but was afterwards transported for life.

FRANCISCANS, Roman Catholic friars, called also Grey friars, founded by Francis de Assisi, about 1209, or 1220. Their rules were chastity, poverty, obedience, and very austere regimen. In 1226 they appeared in England, where, at the time of the dissolution of monasteries by Henry VIII., they had fifty-five abbeys or other houses, 1536-38.

FRANKFORT-ON-THE-MAIN (Central Germany), many ages a free city; was taken and retaken several times during the French wars, and held by Bonaparte from 1803 to 1813, when its independence was guaranteed by the allied sovereigns.

FRANKFORT-ON-THE-ODER (N. Germany); a member of the Hanseatic league, suffered much from marauders in the middle ages, and in the thirty years' war. The university was founded in 1506, and incorporated with the Breslau in 1811. Near Frankfort, on Aug. 12, 1759, Frederick of Prussia was defeated by the Russians and Austrians. See *Cunnersdorf*.

* Deceased to be so termed by the present emperor on his accession.

FRANKING LETTERS, passing letters free of postage, was claimed by parliament about 1660. The privilege was restricted in 1837, and abolished on the introduction of the uniform penny postage, Jan. 10, 1840. The queen was among the first to relinquish her privilege.

FRANKLIN, the English freeholder in the middle ages. See "the Franklin's Tale," in Chaucer's *Canterbury Tales* (written about 1364).

FRANKLIN'S ARCTIC EXPEDITION. Sir John Franklin, with captains Crozier and Fitzjames, in H.M. ships *Erebus* and *Terror* (carrying in all 138 persons), sailed on an arctic expedition of discovery and survey, from Greenhithe, on May 24, 1845. Their last despatches were from the Whalefish islands, dated July 12, 1845. Their protracted absence caused intense anxiety throughout Europe, and numerous expeditions were sent from England and elsewhere in search of them to various parts of the polar regions. Quantities of coals, provisions, clothing, and other necessities, were deposited in such places in the Arctic seas as the crews of the *Erebus* and *Terror* discovery ships might visit, so as to afford them immediate relief, by our own and by the American government, by lady Franklin, and numerous private persons. The *Truclove*, captain Parker, which arrived at Hull, Oct. 4, 1849, from Davis's Straits, brought intelligence (not afterwards confirmed) that the natives had seen sir John Franklin's ships as late as the previous March, beset or frozen up by the ice in Prince Regent's inlet. Other accounts were equally illusory. Her Majesty's government, on March 7, 1850, offered a reward of 20,000*l.* to any party of any country, that should render efficient assistance to the crews of the missing ships. Sir John's first winter quarters were found at Beechy island by captains Ommanney and Penny.

[Sir John Richardson returned to England in 1849, and Dr. Rae continued his search till 1851.]
3. Sir James Ross, with the *Enterprise* and *Investigator* (June 12, 1848), having also sailed in search to Barrow's Straits, returned to England (Scarborough) . . . Nov. 3, 1849
4. The *Enterprise*, capt. Collinson, and *Investigator*, commander McClure, sailed from Plymouth for Behring's Straits . . . Jan. 20, 1850
[Both of these ships proceeded through to the eastward.]
5. Capt. Austin's expedition, viz.: *Resolute*, capt. Austin, C.B.; *Assistance*, capt. Ommanney; *Intrepid*, lieut. Bertie Cator; and *Pioneer*, lieut. Sherard Osborn, sailed from England for Barrow's Straits . . . April 25, "
[Returned Sept. 1851.]
6. The *Lady Franklin*, capt. Penny; and *Sophia*, capt. Stewart, sailed from Aberdeen for Barrow's Straits . . . April 13, "
[Returned home Sept. 1851.]
7. The AMERICAN expedition in the *Advance* and *Rescue*, under lieut. De Haven and Dr. Kane (son of the judge), towards which Mr. Grinnell subscribed 30,000 dollars, sailed for Lancaster Sound and Barrow's Straits; after drifting in the pack down Baffin's Bay, the ships were released in 1851 uninjured, May 25, "
8. The *Felix*, sir John Ross, fitted out chiefly by the Hudson Bay Company, sailed to the same locality . . . May 22, "
[Returned in 1851.]
9. H.M.S. *North Star*, commander Saunders, which had sailed from England in 1849, wintered in Wolstenholme Sound, and returned to Spithead . . . Sept. 28, "
10. H.M.S. *Herald*, capt. Kellett, C.B., which had sailed in 1848, made three voyages to Behring's Straits, and returned in . . . 1851
- Lieut. Pim went to St. Petersburg with the intention of travelling through Siberia to the mouth of the river Kolyma; but was dis-

suaded from proceeding by the Russian government . . . Nov. 18, 1851
[The *Enterprise* and *Investigator* (see No. 4 above) not having been heard of for two years.]

11. Sir Edward Belcher's expedition, consisting of—*Assistance*, sir Edward Belcher, C.B.; *Resolute*, capt. Kellett, C.B.; *North Star*, capt. Pullen; *Intrepid*, capt. McClintock; and *Pioneer*, capt. Sherard Osborn, sailed from Woolwich . . . April 15, 1852
[This expedition had arrived at Beechy Island Aug. 14, 1852. The *Assistance* and *Pioneer* proceeded through Wellington Channel, and the *Resolute* and *Intrepid* to Melville Island; the *North Star* remaining at Beechy Island.]

LADY FRANKLIN'S EQUIPMENTS.

- Lady Franklin, from her own resources, aided by a few friends (and by the "Tasmanian Tribute" of 1500*l.*), equipped four separate private expeditions:
12. The *Prince Albert*, capt. Forsyth, sailed from Aberdeen to Barrow's Straits . . . June 5, 1850
[Returned Oct. 1, 1850.]
 13. The *Prince Albert*, Mr. Kennedy, accompanied by lieut. Bellot, of the French navy, and John Hepburn, sailed from Stromness to Prince Regent's Inlet . . . June 4, 1851
[Returned Oct. 1852.]
 14. The *Isabel*, commander Inglefield, sailed for the head of Baffin's Bay, Jones's Sound, and the Wellington Channel, July 6; and returned . . . Nov. 1852
 15. Mr. Kennedy sailed again in the *Isabel*, on a renewed search to Behring's Straits . . . 1853
 16. H.M.S. *Rattlesnake*, commander Trollope, despatched to assist the *Plover*, capt. Maguire (who succeeded capt. Moore), at Point Barrow in April; met with it . . . Aug. "
 17. The second AMERICAN expedition, the *Advance*, under Dr. Kane, early in . . . June, "
 18. The *Phoenix* (with the *Breadalbane* transport), commander Inglefield, accompanied by lieut. Bellot, sailed in May: he returned, bringing despatches from sir E. Belcher, &c. . . Oct. "

FRANKLIN'S EXPEDITION, *continued.*

The *Investigator* and sir E. Belcher's squadron were safe; but no traces of Franklin's party had been met with. Lieut. Bellet* was unfortunately drowned in August while voluntarily conveying despatches to sir E. Belcher. Capt. McClure had left the *Herald* (10) at Cape Lisburne, July 31, 1850. On Oct. 8, the ship was frozen in, and so continued for nine months. On Oct. 26, 1850, while on an excursion party, the captain discovered an entrance into Barrow's Straits, and thus established the existence of a N.E.—N.W. passage. In Sept. 1851, the ship was again fixed in ice, and so remained till Lieut. Pim and a party from capt. Kellett's ship, the *Resolute* (11), fell in with them in April, 1853. The position of the *Enterprise* (4), was still unknown.

Dr. Rae, in the spring of 1853, again proceeded towards the magnetic pole; and in July, 1854, he reported to the Admiralty that he had purchased from a party of Esquimaux a number of articles which had belonged to sir J. Franklin and his party—namely, sir John's star or order, part of a watch, silver spoons, and forks with crests, &c. He also reported the statement of the natives, that they had met with a party of white men about four winters previous, and had sold them a seal; and that four months later, in the same season, they had found the bodies of thirty men (some buried), who had evidently perished by starvation; the place appears, from the description, to have been in the neighbourhood of the Great Fish river of Back. Dr. Rae arrived in England on Oct. 22, 1854, with the melancholy relics, which have since been deposited in Greenwich hospital. He and his companions were awarded 10,000*l.* for their discovery.

19. The *Phoenix*, *North Star*, and *Talbot*, under the command of capt. Inglefield, sailed in May, and returned in Oct. 1854.

Sir E. Belcher (No. 11), after mature deliberation, in April, 1854, determined to abandon his ships, and gave orders to that effect to all the captains under his command; and capt. Kellett gave similar orders to capt. McClure, of the *Investigator*. The vessels had been abandoned in June, when the crews of the *Phoenix* and *Talbot* (under capt. Inglefield) arrived (19). On their return to England the captains were all tried by court-martial and honourably acquitted. Oct. 17-19, "

Capt. Collinson's fate was long uncertain, and another expedition was in contemplation, when intelligence came, in Feb. 1855, that he had met the *Rattlesnake* (16) at Fort

Clarence in Aug. 21, 1854, and had sailed immediately, in hopes of getting up with capt. Maguire in the *Plover* (1), which had sailed two days previously. Capt. Collinson having failed in getting through the ice in 1850 with capt. McClure, returned to Hong-Kong to winter. In 1851 he passed through Prince of Wales's Straits, and remained in the Arctic regions without obtaining any intelligence of Franklin till July, 1854, when, being once more released from the ice, he sailed for Fort Clarence, where he arrived as above mentioned. Captains Collinson and Maguire arrived in England in May, 1855.

20. The third AMERICAN expedition in search of Dr. Kane, in the *Advance*, consisted of the *Release* and the steamer *Arctic*, the barque *Eringo*, and another vessel under the command of lieut. H. J. Hartstene, accompanied by a brother of Dr. Kane as surgeon, May 31, " [On May 17, 1855, Dr. Kane and his party quitted the *Advance*, and journeyed over the ice, 1300 miles, to the Danish settlement; on their way home in a Danish vessel, they fell in with lieut. Hartstene, Sept. 18; and arrived with him at New York, Oct. 11, 1855. Dr. Kane visited England in 1856; he died in 1857.]

The Hudson's Bay Company, under advice of Dr. Rae and sir G. Back, sent out an overland expedition, June, 1855, which returned Sept. following. Some more remains of Franklin's party were discovered.

21. The 18th British expedition (equipped by lady Franklin and her friends, the government having declined to fit out another)—the *Fox*, screw steamer, under capt. (since sir) F. L. McClintock, R.N. (see No. 11)—sailed from Aberdeen July 1, 1857; returned Sept. 22, 1859.

On May 6, 1859, lieut. Hobson found at Point Victory, near Cape Victoria, besides a cairn, a tin case, containing a paper, signed April 25, 1848, by captain Fitzjames, which certified that the ships *Erebus* and *Terror*, on Sept. 12, 1846, were beset in lat. 70° 05' N., and long. 98° 23' W.; that sir John Franklin died June 11, 1847; and that the ships were deserted April 22, 1848. Captain M'Clintock continued the search, and discovered skeletons and other relics. His journal was published in Dec. 1859; and on May 28, 1860, gold medals were given to him and to lady Franklin by the Royal Geographical Society. Mr. Hall, the arctic explorer, reported, in Aug. 1865, circumstances that led him to hope that capt. Crozier and others were surviving.

FRANKS (or freemen), a name given to a combination of the North-western German tribes about 240, which invaded Gaul and other parts of the empire soon after with various success. See *Gaul* and *France*.

FRATRICELLI (Little Brethren), a sect of the middle ages, originally Franciscan monks of the stricter sort. Their numbers increased, and they were condemned by a papal bull in 1317; and suffered persecution; but were not extinct till the 16th century. They resembled the "Brethren of the Free Spirit."

* A monument to his memory was erected at Greenwich. His "Journal" was published in 1854.

† Capt. Kellett's ship, the *Resolute*, was found adrift 1000 miles distant from where she was left by a Mr. George Henry, commanding an American whaler, who brought her to New York. The British government having abandoned their claim on the vessel, it was bought by order of the American congress, thoroughly repaired and equipped, and entrusted to capt. H. J. Hartstene, to be presented to queen Victoria. It arrived at Southampton Dec. 12, 1856; was visited by her Majesty on the 16th; and formally surrendered on the 30th.

FRAUDULENT TRUSTEES ACT, 20 & 21 Vict. c. 54, was passed in 1857, in consequence of the delinquencies of sir John D. Paul, the British Bank frauds, &c. It was brought in by sir R. Bethell, then attorney-general, and is very stringent.

FRAUNHOFER'S LINES. See *Spectrum*.

FREDERICKSBURG (Virginia, N. America). On Dec. 10, 1862, general Burnside and the federal army of the Potomac crossed the small deep river Rappahannock. On Dec. 11, Fredericksburg was bombarded by the federals and destroyed. On the 13th commenced a series of most desperate yet unsuccessful attacks on the confederate works, defended by generals Lee, Jackson, Longstreet, and others. General Hooker crossed the river with the reserves, and joined in the conflict, in vain. On Dec. 15 and 16 the federal army recrossed the Rappahannock. The battle was one of the most severe in the war.

FREDERICKSHALD (Norway), memorable by Charles XII. of Sweden being killed by a cannon-shot before its walls, while examining the works. He was found with his hand upon his sword, and a prayer-book in his pocket, Dec. 11, 1718.

FREE CHURCH (of Scotland*) was formed by an act of secession of nearly half the body from the national church of Scotland, May 18, 1843. The difference arose on the question of the right of patrons to nominate to livings. The Free Church claims for the parishioners the right of a veto. Much distress was endured the first year by the ministers of the new church, although 366,719*l.* 14*s.* 3*d.* had been subscribed. In 1853 there were 850 congregations. A large college was founded in 1846. In 1856 the sustentation fund amounted to 108,638*l.*, from which was paid the sum of 13*l.* each to 700 ministers.

FREEHOLDERS. Those under forty shillings per annum were not qualified to vote for members of parliament by 8 Hen. VI. c. 7, 1429. Various acts have been passed for the regulation of the franchise at different periods. The more recent were, the act to regulate polling, 9 Geo. IV. 1828; act for the disqualification of freeholders in Ireland, which deprived those of forty shillings of this privilege passed April 13, 1829; Reform Bill, 2 & 3 Will. IV. 1832. County elections act, 7 Will. IV. 1836. See *Chandos Clause*.

FREE TRADE principles, advocated by Adam Smith in his "Wealth of Nations" (1776), triumphed in England when the corn laws were abolished in 1846, and the commercial treaty with France was adopted in 1860. Mr. Richard Cobden, who was very instrumental in passing these measures, has been termed "The Apostle of Free Trade." Since 1830 the exports have been tripled.

FREEMASONRY. Writers on masonry, themselves masons, affirm that it has had a being "ever since symmetry began, and harmony displayed her charms." It is traced by some to the building of Solomon's temple; and it is said the architects from the African coast, Mahometans, brought it into Spain, about the 6th century. Its introduction into Britain has been fixed at 674; many of our Gothic cathedrals are attributed to freemasons. The grand lodge at York was founded 926. Freemasonry was interdicted in England, 1424. In 1717, the grand lodge of England was established; that of Ireland in 1730; and that of Scotland in 1736. Freemasons were excommunicated by the pope in 1738; again condemned, Sept. 30, 1865. The Freemasons' hall, London, was built 1775; the charity was instituted 1788.

FRENCH LANGUAGE is mainly based on the rude Latin which prevailed in the nations subjugated by the Romans. German was introduced by the Franks in the 8th century. In the 9th the Gallo-Romanic dialect became divided into the *Langue d'oc* of the south and the *Langue d'oïl* of the north. The French language as written by Froissart assimilates more to the modern French, and its development was almost completed when the Académie Française, established by Richelieu in 1634, published a dictionary of the language in 1674. The French language, laws, and customs were introduced into England by William I. 1066. Law pleadings were changed from French to English in the reign of Edward III. 1362. *Stow.*

FRENCH REVOLUTIONARY CALENDAR. In 1792, the French nation adopted a new calendar professedly founded on philosophical principles. The first year of the era of the republic began at midnight, between Sept. 21 and 22, 1792; but its establishment was not decreed until the 4th Frimaire of the year II., Nov. 24, 1793. The calendar existed until the 10th Nivose year of the republic XIV., Dec. 31, 1805, when the Gregorian mode of calculation was restored by Napoleon.

FRENCH TREATY, the term given to the treaty of commerce between Great Britain and France, signed Jan. 23, 1860, at Paris by lord Cowley and Mr. Richard Cobden and by the ministers MM. Baroche and Rouher. The beneficial results of this treaty compensated for the depression of trade occasioned by the civil war in North America (1861-5).

FRENCHTOWN (Canada), was taken from the British by the American general Winchester, Jan. 22, 1813, during the second war with the United States of America. It was retaken by the British forces under general Proctor, Jan. 24, and the American commander and troops were made prisoners.

FRESCO PAINTINGS are executed on plaster while fresh. Very ancient ones exist in Egypt and Italy, and modern ones in the British houses of parliament, at Berlin, and other places. The fresco paintings by Giotto and others at the Campo Santo, a cemetery at Pisa, executed in the 13th century are justly celebrated. See *Stereochromy*.

FRIDAY, the sixth day of the week; so called from Friga, the Scandinavian Venus. She was the wife of Thor, and goddess of peace, fertility, and riches; and with Thor and Odin composed the supreme council of the Gods. See *Good Friday*.

FRIEDLAND (Prussia). Here the allied Russians and Prussians were beaten by the French, commanded by Napoleon, on June 14, 1807. The allies lost eighty pieces of cannon and about 18,000 men; the French about 10,000 men. The peace of Tilsit followed, by which Prussia was obliged to surrender nearly half her dominions.

FRIENDLY ISLES, in the Southern Pacific, consist of a group of more than 150 islands, forming an archipelago of very considerable extent. These islands were discovered by Tasman, in 1642; and visited by Wallis, who called them Keppel Isles, 1767; and by captain Cook, who gave them their present name on account of the friendly disposition of the natives, 1773. Subsequent voyagers describe them as very ferocious.

FRIENDLY SOCIETIES originated in the clubs of the industrious classes, about 1793, and have been regulated by various legislative enactments. In 1850, preceding acts were consolidated, and other acts have since passed.

FRIENDS. See *Quakers*.

FRIENDS OF THE PEOPLE associated to obtain parliamentary reform, 1792.

FRIESLAND: EAST (N. Germany), formerly governed by its own counts. On the death of its prince Charles Edward, in 1744, it became subject to the king of Prussia; Hanover disputed its possession, but Prussia prevailed. It was annexed to Holland by Bonaparte, in 1806, and afterwards to the French empire; but was awarded to Hanover in 1814. The English language is said to be mainly derived from the old Frisian dialect.—**FRIESLAND**, West, in Holland, was part of Charlemagne's empire in 800. It passed under the counts of Holland about 936, and was one of the seven provinces which renounced the Spanish yoke in 1580. The term *Chevaux de Frise* (sometimes, though rarely, written *Cheval de Frise*, a *Friesland Horse*) is derived from Friesland, where it was invented.

FROBISHER'S STRAITS, discovered by sir Martin Frobisher, who tried to find a north-west passage to China, and after exploring the coast of New Greenland, entered this strait, Aug. 11, 1576. He returned to England, bringing with him a quantity of black ore, supposed to contain gold, which induced queen Elizabeth to patronise a second voyage. The delusion led to a third fruitless expedition. He was killed at the taking of Brest in 1594.

FRONDE, CIVIL WARS OF THE, in France, in the minority of Louis XIV. (1648-53), during the government of the queen Anne of Austria and cardinal Mazarine, between the followers of the court and the nobility, and the parliament and the citizens. The latter were called *Frondeurs* (*slingers*), it is said, from an incident in a street quarrel. In a riot on Aug. 27, 1648, barricades were erected in Paris.

FROSTS. The following are some of the most remarkable:—

The Euxine Sea frozen over for 20 days	401	his whole army, horse and foot, with large trains of artillery and baggage	1658
A frost at Constantinople, when the two seas there were frozen a hundred miles from the shore Oct. 763—Feb. 764	764	The forest trees, and even the oaks in England, split by the frost; most of the hollies were killed; the Thames was covered with ice eleven inches thick; and nearly all the birds perished*	1684
A frost in England on Midsummer-day is said to have destroyed the fruits of the earth	1035	The wolves, driven by the cold, entered Vienna, and attacked the cattle, and even men	1691
Thames frozen for 14 weeks	1076	Three months' frost, with heavy snow, from Dec. to March, 8 Anne	1709
Dreadful frosts in England from Nov. to April, The Catagat entirely frozen	1294	A fair held on the Thames, and oxen roasted; this frost continued from Nov. 24 to Feb. 9	1716
Baltic passable to travellers for six weeks	1323	One which lasted 9 weeks, when coaches plied upon the Thames, and festivities and diversions of all kinds were enjoyed upon the ice. This season was called the "hard winter"	1740
The Baltic frozen from Pomerania to Denmark, In England, when all the small birds perished, The ice bore riding upon it from Lübeck to Prussia	1402	From Dec. 25 to Jan. 16, and from Jan. 18 to 22; most terrible in its effect	1766
Severe frost, when the large fowl of the air sought shelter in the towns of Germany	1433	One general throughout Europe. The Thames was passable opposite the Custom House, from Nov. to Jan.	1789
The river frozen below London-bridge to Gravesend, from Nov. 24 to Feb. 10	1434	One from Dec. 24, 1794, to Feb. 14, 1795, with the intermission of one day's thaw Jan. 23, 1795	1795
The Baltic frozen, and horse passengers crossed from Denmark to Sweden	1460	Intense frosts all Dec.	1796
The winter so severe in Flanders that the wine distributed was cut by hatchets.	1468	Severe frost in Russia†	1812
Carriages passed over from Lambeth to Westminster	1515	Booths erected on the Thames; the winter very severe in Ireland	1814
Wine in Flanders frozen into solid lumps	1544	The frost so intense in parts of Norway, that quicksilver freezes, and persons exposed to the atmosphere lose their breath	1849
Sledges drawn by oxen travelled on the sea from Rostock to Denmark	1548	Very severe frost in London, Jan. 14 to Feb. 24; and very cold weather up to June 26†	1855
Divisions on the Thames Dec. 21, &c.	1564	Very severe frost from Dec. 20, 1860, to Jan. 5, 1861.† See Cold.	
The Scheldt frozen so hard as to sustain loaded waggons	1565		
The Rhine, Scheldt, and Venice frozen	1594		
Fires and diversions on the Thames	1607		
The rivers of Europe and the Zuyder Zee frozen; ice covers the Hellespont	1622		
Charles X. of Sweden crossed the Little-Belt over the ice from Holstein to Denmark, with			

* "The frost this year was terrible. It began in the beginning of Dec. 1683. The people kept trades on the Thames as in a fair, till Feb. 4, 1684. About forty coaches daily plied on the Thames as on drye land. Bought this book at a shop upon the ice in the middle of the Thames."—*Entry in the memoranda of a Citizen*.

† The frost in Russia in 1812 surpassed in intenseness that of any winter in that country for many preceding years, and was very destructive to the French army in its retreat from Moscow, at the close of that memorable year. Napoleon commenced his retreat on the 9th Nov. when the frost covered the ground, and the men perished in battalions, and the horses fell by hundreds on the roads. What with the loss in battle, and the effects of this awful and calamitous frost, France lost in the campaign of this year more than 400,000 men.

† On Feb. 22, fires were made on the Serpentine, Hyde Park. A traffic on the ice of 35 miles long, was established in Lincolnshire—During the frost of 1860-1, bonfires were lit on the Serpentine, dancing took place, fireworks were let off, &c.

FRUITS. Several varieties of fruit are said to have been introduced into Italy, 70 B.C. *et seq.* Exotic fruits and flowers of various kinds, previously unknown in England, were brought thither between the years 1500 and 1578. See *Gardening and Flowers*.

FUCHSIA, an American plant named after the German botanist Leonard Fuchs, about 1542. The fuchsia fulgens, the most beautiful variety, was introduced from Mexico, about 1830.

FUENTES D'ONORE (Central Spain). On May 2, 1811, Massena crossed the Agueda, with 40,000 infantry, 5000 horse, and about 30 pieces of artillery, to relieve Almeida. He expected every day to be superseded in his command, and wished to make a last effort for his own military character. Wellington could muster no more than 32,000 men, of which only 1200 were cavalry. He however determined to fight rather than give up the blockade of Almeida. After much fighting, night came on and put an end to the battle. Next day, Massena was joined by Bessières with a body of the Imperial guard; and on May 5, the enemy made his grand attack. In all the war there was not a more dangerous hour for England. The fight lasted until evening, when the lower part of the town was abandoned by both parties—the British maintaining the chapel and crags, and the French retiring a cannon-shot from the stream. *Napier*.

FUGGER, a illustrious German family (the present head being prince Leopold Fugger Babenhauser), derives its origin from John Fugger, a master weaver in Augsburg in 1370; and its wealth by trade, and by money-lending to monarchs, especially the emperors.

FUGITIVE SLAVE BILL, passed by the American legislature in 1850. It imposed a fine of 1000 dollars and six months' imprisonment on any person harbouring fugitive slaves or aiding in their escape. This law was declared to be unconstitutional by the judges of the superior court on Feb. 3, 1855. It was carried into effect with great difficulty, and was not received by Massachusetts. It was repealed June 13, 1864. See *Slavery in America*.

FULDA (W. Germany), the seat of an abbey, founded by St. Boniface, the apostle of Germany, in 744. It was made a bishopric in 1752, and a principality in 1803. Napoleon incorporated it with Frankfort in 1810; but in 1815 it was ceded to Hesse-Cassel.

FUMIGATION. Acon, a physician of Agrigentum, is said to have first caused great fires to be lighted and aromatics to be thrown into them to purify the air; and thus to have stopped the plague at Athens and other places in Greece, about 473 B.C.

FUNDS. See *Stocks and Sinking Fund*.

FUNERALS. A tax was laid on funerals in England, 1793. The Romans pronounced harangues over their dead, when eminent for rank, great deeds, and virtues. Theopompus obtained a prize for the best *Funeral Oration* in praise of Mausolus, 353 B.C. Popilia was the first Roman lady who had an oration pronounced at her funeral, which was done by her son, Crassus; and it is observed by Cicero that Julius Cesar did the like for his aunt Julia and his wife Cornelia. In Greece, Solon was the first who pronounced a funeral oration, according to Herodotus, 580 B.C. David lamented over Saul and Jonathan, 1056 B.C., and over Abner, 1048 B.C. 2 Sam. i. and iii.—*Funeral Games*, among the Greeks, were chiefly horse-races; and among the Romans, processions, and mortal combats of gladiators around the funeral pile. These games were abolished by the emperor Claudius, A.D. 47.

PUBLIC FUNERALS voted by parliament:—

Duke of Rutland, in Ireland	Nov. 17, 1787
Lord Nelson (see <i>Nelson</i>)	Jan. 9, 1806
Wm. Pitt	Feb. 22, "
Chas. Jas. Fox	Oct. 10, "

Richard Brinsley Sheridan	July 13, 1816
George Canning	Aug. 16, 1827
Duke of Wellington	Nov. 18, 1852.
Viscount Palmerston (at Her majesty's request)	Oct. 27, 1865

FURRUCKABAD (N. India), a province acquired by the East India Company, in June, 1802. Near the capital of the same name, on Nov. 17, 1804, lord Lake totally defeated the Mahratta chief Holkar, and about 60,000 cavalry, himself losing 2 killed and about 20 wounded.

FURS were worn by Henry I., about 1125. Edward III. enacted that all persons who could not spend 100*l.* a year, should be prohibited this species of finery. March 28, 1336-7.

G.

GABELLE (from *Gabe*, a gift), a term applied to various taxes, but afterwards restricted to the old duty upon salt, first imposed by Philip the Fair on the French in 1286. *Duruy*. Our Edward III., termed Philip of Valois, who first levied the tax, the author of the *Salic* law (from *sal*, salt). The assessments were unequal, being very heavy in some provinces and light in others; owing to privileges and exemptions purchased from the sovereigns in early periods. The tax produced 38 millions of francs in the reign of Louis XVI. It was a grievous burden, and tended to hasten the revolution; during which it was abolished (1790).

GAELIC is the northern branch of the Celtic languages, Irish, Erse, or Highland Scottish, and Manx. The "Dean of Lismore's book" (written 1511-51) contains Gaelic poetry; specimens were published with translations in 1862, by rev. T. M'Lachlan.

GAETA (the ancient Cajeta), a strongly fortified Neapolitan seaport, has undergone several remarkable sieges. It was taken by the French in 1799 and 1806, and by the Austrians in 1815 and 1821. Here the pope, Pius IX., took refuge in 1848, and resided more than a year. Here also Francis II. of Naples, with his queen and court, fled, when Garibaldi entered Naples, Sept. 7, 1860; and here he remained till the city was taken by the Sardinian general Cialdini, Feb. 13, 1861, after a severe siege, uselessly prolonged by a French fleet remaining in the harbour. Cialdini was created duke of Gaeta.

GAGGING BILL, properly so called, meant to protect the king and government from the harangues of seditious meetings, was enacted in 1795, when the popular mind was much excited. In Dec. 1819, soon after the Manchester affray, a bill for restraining public meetings and cheap periodical publications was popularly called "a gagging bill." Statutes coercing popular assemblies, particularly in Ireland, have been also so designated.

GALAPAGOS, islands ceded to the United States by Ecuador, Nov. 3, 1854, the British, French, and other powers protesting against it.

GALATIA, an ancient province of Asia Minor. In the 3rd century B.C. the Gauls under Brennus invaded Greece, crossed the Hellespont, and conquered the Troas 278; were checked by Attalus in a battle about 239; and then settled in what was called afterwards Gallogræcia and Galatia. The country was annexed to the Roman empire B.C. 25, on the death of the king Amyntas. Paul's Epistle to the Galatians was probably written A.D. 58.

GALICIA, a province, N.W. SPAIN, was conquered by D. Junius Brutus, 136 B.C., and by the Vandals, A.D. 419; and was frequently subdued by successive invaders. In 1065, on the death of Ferdinand I. king of Castile and Leon, when his dominions were divided, his son Garcia became king of Galicia. Ruling tyrannically, he was expelled by his brother Sancho; returned at his death in 1072; was again expelled by his brother Alfonso, 1073; and died in prison in 1091. Alfonso, son of Urraca, queen of Castile, was made king of Galicia by her in 1109. He defended his mother, a dissolute woman, against her husband, Alfonso VII., and at her death in 1126, acquired Castile, and once more re-united the kingdoms.—**GALICIA IN POLAND**. East Galicia was acquired by the emperor of Germany at the partition in 1772; and West Galicia at that of 1795. The latter was ceded to the grand-duchy of Warsaw in 1809; but recovered by Austria in 1815. See *Poland*, note.

GALLERIES. See *National, Louvre, and Versailles*.

GALL, ST. (in Switzerland). The abbey was founded in the 7th century, and was surrounded by a town in the 10th. St. Gall became a canton of the Swiss confederation in 1815.

GALLEYS with three rows of rowers, *tri-remes*, were invented by the Corinthians, 786 B.C. *Blair*. The terms "galley slave," and "condemned to the galleys," arose from these sea vessels having from 25 to 30 benches on each side, manned by four or five slaves to each bench. In France they had a general of galleys, of whom the baron de la Garde was the first, 1544. *Hénault*.

GALLIOLI, a sea-port in Turkey in Europe, 128 miles west of Constantinople. It was taken by the Turks in 1357, and fortified by Bajazet I. The first division of the French and English armies proceeding against the Russians landed here in March and April, 1854.

GALUCHES, *French* for overshoes, formerly of leather; but since 1843 made of vulcanised India rubber. The importation of *Galuches* was prohibited by 3 Edw. IV. c. 4 (1463).

GALVANISM AND GALVANO-PLASTICS. See under *Electricity*.

GALWAY (W. Ireland). The ancient settlers here were divided into thirteen tribes, a distinction not yet forgotten. It was taken by Richard de Burgo in 1232. In 1690 Galway declared for king James, but it was invested and taken by general Ginckel immediately after the decisive battle of Aughrim, July 12, 1691. Here is one of the new colleges, endowed by government for the advancement of learning in Ireland, pursuant to act 8 & 9 Vict. c. 66 (1845), inaugurated Oct. 30, 1849. See *Colleges*.*

GAMBOGE, a medicine and pigment, brought from India by the Dutch, about 1600. Hermann in 1677 announced that it was derived from two trees of Ceylon, since ascertained to belong to the order Guttifera.

GAME LAWS are a remnant of the forest laws imposed by William the Conqueror, who, to preserve his game, made it forfeiture of property to disable a wild beast; and loss of eyes, for a stag, buck, or boar. The clergy protested against ameliorations of these laws, under Henry III. The first Game act passed in 1496. Game certificates were first granted with a duty in 1784. Several statutes to prevent the destruction of game have been passed. The Game act (1 & 2 Will. IV. c. 32) greatly modifying all previous laws, was passed in 1831. By it the sale of game is legalised at certain seasons. By the Game Poaching Preventive act, passed in 1862, greatly increased powers were given to the county police.

GAMES. The candidates for athletic games in Greece were dieted on new cheese, dried figs, and boiled grain, with warm water, and no meat. The games were leaping, foot-races, darting, quoits, wrestling, and boxing. See *Capitoline, Isthmian, Olympic, Pythian, Secular games*, &c.

Gaming was introduced into England by the Saxons; the loser was often made a slave to the winner, and sold in traffic like other merchandise. *Camden*.

Act prohibiting gaming to all gentlemen (and interdicting tennis, cards, dice, bowls, &c., to inferior people, except at Christmas time), 33 Hen. VIII. 1541

Gaming-houses licensed in London 1620

Act to prevent excessive and fraudulent gaming, when all private lotteries and the games of Faro, Bassot, and Hazard were suppressed, 13 Geo. II. 1739

The profits of a well-known gaming-house in London for one season have been estimated at 150,000*l.* In one night a million of money is said to have changed hands at this place. *Leigh*. The lord chancellor refused a bankrupt his certificate because he had lost 5*l.* at one time in gaming July 17, 1783

Three ladies of quality convicted in penalties of 50*l.* each for playing at Faro March 11, 1797

Gaming-houses were licensed in Paris until 1836

Any person losing, by betting or playing, more than 100*l.* at any one time, is not compellable to pay the same, 16 Chas. II. 1663

Bonds or other securities given for money won at play not recoverable; and any person losing more than 10*l.* may sue the winner to recover it back, 9 Anne 1710

Amended laws respecting games and wagers, 8 & 9 Vict. c. 109 (1845); by 3 Geo. IV. c. 114, a gaming-house keeper is to be imprisoned with hard labour; and by 2 & 3 Vict. gaming-houses may be entered by the police, and all persons present taken into custody.

Betting-houses suppressed 1853

Public gaming-tables suppressed at Wiesbaden and other places in Germany 1861-2

GAMUT. The invention of the scale of musical intervals (commonly termed *do* or *ut*, *re*, *mi*, *fa*, *sol*, *la*, to which *si* was added afterwards), for which the first seven letters of the alphabet are now employed, is mentioned by Guido Aretino, a Tuscan monk, about 1025.

GANGES CANAL, for irrigating the country between the Ganges and the Jumna. The main line (525 miles long) was opened April 8, 1854. When completed, it will be 900 miles in length, and will irrigate not less than 1,470,000 acres. It is the greatest work of the kind in the world. Its estimated cost is 1,555,548*l.* The immense difficulties in its execution were overcome by the skill and perseverance of its engineer, sir Proby Cautley. In Oct. 1864, sir Arthur Cotton asserted that the work was badly done, and the investment only paid 3 per cent.

GAOL DISTEMPER. See *Old Bailey*.

* In 1853 the sailing of mail steam packets from Galway to America begun; but the subsidy ceased in May, 1861, through the company's breach of contract, which occasioned much discussion in parliament. In July, 1863, the contract for the conveyance of mails from Galway to America was renewed, 75,000*l.* having been voted for the purpose. The scheme was not successful. On Nov. 9 the steamer *Anglia* struck on the Black rock, and the mails were taken to Dublin. The last packet sailed in Feb. 1864.

GARDENING. The first garden, Eden, was planted by God. See *Gen.* ii. Gardening was one of the first arts that succeeded the art of building houses. *Walpole*. Gardens were highly valued by the ancients. The Scriptures abound with allusions to them, particularly the Song of Solomon and the Prophets; and Christ's agony took place in a garden. Xenophon describes the gardens at Sardis; and Epicurus and Plato taught in gardens. Theophrastus's History of Plants was written about 322 B.C. Horace, Virgil, and Ovid derive many images from the garden (50 B.C. to A.D. 50); and Pliny's Tusculan villa is circumstantially described (about A.D. 100). The Romans doubtless introduced gardening into Britain (about A.D. 100), and it was kept up afterwards by the various religious orders. Its cultivation as an art in England is dated from the commencement of the 16th century, when many Flemings came to England in consequence of the persecutions of Philip II. Miller's valuable dictionary was published in 1724; the Horticultural Society (*which see*) was established in 1804; Loudon's valuable Encyclopædia of Gardening was first published in 1822, and his Encyclopædia of Plants in 1829. See *Botany, Flowers, Fruits*. An act for the protection of gardens, and ornamental grounds in cities was passed in 1863.

GAROTTE, a machine for strangling criminals, used in Spain. The term "garotters" was applied to the attempts to strangle made by thieves, very prevalent in the winter of 1862-63. An act was passed in 1863 to punish these acts by flogging.

GARTER, ORDER OF THE, owes its origin to Edward III., who, with a view of recovering France, was eager to draw the best soldiers of Europe into his interest, and thereupon, projecting the revival of king Arthur's round table, he proclaimed a solemn tilting, to invite foreigners and others of quality and courage to the exercise. The king, upon New Year's day, 1344, published royal letters of protection for the safe coming and returning of such foreign knights as had a mind to venture their reputation at the joust and tournaments about to be held. A table was erected in Windsor castle of 200 feet diameter, and the knights were entertained at the king's expense. In 1346 Edward gave his garter for the signal of a battle that had been crowned with success (supposed to be Cressy), and being victorious on sea and land, and having David, king of Scotland, a prisoner, he, in memory of these exploits, is said to have instituted this order, April 23, 1349. The following were the

ORIGINAL KNIGHTS, 1350.
Edward, prince of Wales
(called the Black Prince).
Henry, duke of Lancaster.
Thomas, earl of Warwick.
Piers, captal de Buch.
Ralph, earl of Stafford.
William, earl of Salisbury.
Roger, earl of Mortimer.

Sir John Lisle.
Barth, lord Burghersh.
John, lord Beauchamp.
John, lord Mohun, of Dunstar.
Hugh, lord Courtenay.
Thomas, lord Holland.
Lord Grey, of Codnore.
Sir Richard Fitz-Simon.
Sir Miles Stapleton.

Sir Thomas Wale.
Sir Hugh Wrottesley.
Sir Nele Lorin.
John, Lord Chandos.
Sir James Audley.
Sir Otto Holland.
Sir Henry Eam.
Sir San Daubrichcourt.
Sir Walter Paveley.

Edward gave the garter pre-eminence among the ensigns of the order; it is of blue velvet bordered with gold, with the inscription in old French—"Honi soit qui mal y pense,"—Evil be to him who evil thinks. The knights are installed at Windsor; and were styled *Equites aureæ Periscelidis*, knights of the golden garter. *Beaton*. The honour was conferred on the sultan of Turkey in 1856. The office of GARTER KING AT ARMS was instituted by Henry V. in 1420, and is one of considerable honour; he carries the rod and sceptre at every feast of St George.* *Spelman*. The order of the garter in Ireland was instituted in imitation of that of England, by Edward IV. in 1466; but was abolished by an act of parliament, 10 Hen. VII. 1494. *Ashmole's Instit.* The number of knights was increased in 1786. Many knights were admitted in 1814.

GASCONY (S. W. France) a duchy, part of Aquitaine (*which see*).

GAS-LIGHTS: the inflammable æriform fluid, carburetted hydrogen, evolved by the combustion of coal, was described by Dr. Clayton in 1739. *Phil. Trans.*

Application of coal gas to the purposes of illumination tried by Mr. Murdoch, in Cornwall	1792	1807; Pall Mall, 1809; generally through London	1814
Gaslight introduced at Boulton and Watt's foundry in Birmingham	1798	Mr. David Pollock, father of the chief baron, was governor of the first "chartered" gas company	1812
Permanently used at the cotton-mills of Phillips and Lee, Manchester (1000 burners lighted)	1805	Lyceum Theatre lit with gas as an experiment by Mr. Winsor, 1803; the Haymarket not till 1853	
Introduced in London, at Golden-lane, Aug. 16,			

* The patron saint of England. The order, until king Edward VI.'s time, was called the order of St. George. His figure on horseback, presented as holding a spear, and killing the dragon, was first worn by the knights of the institution. It is suspended by a blue ribbon across the body from the shoulder.—St. George was a tribune in the reign of Diocletian; and being a man of great courage, was a favourite; but complaining to the emperor of his severities towards the Christians, and arguing in their defence, he was put in prison, and beheaded, April 23, 290.—On that day, in 1192, Richard I. defeated Saladin.

GAS-LIGHTS, *continued.*

Gas first used in Dublin, 1818; the streets generally lighted. Oct. 1825
 Gas-lighting introduced in Paris, 1819; ten gas companies in Paris July 1865
 Sydney, in Australia, was lit with gas May 25, 1841
 The gas-pipes in and round London extend upwards of 2000 miles, and are daily increasing.
 It was said in 1860, that of the gas supply of London a leakage of 9 per cent. took place through the faulty joints of the pipes.—The sale of gas is regulated by acts passed in . . . 1860

Processes to obtain illuminating gas from water have been patented by Cruickshanks (1839), White (1849), and others.
 Gas-meters patented by John Malam (1820), sir W. Congreve (1824), Samuel Clegg (1830), Nathan Defries (1838), and others.
 Explosion of a large gasometer at the London Gas-light Company's works at Nine-elms: 10 persons killed, and many injured (first accident of the kind). Oct. 31. 1865

GASES, in chemistry, permanently elastic æriform fluids. See *Oxygen*, *Hydrogen*, and *Nitrogen*. Prof. Thos. Graham's paper on the law of the diffusion of gases appeared in 1834. Furnaces in which gases are used as fuel were devised by Mr. C. W. Siemens, and employed in glass works, &c., in 1861. Lenoir's gas-engine, in which the motive power is obtained by the ignition of combined gases by electricity, was patented by him in 1861. In Dec. 1864, 143 of these engines were working in Paris. They were introduced into England in 1864.

GASTEIN (Salzburg, Austria). The long discussion between Austria and Prussia respecting the disposal of the duchies conquered from Denmark, was closed by a provisional convention signed here by their ministers (Blum for Austria and Bismarck for Prussia), Aug. 14, 1865.* This convention was severely censured by the other powers.

GATESHEAD, a borough in Durham, on the Tyne, opposite Newcastle. At Gateshead-fell, William I. defeated Edgar Atheling in 1068. It was made a parliamentary borough by the reform bill in 1832. Between twelve and one o'clock, Oct. 6, 1854, a fire broke out in a worsted manufactory here, which shortly after set fire to a bond warehouse containing a great quantity of nitre, sulphur, &c., causing a terrific explosion, felt at nearly twenty miles' distance, and totally destroying many buildings, and burying many persons in the ruins. At the moment of the explosion, large masses of blazing materials flew over the Tyne and set fire to many warehouses in Newcastle. About fifty lives were lost, and very many persons were seriously wounded. The damage was estimated at about a million pounds.

GAUGES (in railways). Much discussion (termed "the battle of the gauges") began among engineers about 1833. Mr. I. M. Brunel approved of the broad, adopted on the Great Western railway; and Mr. R. Stephenson, Joseph Locke, and others, of the narrow, that now almost universally adopted, even by the Great Western.

GAUGING, measuring the contents of any vessel of capacity, with respect to wine and other liquids, was established by a law 27 Edw. III. 1352.

GAUL, Gallia, the ancient name of France and Belgium. The natives, termed by the Greeks Galatæ, by the Romans Galli or Celtæ, came originally from Asia, and invading Eastern Europe, were driven westward, and settled in Spain (in Gallicia), North Italy (Gallia Cisalpina), France and Belgium (Gallia Transalpina), and the British isles (the lands of the Cymry or Gaels).

The Phœceans found Massilia, now Marseilles B.C. 600
 The Gauls under Brennus defeat the Romans at the river Allia, and sack Rome; are defeated and expelled by Camillus, July 13, B.C. 390
 The Gauls overrun Northern Greece, 280 B.C.; are beaten at Delphi, 279; and by Sosthenes, king of Macedon 277
 They assist Hannibal 218, &c.
 The Romans conquer Gallia Cisalpina, 220; invade Gallia Transalpina, with various success, 121-58
 They colonise Aix (123 B.C.); and Narbonne . . . 118

* Austria was to have the temporary government of Holstein, and Prussia that of Sleswig; the establishment of a German fleet was proposed, with Kiel as a federal harbour, held by Prussia; Lauenburg was absolutely ceded to Prussia, and the king was to pay Austria as a compensation 2,500,000 Danish dollars.

GAUNTLET, an iron glove, first introduced in the 13th century, perhaps about 1225. It was a part of the full suit of armour, being the armour for the hand. It was commonly thrown down as a challenge to an adversary.

GAUZE, a fabric much prized among the Roman people. "Brocades and damasks and tabbies and gauzes, have been lately brought over" (to Ireland). *Dean Swift*, in 1698. The manufacture of gauze and articles of a like fabric at Paisley, in Scotland, was commenced about 1759.

GAVEL-KIND. The custom of dividing paternal estates in land equally among male children, without any distinction, is derived from the Saxons about 550. This usage is almost universal in Kent, where it was first practised. By the Irish law of gavel-kind, even bastards inherited. *Davies*. Not only the lands of the father were equally divided among all his sons, but the lands of the brother also among all his brethren, if he had no issue of his own. *Law Dict.*

GAZA, a city of the Philistines, of which Samson carried off the gates about 1120 B.C. (*Judges* xvi.) It was taken by Alexander after a long siege, 332; and near to it Ptolemy defeated Demetrius Poliorcetes, 312 B.C. It was taken by Saladin A.D. 1170; and by Bonaparte, March 1799.

GEMS. The ancient Greeks excelled in cutting precious stones, of which many specimens are extant. The art was successfully revived in Italy in the 15th century. In Feb. 1860, Herz's collection of gems was sold for 10,000*l*. The rev. C. King published his "Antique Gems" in 1860, and the "Natural History of Precious Stones and Gems" in 1865. Artificial gems have been recently produced by chemists (Ebelmen, Deville, Wöhler, and others), 1858-65.

GENEALOGY (from the Greek *genca*, birth, descent), the art of tracing pedigrees, &c. The earliest pedigrees are those contained in the 5th, 10th, and 11th chapters of Genesis. The first book of Chronicles contains many genealogies. The pedigree of Christ is given in *Matt.* i. and *Luke* iii. Many books on the subject have been published in all European countries; one at Magdeburg, *Theatrum Genealogicum*, by Henningsen, in 1598. Anderson, *Royal Genealogies*, London, 1732.—Sims' *Manual for the Genealogist*, &c., 1856, will be found a useful guide. The works of Collins (1756 *et seq.*), Edmondson (1764-84), and Nicolas (1825 and 1857), on the British peerage, are highly esteemed. The Genealogical society, London, was established in 1853.

GENERALS. Matthew de Montmorency was the first officer honoured with the title of general of the French armies, 1203. *Hénault*. It is observed by M. Balzac that cardinal Richelieu first coined the word *Generalissimo*, upon his taking the supreme command of the French armies in Italy, in 1629. See *Commanders-in-Chief*.

GENEVA, a town of the Allobroges, a Gallic tribe, 58 B.C.; became part of the empire of Charlemagne, about A.D. 800; and capital of the kingdom of Burgundy 426.

GENS-D'ARMES were anciently the king's horse-guards only, but afterwards the king's *gardes-du-corps*; the musqueteers and light-horse were reckoned among them. There was also a company of gentlemen (whose number was about 250) bearing this name. Scots guards were about the person of the kings of France from the time of St. Louis, who reigned in 1226. They were organised as a royal corps by Charles VII. about 1441. The younger sons of Scottish nobles were usually the captains of this guard. The name *gens-d'armes* was afterwards given to the police; but becoming obnoxious was changed to "municipal guard" in 1830.

GENTLEMAN (from *gentiles*, of a *gens*, a race or clan). The Gauls observing that during the empire of the Romans the *Scutarii* and *Gentiles* had the best appointments of all the soldiers, applied to them the terms *écuyers* and *gentilshommes*. This distinction of gentlemen was much in use in England, and was given to the well descended about 1430. *Sidney*. Gentlemen by blood were those who could show four descents from a gentleman who had been created by the king by letters patent.

GENTLEMEN-AT-ARMS (formerly styled the Band of Gentlemen Pensioners) is the oldest corps in England, with the exception of the Yeoman of the Guard. The band was instituted by Henry VIII. in 1509, and was originally composed entirely of gentlemen of noble blood, whom he named his pensioners or spears. William IV. commanded that it should be called his Majesty's Honourable Corps of Gentlemen-at-Arms, March 7, 1834. *Curling*.

GEOGRAPHY. The first records we have of geographical knowledge are in the Penta-teuch, and in the book of Joshua. Homer describes the shield of Achilles as representing the earth surrounded by the sea, and also the countries of Greece, islands of the Archipelago, and site of Troy. *Iliad*. The priests taught that the temple of Apollo at Delphos was the centre of the world. Anaximander of Miletus was the inventor of geographical maps, about 568 B.C. Hipparchus attempted to reduce geography to a mathematical basis, about 135 B.C. It was first brought to Europe by the Moors of Barbary and Spain, about A.D. 1201. *Langlet*. The invention of the mariner's compass is the important connecting link between ancient and modern geography. The modern maps and charts were introduced into England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, A.D. 1489. Geography is now divided into mathematical, physical, and political. The study has been greatly promoted during the present century by expeditions at the expense of various governments and societies. The Royal Geographical Society of London was established in 1830; that of Paris in 1821.

GEOLOGY, the science of the earth, has been the subject of philosophical speculations from the time of Homer; and it is said to have been cultivated in China many years before the Christian era. It occupied the attention of Pliny, Avicenna, and the Arabian writers.

In 1574 Mercati wrote concerning the fossils in the pope's museum: Cesalpino, Majoli, and others (1597), Steno (1669), Scilla (1670), Quirini (1676), Plot and Lister (1678), Leibnitz (1680) recorded observations, and put forth theories on the various changes in the crust of the earth. Hooke (1668), in his work on Earthquakes, said that fossils, "as monuments of nature, were more

certain tokens of antiquity than coins or medals, and, though difficult, it would not be impossible to raise a chronology out of them." Burnet's "Theory of the Earth," appeared in 1690, Whiston's in 1696. Buffon's geological views (1749) were censured by the Sorbonne in 1751, and recanted in consequence. The principle he renounced was that the present

GEOLOGY, *continued.*

condition of the earth is due to secondary causes, and that these same causes will produce further changes. His more eminent fellow-labourers and successors were Guesner (1758), Michell (1760), Raspe (1762-73), Pallas and Saussure (1793-1800), Werner (1775) ascribed all rocks to an *aqueous* origin, and even denied the existence of volcanoes in primitive geological times, and had many followers, Kirwan, De Luc, &c.—Hutton (1788) supported by Playfair (1801), warmly opposed Werner's views, and asserted that the principal changes in the earth's crust are due to the energy of *fire*. The rival parties were hence termed Neptunists and Vulcanists.

William Smith, the father of British geology (who had walked over a large part of England) drew up a Tabular View of British Strata, in 1799, and published it and his Geological Map of England and Wales, 1812-15.

In 1803 the Royal Institution possessed the best geological collection in London, collected by H. Davy, C. Hatchett, and others; the proposal of sir John St. Aubyn, sir Abraham Hume, and the right hon. C. F. Greville, to aid the government in

establishing a school of mines there in 1804-7, was declined.

In 1807 the Geological Society of London was established, which by collecting a great mass of new data greatly tended to check the disposition to theorise, and led to the introduction of views midway between those of Werner and Hutton.

In 1835 Mr. (afterwards sir Henry) De la Beche suggested the establishment of the present Museum of Geology, which began at Craig's Court, and which was removed to its present position in Jermyn-street. To him is also due the valuable geological maps formed on the ordnance survey. The building was erected by Mr. Pennethorne, and opened in 1851. Attached to the museum are the Mining Records office, a lecture theatre, laboratories, &c. Sir H. De la Beche, the first director, died April 13, 1855, and was succeeded by sir R. I. Murchison. A similar institution was established at Calcutta, in 1840, by the E. I. Company.

The English standard works on Geology at the present time are those of Lyell, Phillips, De la Beche, Murchison, Mantell, and Ansted (1865).

The strata composing the earth's crust may be divided into two great classes: 1st, those generally attributed to the agency of water; 2nd, to the action of fire, which may be subdivided as follows:

Aqueous formation, stratified, rarely crystalline	{ Sedimentary or Fossiliferous rocks.
	{ Metamorphic or Unfossiliferous.
Igneous formations, unstratified, crystalline	{ Volcanic, as Basalt, &c.
	{ Plutonic, as Granite, &c.

Fossiliferous, or Sedimentary, rocks are divided into three great series:—

The Palæozoic (most ancient forms of life), or Primary.	The Neozoic or Cainozoic (more recent forms of life), or Tertiary.
The Mesozoic (middle life period), or Secondary.

GEOMETRY, so termed from its original application to measuring the earth. Its origin is ascribed to the Egyptians; the annual inundations of the Nile having given rise to it by carrying away the landmarks and the boundaries of farms. Thales introduced geometry into Greece, about 600 B.C. Euclid's Elements were compiled about 300 B.C. The doctrine of curves originally attracted the attention of geometers from the conic sections, which were introduced by Plato about 390 B.C. The conchoid curve was invented by Nicomedes, 220 B.C. The science of geometry was taught in Europe in the 13th century. Books on geometry and astronomy were destroyed in England as infected with magic, 7 Edw. VI. 1552. *Stow*. Simson's celebrated edition of Euclid first appeared in 1756.

GEORGE. A gold coin current at 6s. 8d. in the reign of Henry VIII. *Leake*.

GEORGE, ST. The tutelary saint of England, and adopted as patron of the order of the garter by Edward III. His day is April 23. See *Knighthood*.

GEORGES' CONSPIRACY, in France. General Moreau, general Pichegru, Georges Cadoudal, who was commonly known by the name of Georges, and others, were arrested at Paris, charged with a conspiracy against the life of Bonaparte, and for the restoration of Louis XVIII., Feb. 1804. Pichegru was found strangled in prison, April 6. The conspirators were tried, June 9, when seventeen were sentenced to death, and many to imprisonment. Moreau was suffered to leave France, and was escorted from the Temple to embark for America, June 22. In 1813 he was killed before Dresden (*which see*).

GEORGIA, the ancient Iberia, now a province of S. Russia, near the Caucasus, submitted to Alexander, 323 B.C., but threw off the yoke of his successors. It was subjugated to Rome by Pompey, 65 B.C., but retained its own sovereigns. Christianity was introduced into it in the 3rd century. In the 8th century, after a severe struggle, Georgia was subdued by the Arab caliphs; by the Turkish sultan Alp-Arslan, 1068; and by the Tartar hordes, 1235. From the 14th to the 18th centuries, Georgia was successively held by the Persian and Turkish monarchs. In 1740 Nadir Shah established part of Georgia as a principality, of which the last ruler, Heraclius, surrendered his territories to the czar in 1799; and in 1802 Georgia was declared to be a Russian province.—**GEORGIA, IN NORTH AMERICA**, was settled by gen. Oglethorpe, in 1732. Separating from the congress of America, it surrendered to the British, Dec. 1778; and its possession was of vast importance to the royalists in the then war. Count d'Estaing joined the American general Lincoln, and made a desperate attack on Georgia, which failed, and the French fleet returned home; the colony was given up to the Union by the British in 1783. It seceded from the Union, by ordinance, Jan. 18, 1861, and was overrun by Sherman in 1864-5. See *United States*.—**GEORGIA**, in the Pacific, was visited by captain Cook in 1775.

GERMAINS, ST. near Paris, where James II. of England resided in state after his abdication, in 1689, and where he died, Sept. 16, 1701.

GERMANIC CONFEDERATION, constituted by the Allies, 1815, in place of the Confederation of the Rhine (*which see*), now consists of—

The empire of Austria; the kingdoms of Prussia, Hanover, Bavaria, Saxony, and Wurtemberg; 7 grand-duchies (Baden, Hesse, &c.); 8 duchies (Brunswick, &c.); 12 principalities and 1 lordship; 4 free cities (Frankfort, Hamburg, Bremen, and

Lübeck); the late Danish duchies (Schleswig and Holstein); the duchies of Luxemburg and Lemberg belonging to Holland. Population of the whole, in 1853, about 434 millions.—Baron Kubeck, President since May 29, 1859.

GERMANY (*Germania Alemana*), anciently, as now, divided into several independent states. The Germans long withstood the attempts of the Romans to subdue them; and although that people conquered some parts of the country, they were expelled before the close of the 3rd century. In the 5th century the arms of the Huns and other tribes prevailed over the greater portion of Germany. These were subjugated by Charlemagne in the latter

part of the 8th century. He took the title of emperor, entailing the dignity upon his family; but after his race became extinct in 911, the rank was made elective. A member of the house of Austria was elected (almost uninterruptedly) from 1437 until 1804. Germany was divided into circles in 1512; formed into the *Confederation of the Rhine*, in 1804, and into the *Germanic Confederation* in 1815. See *both articles, Austria, &c.*

GERONA (N.E. Spain), an ancient city, frequently besieged and taken. In June, 1808, it successfully resisted the French, but after suffering much by famine, surrendered Dec. 12, 1809.

GETTYSBURG (Philadelphia). Here three days' severe fighting took place on July 1—3, 1863, between the invading confederate army under generals Lee, Longstreet, and Ewell, and the federals under general G. Meade. The confederates were long successful, but eventually were compelled to retire from Pennsylvania and Maryland. The killed and wounded on each side were estimated at about 15,000.

* His son Conradin was proclaimed king of Sicily, which was, however, surrendered to his uncle Manfred, 1254; on whose death it was given by the pope to Charles of Anjou in 1263. Conradin, on the invitation of the Ghibeline party, entered Italy with a large army, and was defeated at Tagliacozzo, Aug. 23, 1268, and beheaded at Naples Oct. 29, thus ending the Hohenstaufen family.

GHEENT, an ancient city in Belgium, built about the 7th century. During the middle ages it became very rich. John, third son of Edward III. of England, was born here in 1340 (hence named *John of Gaunt*), during the revolt under Van Artevelde, a brewer, against the earl Louis, 1379-83. Ghent rebelled against the emperor, Charles V., 1539, for which it was severely punished in 1540. The "Pacification of Ghent" (when the north and south provinces of the Netherlands united against Spain) was proclaimed, Nov. 8, 1576, and broken up in 1579. Ghent was taken by Louis XIV. of France, March 9, 1678, and by the duke of Marlborough in 1706, and afterwards several times taken and retaken. The PEACE OF GHEENT, between Great Britain and America, was signed Dec. 24, 1814.

GHIBELINES. See *Guelphs*.

GHIZNEE, or **GHUZNEE** (East Persia), the seat of the Gaznevdes, who founded the city, 969. They were expelled by the Seljuk Tartars in 1038. The British under sir J. Keane, attacked the citadel of Ghiznee, at two o'clock in the morning, July 23, 1839; it was one of the strongest fortresses in Asia, and was commanded by a son of the ex-king of Cabul. At three o'clock the gates were blown in by the artillery, and under cover of a heavy fire, the infantry forced their way into the place and succeeded at five o'clock in fixing the British colours on its towers.—It capitulated to the Afghans, March 1, 1842, who were defeated Sept. 6, 1842, and general Nott re-entered Ghiznee next day.

GHOSTS are now produced by optical science. Mr. Dircks described his method at the British Association meeting in 1858. Dr. John Taylor exhibited scientific ghosts in March, 1863. Mr. Pepper exhibited the ghost illusion at the Royal Polytechnic institution, July, 1863. See *Cock-lane Ghost*.

GIANTS. Giants' bones, 17, 18, 20, and 30 feet high were once reported to have been found; but geologists now prove them to be the remains of colossal animals.—The battle of Marignano (1515) has been termed the "battle of the *Giants*."

Og, king of Bashan, of the remnant of the giants: his bedstead was 9 cubits long (about $16\frac{1}{2}$ feet). B.C. 1457. (*Deut.* iii. 11.)

Goliath of Gath's "height was 6 cubits and a span." about 1063 B.C. (1 Sam. xvii. 4.)

The emperor Maximin (A.D. 235) was $8\frac{1}{2}$ feet in height, and of great bulk. Some say between 7 and 8 feet; others above 8.

"The tallest man that hath been seen in our age was one named Gabara, who, in the days of Claudius, the late emperor, was brought out of Arabia. He was 9 feet 9 inches high." *Pliney*.

John Middleton, of Hale, in Lancashire, born in 1578, was 9 feet 3 inches high.*

Patrik Cotter, the celebrated Irish giant, born in 1761, was 8 feet 7 inches in height; his hand, from the commencement of the palm to the extremity of

the middle finger, measured 12 inches, and his shoe was 17 inches long; he died in Sept. 1806, in his 46th year.

Big Sam, the porter of the prince of Wales, at Carlton-palace, was near 8 feet high, and performed as a giant in the romance of "Cymon," at the Opera-house, while the Drury-lane company had the use of that theatre until their own was rebuilt in 1809. M. Brice, a native of the Vosges, in London in Sept. 1862, 7 feet 6 inches high.

Robert Hales, the Norfolk giant, died at Great Yarmouth Nov. 22, 1863 (aged 43). He was 7 feet 6 inches high, and weighed 452 lb.

Chang-Woo-Gow, a Chinese, aged 19, 7 feet 8 inches high, exhibited himself in London in Sept. &c. 1865. A giant styled "Anak" was exhibited in London, Nov. 1865.

GIAOUR, Turkish for infidel, a term applied to all who do not believe in Mahomedanism. —Byron's poem, "The Giaour," was published in 1813.

GIBRALTAR. The ancient Calpe (which, with Abyla, on the opposite shore of Africa, obtained the name of the Pillars of Hercules), a town on a rock in South Spain, on which is placed a British fortress, considered impregnable. The height of the rock, according to Cuvier, is 1437 English feet. It was taken by the Saracens under Tarik, whence its present name (derived from *Gibel-el-Tarik*, Mountain of Tarik), in 711.

It was taken from the Moors in 1309; retaken by them, 1333; and finally taken from them by Henry IV. of Castile, in . . . 1462

Gibraltar attacked by the British under sir George Rooke, the prince of Hesse-Darmstadt, sir John Leake, and admiral Byng, July 21st, and taken on the 24th . . . 1704

The Spaniards again attack Gibraltar, and are repulsed with great loss . . . 1720

* It is reported that one of the Irelands took him to London, and introduced him, dressed up in a very fantastic style, to king James the First. On his return from London, a portrait was taken of him, which is preserved in the library of Brazenose college, at Oxford; and Dr. Plot gives the following account of him:—"John Middleton, commonly called the child of Hale, whose hand, from the carpus to the end of his middle finger, was 17 inches long; his palm $8\frac{1}{2}$ inches broad; and his whole height 9 feet 3 inches, wanting but 6 inches of the size of Goliath."—*Nat. Hist. of Staffordshire*, p. 295.

GIBRALTAR, *continued.*

They again attack it with a force of 20,000 men, and lose 5000, while the loss of the English is only 300 Feb. 22, 1727

 Royal battery destroyed by fire Nov. 1800
 Engagement between the French and English fleets in the bay; H.M.S. *Hannibal*, 74 guns, lost July 6, 1801
 The *Royal Carlos* and *St. Hermenegildo* Spanish

ships, each of 112 guns, blew up, with their crews, at night-time, in the straits here, and all on board perished July 12, 1801
 A malignant disease caused a great mortality here in 1804
 A dreadful plague raged 1805
 A malignant fever raged Aug. 1814

 The fatal epidemic ceased Jan. 12, 1829

GILDING was practised at Rome, about 145 B.C. The capitol was the first building on which this enrichment was bestowed. *Pliny*. Of gold leaf for gilding the Romans made but 750 leaves, four fingers square, out of a whole ounce. *Pliny*. It consequently was more like our plating. *Trusler*. A single grain of gold may now be stretched out under the hammer into a leaf that will cover a house. *Dr. Halley*. Gilding with leaf gold on *bole ammoniac* was first introduced by Margaritone in 1273. Gilding on wood formed part of the decorations of the Jewish tabernacle (*Exod.* xxv. 11.); and was improved in 1680. See *Electrotype*.

GIN, ardent spirit, flavoured with the essential oil of the juniper berry. The "gin act," laying an excise of 5s. per gallon upon it, passed July 14, 1736, when it had been found, in the preceding year, that in London alone 7044 houses sold gin by retail; and it was so cheap that the poor could intoxicate themselves for one penny. *Salmon*. About 1700 gin-shops were suppressed in London in 1750. *Clarke*.

GIPSIES. See *Gypsies*.

GIRAFFE, or CAMELOPARD, a native of the interior of Africa, was well known to the ancients. In 1827 one was brought to England for the first time as a present to George IV. It died in 1829. On May 25, 1835, four giraffes, obtained by M. Thibaut, were introduced into the Zoological gardens, Regent's park, where a young one was born in 1839.

GIRONDISTS, an important party during the French revolution, principally composed of deputies from the Gironde. At first they were ardent republicans, but after the cruelties of Aug. and Sept. 1792, they laboured to restrain the cruelties of the Mountain party, to which they succumbed. Their leaders, Brissot, Vergniaud, and many others, were guillotined Oct. 31, 1793, at the instigation of Robespierre. Lamartine's "*Histoire des Girondins*," published in 1847, tended to hasten the revolution in 1848.

GISORS, BATTLE OF (France), on Sept. 20, 28, or Oct. 10, 1198, between the armies of France and England. The former was signally defeated by Richard I., who commanded the English, and his parole for the day, "*Dieu et mon droit*"—"God and my right," afterwards became the motto to the arms of England.

GLADIATORS were originally malefactors, who fought for their lives, or captives who fought for freedom. They were exhibited at the funeral ceremonies of the Romans, 263 B.C., probably following the Greek custom of sacrificing to the manes of deceased warriors, the prisoners taken in battle. Gladiator fights afterwards exhibited at festivals, about 215 B.C. When Dacia was reduced by Trajan, 1000 gladiators fought at Rome in celebration of his triumph, for 123 days, A.D. 103. These combats were suppressed in the East by Constantine the Great, A.D. 325, and in the West by Theodoric in 500. *Lenglet*.

GLANDELAGH, BISHOPRIC OF (Ireland), has been united to the arch-prelacy of Dublin since the year 1214. St. Keiven seems to have been the founder of this see; he resigned in 612. Glendalagh is now commonly known by the name of the Seven Churches, from the remains of so many buildings contiguous to the cathedral.

* In one night their floating batteries were destroyed with red-hot balls, and their whole line of works annihilated by a sortie from the garrison, commanded by general Elliot, Nov. 27, 1781. The enemy's loss in munitions of war, on this night alone, was estimated at upwards of 2,000,000 sterling. The army amounted to 40,000 men. But their grand defeat by a garrison of only 7000 British occurred Sept. 13, 1782. The duke of Crillon commanded 12,000 of the best troops of France. 1000 pieces of artillery were brought to bear against the fortress, besides which there were 47 sail of the line, all three-deckers; 10 great floating batteries, esteemed invincible, carrying 212 guns; innumerable frigates, xebecs, bomb-ketches, cutters, and gun and mortar boats; while small craft for disembarking the forces covered the bay. For weeks together 6000 shells were daily thrown into the town; and on a single occasion 8000 barrels of gunpowder were expended by the enemy.

GLASGOW (Lanarkshire), the largest city in Scotland. Its prosperity was immensely increased after the union in 1707, in consequence of its obtaining some of the American trade. Population in 1707 about 12,000; in 1861, 394,857.

GLASGOW, BISHOPRIC OF. Kennet, in his *Antiquities*, says it was founded by St. Kentigern, *alias* Mungo, in 560; while others affirm that Mungo was a holy man who had a cell here, whose sanctity was held in such veneration that the church was dedicated to him. Dr. Heylin, speaking of the see of St. Asaph, in Wales, says that *that* see was founded by St. Kentigern, a Scot, then bishop of Glasgow in 583. This prelacy became archiepiscopal in 1491, and ceased at the Revolution. Glasgow is now a post-revolution bishopric. The cathedral was commenced in 1121, and has been beautified and improved at various periods since. It has a noble crypt. See *Bishops*.

GLASITES (in Scotland) and SANDEMANIANS (in England), names given to a small body of Christians, whose tenets (professedly derived from the Holy Scriptures alone) are set forth in the "Testimony of the King of Martyrs" published by John Glas, a minister of the Church of Scotland in 1727, and in his son-in-law, Robert Sandeman's "Letters on Theron and Aspasio" (1755). Churches were first formed by them on what were considered the primitive models, in Scotland, about 1728, and in England about 1755, some of which still exist. They hold that true faith is the gift of God, and not to be taught or acquired by man; and that it produces love to God and good works. They partake weekly of the Lord's supper and love-feasts (see *Agape*), avoid eating blood, and maintain the primitive discipline. They erected a new meeting-house at Barnsbury, London, N., in 1862.

GLASS. The Egyptians are said to have been taught the art of making glass by Hermes. The discovery of glass took place in Syria. *Pliny*. Glass-houses were erected in Tyre, where glass was a staple manufacture for many ages. This article is mentioned among the Romans in the time of Tiberius; and we know from the ruins of Pompeii, that windows were formed of glass before 79. Italy had the first glass windows; next France, whence they came to England.

Glass is said to have been brought to England by Benedict Biscop, abbot of Wearmouth, in the manufacture established in England at Crutched-friars, and in Savoy (in *Stow*) . . . 1557

Great improvements have been made in the manufacture, through the immense increase of chemical knowledge in the present century. Professor Faraday published his researches on the manufacture of glass for optical purposes in . . . 1830

The duties on glass, first imposed 1695, were finally remitted 1845

PAINTING ON GLASS, a very early art, was practised at Marseilles in a beautiful style, about 1500

It reached to a state of great perfection about 1530

GLASS-PLATE, for coach-windows, mirrors, &c., made at Lambeth by Venetian artists, under the patronage of Villiers duke of Buckingham 1673

The manufacture was improved by the French, who made very large plates; and further improvements in it were made in Lancashire in 1773, when the British Plate Glass Company was established.

Manufacture of British sheet glass introduced by Messrs. Chance, of Birmingham, about . 1832

GLASTONBURY, said to have been the residence of Joseph of Arimathea, and the site of the first Christian church in Britain, about 60. A church was built here by Iua about 718. The town and abbey were burnt, 1184. An earthquake did great damage in 1276. Richard Whiting, the last abbot, who had 100 monks and 400 domestics, was hanged on Tor-hill in his pontificals, with the abbots of Reading and Colchester, for refusing to take the oath of supremacy to Henry VIII., Nov. 1539.

GLENCOE MASSACRE of the unsuspecting inhabitants, the Macdonalds, merely for not surrendering before the time stated in King William's proclamation, Dec. 31, 1691. Sir John Dalrymple the master, afterwards earl of Stair, their inveterate enemy, obtained a decree "to extirpate that set of thieves," which the king is said to have signed without perusing. Every man under 70 was to be slain. This mandate was executed with the blackest treachery. The 120 soldiers were hospitably received by the Highlanders. On Feb. 13, 1692, the massacre began. About 60 men were brutally slain; and many women and children, their wives and offspring, were turned out naked in a dark and freezing night, and perished by cold and hunger. This black deed was perpetrated by a part of the earl of Argyle's regiment. It excited great indignation in England; and an inquiry was set on foot in 1695, but no capital punishment followed.

GLOBE. The globular form of the earth, the five zones, some of the principal circles of the sphere, the opacity of the moon, and the true causes of lunar eclipses, were taught, and an eclipse predicted, by Thales of Miletus, about 640 B.C. Pythagoras demonstrated, from the varying altitudes of the stars by change of place, that the earth must be round; that there might be antipodes on the opposite part of the globe; that Venus was the morning and evening star; that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the spheres of the moon, the sun; Venus, Mercury, Mars, Jupiter, Saturn, and the sphere of the stars; about 506 B.C.—Aristarchus, of Samos, maintained that the earth turned on its own axis, and revolved about the sun; which doctrine was held by his contemporaries as so absurd, that the philosopher nearly lost his life by his theory, 280 B.C. To determine the figure of the earth, a degree of latitude has been measured in different parts of the world by eminent philosophers; for this purpose Bouguer and La Condamine were sent to Peru, and Maupertuis and others to Lapland, in 1735. France and Spain were measured by Mechain, Delambre, Biot, and Arago, between 1792 and 1821. Measurements were made in India by col. (now sir George) Everest, and published in 1830. Experiments have been made by pendulums to demonstrate the rotation of the earth by Foucault in 1851; and to determine its density by Maskelyne, Bailly, and others; and in 1826, 1828, and 1854, by Mr. G. B. Airy, the astronomer Royal. See *Circumnavigators*.

ARTIFICIAL GLOBES. It is said that a celestial globe was brought to Greece from Egypt, 358 B.C., and that Archimedes constructed a planetarium about 212 B.C.

The globe of Gottorp is a concave sphere, eleven feet in diameter, containing a table and seats for twelve persons, and the inside representing the visible surface of the heavens, the stars and constellations all distinguished according to their respective magnitudes, and being turned by means of curious mechanism, their true position, rising, and setting, are shown. The outside is a terrestrial globe. This machine is called the globe of Gottorp, from the original one of that name, which, at the expense of Frederick II. duke of Holstein, was erected at Gottorp, under the direction of Adam

Olearius, and was planned after a design found among the papers of the celebrated Tycho Brahe. Frederick IV. of Denmark presented it to Peter the Great in 1713. It was nearly destroyed by fire in 1757; but it was afterwards reconstructed. *Coze*.

The globe at Pembroke-hall was erected by Dr. Long; it far surpasses the other, being eighteen feet in diameter, and thirty persons can sit conveniently within it while it is in motion.

In 1831 Mr. Abrahams erected in Leicester-square, for Mr. Wylde, a globe 60 feet 4 inches in diameter, lit from the centre by day, and by gas at night. It was closed in July, 1861; the models were sold, and the building eventually taken down.

GLOBE THEATRE, BANKSIDE (London). See *Shakespeare's Theatre*.

GLOIRE, French steam frigate. See *Navy, French*.

GLORY, the nimbus drawn by painters round the heads of saints, angels, and holy men, and the circle of rays on images, adopted from the Cæsars and their flatterers, were used in the 1st century. The doxology of the prayer *Gloria Patri* was ordained in the church of Rome, and was called doxology because it began with *doxa, glory*, 382.

GLOUCESTER, a Roman colony (*Glevum*), built by Arrivagus, 47, in honour of Claudius Cæsar, whose daughter he had married. In 1278-9 the statutes of Gloucester were passed at a parliament held by Edward I. This city was incorporated by Henry III.; it was fortified by a strong wall, which was demolished after the Restoration, in 1660, by order of Charles II., as a punishment for the obstinate resistance of the city to Charles I., in 1643,

under col. Massey. The Gloucester and Berkeley canal was completed in April, 1827. Gross bribery took place here at the election for the parliament in 1859.—It was one of the six bishoprics erected by Henry VIII. in 1541, and was formerly part of Worcester. It was united to that of Bristol in 1836. The church, which belonged to the abbey, and its revenues, were appropriated to the maintenance of the see. The abbey, which was founded by king Wulphere about 700, was burnt in 1102, and again in 1122. In it are the tombs of Robert, duke of Normandy, and Edward II. In the king's books, this bishopric is valued at 315*l.* 17*s.* 2*d.* per annum. Present income, 5000*l.*

GLOVES. In the middle ages, the giving a glove was a ceremony of investiture in bestowing lands and dignities; and two bishops were put in possession of their sees by each receiving a glove, 1002. In England, in the reign of Edward II. the deprivation of gloves was a ceremony of degradation. The Glovers' company of London was incorporated in 1556. Embroidered gloves were introduced into England in 1580, and are still presented to judges at maiden assizes.

GLUCINUM (from *glukus*, sweet). In 1798 Vauquelin discovered the earth *glucina* (so termed from the sweet taste of its salts). It is found in the beryl and other crystals. From glucina Wöhler and Bussy obtained the rare metal glucinum in 1828. *Gmelin*.

GLUCOSE. See *Sugar*.

GLUTEN, an important ingredient of grain, particularly wheat, containing nitrogen, and termed the vegeto-animal principle. Its discovery is attributed to Beccaria in the 18th century.

GLYCERINE, discovered by Scheele, about 1779, and termed by him the "sweet principle of fats," and further studied by Chevreul, termed the "father of the fatty acids." It is obtained pure by saponifying olive oil or animal fat with oxide of lead, or litharge. Glycerine is now much employed in medicine and the arts.

GNOSTICS (from the Greek *gnōsis*, knowledge), a sect who soon after the preaching of Christianity, endeavoured to combine its principles with the Greek philosophies. Among their teachers were Saturnius, 111; Basilides, 134; and Valentine, 140. Priscillian, a Spaniard, was burnt at Thebes as a heretic, in 384, for endeavouring to revive Gnosticism.

GOA (S.W. Hindostan), was taken by the Portuguese under Albuquerque in 1510, and made their Indian capital.

GOBELIN-TAPESTRY, so called from a house at Paris, formerly possessed by wool-dyers, whereof the chief (Giles Gobelin) in the reign of Francis I., is said to have found the secret of dyeing scarlet. This house was purchased by Louis XIV. for a manufactory of works for adorning palaces, under the direction of Colbert, especially tapestry, designs for which were drawn by Le Brun, about 1666.

"**GOD BLESS YOU!**" We are told that in the time of pope Pelagius II. a plague raged at Rome of so fatal a nature, that persons seized with it died sneezing and gaping; whence came the custom of saying "*God Bless you!*" when a person sneezes, and of Roman Catholics making the sign of the cross upon the mouth when any one gapes; 582. *Nouv. Dict.*

"**GOD SAVE THE KING.**" This melody is said to have been composed by John Bull, Mus. D., in 1606, for a dinner given to James I. at Merchant Taylors' Hall; others ascribe it to Henry Carey, about 1743. It has been claimed by the French. The controversy on the subject is summed up in Chappell's "*Popular Music of the Olden Times*" (1859).

GODERICH ADMINISTRATION. Viscount Goderich* (afterwards earl of Ripon) became first minister on the death of Mr. Canning, Aug. 8, 1827; resigned Jan. 8, 1828.

* Born 1782; held various inferior appointments from 1809 to 1818, when he became president of the board of trade; was chancellor of the exchequer from 1818 to April, 1827, when he became colonial secretary, which office he held in the Grey cabinet, Nov. 1830; created earl of Ripon, 1833; died 1859.

GODERICH ADMINISTRATION, *continued.*

Viscount Goderich, *first lord of the treasury*.
 Duke of Portland, *president of the council*.
 Lord Lyndhurst, *lord chancellor*.
 Earl of Carlisle, *lord privy seal*.
 Viscount Dudley, Mr. Huskisson, and the marquess
 of Lansdowne, *foreign, colonial, and home secre-*
taries.

Lord Palmerston, *secretary-at-war*.
 Mr. Wynn, *president of the India board*.
 Mr. Charles Grant (afterwards lord Glenelg), *board*
of trade.
 Mr. Herries, *chancellor of the exchequer*.
 Mr. Tierney, *master of the mint, &c.*

GODFATHERS AND GODMOTHERS. The Jews are said to have had godfathers in the circumcision of their sons; but there is no mention of them in scripture. The custom was first ordained, according to some by pope Alexander; according to others by Sixtus; others refer it to Telephorus, about 130, and others to Hyginus about 140. In Roman Catholic countries bells have godfathers and godmothers at their baptism.

GODOLPHIN ADMINISTRATIONS, 1684 and 1690. The earl of Godolphin became prime minister to queen Anne, May 8, 1702; received the treasurer's staff two days afterwards; resigned Aug. 8, 1710; and died 1712. See *Administrations*.

Sidney, lord (afterwards earl) Godolphin, *treasury*.
 Thomas, earl of Pembroke and Montgomery, *lord*
president.
 John Sheffield, marquess of Normanby (afterwards
 duke of Normanby and Buckingham), *privy seal*.

Hon. Henry Boyle, *chancellor of the exchequer*.
 Sir Charles Hedges and the earl of Nottingham (the
 latter succeeded by the right hon. Robert Harley,
 created earl of Oxford in 1704), *secretaries of state,*
&c.

GODWIN'S OATH. "Take care you are not swearing Godwin's oath." This caution, to a person taking a voluntary and intemperate oath, or making violent protestations, had its rise in the following circumstance related by the monks: Godwin, earl of Kent, was tried for the murder of prince Alfred, brother of Edward the Confessor, and pardoned, but died at the king's table while protesting with oaths his innocence of the murder; supposed by the historians of those times to have been choked with a piece of bread, as a judgment from Heaven, having prayed it might stick in his throat if he were guilty of the murder; 1053.

GODWIN SANDS, sand-banks off the east coast of Kent, occupy land which belonged to Godwin, earl of Kent, the father of king Harold II. This ground was afterwards given to the monastery of St. Augustin at Canterbury; but the abbot neglecting to keep in repair the wall that defended it from the sea, the tract was submerged in 1100, leaving these sands, upon which many ships have been wrecked. *Salmon.*

GOLD.* The purest and most ductile of all the metals, for which reason it has, from the earliest ages, been considered by almost all nations as the most valuable. It is too soft to be used pure, and to harden it it is alloyed with copper or silver: our coin consists of twenty-two carats of pure gold, and two of copper. In the early ages no metals were used but those found pure, as gold, silver, and copper. By 17 & 18 Vict. c. 96 (1854), gold wares are allowed to be manufactured at a lower standard than formerly; wedding rings excepted, by 18 & 19 Vict. c. 60 (1855). The present stated price is 3*l.* 17*s.* 10½*d.* per oz. See *Coin of England and Guineas*.

 The gold coin brought into the Mint by pro-
 clamations in 1773-6, amounted to about
 15,563,593*l.*; the expense of collecting, melt-
 ing, and re-coining it, was 754,019*l.*

Act for weighing gold coin passed, June 13, 1774
 Proclamation for issuing gold 7*s.* pieces Nov. 20, 1797

"The quantity of gold that passed through the Mint, since the accession of queen Elizabeth to the throne, in 1558, to the beginning of 1840, is 3,353,561 pounds weight, troy. Of this, nearly one-half was coined in the reign of George III., namely, 1,593,078 pounds weight, troy. The value of the gold coined in the reign of that sovereign was 74,501,586*l.*"
Professor Faraday.

The weight of gold coined in Victoria's reign, from June, 1837 to Jan. 1848, was 746,452 lb.; the value of this amount coined was 29,886,457*l.* Gold coined in 1853 (when Australian gold came in), 12,664,125*l.*; in 1854, 4,354,201*l.*; in 1855, 9,245,264*l.*; in 1856, 6,476,060*l.*

* The amalgamation of gold is described by Pliny (about 77) and Vitruvius (about B.C. 27). The alchemist Basil Valentine (in the 15th century) was acquainted with the solution of the chloride of gold and fulminating gold. Andreas Cassius in 1685, described the preparation of *gold purple*, which was then adapted by Kunkel to make *red glass*, and to other purposes. *Gmelin*. Gold has been subjected to the researches of eminent chemists, such as Berzelius and Faraday, up to the present day.

GOLD, *continued.*

GOLD MINES. Gold was found most abundantly in Africa, Japan, and South America, in which last gold was discovered by the Spaniards in 1492, from which time to 1731 they imported into Europe 6000 millions of pieces of eight, in register gold and silver, exclusively of what were unregistered.

A piece of gold weighing ninety marks, equal to sixty pounds troy (the mark being eight ounces), was found near La Paz, a town of Peru, 1730.

Gold was discovered in Malacca in 1731; in New Andalusia in 1785; in Ceylon, 1800; 2887 oz. of gold, value 999*l.*, obtained from mines in Britain and Ireland in 1864; has been found in Cornwall, and in the county of Wicklow in Ireland.

The Ural or Oural mountains of Russia long produced gold in large quantity.

Gold discovered in California, 1847; and in Australia, 1851. On April 28, 1858, a nugget, said to weigh 146 pounds, was shown to the queen. It is estimated that between 1851 and 1859 gold to the value of 88,889,435*l.* was exported from Victoria alone. See *California* and *Australia* severally.

Gold discovered in what is now termed New Columbia in 1856; much emigration there in 1858.

Gold discovered in New Zealand, and in Nova Scotia in 1861.

GOLD WIRE was first made in Italy about 1350. An ounce of gold is sufficient to gild a silver wire above 1300 miles in length; and such is its tenacity that a wire the one-eighteenth part of an inch will bear the weight of 500 lb. without breaking.

Fourcroy.

A single grain of gold may be extended into a leaf of fifty-six square inches, and gold leaf can be reduced to the 300,000 part of an inch, and gilding to the ten-millionth part. *Kelly's Cambist.*
GOLD ROBBERY. Three boxes, hooped and sealed, containing gold in bars and coin to the value of between 18,000*l.* and 20,000*l.* were sent from London, May 15, 1855. On their arrival in Paris, it was found that ingots to the value of 12,000*l.* had been abstracted, and shot substituted, although the boxes bore no marks of violence. Many persons were apprehended on suspicion; but the police obtained no trace till Nov. 1856. Three men named Pierce, Burgess, and Tester, were tried and convicted Jan. 13-15, 1857, on the evidence of Edward Agar, an accomplice. They had been preparing for the robbery for eighteen months previous to its perpetration.

GOLD FISH. Brought to England from China in 1691; but not common till 1723.

GOLDEN BULL. See *Bulls*.

GOLDEN FLEECE (see *Argonauts*). Philip the Good, duke of Burgundy, in 1429, instituted the military order of "*Toison d'or*" or "golden fleece." The number of knights was thirty-one. The king of Spain afterwards became grand master of the order, as duke of Burgundy. It was said to have been instituted on account of the immense profit the duke made by wool. The first solemnities were performed at Burgos, at this duke's marriage with Isabel of Portugal. The knights wore a scarlet cloak lined with ermine, with a collar opened, and the duke's cipher, in the form of a B, to signify Burgundy, together with flints striking fire, with the motto "*Ante ferit, quam flammam micat*." At the end of the collar hung a golden-fleece, with this device, "*Præitium non vile laborum*." The order afterwards became common to all the princes of the house of Austria, as being descended from Mary, daughter of Charles the Bold, last duke of Burgundy. The order now belongs to both Austria and Spain, in conformity with a treaty made in 1725.

GOLDEN HORDE, a name given to the Mongolian Tartars who established an empire in Kaptehak (or Kibzak), now S.E. Russia, about 1224, their ruler being Batou, grandson of Gengis Khan. They invaded Russia, and made Alexander Newski grand-duke, 1252. At the battle of Bielawisch, in 1481, they were crushed by Ivan III. and his allies the Nogai Tartars.

GOLDEN NUMBER, the cycle of nineteen years, or the number which shows the years of the moon's cycle; its invention is ascribed to Meton, of Athens, about 432 B.C. *Pliny*. To find the golden number or year of the lunar cycle, add one to the date and divide by nineteen, then the quotient is the number of cycles since Christ, and the remainder is the golden number. The golden number for 1865, is 4; for 1866, 5; for 1867, 6; for 1868, 7.

GOLDSMITHS' COMPANY (London) began about 1327, and incorporated 16 Rich. II. 1392. The mark or date of the Goldsmiths' company wherewith to stamp standard silver and gold wares is made by letters from A to U, changed every year, commenced in 1796. The old hall was taken down in 1829, and the present magnificent edifice was opened in 1835. See *Assay*, and *Standard*. The first bankers were goldsmiths.

GOOD FRIDAY (probably God's Friday). From early time this has been held as a solemn fast, in remembrance of the crucifixion of our Saviour on Friday, April 3, 33, or April 15, 29. Its appellation of *good* appears to be peculiar to the church of England; our Saxon forefathers denominated it *Long Friday*, on account of the great length of the offices observed and fastings enjoined on this day. Good Friday, 1866, March 30; 1867, April 19; 1868, April 10.

GOODWIN. See *Godwin*.

GOOJERAT (N. India). Near this place, on Feb. 21, 1849, lord Gough totally defeated the Sikhs after a very severe conflict. Some of the enemy's guns, and the whole of their ammunition and camp equipage, fell into the hands of the British. Shere-Singh escaped with only 8000 men. Goojerat was taken.

GOOSE. See *Michaelmas*.

GORDIAN KNOT. The knot is said to have been made of the thongs that served as harness to the waggon of Gordius, a husbandman, afterwards king of Phrygia. Whosoever loosed this knot, the ends of which were not discoverable, the oracle declared should be ruler of Persia. Alexander the Great cut away the knot with his sword until he found the ends of it, and thus, in a military sense at least, interpreted the oracle, 330 B.C.

GORDON'S "NO POPERY" RIOTS, occasioned by the zeal of lord George Gordon, June 2—5, 1780.*

GOREE, a station near Cape Verd, W. coast of Africa, planted by the Dutch, 1617. It was taken by the English admiral Holmes in 1663; and was ceded to France by the treaty of Nimeguen in 1678. Goree was again taken by the British in 1758, 1779, 1800, and 1804. Governor Wall, formerly governor of this island, was hanged in London, Jan. 28, 1802, for the murder of sergeant Armstrong, committed while at Goree in 1782.

GOREY (S.E. Ireland). Near here the king's troops under colonel Walpole were defeated, and their leader slain, by the Irish rebels, June 4, 1798.

GORGET, the ancient breast-plate, was very large, varying in size and weight. The present diminutive breast-plate came into use about 1660. See *Armour*.

GORILLA, a powerful ape of West Africa, from about five feet six, seven, or eight inches high. It is a match for the lion, and attacks the elephant with a club. It is considered to be identical with the hairy people called *Gorullai* by the navigator Hanno, in his *Periplus*, about 400 or 500 B.C. In 1847 a sketch of a gorilla's cranium was sent to Professor Owen by Dr. Savage, then at the Cahoon river. Preserved specimens have been recently brought to Europe, and a living one died on its voyage to France. In 1859 Professor Owen gave an able summary of our knowledge of this creature at the Royal Institution, London; and in 1861 several skins and skulls were there exhibited by M. Du Chaillu, who stated that he killed 21 of them in his travels in Central Africa. The gorilla was not known to Cuvier.

GOSPELLERS, the name given to the followers of Wickliffe, who first attacked the errors of popery, about 1377. Wickliffe opposed the authority of the pope, the temporal jurisdiction of bishops, &c., and is called the father of the Reformation.

GOSPELS (Saxon *god-spell*, good story). Matthew's and Mark's are conjectured to have been written between A.D. 38 and 65; Luke's, 55 and 65; John's, about 97. Dr. Robert Bray was one of the authors of the Society for the Propagation of the Gospel in Foreign Countries, incorporated in 1701. A body termed "Bray's Associates" still exists; its object being to assist in forming and supporting clerical parochial libraries. Irenaeus in the 2nd century refers to each of the gospels by name.

GOSPORT (Hampshire), contains the Royal Clarence victualling yard, the bakery in which can turn out ten tons of biscuit in an hour. The great Haslar hospital, near Gosport, was built in 1762.

GOTHA, capital of the duchy of Saxe Coburg-Gotha. Here is published the celebrated *Almanach de Gotha*, which first appeared in 1764, in German.

GOTHIC ARCHITECTURE began about the 9th century after Christ, and spread over Europe. Its great feature is the pointed arch; hence it has been suggested to call it the *pointed style*. "Gothic" was originally a term of reproach given to this style by the

* On Jan. 4, 1780, he tendered the petition of the Protestant Association to lord North, and on June 2, headed the mob of 40,000 persons who assembled in St. George's Fields, under the name of the Protestant Association, to carry up a petition to parliament for the repeal of the act which granted certain indulgences to the Roman Catholics. The mob once raised could not be dispersed, but proceeded to the most daring outrage, pillaging, burning, and pulling down the chapels and houses of the Roman Catholics first, but afterwards of several other persons; breaking open prisons and setting the persons free; even attempting the Bank of England; and in a word totally overcoming the civil power for nearly six days. On June 3rd, the Roman Catholic chapels and numerous mansions were destroyed, the Bank attempted, the gaols opened,—among these were the King's Bench, Newgate, Fleet, and Bridewell prisons; on the 5th, thirty-six fires were seen blazing at one time. At length by the aid of armed associations of the citizens, the horse and foot guards, and the militia of several counties, then embodied and marched to London, the riot was quelled. In the end, 210 of the rioters were killed, and 248 wounded, of whom 75 died afterwards in the hospitals. Many were tried, convicted, and executed. Lord George was tried for high treason, Feb. 5, 1781, but was acquitted. He died a prisoner for libel, Nov. 1, 1793.

renaissance architects of the 16th century. Its invention has been claimed for several nations, particularly for the Saracens. The following list is from Godwin's Chronological Table of English Architecture:—

ANGLO-ROMAN—B.C. 55 to about A.D. 250—St. Martin's church, Canterbury.

ANGLO-SAXON—A.D. 800 to 1066—Earl's Barton church; St. Peter's, Lincolnshire.

GOthic ANGLO-ROMAN—A.D. 1066 to 1135—Rochester cathedral nave; St. Bartholomew's, Smithfield; St. Cross, Hants, &c.

EARLY ENGLISH, OR POINTED—A.D. 1135 to 1272—Temple church, London; parts of Winchester, Wells, Salisbury, and Durham cathedrals, and Westminster Abbey.

POINTED, called Pure Gothic—A.D. 1272 to 1377—Exeter cathedral, Waltham Cross, &c., St. Stephen's, Westminster.

FLORID POINTED—A.D. 1377 to 1509—Westminster Hall; King's College, Cambridge; St. George's chapel, Windsor; Henry VII.'s chapel, Westminster.

Revival of Grecian architecture about 1625, Banqueting House, Whitehall, &c.

The revival of Gothic architecture commenced about 1825, mainly through the exertions of A. W. Pugin. The controversy as to its expediency was rife in 1860-1.

GOTHLAND, an isle in the Baltic Sea, was conquered by the Teutonic knights, 1397-8: given up to the Danes, 1524; to Sweden, 1645; conquered by the Danes, 1677, and restored to Sweden, 1679.

GOTHS, a warlike nation that inhabited the country between the Caspian, Pontus, Euxine, and Baltic seas. They entered Mesia, took Philippopolis, massacring thousands of its inhabitants; defeated and killed the emperor Decius, 251; but were defeated by Claudius, 320,000 being slain, 269. Aurelian ceded Dacia to them in 272; but they long troubled the empire. After the destruction of the Roman empire by the Heruli, the *Ostrogoths*, under Theodorice, became masters of the greater part of Italy, where they retained their dominion till 553, when they were finally conquered by Narses, Justinian's general. The *Visigoths* settled in Spain, and founded a kingdom, which continued until the country was subdued by the Saracens.

GOVERNESSES' BENEVOLENT INSTITUTION, was established in 1843, and incorporated in 1848. It affords to aged governesses annuities and an asylum; and to governesses in distress a temporary home and assistance.

GOVERNMENT ANNUITIES ACT. See *Annuities*. The building of the new GOVERNMENT OFFICES began in 1861.

GOWRIE CONSPIRACY. A young Scotch nobleman, John, earl of Gowrie, in 1600, reckoning on the support of the burghs and the kirk, conspired to dethrone James VI. and seize the government. For this purpose he decoyed the king into Gowrie house, in Perth, on Aug. 6, 1600. The plot was frustrated, and the earl and his brother, Alexander Ruthven, were slain on the spot. At the time, many persons believed that the young men were rather the victims than the authors of a plot. Their father, William, was treacherously executed in 1584 for his share in the Raid of Ruthven, in 1582; and he and his father, Patrick, were among the assassins of Rizzio in 1566.

GRACE AT MEAT. The ancient Greeks would not partake of any meat until they had first offered part of it, as the first fruits, to their gods. The short prayer said before, and by some persons after meat, in all Christian countries, from the earliest times, is in conformity with Christ's example, *John vi. 11, &c.*

GRACE, a title assumed by Henry IV. of England, on his accession, in 1399. *Excellent Grace* was assumed by Henry VI. about 1425. Till the time of James I. 1603, the king was addressed by that title, but afterwards by the title of *Majesty* only. "Your Grace" is the manner of addressing an archbishop and a duke in this realm.—The term "*Grace of God*" is said to have been taken by bishops at Ephesus, 431 (probably from 1 *Cor. xv. 10*), by the Carolingian princes in the 9th century, by popes in the 13th century; and about 1440 it was assumed by kings as signifying their divine right. It was taken by the king of Prussia in Oct. 1861, and created much adverse comment.

GRÆCIA, MAGNA, colonies planted by the Greeks, 974—748 B.C. See *Italy*.

GRAFTON'S, DUKE OF, ADMINISTRATION, succeeded that of lord Chatham, Dec. 1767. Terminated by lord North becoming prime minister in 1770. See *North's Administration*.

Augustus Henry, duke of Grafton, first lord of the

treasury (born, 1735; died, 1811).

Frederick, lord North, chancellor of the exchequer.

Earl Gower, lord president.

Earl of Chatham, lord prime seal.

Earl of Shelburne and viscount Weymouth, secreta-

ries of state.

Sir Edward Hawke, first lord of the admiralty.

Marquess of Granby, master-general of the ordnance.

Lords Sandwich and Le Despencer joint postmasters-general.

Lords Hertford, duke of Ancaster, Thomas Townshend, &c.

Lord Camden, lord chancellor.

GRAFFITI, a term given to the scribblings found on the walls of Pompeii and other Roman ruins : selections were published by Wordsworth in 1837, and by Garrucci in 1856.

GRAHAM'S DIKE (Scotland). A wall built in 209 by Severus Septimus, the Roman emperor, or, as others say, by Antoninus Pius. It reached from the Frith of Forth to the Clyde. The eminent historian Buchanan relates that there were considerable remains of this wall in his time ; and some vestiges of it are to be seen even to this day.

GRAIN. Henry III. is said to have ordered a grain of wheat gathered from the middle of the ear to be the original standard of weight : 12 grains to be a pennyweight ; 12 pennyweights one ounce, and 12 ounces a pound Troy. *Lawson*.

GRAMMARIANS. Anciently, the most eminent men in literature were denominated grammarians. A society of grammarians was formed at Rome so early as 276 B.C. *Blair*. Apollodorus of Athens, Varro, Cicero, Messala, Julius Caesar, Nicias, Ælius Donatus, Remmius, Palemon, Tyrannion of Pontus, Athenæus, and other distinguished men, were of this class. A Greek grammar was printed at Milan in 1476 ; Lily's Latin grammar (*Brevis Institutio*), 1513 ; Lindley Murray's English grammar, 1795 ; Cobbett's English grammar, 1818.—Harris's *Hermes* was published in 1750, Horne Tooke's *Epea Pteroenta*, or the "Diversions of Purley," in 1786, both excellent treatises on the philosophy of language and grammar. Cobbett declared Mr. Canning to have been the only purely grammatical orator of his time ; and Dr. Parr, speaking of a speech of Mr. Pitt's, said, "We threw our whole grammatical mind upon it, and could not discover one error."

GRAMME. See *Metrical System*.

GRAMPIAN HILLS (central Scotland). At Ardoch, near the *Mons Grampius* of Tacitus, the Scots and Picts under Galgacus were defeated by the Romans under Agricola, 84.

GRAMPOUND (Cornwall). For bribery and corrupt practices in this borough, in 1819, several persons were convicted, among them sir Manassch Lopez, who was sentenced by the court of king's bench to a fine of 10,000*l.* and two years' imprisonment. Grampound was disfranchised in 1821.

GRANADA, a city, S. Spain, was founded by the Moors in the 8th century, and formed at first part of the kingdom of Cordova. In 1236, Mohammed-al-Hamar made it the capital of his new kingdom of Granada, which was highly prosperous till its subjugation by the "great captain," Gonsalvo de Cordova, in 1492. In 1609 and 1610, the industrious Moors were expelled from Spain, by the bigoted Philip III., to the lasting injury of his country. Granada was taken by marshal Soult in 1810, and held till 1812. See *New Granada*.

GRANARIES were formed by Joseph in Egypt, 1715 B.C. (*Genesis* xli. 48.) There were three hundred and twenty-seven granaries in Rome. *Univ. Hist.* Twelve new granaries were built at Bridewell to hold 6000 quarters of corn, and two storehouses for seacoal to hold 4000 loads, thereby to prevent the sudden dearness of these articles by great increase of inhabitants, 7 James I. 1610. *Stow*.

GRAND ALLIANCE between England, the emperor, and the States-General (principally to prevent the union of the French and Spanish monarchies in one person), signed at Vienna, May 12, 1689, to which Spain and the duke of Savoy afterwards acceded.

GRANDEES. See *Spanish Grandees*.

GRAND-DUKE. See *Duke*.

GRAND JUNCTION CANAL (central England), joins several others, and forms a water communication between London, Liverpool, Bristol, and Hull. The canal commences at Braunston, on the west borders of Northamptonshire, and enters the Thames near London. Executed 1793-1801.

GRAND PENSIONARY, a chief state functionary in Holland, in the 16th century. In the constitution given by France to the Batavian republic, previously to the erection of the kingdom of Holland, the title was revived and given to the head of the government, April 29, 1805, Rutger Jan Schimmelpenninck being made the Grand Pensionary. See *Holland*.

GRAND REMONSTRANCE. See *Remonstrance*.

GRANICUS (a river, N.W. Asia Minor), near which on May 22, 334 B.C., Alexander the Great signally defeated the Persians. The Macedonian troops (30,000 foot and 5000 horse),

crossed the Granicus in the face of the Persian army (600,000 foot and 20,000 horse). *Justin*. The victors lost fifty-five foot soldiers and sixty horse. Sardis capitulated, Miletus and Halicarnassus were taken by storm, and other great towns submitted to the conqueror.

GRANSON, near the lake of Neuchâtel, Switzerland, where Charles the Bold, duke of Burgundy, was defeated by the Swiss, April 5, 1476.

GRAPES. Previously to the reign of Edward VI. grapes were brought to England in large quantities from Flanders, where they were first cultivated about 1276. The vine was introduced into England in 1552; being first planted at Bloxhall, in Suffolk. In the gardens of Hampton-court palace is a vine, stated to surpass any in Europe; it is 72 feet by 20, and has in one season produced 2272 bunches of grapes, weighing 18 cwt.; the stem is 13 inches in girth; it was planted in 1769. *Leigh*.

GRAPHITE (from the Greek *graphein*, to write), a peculiar form of mineral carbon, with a trace of iron, improperly termed black lead and plumbago. In 1809 sir Humphry Davy investigated into the relations of three forms of carbon, the diamond, graphite, and charcoal. A rude kind of black lead pencil is mentioned by Gesner in 1565. Interesting results of sir B. C. Brodie's researches on graphite appeared in the International Exhibition of 1862.

GRATES. There were arched hearths among the Anglo-Saxons, and chafing-dishes were most in use until the general introduction of chimneys about 1200. See *Chimneys* and *Stoves*.

GRAVELINES (N. France). Here the Spaniards, aided by an English fleet, defeated the French on July 13, 1558.

GRAVITATION, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about 38. Kepler investigated the subject about 1615; and Hooke devised a system of gravitation about 1674. The principles of gravity were demonstrated by Galileo at Florence, about 1633; but the great law on this subject was laid down by Newton in his "Principia," in 1687.

GREAT BETHEL. See *Big Bethel*.

GREAT BRITAIN, the name given in 1604 to *England, Wales, and Scotland (which see)*.—The stupendous iron steam vessel, GREAT BRITAIN, commanded by captain Hosken, formerly a naval officer, sailed from the Mersey, Liverpool, July 26, 1845, and arrived at New York, Aug. 10. She sailed to the same place in the forenoon of Sept. 22, 1846, with a large cargo of goods and 185 passengers, the greatest number that had ever sailed to America by steam. The same evening the passengers were suddenly alarmed by a concussion, as if the vessel had struck upon a rock, and soon discovered that she was aground in Dundrum bay, in Ireland. They were landed in safety, but all attempts to get the vessel off were ineffectual, and she lay stranded until Aug. 27, 1847, when Messrs. I. Brunel, jun., and Brenner, the engineers, succeeded in getting her off, she having sustained little damage from the shock, or from the waves rolling over her for nearly a year.

GREAT EASTERN, &c. See under *Steam*. The Eastern Counties Railway assumed the name of GREAT EASTERN in 1862. The GREAT NORTHERN RAILWAY Company was incorporated in 1846. Their station at King's-cross, London, was opened in Oct. 1852. The GREAT WESTERN RAILWAY, between London and Bristol, was opened June 30, 1841.

GREAT SEAL OF ENGLAND. The first seal used by Edward the Confessor was called the broad seal, and affixed to grants of the crown, 1048. *Baker's Chron*. The most ancient seal with arms on it is that of Richard I. James II., when fleeing from London in 1688, dropped the great seal in the Thames. The great seal of England was stolen from the house of lord chancellor Thurlow, in Great Ormond-street, into which some thieves broke, and carried it away, with other property, March 24, 1784, a day before the dissolution of parliament; it was never recovered. It was replaced on the next day. A new seal was brought into use on the union with Ireland, Jan. 1, 1801. A new seal for Ireland was brought into use and the old one defaced, Jan. 21, 1832.

GREECE, anciently termed Hellas. The Greeks are said to have been the progeny of Javan, fourth son of Japheth. Greece was so called from a very ancient king named Grecus; and from another king, Hellen, the son of Deucalion, the people were called Hellenes. From Hellen's sons, Dorus and Æolus, came the Dorians and Æolians; another son Xuthus was father of Achæus and Ion, the progenitors of the Achæans and Ionians. Homer calls the inhabitants indifferently Myrmidons, Hellenes, and Achæians. They were termed Danaï, from Danaus, king of Argos, 1474 B.C. Greece anciently consisted of the peninsula of the Peloponnesus, Greece outside of the Peloponnesus, Thessaly, and the islands. The principal

states of Greece were Athens, Sparta, Corinth, Thebes, Arcadia, and afterwards Macedon (*all which see*). The limits of modern Greece are much more confined. Greece became subject to the Turkish empire in the 15th century. The population of the kingdom, established in 1829, 96,810; in 1861, with the Ionian isles (added in 1864), 1,326,000.

GREEK ARCHITECTURE. See *Architecture*.

GREEK CHURCH, or Eastern church, claims priority, as using the language in which the Gospel was first promulgated. Some of its forms and ceremonies are similar to those of the Roman church; but it disowns the supremacy of the pope, and is strongly opposed to many of the doctrines and practices of its rival. It is the established religion of Russia. The Greek orthodox confession of faith appeared in 1643. See *Fathers of the Church*.

GREEK FIRE, a combustible composition (now unknown, but thought to have been principally naphtha), thrown from engines, said to have been invented by Callinicus, an ingenious engineer of Heliopolis, in Syria, in the 7th century, in order to destroy the Saracens' ships, which was effected by the general of the fleet of Constantine Pogonatus, and 30,000 men were killed. A so-called "Greek Fire," probably a solution of phosphorus in bi-sulphide of carbon, was employed at the siege of Charleston, U.S., in Sept., 1863.

GREEK LANGUAGE. It was first studied in Europe about 1450: in France, 1473; William Grocyn, or Grokeyn, a learned English professor of this language, travelled to acquire its true pronunciation, and introduced it at Oxford, about 1491, where he had the honour to teach Erasmus, who himself taught it at Cambridge in 1510. *Wood's Athen. Oxon.* England has produced many eminent Greek scholars, of whom may be mentioned Richard Bentley, died 1742; professor Porson, who died in 1808; Dr. Parr, who died in 1825; and Dr. C. Burney, who died in 1817.

GREENBACKS, a name given, from the colour of some, to the paper currency first issued by the United States government, in 1862. They represented sums as low as 1½d., 2½d., and 5d., &c.—the precious metals being exceedingly scarce.

GREEN-BAG INQUIRY took its name from a *Green Bag*, full of documents of alleged seditions, laid before parliament by lord Sidmouth, Feb. 1817. Secret committees presented their reports, Feb. 19; and bills were brought in on the 21st to suspend the *Habeas Corpus* act, and prohibit seditious meetings then frequent.

GREEN-CLOTH, BOARD OF, in the department of the lord-steward of the household, included an ancient court (abolished in 1849), which had jurisdiction of all offences committed in the verge of the court.

GREENLAND (an extensive Danish colony in North America) was discovered by some Icelanders, under Eric Raude, about 980, and so named from its verdure, superior to that of Iceland. It was visited by Frobisher in 1576. The first ship from England to Greenland was sent for the whale-fishery by the Muscovy company, 2 James I. 1604. In a voyage performed in 1630, eight men were left behind by accident, who suffered incredible hardships till the following year, when the company's ships brought them home. *Tindal*. The Greenland Fishing company was incorporated in 1693.—Hans Egede, a Danish missionary, founded a new colony, called *Godthaab*, or Good Hope, in 1720-3; and other missionary stations have been since established. Scoresby surveyed Greenland in 1821; and capt. Graah, by order of the king of Denmark, in 1829-30.

GREENOCK (W. Scotland). Charters were granted in 1635 and 1670 to John Shaw, of the barony of Greenock. Prior to 1697, it was an inconsiderable fishing station; but during that year the Scottish Indian and African company resolved to erect salt-works in the Firth, and thus drew the attention of sir John Shaw, its superior, to the maritime advantages of its situation. It was made a burgh of barony in 1757, and a parliamentary burgh in 1832. The erection of the new quay was entrusted, about 1773, to James Watt, who was born here in 1736. The East India harbour was built 1805-19, and Victoria harbour 1840-50.

GREEN PARK (near Buckingham palace, London), forms a part of the ground enclosed by Henry VIII. in 1530, and is united to St. James's and Hyde parks by the road named Constitution-hill. Over the arch at the entrance, the Wellington statue was placed in 1836. On the north side was a reservoir of the Chelsea water-works, which was filled up in 1856.

GREENWICH HOSPITAL stands on the site of a royal residence in the time of Edward I. (1300) much enlarged by his successors. Here were born Henry VIII. and his daughters Mary and Elizabeth, and here his son Edward VI. died. The palace was the favourite summer residence of queen Elizabeth, and Charles II. intended to build a new palace here on a very grand scale, and accordingly erected one wing of this grand edifice, but died before any other part of the design was finished. In this state it remained till Mary and William III. formed the plan of making the palace useful to the kingdom, as an hospital, which was instituted in 1694. 100 disabled seamen were admitted in 1705. The forfeited estate of the attainted earl of Derwentwater (beheaded in 1716) was bestowed upon it. Sixpence per month was to be contributed by every seaman, and the payment was advanced to one shilling, from June, 1797. The payment was abolished in 1829, and that of "the Merchant seamen's" sixpence also in 1834. This hospital lodged 2710 in 1853, and possessed a revenue of about 150,000*l.* per annum.* A charter was granted to it in Dec. 1775. The chapel, the great dining-hall, and a large portion of the buildings appropriated to the pensioners, were destroyed by fire, Jan. 2, 1779. The chapel was rebuilt in 1789.—Greenwich fair was discontinued, April 1857.

GREENWICH OBSERVATORY was built at the solicitation of sir Jonas Moore and sir Christopher Wren, by Charles II., on the summit of Flamsteed-hill, so called from the great astronomer of that name, the first astronomer-royal here. The English began to compute the longitude from the meridian of this place, 1675; some make the date 1679. This observatory contains among other instruments a transept circle by Troughton; a transit instrument of eight feet by Bird; two mural quadrants of eight feet, and Bradley's zenith sector. The telescopes are forty and sixty inch achromatics, and a six-feet reflector. In 1852, an electric telegraph signal ball in the Strand was completed, and put in connection with Greenwich observatory.

* Important changes were made in October, 1865, in consequence of an act of parliament passed in that year, based upon the report of a commission. About 900 of the in-door pensioners received additions to their pay, and were permitted to reside wherever they pleased outside the hospital, which, in future, will be rather an infirmary than a residence.

GREGORIAN CALENDAR (see *Calendar*, and *New Style*.)

GREGORIAN CHANT received its name from pope Gregory I., who improved the Ambrosian chant, about 590.

GRENADA. See *Granada* and *New Granada*.

GRENADES, a powerful missile of war, so named from *Granada*, Spanish, invented in 1594. It is a small hollow globe, or ball, of iron, about two inches in diameter, which being filled with fine powder and set on fire by a fusee at a touchhole, the case flies into shatters, to the damage of all who stand near.

GRENADIERS. The Grenadier corps was a company armed with a pouch of hand-grenades, established in France in 1667; and in England in 1685. *Brown*.

GRENVILLE ADMINISTRATIONS. The first succeeded the Bute administration, in April, 1763; and resigned in July, 1765.

George Grenville (born 1712, died 1770), *first lord of the treasury and chancellor of the exchequer*.

Earl Granville (succeeded by the duke of Bedford), *lord president*.

Duke of Marlborough, *privy seal*.

Earls of Halifax and Sandwich, *secretaries of state*.

Earl Gower, *lord chamberlain*.

Lord Egmont, *admiralty*.

Marquess of Granby, *ordnance*.

Lord Holland (late Mr. Fox), *paymaster*.

Welbore Ellis, *secretary-at-war*.

Viscount Barrington, *treasurer of the navy*.

Lord Hillsborough, *first lord of trade*.

Lord Henley (afterwards earl of Northington), *lord chancellor*.

Duke of Rutland, lords North, Trevor, Hyde, &c.

The Second Grenville administration was formed after the death of Mr. Pitt, on Jan. 23, 1806. From the ability of many of its members, their friends said it contained "*All the Talents*," a term which was afterwards applied to it derisively by its opponents. The death of Mr. Fox, Sept. 13, 1806, led to changes, and eventually the cabinet resigned, March 25, 1806.

Lord Grenville, *first lord of the treasury*.

Lord Henry Petty (afterwards marquess of Lansdown), *chancellor of the exchequer*.

Earl Fitzwilliam, *lord president*.

Viscount Sidmouth (late Mr. Addington), *privy seal*.

Charles James Fox, *foreign secretary*.

Earl Spencer, *home secretary*.

William Windham, *colonial secretary*.

Lord Erskine, *lord chancellor*.

Sir Charles Grey (afterwards viscount Howick and earl Grey), *admiralty*.

Lord Minto, *board of control*.

Lord Auckland, *board of trade*.

Lord Moira, *master-general of the ordnance*.

R. B. Sheridan, *treasurer of the navy*.

Richard Fitzpatrick, &c.

Lord Ellenborough (*lord chief justice*), had a seat in the cabinet.

GRESHAM COLLEGE (London), founded by sir Thomas Gresham, in 1575. He was the founder of the Royal Exchange, and left a portion of his property in trust to the City and the Mercers' Company to endow this college for, among other uses, lectures in divinity, astronomy, music, and geometry, and readers in civil law, physic, and rhetoric, and to promote general instruction; he died 1579. The lectures, commenced in Gresham's house, near Broad-street, June 1597 (where the Royal Society first met in 1645), and continued, with interrupt on, till 1710. The buildings were pulled down in 1768, and the Excise-office erected on its site. The lectures were then read in a room over the Royal Exchange for many years: on the rebuilding of the present exchange, the Gresham committee erected the present building in Basinghall-street, which was designed by G. Smith, and opened for lectures, Nov. 2, 1843. It cost above 7000*l*.

GRETN-GREEN MARRIAGES. Gretna is the nearest and most accessible point in Scotland from the sister kingdom; and in its neighbourhood fugitive marriages were long contracted. The practice was begun by a tobaccoist named John Paisley, who lived to a great age, and died in 1814. His first residence was at Megg's Hill, on the common or green betwixt Gretna and Springfield, to the last of which villages he removed in 1782. A man named Elliot was lately the principal officiating person. The General Assembly, in 1826, vainly attempted to suppress this system, but an act, passed in 1856, made these marriages illegal after that year, unless one of the persons married had lived in Scotland 21 days.

GREY ADMINISTRATION succeeded the Wellington administration, in Nov. 1830. It carried the Reform bill (*which see*), and terminated July, 1834.

GREY ADMINISTRATION, *continued*.

Earl Grey,* *first lord of the treasury*.
 Lord Brougham, *lord chancellor*.
 Viscount Althorpe, *chancellor of the exchequer*.
 Marquess of Lansdowne, *president of the council*.
 Earl of Durham, *privy seal*.
 Viscounts Melbourne, Palmerston, and Goderich,
home, foreign, and colonial secretaries.

Sir James Graham, *admiralty*.
 Lord Auckland and Mr. Charles Grant (afterwards,
 1830, lord Glenelg), *board of trade and control*.
 Lord Holland, *duchy of Lancaster*.
 Lord John Russell, *paymaster of the forces*.
 Duke of Richmond, earl of Carlisle, Mr. Wynne, &c.

GREYTOWN. See *Mosquito Coast*.

GROAT, from the Dutch *groat*, value of fourpence, was the largest silver coin in England until after 1351. Fourpenny pieces were coined in 1836 to the value of 70,884*l.*; in 1837, 16,038*l.* None have been coined since 1861.

GROCERS anciently meant "ingrossers or monopolisers," as appears by a statute 37 Edw. III. 1363: "Les Marchauntz nomez engrossent totes maners de merchandises vendables." The Grocers' company, one of the twelve chief companies of London, was established in 1345, and incorporated in 1429.

GROCHOW, BATTLE OF, near Praga, a suburb of Warsaw, between the Poles and Russians, Feb. 25, 1831. After an obstinate contest, continuing the whole of one day and great part of the next, the Poles remained masters of the field of battle. The Russians shortly after retreated, having been foiled in their attempt to take Warsaw. They are said to have lost 7000 men, and the Poles 2000. See *Poland*, 1861.

GROG, sea-term for rum and water, derived its name from admiral Edward Vernon, who wore grogram breeches, and was hence called "Old Grog." About 1745, he ordered his sailors to dilute their rum with water.†

GUADALOUPE, a West India island, discovered by Columbus in 1493. The French took possession of it in 1635, and colonised it in 1664. Taken by the English in 1759, and restored in 1763. Again taken by the English in 1779, 1794, and 1810. The allies, in order to allure the Swedes into the late coalition against France, gave them this island. It was, however, by the consent of Sweden, restored to France at the peace in 1814.

GUAD-EL-RAS (N.W. Africa). Here the Spaniards signally defeated the Moors, March 23, 1860, after a severe conflict: general Prim manifested great bravery, for which he was ennobled. The preliminaries of peace were signed on the 25th.

GUANO, or HUANO (the Peruvian term for manure), the excrement of sea-birds that swarm along the coasts of Peru and Bolivia, and also of Africa and Australia. Humboldt was one of the first by whom it was brought to Europe, in order to ascertain its value in agriculture. The importation of guano into the United Kingdom appears to have commenced in 1839. 283,000 tons were imported in 1845 (of which 207,679 tons came from the western coast of Africa); 243,016 tons in 1851 (of which 6522 tons came from Western Australia), and 131,358 tons in 1864.

GUARDS. The custom of having guards is said to have been introduced by Saul, 1093 B.C.

Body guards were appointed to attend the kings of England, 2 Hen. VII. 1485.

Horse Guards were raised 4 Edw. VI. 1550.

The three regiments, 1st, 2nd, and 3rd Foot Guards were raised in 1660, and the command of them given to colonel Russell, general Monk, and lord Linlithgow. The 2nd regiment, or Coldstream, was the first raised. See *Coldstream*. These

guards were the beginning of our standing army.

The Horse Grenadier guards first troop, raised in 1693, was commanded by general Cholmondeley; the second troop was raised in 1702, and was commanded by lord Forbes; this corps was reduced in 1783, the officers retiring on full pay.

See *Horse Guards*, *Yeoman, National*, and *Imperial Guards*.

GUATEMALA. A republic in Central America, declared independent March 21, 1847. President (1862), general Raphael Carrera, elected 1851; appointed for life (1854). A war between Guatemala and San Salvador broke out in Jan. 1863; and on June 16 the troops of the latter were totally defeated. Population, about 850,000.

GUEBRES. See *Parsees*.

* Born March 13, 1764; M.P., as Charles Grey, in 1786; first lord of the admiralty and afterwards foreign secretary in 1806; resigned in 1806 on account of his favouring Roman Catholic emancipation; died July 17, 1845.

† He did great service in the West Indies, by taking Porto Bello, Chagre, &c.; but by his disagreement with the commander of the land forces, the expedition against Carthagena in 1741, is said to have failed. He was dismissed the service for writing two pamphlets attacking the admiralty; he died Oct. 30, 1757.

GUELPHIC ORDER of knighthood was instituted for Hanover by the prince regent, afterwards George IV., Aug. 12, 1815. The king of Hanover is grand master.

GUELPHS AND GIBELINES, names given to the papal and imperial factions whose conflicts destroyed the peace of Italy from the 12th to the end of the 15th century (the invasion of Charles VIII. of France in 1495). The origin of the names is uncertain; but it is ascribed to the contest for the imperial crown between Conrad of Hohenstaufen, duke of Swabia, lord of Wiblingen (hence *Ghibelin*), and Henry nephew of Welf, or Guelf, duke of Bavaria, in 1138. The former was successful; but the popes and many of the Italian cities took the side of his rival. *Hie Guelf* and *Hie Ghibelin* are said to have been used as war-cries in 1139. The Ghibelines were almost totally expelled from Italy in 1267, when Conradin, the last of the Hohenstaufens, was beheaded by Charles of Anjou. Guelf is the name of the present royal family of England. See *Brunswick*.

GUERNSEY. See *Jersey*.

GUEUX (beggars), a name given by the comte de Barlaimont to the 300 Protestant deputies from the Low Countries, headed by Henri of Brederode and Louis of Nassau, who petitioned Margaret, governess of the Low Countries, to abolish the inquisition, April 5, 1566. The deputies at once assumed the name as honourable, and immediately organised an armed resistance to the government. See *Holland*.

GUIANA (N.E. coast of South America), was visited by the Spaniards in the 16th century; explored by sir Walter Raleigh in 1596 and 1617. The French settlements here were formed in 1626-43; and the Dutch, 1627-67. Demerara and Essequibo were ceded to Great Britain in 1814. See *Demerara*.

GUIENNE, a French province, was part of the dominions of Henry II. after his wife Eleanor, 1152. Philip of France seized it in 1293, which led to war. It was alternately held by England and France till 1453, when John Talbot, earl of Shrewsbury, in vain attempted to retake it from the latter.

GUILDHALL (London), was built in 1411. When it was rebuilt (in 1669), after the great fire of 1666, no part of the ancient building remained, except the interior of the porch and the walls of the hall. The front was not erected until 1789: a new roof was built in 1864-5. Beneath the west window are the colossal figures of Gog and Magog, said to represent a Saxon and an ancient Briton. The hall can contain 7000 persons, and is used for city feasts. Here were entertained the allied sovereigns in 1814, and Napoleon III., April 19, 1865.

GUILDS (of Saxon origin), associations of inhabitants of towns for mutual benefit, resembling our friendly societies, chartered by the sovereign since the time of Henry II. The "Guild of Literature and Art" (including sir E. B. Lytton, C. Dickens, and others) founded an institution (on ground given by sir E. B. Lytton, at Stevenage), consisting of thirteen dwellings, retreats for an artist, scholar, and man of letters, which were completed in July, 1865.

GUILLOTINE invented (about 1785) by Joseph Ignatius Guillotin (an eminent physician and senator, esteemed for his humanity), designed to render capital punishment less painful by decapitation. During the revolution he ran some hazard of being subjected to its deadly operation; but (contrary to a prevailing opinion) escaped, and lived to become one of the founders of the Academy of Medicine at Paris, and died in 1814, greatly respected.—A somewhat similar instrument may be seen in an engraving accompanying the *Symbolicæ Questiones* (called the *Mannaia*). It is said to have been used in Italy, at Halifax in England (see *Halifax*), and in Scotland, there called the Maiden and the Widow.

GUINEA (W. coast of Africa) was discovered by the Portuguese about 1460. From their trade with the Moors originated the slave trade. Sir John Hawkins was the first Englishman who made a merchandise of the human species. *Bell*. He was assisted in his enterprise by a number of English gentlemen, who subscribed money for the purpose. He sailed from England in Oct. 1562, with three ships, proceeded to the coast of Guinea, purchased or forcibly seized 300 negroes, sold them profitably at Hispaniola, and returned home richly laden with hides, sugar, ginger, and other merchandise, in Sept. 1563. This voyage led to similar enterprises. *Hakluyt*. See *Slave Trade*.

GUINEAS, English gold coin, so named from having been first coined of gold brought by the African company from the coast of Guinea in 1663, valued then at 20s.; but worth 30s. in 1695. Reduced at various times; in 1717 to 21s. In 1810 guineas were sold for 22s. 6d.; in 1816, for 27s. In 1811 an act was passed forbidding their exportation, and their

sale at a price above the current value, 21s. The first guineas bore the impression of an elephant; having been coined of this African gold. Since the issue of sovereigns in July 1, 1817, guineas have not been coined.

GUINEGATE, BATTLE OF. See *Spurs*.

GUISE, a French ducal family:—

Claude of Lorraine, first duke, a brave warrior, favoured by Francis I.; died . . . April, 1550	revenged his father's death; assassinated by Henry III. Dec. 23, 1588
Francis, the great general, born, 1519; assassinated Feb. 24, 1563	Charles, first opposed, and then submitted to, Henry IV.; died 1640
Henry, head of the Catholic league; born 1550;	Henry, died without issue 1664

GUN-COTTON, a highly explosive substance, invented by professor Schönbein, of Basel, and made known in 1846. It is purified cotton, steeped in a mixture of equal parts of nitric acid and sulphuric acid, and afterwards dried, retaining the appearance of cotton wool. Dr. Böttger and others also claim the discovery.* See *Collodion*.

GUNPOWDER. The invention of gunpowder is generally ascribed to Bertholdus or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany, about 1320. But many writers maintain that it was known much earlier in various parts of the world.† Some say that the Chinese possessed it a number of centuries before. Its composition, moreover, is expressly mentioned by Roger Bacon, in his treatise *De Nullitate Magie*. He died in 1292 or 1294.

GUNPOWDER PLOT. The memorable conspiracy known by this name, for springing a mine under the houses of parliament, and destroying the three estates of the realm—king, lords, and commons—there assembled, was discovered on Nov. 4, 1605. It was projected by Robert Catesby, and several Roman Catholic persons of rank were leagued in the enterprise. Guy Faux was detected in the vaults under the house of lords preparing the train for being fired on the next day. Catesby and Percy (of the family of Northumberland) were killed; Guy Faux, sir Everard Digby, Rockwood, Winter, and others, died by the hands of the executioner, Jan. 30, 31, 1606. Henry Garnet, a Jesuit, was executed as an accomplice, May 3, following. An anonymous letter sent to lord Monteagle led to the discovery. It contained the following words, "Though there be no appearance of any stir, yet I say they shall receive a terrible blow this parliament, and yet they shall not see who hurts them." The vault called Guy Faux cellar, in which the conspirators lodged the barrels of gunpowder, remained in the late houses of parliament till 1825, when it was converted into offices.

GUNS. See *Artillery*.

GUNTER'S CHAIN, used in measuring land, invented by Edmund Gunter, in 1606.

GUTTA PERCHA. This highly useful substance is procured from the sap of the Isonandra Gutta, a large forest tree, growing in the Malayan peninsula and on the islands near it. It was made known in England by Drs. D. Almeida and Montgomery, at the

* The diet of Frankfort voted, Oct. 3, 1846, a recompense of 100,000 florins to professor Schönbein and Dr. Bettger, as the inventors of the cotton powder, provided the authorities of Mayence, after seeing it tried, pronounced it superior to gunpowder as an explosive; but its use, as a substitute for gunpowder, in gunnery, is still a matter of uncertainty, as the ignition of the cotton is not under the same control. Of its utility, however, in blasting and mining operations, not the slightest doubt can exist. Improvements were made in the manufacture of gun-cotton by an Austrian officer, Baron Von Lenk, about 1852, and it was tried by a part of the Austrian army in 1855, but did not obtain favour. In 1862 details of the manufacture were communicated by the Austrian government to our own government, and Mr. Abel, our war-office chemist, was directed to experiment on the constitution and desirability of gun-cotton. The British Association also appointed a scientific committee to consider its merits. A complete decision has not been arrived at. The first trial of English-made gun-cotton was made in the spring of 1864, at the manufactory at Stowmarket, Suffolk, by Messrs. Prentice.

† A scientific inquirer, W. Hunter, after a careful examination of the question, in 1847, thus states the result:—"July and August, 1346, may therefore be safely assumed to be the time when the explosive force of gunpowder was first brought to bear on the military operations of the English nation." On Jan. 16, 1864, above 11 tons of gunpowder on board the Lottie Sleigh, in the Mersey, exploded; much damage was done in Liverpool and Birkenhead, but no lives were lost. On Oct. 1, 1864, about 104,000 lbs. of gunpowder exploded at the Belvedere powder magazines of Messrs. Hall & Co., at Plumstead, near Woolwich; 13 persons perished, and the shock was felt at 50 miles' distance. Searching inquiries were made into the circumstances, and new regulations for the keeping and transmission of powder issued in November. See *Dartford*. Mr. Gale, a blind gentleman of Plymouth, on June 22, 1865, patented his method of rendering gunpowder unflammable by combining with it finely powdered glass which can be readily separated by a sieve when the powder is required for use. Successful public experiments were made, and Gale's Protected Gunpowder Company was formed (Oct. 1865). Mr. Gale exhibited his process before the Queen at Windsor, Nov. 10, 1865. The attainment of perfect security is still doubted.

Society of Arts, in 1843. As a non-conductor of electricity it has become an invaluable aid in constructing the submarine telegraph.

GUZERAT, a state in India, founded by Mahmoud the Gaznevide, about 1020, was conquered by Akbar in 1572; and became subject to the Mahrattas 1732 or 1752.

GUY'S HOSPITAL, London. Thomas Guy, a wealthy bookseller, after bestowing large sums on St. Thomas's, determined to be the sole founder of another hospital. At the age of seventy-six, in 1721, he commenced the erection of the present building, and lived to see it nearly completed, it costing him 18,793*l*. In addition, he endowed it with 219,499*l*. In 1829, 196,115*l*. were bequeathed to this hospital by Mr. Hunt, to provide accommodation for 100 additional patients.

GWALIOR, a state in Central India; since 1803, under British protection. The maharajah remained faithful during the revolt of 1857.

GYMNASIUM, a place where the Greeks performed public exercises, and where also philosophers, poets, and rhetoricians repeated their compositions. In wrestling and boxing the athletes were often naked (*gymnos*), whence the name. A London gymnastic society, formed 1826, did not flourish. In 1862, M. Ravenstein set up another gymnastic association. The German Gymnastic Institution, in St. Pancras-road, London, was opened on Jan. 29, 1865, and a large and perfect gymnasium at Liverpool was inaugurated by lord Stanley, Nov. 6, 1865.

GYMNOSOPHISTÆ, a sect of philosophers in India, who lived naked, as their name implies. Alexander (about 324 B.C.) was astonished at the sight of men who seemed to despise bodily pain, and who injured themselves to the greatest tortures without uttering a groan or expressing any fear. *Pliny*.

GYPSIES, or EGYPTIANS (French, *Bohèmes*; Italian, *Zingari*; Spanish, *Gitanos*; German, *Zigeuner*); vagrants, supposed to be descendants of Hindoos expelled by Timour, about 1399. They appeared in Germany and Italy early in the 15th century. In England an act was made against their itinerancy, in 1530; and in the reign of Charles I. thirteen persons were executed at one assizes for having associated with gypsies for about a month, contrary to the statute. The gypsy settlement at Norwood was broken up, and they were treated as vagrants, May, 1797. There were in Spain alone, previously to 1800, more than 120,000 gypsies, and many communities of them yet exist in England. Notwithstanding their intercourse with other nations, they are still, like the Jews, in their manners, customs, visage, and appearance, almost wholly unchanged, and their pretended knowledge of futurity still gives them power over the superstitious. Esther Faa was crowned queen of the gypsies at Blyth, on Nov. 18, 1860. The Bible has been translated into gypsy dialects.

GYROSCOPE (from *gyrosc*, to revolve), the name of a rotatory apparatus popular in 1859, invented by Fessel of Cologne (1852), and improved by professor Wheatstone and M. Foucault of Paris. It is similar in principle to the rotatory apparatus of Bohnenberger of Tübingen (born 1765, died 1831).—The gyroscope exhibits the combined effects of the centrifugal and centripetal forces, and the remarkable results of the cessation of either, and thus illustrates the great law of gravitation.

H.

HAARLEM, an ancient town, once the residence of the counts of Holland, was taken by the duke of Alva, in July, 1573, after a siege of seven months. He violated the capitulation by butchering half the inhabitants. The lake was drained in 1849-51.

HABEAS CORPUS. The subjects' *Writ of Right*, passed "for the better securing the liberty of the subject," 31 Charles II. c. 2, May 27, 1679.* This act (founded on the old common law) is next in importance to *Magna Charta*, for so long as the statute remains in force no subject of England can be detained in prison, except in cases wherein the detention

* By this act, if any person be imprisoned by the order of any court, or of the queen herself, he may have a writ of habeas corpus, to bring him before the court of queen's bench or common pleas, which shall determine whether his committal be just. The constitution of the United States provides that "the privilege of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it;" but does not specify the department of the government having the power of suspension. A series of contests on this subject between the legal and military authorities began in Maryland, May, 1861. In consequence of the affair of John Anderson (see *Slavery in England*, note), an act was passed in 1862, enacting that no writ of *Habeas Corpus* should issue out of England into any colony, &c., having a court with authority to grant such writ.

is shown to be justified by the law. The *Habeas Corpus* act can alone be suspended by the authority of parliament, and then for a short time only, and when the emergency is extreme. In such a case the nation parts with a portion of its liberty to secure its own permanent welfare, and suspected persons may then be arrested without cause or purpose being assigned. *Blackstone*.

HACKNEY COACHES (probably from the French *coche-à-haquenée*, a vehicle with a hired horse, *haquenée*. Their supposed origin in Hackney, near London, is a vulgar error. See *Cabriolets* and *Omnibuses*.

Four were set up in London by a capt. Bailey in 1625: their number soon increased. They were limited by the star-chamber in 1635; restricted to 200 in 1637 and in . . . 1652
The number was raised to 400, in 1662; to 700, in 1694; to 800, in 1715; to 1000, in 1771; to 1100, in 1814; and finally, to 1300, in . . . 1815

HADRIANOPLE. See *Adrianople*.

HAGUE, capital of the kingdom of Holland, once called the finest *village* in Europe; the place of meeting of the States-General, and residence of the former earls of Holland since 1250, when William II. built the palace here.

Here the states abrogated the authority of Philip II. of Spain, 1580, and held a conference upon the five articles of the remonstrants, which occasioned the synod of Dort. 1620

HAINAULT, a province in Belgium, anciently governed by counts hereditary, after Regnier I., who died in 916. The count John d'Arennes became count of Holland in 1299. Hainault henceforth partook of the fortunes of Flanders.

HAINAULT FOREST (Essex), a celebrated forest, in which stood the ancient Fairlop oak (*which see*); was disafforested in 1851.

HAIR. In Gaul, hair was much esteemed, and hence the appellation *Gallia comata*; and cutting off the hair was inflicted as a punishment among the Gauls. The royal family of France held it as a particular mark and privilege of the kings and princes of the blood to wear long hair artfully dressed and curled. "The clerical tonsure is of apostolic institution!" *Isidorus Hispalensis*. Pope Anicetus forbade the clergy to wear long hair, 155. Long hair was out of fashion during the protectorate of Cromwell, and hence the term *Round-heads*; in 1795; and also 1801. Hair-powder came into use in 1590; and in 1795 a tax was laid upon persons using it, which yielded at one time 20,000*l.* per annum. The tax is now 1*l.* 3*s.* 6*d.* for each person annually. See *Beard*.

HAITI. See *Hayti*.

HALEYBURY COLLEGE (Herts), wherein students were prepared for service in India; it was founded by the East India Company in 1806, and was closed in 1858.

HALICARNASSUS, Caria (Asia Minor); reputed birth-place of Herodotus, 484 B.C.; the site of the tomb of Mausolus, erected 352; taken by Alexander, 334. See *Mausoleum*.

HALIDON HILL, near Berwick, where, on July 19-20, 1333, the English defeated the Scots, the latter losing upwards of 14,000 slain, among whom were the regent Douglas and a large number of the nobility, while a comparatively small number of the English suffered. Edward III. placed Edward Balliol on the throne of Scotland.

HALIFAX (Yorkshire). The woollen manufactory was established here in the 15th century, prodigious quantities of cloth, &c., being on the tenters. The town, at its incorporation, was empowered to punish capitally (by a peculiar engine, which beheaded the offender in a moment) any criminal convicted of stealing to the value of upwards of thirteen pence halfpenny. King James I. in 1620 took this power away. See *Guillotine*. In 1857, Mr. J. Crossley announced his intention of founding a college here, and Mr. F. Crossley presented the town with a beautiful park.

HALIFAX ADMINISTRATION. The earl of Halifax became minister, Oct. 1714, and died in 1715. This ministry was succeeded by Robert Walpole's.

Charles, earl of Halifax, *first lord of the treasury* (succeeded on his death by the earl of Carlisle).
William, lord Cowper, afterwards earl Cowper, *lord chancellor*.
Daniel, earl of Nottingham, *lord president*.
Thomas, marquess of Wharton, *privy seal*.

Edward, earl of Oxford, *admiralty*.
James Stanhope, afterwards earl Stanhope, and Charles, Viscount Townshend, *secretaries of state*.
Sir Richard Onslow, *chancellor of the exchequer*.
Dukes of Montrose and Marlborough, lord Berkeley, Robt. Walpole, Mr. Pulteney, &c.

HALL, principal apartment in mediæval mansions. Westminster and Eltham halls are fine examples. See *Westminster Hall*.

HALL MARK. See *Goldsmiths*, and *Standard*.

HALLELUJAH AND AMEN (*Praise the Lord*, and *So be it*), expressions used in the Hebrew hymns; said to have been introduced by Haggai, the prophet, about 520 B.C. Their introduction into the Christian church is ascribed to St. Jerome, about A.D. 390.

HALYS, a river (Asia Minor), near which a battle was fought between the Lydians and Medes. It was interrupted by an almost total eclipse of the sun, which occasioned a conclusion of the war between the two kingdoms, May 28, 585 B.C. (the fourth year of the 48th Olympiad). *Pliny, Nat. Hist.* ii. Others give the date 584, 603, and 610 B.C. This eclipse is said to have been predicted many years before by Thales of Miletus. *Herodotus* i. 75.

HAMBURG, a free city, N. W. Germany, founded by Charlemagne, about 809. It joined the Hansæatic League in the 13th century, and became a flourishing commercial city. Population in 1860, 229,941.

It obtained the title of a free imperial city by permission of the dukes of Holstein, 1206; was subject to them till 1618; purchased its total exemption from their claims. 1768

HAMPTON-COURT PALACE (Middlesex), built by cardinal Wolsey on the site of the manor-house of the knights-hospitallers, and in 1525 presented to Henry VIII.; perhaps the most splendid offering ever made by a subject to a sovereign. Here Edward VI. was born, Oct. 12, 1537; here his mother, Jane Seymour, died, Oct. 24, following; and here Mary, Elizabeth, Charles, and others of our sovereigns, resided. Much was pulled down, and the grand inner court built by William III. in 1694, when the gardens, occupying 40 acres, were laid out. Here was held, Jan. 14-16, 1604, the conference between the Puritans and the clergy of the Established church, which led to a new translation of the Bible. See *Conference*.

HANAPER OFFICE (of the court of Chancery), where writs relating to the business of the subject, and their returns, were anciently kept in *hanaperio* (in a wicker hamper); and those relating to the crown, in *parva laga* (a little bag). Hence the names *Hanaper* and *Petty Bag Office*. The office was abolished in 1842.

HANAU (Hesse-Cassel), where a division of the combined armies of Austria and Bavaria, of 30,000 men, under general Wrede, encountered the French, 70,000 strong, under Napoleon I., on their retreat from Leipzig, Oct. 30, 1813. The French suffered very severely, though the allies were compelled to retire.

HANDEL'S COMMEMORATIONS. The *first* was held in Westminster abbey, May 26, 1784; king George III. and queen Charlotte, and above 3000 persons being present. The band contained 268 vocal, and 245 instrumental performers, and the receipts of three successive days were 12,746*l*. These concerts were repeated in 1785, 1786, 1790, and 1791.

Second great commemoration, in the presence of king William IV. and queen Adelaide, when there were 644 performers, June 24, 26, and 28, 1834. This commemoration led to the formation of the Sacred Harmonic Society at Exeter Hall.

This society, in conjunction with the Crystal Palace Company, projected the Festival of 1859.

Grand Rehearsal at the Crystal Palace, June 15, 17, 19, 1857, and on July 2, 1858.

Great Handel festival (at the Crystal Palace) on the centenary of his death. Performances: Messiah, June 20; Selections, 22; Israel in Egypt, 24, 1859, when the prince consort, the king of the Belgians, and 26,827 persons were present. There

were 2765 vocal and 393 instrumental performers and the performance was highly successful. The receipts amounted to about 33,000*l*., from which there were deducted 18,000*l*. for expenses; of the residue (15,000*l*), two parts accrued to the Crystal Palace Company, and one part to the Sacred Harmonic Society. Handel's harpsichord, original scores of his oratorios, and other interesting relics, were exhibited.

Handel festival (at the Crystal Palace): 4000 performers; highly successful; June 23, 25, 27, 1862.

Handel festival (at the Crystal Palace): very successful: June 26, 28, 30, 1865.

HANDKERCHIEFS, wrought and edged with gold, used to be worn in England by gentlemen in their hats, as favours from young ladies, the value of them being from five to twelve pence for each in the reign of Elizabeth, 1558. *Stow's Chron.* Paisley handkerchiefs were first made in 1743.

HANDS, imposition of, was performed by Moses in setting apart his successor Joshua (*Num.* xxvii. 23), and in Christian ordination by the apostles (*1 Tim.* iv. 14).

HANGING, DRAWING, AND QUARTERING, said to have been first inflicted upon William Marise, a pirate, a nobleman's son, 25 Hen. III., 1241. Five gentlemen attached to the duke of Gloucester were arraigned and condemned for treason, and at the place of execution were hanged, cut down alive instantly, stripped naked, and their bodies marked for quartering, and then pardoned, 25 Hen. VI. 1447. *Stow.* The last execution in this manner in England was that of the Cato-street conspirators (*which see*), May 1, 1820. Hanging in chains was abolished in 1834. *See Death.*

HANGO BAY (Finland). On June 5, 1855, a boat commanded by lieut. Geneste left the British steamer *Cossack*, with a flag of truce to land some Russian prisoners. They were fired on by a body of riflemen, and five were killed, several wounded, and the rest made prisoners. The Russian account, asserting the irregularity to have been on the side of the English, has not been substantiated.

HANOVER, a kingdom, formerly an electorate, N. W. Germany. Hanover is composed of territories which formerly belonged to the dukes of Brunswick (*which see*). Population in 1859, 1,850,000; in 1861, 1,888,070.

ELECTORS AND KINGS OF HANOVER.

1692. Ernest-Augustus, youngest son of George, that son of William, duke of Brunswick-Luneburg, who obtained by lot the right to marry (*see Brunswick*). He became bishop of Osnaburg in 1662, and in 1679 inherited the possessions of his uncle John, duke of Calenberg; created ELECTOR of Hanover in 1692. [He married, in 1659, the princess Sophia, daughter of Frederick, elector palatine, and of Elizabeth, the daughter of James I. of England. In 1701, Sophia was declared next

heir to the British crown, after William III., Anne and their descendants.]
1698. George-Lewis, son of the preceding; married his cousin Sophia, the heiress of the duke of Brunswick-Zell. Became king of Great Britain, Aug. 1, 1714, as GEORGE I.
1727. George-Augustus, his son (GEORGE II. of England), June 11.
1760. George-William-Frederick, his grandson (GEORGE III. of England), Oct. 25.

HANOVER, *continued.*KINGS OF HANOVER. See *Accession.*

1814. George-William-Frederick (the preceding sovereign), first king of Hanover, Oct. 12.
 1820. George-Augustus-Frederick, his son (GEORGE IV. of England), Jan. 20.
 1830. William-Henry, his brother (WILLIAM IV. of England), June 26.
 [Hanover separated from the crown of Great Britain.]

1837. Ernest-Augustus, duke of Cumberland, brother to William IV. of England, on whose demise he succeeded (as a distinct inheritance) to the throne of Hanover, June 20.

1851. George V. (born May 27, 1819), son of Ernest : ascended the throne on the death of his father, Nov. 18. The PRESENT (1865) king of Hanover.

Heir : Prince Ernest-Augustus, born Sept. 21, 1845.

HANSE TOWNS. The Hanseatic League (from *hansa*, association), formed by a number of port towns in Germany, against the piracies of the Swedes and Danes : began about 1140 ; the league was signed 1241. At first it consisted only of towns situate on the coasts of the Baltic sea, but in 1370 it was composed of sixty-six cities and forty-four confederates. They proclaimed war against Waldemar, king of Denmark, about the year 1348, and against Eric in 1428, with forty ships and 12,000 regular troops, besides seamen. This gave umbrage to several princes, who ordered the merchants of their respective kingdoms to withdraw their effects. The Thirty years' war in Germany (1618-48) broke up the strength of the association. In 1630 the only towns of note of this once powerful league, retaining the name, were Lübeck, Hamburg, and Bremen. The league suffered also by the rise of the commerce of the Low Countries in the 15th century. The many privileges they enjoyed by treaty in England were abolished by Elizabeth in 1578.

HAPSBURG (or HABSBURG), HOUSE OF, the family from which the imperial house of Austria sprang in the 7th century. Hapsburg was an ancient castle of Switzerland, on a lofty eminence near Schintznach. Rodolph, count of Hapsburg, became archduke of Austria, and emperor of Germany, 1273. See *Austria* and *Germany*.

HARBOURS. England has many fine natural harbours ; the Thames (harbour, dock, and depôt), Portsmouth, Plymouth, &c. Acts for the improvement of harbours, &c., were passed in 1847, 1861, and 1862.

HARFLEUR (seaport, N. W. France, was besieged by Henry V., and taken Sept. 22, 1415).

HARLAW (Aberdeenshire), the site of a desperate indecisive battle between the earl of Mar, with the royal army, and Donald, the lord of the Isles, July 24, 1411. This conflict was very disastrous to the nobility, some houses losing all their males.

HARLEIAN LIBRARY, containing 7000 manuscripts, bought by secretary Harley, afterwards earl of Oxford and Mortimer, is now in the British Museum. A large portion of his life and wealth was spent on the collection. He died May 21, 1724. The Harleian Miscellany, a selection from the MSS. and Tracts of his library, was published in 1744 and 1808.

HARMONIC STRINGS, said to have been invented by Pythagoras through hearing four blacksmiths working with hammers, in harmony, whose weights he found to be six, eight, nine, and twelve ; or rather by squares, as thirty-six, sixty-four, eighty-one, and one hundred and forty-four.—The HARMONICA, or musical glasses, were first "arranged" by an Irish gentleman named Puckeridge, and improved by Dr. Franklin in 1760.

HARMONISTS, a sect, founded in Württemberg by Rapp, about 1780. Not much is known of their tenets, but they held their property in common, and considered marriage a civil contract. Not finding toleration, they emigrated to America, and built New Harmony in Indiana in 1815. Robert Owen purchased this town about 1823 ; but failed in his scheme of a "social" community, and returned to England. See *Socialists*. The Harmonists removed to Pittsburg in Pennsylvania in 1822.

HARMONIUM, a keyed wind instrument, resembling the accordion in the tones being generated by the action of wind upon metallic reeds. The Chinese were well acquainted with the effects produced by vibrating tongues of metal. M. Biot stated, in 1810, that they were used musically by M. Grenié ; and in 1827-29, free reed stops were employed in organs at Beauvais and Paris. The harmoniums best known in England are those of Alexandre and Debain, the latter claiming to be the original maker of the French instrument. In 1841, however, Mr. W. E. Evans, of Cheltenham, produced his English harmonium, then termed the Organ-Harmonica. By a succession of improvements he has produced a fine instrument, with diapason quality, and great rapidity of speech, without loss of power. *English Cyclopædia*.

HARNESS, the leathern dressings used for horses to draw chariots, and also chariots, are said to have been the invention of Erichthonius of Athens, who was made a constellation after his death, under the name of *Boötes*, about 1487 B.C.

HARO, CRY OF (*Clameur de Haro*), derived from Raoul, or Rollo, ancestor of our Norman princes of England. Rollo had administered justice with such exactness, that those who had injury done them used to call out *A Raoul!* This obliged the person who met an adverse party in the streets to go before the judge, who decided their differences, at least provisionally. *Hénault*.

HARP. Invented by Jubal, 3875 B.C. (*Gen.* iv. 21). David played the harp before Saul, 1063 B.C. 1 *Sam.* xvi. 23. The Cimbri, or English Saxons, had this instrument. The celebrated Welsh harp was strung with gut; and the Irish harp, like the more ancient harps, with wire.* Erard's improved harps were first patented in 1795.

HARPER'S FERRY (Virginia). See *United States*, 1859-62.

HARRISON'S TIME-PIECE. Mr. John Harrison, of Foulby, near Pontefract, was the inventor. In 1714, the government offered rewards for methods of determining the longitude at sea; Harrison came to London, and produced his first time-piece in 1735; his second in 1739; his third in 1749; and his fourth, which procured him the reward of 20,000*l.* offered by the Board of Longitude, a few years after. He obtained 10,000*l.* of his reward in 1764, and other sums, more than 24,000*l.* in all, for further improvements in following years.

HARROGATE (Yorkshire). The first or old spa in Knaresborough forest was discovered by capt. Slingsby in 1571: a dome was erected over the well at the expense of lord Rosslyn in 1786. There are two other chalybeate springs, called the Alum well and the Towit spa. The noted sulphureous well was discovered in 1783. The theatre was erected in 1788. The Bath hospital was erected by subscription in 1825.

HARROW-ON-THE-HILL SCHOOL (Middlesex†), founded and endowed by John Lyon in 1571. To encourage archery, the founder instituted a prize of a silver arrow to be shot for annually on the 4th of August; but the custom has been abolished. Lord Palmerston, sir R. Peel, the statesman, and lord Byron, the poet, were educated here.

HARTLEY COAL MINE (Northumberland). On Jan. 16, 1862, one of the beams at the mouth of the ventilating shaft broke, and a mass of iron weighing about 12 tons fell down the shaft, destroyed the brattice, divided the shaft, and carried down sufficient timber to kill two men who were ascending the shaft, and buried alive 202 persons, men and boys. Several days elapsed before the bodies could be removed. Much sympathy was shown by the public, from the queen to the humblest classes; and about 50,000*l.* were collected on behalf of the bereaved families. The coroner's verdict expressed the necessity of there being two shafts to coal mines, and recommended that the beams of colliery engines should be of malleable instead of cast-iron.

HARTWELL (Buckinghamshire), the retreat of Louis XVIII., king of France, 1807-14. He landed in England at Yarmouth, Oct. 6, 1807, took up his residence at Gosfield hall, in Essex, and afterwards came to Hartwell, as the count de Lille. His consort died here in 1810. On his restoration, he embarked at Dover for France, April 24, 1814. See *France*.

HARUSPICES, priests or soothsayers, of Etruscan origin, who foretold events from observing entrails of animals. They were introduced to Rome by Romulus (about 750 B.C.), and abolished by Constantine, A.D. 337, at which time they were seventy in number.

HARVARD COLLEGE (Massachusetts, North America) was founded by the general court at Boston, on Oct. 28, 1636. It derived its name from John Harvard, who bequeathed to it a library and a sum of money in 1638.

HASTINGS (Sussex). At Battle, near this place, more than 30,000 were slain in the conflict between Harold II. of England and William duke of Normandy, the former losing his life and kingdom, Oct. 14, 1066. The day of this battle was also the anniversary of Harold's birth. He and his two brothers were interred at Waltham abbey, Essex.

* One of the most ancient harps existing is that of Bryan Boiroidmhe, monarch of Ireland: it was given by his son Donagh to Pope John XVIII., together with the crown and other regalia of his father, in order to obtain absolution for the murder of his brother Teig. Adrian IV. alleged this as being one of his principal titles to the kingdom of Ireland in his bull transferring it to Henry II. This harp was given by Leo X. to Henry VIII., who presented it to the first earl of Clanricarde: it then came into possession of the family of De Burgh; next into that of MacMahon of Clenagh, county of Clare; afterwards into that of MacNamara of Limerick; and was at length deposited by the right hon. William Conyngham in the College Museum, Dublin, in 1782.

† Charles II. cut short some theological discussion relative to the claims for the title of the visible church, by declaring that it "was the parish church of Harrow, which could be seen everywhere."

HASTINGS' TRIAL. Warren Hastings,* governor-general of India, was tried by the peers of Great Britain for high crimes and misdemeanors. Among other charges was his acceptance of a present of 100,000*l.* from the nabob of Oude (see *Chunar, Treaty of*). The trial lasted seven years and three months; commencing Feb. 13, 1788, terminating in his acquittal, April 25, 1795. Mr. Sheridan's speech on the impeachment excited great admiration.

HATFIELD'S ATTEMPT ON THE LIFE OF GEORGE III. On May 11, 1800, during a review in Hyde-park, a shot from an undiscovered hand was fired, which wounded a young gentleman who stood near the king. In the evening, when his majesty was at Drury-lane theatre, Hatfield fired a pistol at him; upon his trial he was sentenced to be confined as a lunatic during his life. He died Jan. 23, 1841, aged 69 years.

HATS. See *Caps*. First made by a Swiss at Paris, 1404. When Charles VII. made his triumphal entry into Rouen, in 1449, he wore a hat lined with red velvet, and surmounted with a rich plume of feathers. Henceforward, hats and caps, at least in France, began to take place of chaperons and hoods. *Hénault*. Hats were first manufactured in England by Spaniards in 1510. *Stow*. Very high-crowned hats were worn by queen Elizabeth's courtiers; and high crowns were again introduced in 1783. A stamp-duty laid upon hats in 1784, and in 1796, was repealed in 1811. Silk hats began to supersede beaver about 1820.

HAVANNAH (capital of Cuba, West Indies). Founded by Velasquez, 1511; was taken by lord Albemarle, Aug. 14, 1762; restored, 1763; the remains of Columbus were brought from St. Domingo and deposited in the cathedral here, 1795.

HAVRE-DE-GRAVE (N.W. France) was defended for the Huguenots by the English in 1562; who, however, were expelled in 1563. It was bombarded by Rodney, July 6 to 9, 1759; by sir Richard Strachan, May 25, 1798; and blockaded, Sept. 6, 1803. The attempts of the British to burn the shipping here failed, Aug. 7, 1804.

HAWAII. See *Owhyhee*.

HAWKERS and PEDLARS were first licensed in 1697. Licensing commissioners were appointed in 1810. The expense of licensing was reduced in 1862.

HAYMARKET (Westminster), opened in 1664, was removed to Cumberland-market, Jan. 1, 1831. The Haymarket theatre was opened in 1702. See *Theatres*.

HAYTI, or HAITI, Indian name of St. Domingo, a West Indian island, discovered by Columbus in Dec. 1492, and named Hispaniola. Before the Spaniards fully conquered it, they are said to have destroyed, in battle or cold blood, 3,000,000 of its inhabitants, including women and children. General Fabre Geffrard became president of the republic of Hayti, Jan. 15, 1859. Population in 1859, about 572,000.

* He was born in 1732; went to India as a writer in 1750; became governor-general of Bengal in 1772; of India, 1773; governed ably, but, it is said, unscrupulously and tyrannically, till he resigned in 1785. The expenses of his trial (70,000*l.*) were paid by the East India Company. He died a privy-councillor in 1818.

HEAD ACT. See *note* to article *Ireland*, 1465.

HEALTH, GENERAL BOARD OF, was appointed by the act for the promotion of the public health, passed in 1848. See *Sanitary Legislation*. This board was reconstructed in Aug. 1854, and sir B. Hall was placed at its head, with a salary of 2000*l.*; succeeded by W. F. Cowper, Aug. 1855, and by Ch. B. Adderley in 1858. The expenses for the year 1856-7 were 12,325*l.* In 1858 this board was incorporated into the privy council establishment; Dr. Simon being retained as medical officer.

HEARTH, or CHIMNEY, TAX, on every fire-place or hearth in England was imposed by Charles II. in 1662, when it produced about 200,000*l.* a year. It was abolished by William and Mary at the Revolution in 1689; but was imposed again, and again abolished.

HEAT (called by French chemists *Caloric*). Little progress had been made in the study of the phenomena of heat till about 1757, when Joseph Black put forth his theory of latent heat (which heat he said was absorbed by melting ice), and of specific heat. Cavendish, Lavoisier, and others, continued Black's researches. Sir John Leslie put forth his views on radiant heat in 1804. Count Rumford espoused the theory that heat consists in motion among the particles of matter, which view he supported by experiments on friction (recorded in 1802). This theory (now called the dynamical or mechanical theory of heat, and used to explain all the phenomena of physics and chemistry) has been further substantiated by the independent researches of Dr. J. Mayer of Heilbronn and of Mr. Joule of Manchester (about 1840), who assert that heat is the equivalent of work done. In 1854, professor Wm. Thomson, of Glasgow, published his researches on the dynamical power of the sun's rays. The minds of philosophers are still engaged on this subject.* See *Calorescence*. Thermo-electricity, produced by heating pieces of copper and bismuth soldered together, was discovered by Seebeck in 1823. A powerful thermo-electric battery was constructed by Marcus of Vienna, in 1865.

HEBREWS. See *Jews*.

HEBRIDES (the *Ebudes* of Ptolemy and the *Hebudes* of Pliny), Western isles of Scotland, long subject to Norway; ceded to Scotland in 1264; and annexed to the Scottish crown in 1540 by James V.

HEBRON (in Palestine). Here Abraham resided, 1860 B.C.; and here David was made king of Judah, 1048 B.C. On April 7, 1862, the prince of Wales visited the reputed cave of Machpelah, near Hebron, said to contain the remains of Abraham and his descendants.

HECATOMB, an ancient sacrifice of a hundred oxen, particularly observed by the Lacedæmonians when they possessed a hundred cities. The sacrifice was subsequently reduced to twenty-three oxen, and goats and lambs were substituted.

HECLA, MOUNT. Its first eruption is recorded as having occurred 1004. About twenty-two eruptions have taken place, according to Olsson and Paulson. The most dreadful and multiplied convulsions of this great volcanic mountain occurred in 1766, since when a visit to the top in summer is not attended with great difficulty. For particulars of an eruption in 1784-5, see *Iceland*. The mount was in a state of violent eruption from Sept. 2, 1845, to April, 1846. Three new craters were formed, from which pillars of fire rose to the height of 14,000 English feet. The lava formed several hills, and pieces of pumice stone and scoriæ of 2 cwt. were thrown to a distance of a league and a half; the ice and snow which had covered the mountain for centuries melted into prodigious floods.

HEGIRA, ERA OF THE, dates from the flight (Arabic *hejra*) of Mahomet from Mecca to Medina, on the night of Thursday, the 15th July, 622. The era commences on the 16th. Some compute this era from the 15th, but Cantemir proves that the 16th was the first day. 33 of its lunar years were equal to 32 of those of the vulgar era.

* Captain Ericson constructed a ship, in which caloric, or heat, was the motive-power. On Jan. 4, 1853, it sailed down the bay of New York, at the rate of 14 miles an hour, it is said at a cost of 80 per cent. less than steam. Although caloric engines were not successful, captain Ericson continued his experiments, and patented an improved engine in 1856.

HEIDELBERG (Germany) was capital of the Palatinate, 1362-1719. The protestant electoral house becoming extinct in 1693, a war ensued, in which the castle was ruined, and the elector removed his residence of Manheim. It was annexed to Baden in 1802. Here was the celebrated tun, constructed in 1343, when it contained twenty-one pipes of wine. Another was made in 1664 which held 600 hogsheads. It was destroyed by the French in 1688; but a larger one, fabricated in 1690, which held 800 hogsheads, and was formerly kept full of the best Rhenish wine, is now mouldering in a damp vault, quite empty.

HELDER POINT (Holland). The fort and the Dutch fleet lying in the Texel surrendered to the British under the duke of York and sir Ralph Abercrombie, for the prince of Orange; 540 British were killed, Aug. 30, 1799. The place was left in Oct. See *Bergen*.

HELEN, a Grecian princess, according to mythology, daughter of Jupiter and Leda, and sister of Castor and Pollux. She was demanded in marriage by several Greek princes. She chose Menelaus, king of Sparta; but eloped from him with Paris, son of Priam, king of Troy. This led to the Trojan war, which lasted 1193 to 1183 B.C.

HELENA, St. (an island in the South Atlantic Ocean), was discovered by the Portuguese under Juan de Nova Castilla, on the festival of St. Helena, May 21, 1502. The Dutch afterwards held it until 1600, when they were expelled by the English. The British East India Company settled here in 1651; and the island was alternately possessed by the English and Dutch until 1673, when Charles II., on Dec. 12, assigned it to the company once more. St. Helena was made the place of Napoleon's captivity, Oct. 16, 1815; and of his death, May 5, 1821. His remains were removed in 1840, and interred at the Hôtel des Invalides, Paris. See *France*, 1840. The house and tomb have been purchased by the French government.

HELIGOLAND, an island in the North Sea, taken from the Danes by the British, Sept. 5, 1807; made a depôt for British merchandise; confirmed to England by the treaty of Kiel, Jan. 14, 1814. Though a mere rock, it is an important possession.

HELIOGRAPHY (from *helios*, the sun). See *Photography*.

HELIOMETER, &c., an instrument for measuring the diameters of the sun, moon, planets, and stars, invented by Savary, in 1743; applied by M. Bouguer, in 1747.

HELIOSCOPE (a peculiar sort of telescope, prepared for observing the sun so as not to affect the eye), was invented by Christopher Scheiner in 1625.

HELIOSTAT, an instrument invented to make a sunbeam stationary, or apparently stationary, invented by Gravesande about 1719, and greatly improved by Malus and others. One constructed by MM. Foucault and Duboseq, was exhibited at Paris in October, 1862.

HELLAS, in Thessaly, the home of the Hellenes and the Greek race, which supplanted the Pelasgians from the 15th to the 11th century B.C., derived their name from Helen, king of Phthiotis, about 1600 B.C. They separated into the Dorians, Æolians, Ionians, and Achæians. The present king of Greece is called "king of the Hellenes." See *Greece*.

HELLESPONT, a narrow arm of the sea betwixt Europe on the west, Asia on the east, the Propontis, or Sea of Marmora, northward, and the Ægean Sea, now the Archipelago, southward. The present name is the Strait of the Dardanelles. The Hellespont took its original name from Helle, daughter of Athamas, king of Thebes, who was drowned here. It is celebrated for the loves of Hero of Sestos, and Leander of Abydos: Leander was drowned in a tempestuous night as he attempted to swim across the Hellespont, and Hero, in despair, threw herself into the sea, 627 B.C. See *Xerxes*.

HELL-FIRE CLUBS. Three of these associations which existed for some time, were suppressed by an order in council, 1721. They met at Somerset-house, and at houses in Westminster, and in Conduit-street.

HELMETS, among the Romans, were provided with a vizor of grated bars, to raise above the eyes, and beaver to lower for eating; the helmet of the Greeks was round, that of the Romans square. Richard I. of England wore a plain round helmet; but most of the English kings had crowns above their helmets. Alexander III. of Scotland, 1249, had a flat helmet, with a square grated vizor, and the helmet of Robert I. was surmounted by a crown, 1306. *Gwillim*.

HELOTS, *captives*, derived by some from the Greek *helein*, to take; by others from Helos, a city which the Spartans hated for refusing to pay tribute, 883 B.C. The Spartans, it is said, ruined the city, and reduced the Helots to slavery; and called all their slaves and

the prisoners of war, *Helotæ*. The number of the Helots was much enlarged by the conquest of Messenia, 668 B.C., and is considered to have been four-fifths of the inhabitants of Sparta. In the Peloponnesian war the Helots behaved with uncommon bravery, and were rewarded with their liberty, 431 B.C.; but the sudden disappearance of 2000 manumitted slaves was attributed to the Lacedæmonian treachery. *Herodotus*.

HELVETIAN REPUBLIC. Switzerland having been conquered by the French in 1797, a republic was established in 1798 with this title. See *Switzerland*.

HELVETII, a Celto-Germanic people, who inhabited what is now called Switzerland. Invading Gaul, 61 B.C., they were opposed and beaten by Julius Cæsar, 58 B.C., near Geneva.

HEMP AND FLAX. Flax was first planted in England, when it was directed to be sown for fishing-nets, 1533. "Bounties were paid to encourage its cultivation in 1783; and every exertion should be made by the government and legislature to accomplish such a national good. In 1785 there were imported from Russia, in British ships, 17,695 tons of hemp and flax." *Sir John Sinclair*. The annual importation of these articles now amounts to about 100,000 tons. The cultivation of flax was revived at the dearth of cotton during the American civil war, 1861-4. More than 180,000 lbs. of rough hemp were used in the cordage of a first-rate man-of-war, including rigging and sails.

HEPTARCHY* (or government of seven kings) in England was gradually formed from 455, when Hengist became the king of Kent. It terminated in 828, when Egbert became sole monarch of England. See *Britain* and *Oclarchy*.

HERACLIDÆ, descendants of Hercules, who were expelled from the Peloponnesus about 1200 B.C., but reconquered it in 1103-4 or 1109 B.C., a noted epoch in chronology, all the history preceding being accounted fabulous.

HERALDRY. Marks of honour were used in the first ages. *Nisbet*. The Phrygians had a sow; the Thracians, Mars; the Romans, an eagle; the Goths, a bear; the Flemings, a bull; the Saxons, a horse; and the ancient French, a lion, and afterwards the fleur-de-lis (*which see*). Heraldry, as an art, is ascribed first to Charlemagne, about 800; and next to Frederick Barbarossa, about 1152; it began and grew with the feudal law. *Mackenzie*. The great English works on heraldry are those of Barcham or Barkham, published by Gwillim (1610), and Edmondson (1780).

HERALDS' COLLEGE.

Edward III. appointed two heraldic kings-at-arms for the south and north (Surroy, Norroy) 1340
Richard III. incorporated and endowed the college 1484
Philip and Mary enlarged its privileges, and confirmed them by letters patent. July 15, 1554
Formerly, in many ceremonies, the herald represented the king's person, and therefore wore a crown, and was always a knight.

This college has an earl marshal, 3 kings of arms (Garter, Clarenceux, and Norroy), 6 heralds (Richmond, Lancaster, Chester, Windsor, Somerset, and York), 4 pursuivants, and 2 extra heralds. See *Earl Marshal*, and *Kings-at-Arms*.
The building in Doctors' Commons, London, was erected by sir Christopher Wren, after the great fire in 1666 1683

HERAT, on the confines of Khorasân, a strong city called the key of Afghanistan, capital of a state formed by Shah Mahmoud, in 1818. Population in 1830, 100,000. The Persians were baffled in an attempt to take it in 1838; but took it Oct. 25, 1856, in violation of a treaty made in 1853. In consequence, war ensued between Great Britain and Persia. Peace was made in April, 1857 (see *Persia*). Herat was restored July 27 following. See *Afghanistan*.

HERCULANEUM, an ancient city of Campania, overwhelmed, together with Pompeii, by an eruption of lava from Vesuvius, Aug. 23 or 24, 79. Successive eruptions laid them still deeper under the surface, and all traces of them were lost until excavations began in 1711; in 1713 many antiquities were found. In 1738 excavations were resumed, and works of art and monuments and memorials of civilised life, were discovered. 150 volumes of MSS. were found in a chest, in 1754; and many antiquities were purchased by sir William Hamilton, and sold to the British Museum, where they are deposited; but the principal relics are preserved in the museum of Portici. The "Antichità di Ercolano," 8 vols. folio, were published by the Neapolitan government, 1757-92.

* There were at first nine or ten Saxon kingdoms, but Middlesex soon ceased to exist, and Bernicia and Deira were generally governed by one ruler, as Northumberland.

HEREFORD was made the seat of a bishopric about 676, Putta being first bishop. The cathedral was founded by a nobleman named Milfride, in honour of Ethelbert, king of the East Saxons, who was treacherously slain by his intended mother-in-law, the queen of Mercia. The tower fell in 1786, and was rebuilt by Mr. Wyatt. The cathedral was reopened after very extensive repairs, on June 30, 1862. The see is valued in the king's books at 768*l. per annum*. Present income, 4200*l.*

HERERA (Arragon). Here don Carlos, of Spain, in his struggle for his hereditary right to the throne of that kingdom, at the head of 12,000 men, encountered and defeated general Buerens, who had not much above half that number of the queen of Spain's troops. Buerens lost about 1000 in killed and wounded, Aug. 24, 1837.

HERETICS (from the Greek *hairesis*, choice). Paul says, "After the way they call *heresy*, so worship I the God of my fathers," 60 (*Acts* xxiv. 14). Heresy was unknown to the Greek and Roman religions. Simon Magus is said to have broached the Gnostic heresy about 41. This was followed by the Manichees, Nestorians, Arians, &c. Formerly the term heresy denoted a particular sect; now, heretics are those who propagate their private opinions in opposition to the Roman Catholic Church. *Burnet*. See *Inquisition*.

Thirty heretics came from Germany to England to propagate their opinions, and were branded in the forehead, whipped, and thrust naked into the streets in the depth of winter, where, none daring to relieve them, they died of hunger and cold (*Speed*) 1160

Certain laws against heretics were repealed, 25 Hen. VIII. 1534-5
The last person executed for heresy in Britain was Thomas Aikenhead, at Edinburgh . . . 1696
[The orthodox Mahomedans are Sunnites; the heretics are Shiites, Druses, &c.]

HERITABLE JURISDICTIONS (*i.e.*, feudal rights) in Scotland, valued at 164,232*l.*, were bought up in 1747 (20 Geo. II. c. 43) and restored to the crown.—*Heritable and Movable Rights*, in the Scottish law, denote what in England is meant by real and personal property; *real* property in England answering nearly to the heritable rights in Scotland, and *personal* property to the movable rights.

HERMANDAD (Spanish for brotherhood), associations of the chief cities of Castile and Arragon for the defence of their liberties in times of trouble; began about the middle of the 13th century. The brotherhood was disorganised in 1498, public order having been firmly established.

HERMAS, author of "the Shepherd," a Christian apocryphal book, supposed to have been written about 131. Some believe Hermas to be mentioned in *Romans* xvi. 14.

HERMITS. See *Monachism*. HERO, BRITISH MAN-OF-WAR. See *Wrecks*, 1811.

HERRING-FISHERY was largely encouraged by the English and Scotch so early as the 8th century. The herring statute was passed in 1357. The mode of preserving herrings by pickling was discovered about 1397. *Anderson*. The British Herring-Fishery company was instituted Sept. 2, 1750. A scientific commission in relation to the fishery was appointed in 1862.

HERRINGS, BATTLE OF THE, fought Feb. 12, 1429, when the English were besieging Orleans, obtained its name from the duc de Bourbon attempting to intercept a convoy of salt fish, on the road to the English camp before Orleans; he was beaten.

HERSCHEL TELESCOPE. Sir Wm. Herschel's seven, ten, and twenty-foot reflectors were made about 1799. He discovered the planet Uranus (*which see*), March 21, 1781, and a volcanic mountain in the moon, in 1783; and about this time laid the plan of his great forty-foot telescope, which he completed in 1789, when he discovered two other volcanic mountains. In 1802, by means of his telescopes, he was enabled to lay before the Royal Society a catalogue of 5000 nebulae and clusters of stars. The great telescope was taken down in 1822, and one of 20 feet focal length erected by sir John Herschel, who afterwards took it to the Cape of Good Hope and with it made his observations.

HERULI, a German tribe, which ravaged Greece and Asia Minor in the 3rd century after Christ. Odoacer, their leader, overwhelmed the western empire and became king of Italy, 476. He was defeated and put to death by Theodoric the Ostrogoth, 491-3.

HERZEGOVINA, a province of European Turkey, N. of Montenegro. In Dec. 1861, an insurrection against the Turks broke out, fostered by the prince of Montenegro. It was subdued ; and on Sept. 23, 1862, Vucalovitch, chief of the insurgents, surrendered on behalf of his countrymen to Kurschid Pasha, and an amnesty was granted.

HESSE (W. Germany), the seat of the Catti, formed part of the empire of Charlemagne ; from the rulers of it in his time, the present are descended. It was joined to Thuringia till about 1263, when Henry I. (son of a duke of Brabant and Sophia, daughter of the landgrave of Thuringia) became landgrave of Hesse. The most remarkable of his successors was Philip the Magnanimous (1509), an eminent warrior and energetic supporter of the Reformation, who signed the Augsburg Confession in 1530 and the League of Smalcald in 1531. At his death, in 1567, Hesse was divided into HESSE-CASSEL and HESSE-DARMSTADT, under his sons William and George. Their descendants played an eminent part in the convulsions of Germany during the 17th and 18th century.* In 1803, Hesse-Cassel became an electorate, and in 1806 Hesse-Darmstadt a grand duchy ; which titles were retained in 1814. In 1806 Hesse-Cassel was incorporated with the kingdom of Westphalia, but in 1814 the electorate was re-established.

1847. The elector Frederic-William I.,† Nov. 20
(born Aug. 20, 1802).

Heir : his son, Augustus, born Sept. 21, 1859.

HESSE-DARMSTADT. (Population, Dec. 1861, 856,907).
1848. The grand-duke Louis III., June 16 (born
June 9, 1806).

Heir : his brother Charles (born April 23, 1809),
whose son Louis married the princess Alice,
of England, July 1, 1862.

Issue : Victoria-Alborta, born April 5, 1863 ;
and another princess, Nov. 1, 1864.

HESSE-HOMBURG, a landgraviate, established in the person of Frederic, son of George of Hesse-Darmstadt, in 1596. His descendant, Augustus Frederic, married May 7, 1818, Elizabeth, daughter of George III. of England, who had no issue. The landgraviate was absorbed into the grand duchy of Hesse in 1806, but re-established in 1815 with additional territories. The landgrave Ferdinand (born April 26, 1783) succeeded his brother, Sept. 8, 1848. Population (Dec. 1861), 26,817.

HETEROGENY. See *Spontaneous Generation*.

HEWLEY'S CHARITY. See *Unitarians*.

HEXAMETER, six measures or feet, each containing two long syllables (a spondee), or a long one and two short (a dactyl), the form of verse in which Homer wrote his Iliad and Odyssey.

HEXHAM (Northumberland). The see of Hexham was founded in the infancy of the Saxon church ; it had ten bishops successively, but by reason of the spoil and rapine of the Danes, it was discontinued ; the last prelate, appointed 810. The BATTLE OF HEXHAM, in which the Yorkist army of Edward IV. obtained a complete victory over the Lancastrian army of Henry VI. was fought May 15, 1464.

HIBERNIA, Ibernia, Ivernina, and Ierne, a name given to Ireland by classical writers (Aristotle, Ptolemy, &c.). See *Ireland*. The ship *Hibernia*, captain Brenn, bound from

* Six thousand Hessian troops arrived in England, in consequence of an invasion being expected in 1756. The sum of 471,000*l.* three per cent. stock was transferred to the landgrave of Hesse, for Hessian auxiliaries lost in the American war, at 30*l.* per man, Nov. 1786. The Hessian soldiers were again brought to this realm at the close of the last century, and served in Ireland during the rebellion in 1798.

† The elector of Hesse had, in 1850, remodelled the constitution given to his people in 1831 (by which the chamber had the exclusive right of voting the taxes), and did not convene the chamber until the usual time for closing the session had arrived, when his demand for money for the ensuing year, 1851, was laid before it. The chamber called, unanimously, for a regular budget, that it might examine into, and discuss, its items. The elector dissolved the chamber, and declared the whole of his dominions in a state of siege and subject to martial law, Sept. 7, 1850. In the end he was obliged to flee to Hanover, and subsequently to Frankfurt ; and on Oct. 14, he formally applied to the Frankfort diet for assistance to re-establish his authority in Hesse. On Nov. 6 following, an Austro-Bavarian force of 10,000 men, with 20 pieces of artillery, entered Hesse-Cassel, under the command of prince Thurn und Taxis, who fixed his headquarters in Hanau ; and on the next day a Prussian force entered Cassel. The elector returned to his capital, Dec. 27, 1850, the taxes having been previously collected under threats of imprisonment. The Austro-Bavarian and Prussian troops afterwards evacuated the electorate. In 1852, the constitution of 1831 was abolished, and a new one established.—The elector and his chamber are still in a state of disagreement. Although the German federal diet affirmed the constitution of 1852, on March 14, 1860, the elector granted a new one on May 30. This, however, did not give satisfaction. Further contests ensued. In May, 1862, there was danger of an armed Prussian intervention, the king having been insulted by the Hesse ministry. In June a new ministry was formed, and the legislative chambers assembled on Oct. 27.

Liverpool to New South Wales, with 232 persons on board, of whom 208 were passengers going out as settlers, was destroyed at sea by fire, kindled through the negligence of the second mate,—in W. long. 22° and S. lat. 4°. 150 lives were lost through the insufficiency of the boats to contain more than a third of the people on board : Feb. 15, 1833.

HIEROGLYPHICS (sacred engravings), picture-writing, the expression of ideas by representation of visible objects, used chiefly by the Egyptians ; said to have been invented by Athotes, 2112 B.C. *Usher*. Young, Champollion, Rosellini, and others (in the present century), have done much to elucidate Egyptian hieroglyphics. See *Rosetta Stone*.

HIGH AND LOW CHURCH. These sections in the Church of England began in the reign of Anne, and still continue. Dr. Sacheverel, preacher at St. Saviour's, Southwark, was prosecuted for two seditious sermons (preached Aug. 14, and Nov. 9, 1709), to rouse the apprehensions of the people for the safety of the church, and to excite hostility against the dissenters. His friends were called High Church and his opponents Low Church, or moderate men, 1720. The queen, who favoured Sacheverel, presented him with the valuable rectory of St. Andrew's, Holborn. He died in 1724.

HIGH COMMISSION, COURT OF, an ecclesiastical court, erected by 1 Eliz. c. 1., 1559, by which all spiritual jurisdiction was vested in the crown. It originally had no power to fine or imprison ; but under Charles I. and archbishop Laud it assumed illegal powers, was complained of by the parliament, and was abolished in 1641.

HIGHLANDS (of Scotland), long held by semi-barbarous clans, were greatly improved by the construction of military roads by general Wade, about 1725-6 ; and by the abolition of heritable jurisdiction of feudal rights in 1748, and by the establishment of the Highland and Agricultural Society in 1784. See *Regiments*.

HIGHNESS. The title of *Highness* was given to Henry VII. ; and this, and sometimes *Your Grace* was the manner of addressing Henry VIII. ; but about the close of the reign of the latter-mentioned king, the title of "Highness" and "Your Grace" were absorbed in that of "Majesty." Louis XIII. of France gave the title of Highness to the prince of Orange, in 1644 ; this prince had previously only the distinction of Excellency. *Hénault*. Louis XIV. gave the princes of Orange the title of High and Mighty Lords, 1644. *Idem*.

HIGH PRIEST. See *Priest*.

HIGH TREASON. In regulating the trials for this was enacted the statute, so favourable to liberty, the 25th of Edward III., 1352, by which two living witnesses are required : it arose in the refusal of parliament to sanction the sentence of death against the duke of Somerset. By the 40th Geo. III., 1800, it was enacted that where there was a trial for high treason in which the overt act was a direct attempt upon the life of the sovereign, such trial should be conducted in the same manner as in the case of an indictment for murder.*

HIMERA (Sicily). Here (in 480 B.C.) Theron and Gelon of Agrigentum defeated the Carthaginians ; and here the latter defeated Agathocles of Syracuse, 310 B.C.

HINDOO ERA (see *Calī-yuga*) began 3101 B.C., or 756 before the Deluge, in 2348. The Hindoos count their months by the progress of the sun through the zodiac. The Samoat era begins 56 B.C. ; the Saca era A.D. 79.

HIPPOPOTAMUS (Greek, *river-horse*), a native of Africa, known to, but incorrectly described by ancient writers. Hippopotami were exhibited at Rome by Antoninus Commodus and others, about 138, 180, and 218. The first brought to England arrived May 25, 1850, and is now in the Zoological Gardens, Regent's-park, London ; another, a female, four months old, was placed there in 1854. Two young ones born at Paris in May, 1858, and June, 1859, were killed by their mother. One born at Amsterdam, July 29, 1865, was living in September.

* The last two cases of persons executed for high treason were, 1st, William Cundell, *alias* Connell, and John Smith. They were tried on a special commission, Feb. 6, 1812, being two of fourteen British subjects taken in the enemy's service in the Isles of France and Bourbon. Mr. Abbot, afterwards lord Tenterden and chief justice, and sir Vicary Gibbs, attorney-general, conducted the prosecution, and Mr. Brougham, now lord Brougham, defended the prisoners. The defence was, that they (the prisoners) had assumed the French uniform for the purpose of aiding their escape to England. The two above-mentioned were hanged and beheaded on the lodge of Horsemonger-lane gaol on March 16, 1812. All the other convicts were pardoned upon condition of serving in colonies beyond the seas. 2nd, the *Cato Street Conspirators* (which see), May 1, 1820.

HIPPODROME, a circus for horse-riding. One opened by Mr. John Whyte, near Notting-hill, London, on May 29, 1837, was closed in 1841 by the Kensington vestry.

HISTOLOGY (from *histos*, a web), the science which treats of the tissues which enter into the formation of animals and vegetables; mainly prosecuted by the aid of the microscope. Schwann, Valentin, Kölliker, and Robin are celebrated for their researches. Professor Quekett's Lectures on Histology were published in 1852 and 1854.

HISTORY. The Bible, the Parian Chronicle, the histories of Herodotus and Ctesias, and the poems of Homer, are the foundations of early *ancient* history. Later ancient history is considered as ending with the destruction of the Roman empire in Italy, 476; and *modern* history dates from the age of Charlemagne, about 800. There was not a professorship of modern history in either of our universities until the years 1724 and 1736, when Regius professorships were established by George I. and George II.

HOBART TOWN, or **HOBARTON**, a sea-port and capital of Van Diemen's Land, was founded in 1804 by col. Collins, the first lieutenant-governor, who died here in 1810.

HOCHKIRCHEN (Saxony), where, on Oct. 14, 1758, the Prussian army, commanded by Frederick II., was surprised and defeated by the Austrians commanded by count Daun. Marshal Keith, a Scotsman, in the Prussian service, was killed. The Austrian generals shed tears, and ordered his interment with military honours.

HOCHSTADT, a city on the Danube, in Bavaria, near which several important battles have been fought: (1.) Sept. 20, 1703, when the Imperialists were defeated by the French and Bavarians, under marshal Villars and the elector of Bavaria. (2.) Aug. 13, 1704, called the battle of Blenheim (*which see*). (3.) June 19, 1800, when Moreau totally defeated the Austrians, and avenged the defeat of the French at Blenheim.

HOHENLINDEN (Bavaria), **BATTLE OF**, Dec. 3, 1800, between the Austrians commanded by archduke John, and the French commanded by general Moreau. The Imperialists were defeated with great loss in this hard-fought battle, their killed and wounded amounting to 10,000 men, and their loss in prisoners to 10,000 more. The forces opposed were nearly equal in numbers. The peace of Luneville followed.

HOLLAND (*Hollow land*, or, some say, *Wooded land*), a kingdom, N.W. Europe, the chief part of the northern Netherlands, is composed of land rescued from the sea, and defended by immense dykes. It was inhabited by the Batavi in the time of Caesar, who made a league with them. It became part of Gallia Belgica, and afterwards of the kingdom of Austrasia. From the 10th to the 15th century it was governed by counts under the German emperors. In 1861, the population of the kingdom in Europe was 3,521,416; of the colonies, 18,175,910; of both in 1863, 21,805,607.

HOLMFIRTH FLOOD. On Feb. 5, 1852, the Bilbury reservoir above Holmfirth, near Huddersfield, in Yorkshire, burst its banks, and levelled four mills and many ranges of other buildings, destroying the lives of more than 90 persons, and devastating property estimated at from half a million to 800,000*l.*

HOLSTEIN AND SCHLESWIG (N.W. Germany), duchies once belonging to Denmark. The country, inhabited by Saxons, was subdued by Charlemagne in the beginning of the 9th century, and afterwards formed part of the duchy of Saxony. In 1106 or 1110, Adolphus of Schauenberg became count of Holstein: his descendants ruled till 1459, when Adolphus VII. died without issue, and the states of Holstein and Schleswig elected Christian king of Denmark, his nephew, as their duke, through fear of his arms. In 1544, his grandson, Christian II., divided his states amongst his brothers, with the condition that the duchies should remain subject to Denmark. The eldest branch of the family reigned in Denmark till the decease of Frederick VII., Nov. 15, 1863. From a younger branch (the dukes of Holstein-Gottorp) descended, through marriage, the kings of Sweden from 1751—1818, and the reigning family in Russia since 1762, when the duke, as the husband of Anne, became czar. In 1773, Catherine II. of Russia ceded Holstein-Gottorp to Denmark in exchange for Oldenburg, &c. The duchies were occupied by the Swedes in 1813, but restored to Denmark in 1814, and on May 28, 1831, constituent assemblies were granted to them. Since 1844 disputes have been rife between the duchies and Denmark, and in 1848 the states-general of the duchies voted their annexation to the German confederacy, in which they were supported by Prussia: war ensued, which lasted till 1850. See *Denmark*. The agitation in the duchies, encouraged by Prussia, revived in 1857. The Germans in Schleswig desired it to be made a member of the German confederation, like Holstein; and both duchies demanded a local government more independent of Denmark, which changes were resisted by that power. For the events of the war of 1864, see *Denmark*. By the convention signed at Gastein, Aug. 14, 1865, the government of Holstein was left with Austria, and that of Schleswig with Prussia. See *Gastein*. Population in 1860, 1,004,473.

HOLY ALLIANCE, was ratified at Paris, Sept. 26, 1815, between the emperors of Russia (its originator) and Austria, and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions, with a view to perpetuating the peace they had achieved. The compact was severely censured in this country as opposed to rational liberty.

HOLY MAID OF KENT,—Elizabeth Barton was incited by the Roman Catholic party to hinder the Reformation, by pretending to inspirations from heaven. She foretold that Henry VIII. would die a speedy and violent death if he divorced Catherine of Spain and married Anne Boleyn, and direful calamities to the nation. She and her confederates were hanged at Tyburn, April 20, 1534. *Rapin*.

HOLY PLACES IN PALESTINE. The possession of these places has been a source of contention between the Greek and Latin churches for several centuries. In the reign of Francis I. they were placed in the hands of the Latin monks, under the protection of the French government, by a treaty with the then sultan; but the Greeks from time to time obtained firmans from the Porte invalidating the rights of the Latins, who were at last (in 1757) expelled from some of the sacred buildings, which were committed to the care of the Greeks by a hatti-scheriff, or imperial ordinance.

HOLY PLACES, *continued*.

The holy sepulchre partially destroyed by fire, and rebuilt by the Greeks, who claim additional privileges, and cause fresh dissensions 1808
 The Russian and French governments interfered, and sent envoys (M. Dashkoff and M. Marcellus) to adjust the dispute; but an arrangement was prevented by the Greek revolution in 1821
 The subject again agitated, and the Porte propose that a mixed commission should adjudicate on the rival claims. M. Titoff, the Russian envoy, acting on behalf of the Greeks, and M. Lavalette, the French envoy, on that of the Latins, took up the question very warmly 1850
 A firman issued by the Porte, confirming and consolidating the rights previously granted to the Greek Christians, and declaring that the Latins had no right to claim exclusive possession of certain holy places specified, but permitting them to possess a key of the

church at Bethlehem, &c., as in former times March 9, 1852
 The French government acquiesced, with much dissatisfaction; but the Russian envoy still desired the key to be withheld from the Latin monks. M. D'Ozeroff made a formal declaration of the right of Russia to protect the orthodox in virtue of the treaty of Kainardji in 1774, and demanded that the firman of March 9, 1852, should be read at Jerusalem, although it militated against his pretensions, which was accordingly done. The dispute still continued, the Porte being exposed to the attacks of both the Russian and French governments March, 1853
 Prince Menschikoff arrives at Constantinople as envoy extraordinary, and in addition to the claims respecting the holy places, makes those demands respecting the protection of the Greek Christians in Turkey which led to the war of 1854-6. (See *Russo-Turkish War*)

HOLY ROOD OR CROSS. A festival was instituted on account of the recovery of a large piece of the cross by the emperor Heraclius, after it had been taken away, on the plundering of Jerusalem, about 615. The feast of the finding (or invention) of the Cross is on May 3; that of the exaltation of the Cross, Sept. 14. At Boxley abbey, in Essex, was a crucifix, called the *Rood of Grace*; at the dissolution it was broken in pieces as an imposture by Hilsey, bishop of Rochester, at St. Paul's cross, London.

HOLYROOD PALACE (Edinburgh), formerly an abbey, was for several centuries the residence of the monarchs of Scotland. The abbey, of which some vestiges remain, was founded by David I. in 1128, and in the burial-place within its walls are interred several of his successors. The palace is a large quadrangular edifice of hewn stone, with a court within surrounded by piazzas. In the north-west tower is the bed-chamber which was occupied by queen Mary; and from an adjoining cabinet to it David Rizzio, her favourite, was dragged forth and murdered, March 9, 1566. The north-west towers were built by James V., and the remaining part of the palace was added during the reign of Charles II. Great improvements were made in 1857. The Queen held her court here, Aug. 30, 1850.

HOLY SEPULCHRE, a Byzantine church in modern Jerusalem. Fergusson, Robinson, and others, consider the true site of the holy sepulchre to be the mosque of Omar, termed the "dome of the Rock." The question is still undecided, and investigations are going on at the expense of the Russian government. See *Knights*.

HOLY WARS. See *Crusades*.

HOLY WATER is said to have been used in churches as early as 120. *Ashe*.

HOLY WEEK, or, the "Week of Indulgences," is the week before Easter.

HOMELDEN (Northumberland), where the Scots, headed by the earl of Douglas, were defeated by the Percies (among them Hotspur), Sept. 14, 1402. Douglas and the earls of Angus, Murray, Orkney, and the earl of Fife, son of the duke of Albany, and nephew of the Scottish king, with many of the nobility and gentry, were taken prisoners.

HOMER'S ILIAD AND ODYSSEY, the two most perfect epic poems in the world, written by the greatest poet that has ever lived. The first begins with the wrath of Achilles, and ends with the funeral of Hector; the second recounts the voyages and adventures of Ulysses, after the destruction of Troy. Various dates are assigned to these works, from 962 to 915 B.C.* Among the thousands of volumes burnt at Constantinople, A.D. 477, are said to have been the works of Homer written in golden letters on the great gut of a dragon, 120 feet long.

HOMICIDE. This crime was tried at Athens by the Areopagites, 1507 B.C. He that killed another at any public exercise of skill, or who killed another that lay hid to do a person mischief of a grievous nature, was not deemed guilty. He who killed a man taken

* The first English version of the Iliad, by Arthur Hall, appeared in 1581. The most celebrated versions of Homer's works are Chapman's, 1616; Hobbes', 1675; Pope's, 1715-25; Cowper's, 1791. The translation of the Iliad by the earl of Derby (1864) is much commended.

with another's wife, sister, daughter, or concubine, or he that killed a man who, without just grounds, assaulted another violently, was not deemed a homicide. Among the Jews, wilful murder was capital; but for chance-medley the offender was to fly to one of the cities of refuge, and there continue till the death of the high-priest, 1451 B.C. (*Nam. xxxv.*). 9 Geo. IV. c. 31 (1828), distinguishes between justifiable homicide and homicide in its various degrees of guilt, and circumstances of provocation and wilfulness. See *Murder*.

HOMILIES (*Greek*) in early Christian times were discourses delivered by the bishop or presbyter, in a homely manner, for the common people.—The Book of Homilies drawn up by abp. Crammer, and published 1547; and another prepared by an order of convocation, 1563, were ordered to be read in those churches that had not a minister able to compose proper discourses.—*Slow*.

HOMOEOPATHY, a hypothesis promulgated at the commencement of the present century by Dr. Samuel Hahnemann, of Leipsic (died 1843), according to which every medicine has a specific power of inducing a certain diseased state of the system (*similia similibus curantur*, likes are cured by likes); and if such medicine be given to a person suffering under the disease which it has a tendency to induce, such disease disappears, because two similar diseased actions cannot simultaneously subsist in the same organ. *Brande*. Infinitesimal doses of medicine, such as the millionth of a grain of aloes, have been employed, it is said, with efficacy. The real merits of the system consist in its inducing the patient to regulate his diet and habits according to the dictates of common sense.—The Hahnemann hospital was opened in Bloomsbury-square, Sept. 16, 1850.

HOMOUSION AND HOMOIOUSION (*Greek*, same essence, and similar essence or being), terms employed with respect to the nature of the Father and the Son in the Trinity. The orthodox party adopted the former term as a party cry at the council of Nice, 325; the Arians adopted the latter at Seleucia, 359.

HONDURAS, one of the republics of Central America (*which see*). Great Britain ceded the Bay Islands to Honduras, Nov. 28, 1859. Its present president, general J. M. Medina, was elected for four years, Feb. 1, 1864. Population, about 350,000 (1860). *British Honduras*, Central America, was settled by English from Jamaica soon after a treaty with Spain in 1667. They were often disturbed by the Spaniards and sometimes expelled, till 1783. Balize or Belize, the capital, is a great seat of the mahogany trade. In 1861, the population was 25,635, and the revenue, 35,757*l*.

HONEY-MOON. Among the ancients a beverage prepared with honey, such as that known as mead, and as metheglin, in England. It was a custom to drink of diluted honey for thirty days, or a moon's age, after a wedding-feast, and hence arose the term *honey-moon*, of Teutonic origin. Attila the Hun drank, it is said, so freely of *hydromel* on his marriage-day, that he died of suffocation, 453.

HONG-KONG, an island off the coast of China, was taken by capt. Elliott, Aug. 23, 1839, and ceded to Great Britain, Jan. 20, 1841. Its chief town is Victoria, built in 1842, and erected into a bishopric in 1849. Sir John Bowring, governor from 1854 to 1859, was succeeded by sir Hercules Robinson.

HONI SOIT QUI MAL Y PENSE, "Evil be to him who evil thinks." It is said that the countess of Salisbury, at a hall at court, happening to drop her garter, the king, Edward III., took it up, and presented it to her with these words, which afterwards became the motto of the order of the garter; but this statement is unsupported by sufficient authority.—The order is said to have been instituted, April 23, 1349.

HONOUR. Temples were erected to Honour by Scipio Africanus, about 197 B.C.; and by C. Marius, about 102 B.C.—The *Legion of Honour* was created by Bonaparte in 1802.

HOOKS AND CODFISH. See *Holland*, 1347.

HOOPS. See *Crinoline*.

HOPS. Introduced from the Netherlands, into England, about 1524, and used in brewing; but the physicians having represented that they were unwholesome, their use was prohibited in 1528. *Anderson*. In the year ending Jan. 5, 1853, there were 46,157½ acres under hops in England and Wales, chiefly in Herefordshire, Kent, and Worcestershire, which paid 447,144*l*. duty; the quantity yielded was 51,102,494 lbs., whereof 955,855 lbs. were exported. The duty on hops was repealed in 1862, after many applications.

HORATH AND CURIATH. The Romans and the Albans, contesting for superiority, chose three champions on each side to determine it. The three Horatii (Roman knights) overcame the Curiatii (Albans), and thereby united Alba to Rome, about 669 B.C.

HORN ; HORNPIPE. The horn is thought to be, next to the reed, the earliest wind instrument, and has been found among most savage nations. It was first made of horn, hence the name ; afterwards of brass, with keys, for the semi-tones, in the last century.—The dance called the Hornpipe is supposed to be so named from its having been performed to the Welsh *pib-corn*, that is, hornpipe, about 1300. *Spencer.*

HORNE TOOKE, &c. The trial of Messrs. Hardy, Tooke, Joyce, Thelwall, and others, on a charge of high treason, caused a great sensation in England. They were taken into custody on May 20, 1794. Mr. Hardy was the first who was put to the bar, Oct. 29, same year ; and, after a trial which lasted eight days, he was honourably acquitted. John Horne Tooke was next tried, and was acquitted Nov. 20 ; and Mr. Thelwall also was acquitted, Dec. 5 ; all the other accused persons were discharged. Acts were passed to prohibit Mr. Thelwall's political lectures in 1795. See *Gagging Bills* and *Thelwall*.

HOROLOGY. See *Clocks*.

HORSE.* The people of Thessaly were excellent equestrians, and probably were the first, among the Greeks at least, who rode upon horses, and broke them in for service in war ; whence arose the fable that Thessaly was originally inhabited by centaurs. "Solomon had 40,000 stalls of horses for his chariots, and 12,000 horsemen," 1014 B.C. 1 *Kings* iv. 26. The power of the horse is equal to that of five or six men. *Smeaton.* The Greeks and Romans had some covering to secure their horses' hoofs from injury. In the 9th century horses were only shod in the time of frost. The practice of shoeing was introduced into England by William I., 1066. In England there are 2,000,000 draught and pleasure horses, and 100,000 agricultural horses, which consume the produce of 7,000,000 acres. The horse-tax was imposed in 1784, and was then levied on all saddle and coach horses in England. Its operation was extended, and its amount increased, in 1796 ; and again in 1808. The existing duty upon "horses for riding" only, in England, amounts to about 350,000*l.* per year (1862).† See *Race-Horses*.

HORSE GUARDS. They were instituted in the reign of Edward VI. 1550, and revived by Charles II. 1661. The first troop of the Horse Grenadier Guards was raised in 1693, and was commanded by general Cholmondeley ; and the second troop, commanded by lord Forbes, was raised in 1702. There was a reduction of the Horse and Grenadier Guards, and Life Guards, as now established, were raised in their room, May 26, 1788. *Phillips.* The present edifice called the Horse Guards was erected by Ware about 1730. In the front are two small arches, where horse-soldiers, in full uniform, daily mount guard. In a part of the building is the office of the commander-in-chief.

HORSE-RACING. See *Racing*.

HORTICULTURAL SOCIETIES. Horticulture, the art of cultivating gardens, is a late word in our dictionaries (from *hortus* and *cultura*), and was first used by Evelyn. The (now Royal) Horticultural society of London was founded by sir Joseph Banks and others in 1804, and was incorporated April 17, 1809 ; the Edinburgh society in 1809 ; and that of Dublin in Jan. 1817. The transactions of the London society (1812, &c.) have attracted great attention. In 1822 the planting of the society's garden at Chiswick was begun. The annual exhibitions there date from 1831. The society not having been prosperous, in 1859 the library was sold. In July a proposal for laying out a garden for the society, on the Brompton estate belonging to the Crystal Palace commissioners, received the support of the queen, nobility, &c., and Mr. Nesfield's design was adopted in May, 1860. On June 5, 1861, the new gardens were opened by the prince consort, who planted a *Wellingtonia gigantea* (which see). The queen also planted one on July 24 following. On June 10, 1863, the Albert memorial was uncovered in the presence of the prince and princess of Wales.

* In March, 1858, Mr. J. S. Rarey, an American, made a great sensation in London by taming vicious and wild horses, and even a zebra from the Zoological Gardens. His system is founded on a profound study of the disposition of the animal, and on kindness. He initiated many illustrious persons in his method (on March 20, 1858, lord Palmerston and twenty others), binding them to secrecy ; from which they were released in June, 1858, when his book was reprinted in England without his consent. In July, 1859, he was engaged to instruct cavalry officers and riding-masters of the army. On Jan. 12, 1860, he gave a lecture to the London cabmen, which was well received ; and in May same year he received a present of 20 guineas from the Society for the Prevention of Cruelty to Animals.

an infirmary for the sick. The richly endowed "five royal hospitals" under "the pious care of the lord-mayor of London," &c., are St. Bartholomew's, St. Thomas's, Bridewell, Bethlehem, and Christ's. See *Infirmarys*. The Royal Dispensary in Aldersgate-street was the first established, 1770.

HOST, ELEVATION OF THE, introduced into Roman Catholic worship, and prostration enjoined, in 1201. Pope Gregory IX. was the first pontiff who decreed a bell to be rung as a signal for the people to betake themselves to the adoration of the host, 1228, which is done to this day. *Does*. The supposed miracle of the consecrated host being visibly changed into the body of our Lord, is referred by Hénault to 1290.

HOT BLAST. See *Blowing Machine*.

HOURS. The day began to be divided into hours from the year 293 B.C., when L. Papius Cursor erected a sun-dial in the temple of Quirinus at Rome. Previously to the invention of water-clocks (*which see*), 158 B.C., the time was called at Rome by public criers. The Chinese divide the day into twelve parts of two hours each. The Italians reckon twenty-four hours round, instead of two divisions of twelve hours. In England, the measurement of time was, in early days, uncertain : one expedient was by wax candles, three inches burning an hour, and six wax candles burning twenty-four hours : said to have been invented by Alfred, A.D. 886. For *Hours of Prayer*, see *Breviary*.

HOUSE DUTY was imposed in 1695. Its rate was frequently changed till its repeal in 1840 (3 & 4 Will. 4. c. 39). It was re-imposed as a substitute for the window tax, in 1851.

HOUSELESS POOR ACT (Metropolitan) was passed in 1864, and made perpetual in 1865. See *Poor*.

HOUSE OF COMMONS, LORDS, &c. See *Parliament, Lords, and Commons*.

HOWARD FAMILY. John Howard, son of Margaret, the heiress of the Mowbrays, was created earl marshal and the 7th duke of Norfolk in 1483. He was slain with his master, Richard III., at Bosworth, Aug. 22, 1485. His son was restored to the earldom of Surrey in 1489, in reward for having gained the victory of Flodden, Sept. 9, 1513; he was created the 8th duke of Norfolk in 1514. Thomas, the 10th duke, was beheaded for conspiracy against queen Elizabeth on behalf of Mary, queen of Scots, in 1572. Henry Fitzalan Howard, now the 21st duke of Norfolk, and the 18th of the Howard family, premier duke and earl of England and hereditary earl marshal, was born in 1847.

HOWITZER, a German piece of ordnance, ranking between a cannon and a mortar, came into use early in the 18th century.

HUDSON'S BAY, discovered by captain Henry Hudson, when in search of a north-west passage to the Pacific Ocean, 1610; had been discovered by Frobisher in the reign of Elizabeth, although Hudson ventured further north. The latter, passing the winter in this bay on his fourth voyage, was, with four others, thrown by his sailors into a boat, and left to perish. The Hudson's-Bay Company obtained a charter in 1670. Their licence expired in 1859. The forts were destroyed by the French in 1686 and 1782. In July, 1863, the formation of a new company was proposed.

HUE AND CRY. The old common-law process of pursuing "with horn and with voice," from hundred to hundred, and county to county, all robbers and felons. Formerly, the *hundred* was bound to make good all loss occasioned by the robberies therein committed, unless the felon were taken; but by subsequent laws it is made answerable only for damage committed by riotous assemblies. The pursuit of a felon was aided by a description of him in the *Hue and Cry*, a gazette established for advertising felons in 1710. *Ashe*.

HUGUENOTS, a term (derived by some from the German *Eidgenossen*, confederates; by others from Hugues, a Geneveve Calvinist) applied to the Reformed party in France, followers of Calvin. They took up arms against their persecutors in 1561. After a delusive edict of toleration, a great number were massacred at Vassy in 1562 (March 1), when the civil wars began, which lasted with some intermission till the edict of Nantes in 1598, revoked in 1685. The massacre of St. Bartholomew's day, Aug. 24, 1572, occurred during a truce. See *Calvinists*, *Bartholomew*, and *Edict*.

HULL (E. Yorkshire), a rising commercial place in 1200, was named Kingston-upon-Hull in 1296 by Edward I., who purchased the town, formed the port, and granted a charter. Great fire; damage about 100,000*l.*, Aug. 15, 1864.

HULSEAN LECTURES (on Theology), were instituted at Cambridge by the will of the rev. John Hulse, who died in 1790. They began in 1820, when twenty lectures were given by the rev. Christopher Benson. In 1830 the number was reduced to eight.

HUMANE SOCIETY, ROYAL (London), for the recovery of persons apparently drowned, was founded in 1774, by Drs. Goldsmith, Heberden, Towers, Lettsom, Hawes, and Cogan, but principally by the last three. The society has 221 receiving-houses, supplied with apparatus. The principal one was erected in 1794, on a spot of ground given by George III. on the north side of the Serpentine river, Hyde-park. The motto of this society is appropriate—"Lateat scintillula forsan"—"a small spark may perhaps lie concealed." See *Drowning*.

HUMILIATI, a congregation of religious of the church of Rome, formed by some Milanese who had been imprisoned by Frederick I. 1162. The order had more than ninety monasteries; but was abolished for luxury and cruelty by pope Pius V., and their houses were given to the Dominicans, Cordeliers, and other communities, in 1570.

HUMMING-BIRDS. Mr. Gould's beautiful collection of the skins of these birds was exhibited at the Zoological Gardens, London, in 1851. His elaborate work on them in five folio volumes, with richly coloured plates, was completed in 1862.

HUNDREDS, a Danish institution; a hundred being a part or division of a shire, so called, as is supposed, from its having been composed of a hundred families, at the time the counties were originally divided by king Alfred, about 897. The hundred-court is a court-baron held for all the inhabitants of a hundred instead of a manor. *Law Dictionary*.

HUNGARY, part of the ancient Pannonia and Dacia, was subjected to the Romans about 106, and retained by them till the 3rd century, when it was seized by the Goths, who were expelled about 376 by the Huns, under Attila. See *Huns* and *Attila*. On his death, in 453, the Ostrogoths, Gepidae, and Lombards at times held the country, which was however acquired by the Avars about 568, and retained by them till their destruction by Charlemagne in 799. About 894 the country was settled by a Scythian tribe, named Vingours or Ungri (whence the German name *Ungarn*), and the Magyars of Finnish origin. The chief of the latter, Arpad, was the ancestor of a line of kings (see *below*). The progress of the Magyars westward was checked by their defeat by the emperor Henry the Fowler, 934. The line of Arpad became extinct in 1309, when Charles Robert of Anjou ascended the throne. In 1526 it accrued to the house of Austria, in which it was made hereditary in 1687. War with Turkey was frequent from the 15th to the 18th century. The Magyars have of late much intermingled with the German and Slavonic races. Population (without the army) in 1857, 9,900,785. HUNS, a race of warlike Asiatics, said to have conquered China, about 210 B.C., and to have been expelled therefrom about A.D. 90. They invaded Hungary about 376, and drove out the Goths. Marching westward, under Attila, they were thoroughly beaten at Chalons by the consul Aëtius, 451. See *Attila*.

HUNTING : an ancient pastime. The "Bokys of Hawking and Huntynge," by Dame Juliana Barnes, was printed at St. Albans, 1486.

HUSSARS, light cavalry in Poland and Hungary, about 1600 : and as they were more fitted for a hasty enterprise than a set battle, they are supposed to have taken their name from the *huzzas* or shout they made at their first onset. They were generally opposed to the Turkish horse, "and were oddly clothed, having the skins of tigers and other wild beasts hanging on their backs against bad weather, and wore fur caps, with a cock's feather." *Pardon*. Hussars became the name of a British force in the last century (1759), very differently attired.

HUSSITES. After the death of Huss,† many of his followers took up arms, in 1419,

* It was 14 feet wide, and 1342 feet long; the length of the central span, between the two piers, 676 feet; the height of the two towers 55 feet above the footway, and 84 above high water; the piers were in the Italian style, with the chains passing through the attic of each. The cost of the masonry was 60,000*l.*; of the ironwork, exceeding 700 tons in weight, 17,000*l.*; of the approaches, 13,000*l.*; total 102,245*l.* Architect, I. K. Brunel.

† The clergy having instigated the pope to issue a bull against heretics, John Huss (born in Bohemia in 1373), a zealous preacher of the Reformation, was cited to appear before a council of divines at Constance,

and formed a political party under John Ziska, and burnt the city of Tabor. They defeated the emperor Sigismund several times, 1420-22 : but after being worsted in 1434, at Bömisch-brod, they entered into negotiations, which ended in the Compact of Prague. They were again defeated by Albert of Austria in 1438. The pacific portion of the Hussites existed in the time of Luther, and were called "Bohemian Brethren."

HUSTINGS (said to be derived from *House Court*, an assembly among the Anglo-Saxons), an ancient court of London, being its supreme court of judicature, as the court of common council is of legislature. The court of *Hustings* was granted to the city of London, to be holden and kept weekly, by Edward the Confessor, 1052. Winchester, Lincoln, York, &c., were also granted Hustings courts.

HUTCHINSONIANS included many eminent clergy, who did not form any sect, but held the opinions of John Hutchinson, of Yorkshire ; they rejected the Newtonian system, and contended that the scriptures contain a complete system of natural philosophy. His work, "*Moses' Principia*," was published in 1724. He derived all things from the air, whence he said proceeded fire, light, and spirit,—types of the Trinity. In 1712 he invented a time-piece for finding the longitude, and died in 1737.

HYDE PARK, W. (London), the ancient manor of Hyde, belonging to the abbey of Westminster, became crown property at the dissolution, 1539. It was sold by parliament in 1652 ; but was resumed by the king at the restoration in 1661. It comprises about 394 acres, with a large winding sheet of water, called the Serpentine. There are eight entrances.

HYDRAULIC PRESS. See under *Hydrostatics*.

HYDROGEN (from *hydōr*, water) under the name of combustible air was obtained by Paracelsus in the 16th century. In 1766 Cavendish described its properties ; and, in 1781, he and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burnt, water is produced ; subsequently Lavoisier decomposed water into its elements. One volume of oxygen combines with two volumes of hydrogen, and forms water. Hydrogen is never found in the free state. *Gmelin*.

HYDROGRAPHY is the description of the surface waters of the earth. The first sea-chart is attributed to Henry the Navigator, in the 16th century. There is a hydrographic department in the British Admiralty, by which a series of charts has been issued.

HYDROMETER, the instrument by which is measured the gravity, density, and other properties of liquids. The oldest mention of the hydrometer occurs in the 5th century, and may be found in the letters of Synesius to Hypatia ; but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found. *Beckmann*. Archimedes was killed in 212 B.C., and Hypatia was torn to pieces, A.D. 415.

HYDROPATHY, a term applied to the treatment of diseases by cold water, practised by Hippocrates in the 4th century B.C., by the Arabs in the 10th century A.D., and revived by Dr. Currie in 1797. The present system was suggested in 1825 by Vincenz Priessnitz, of Grafenberg, in Austrian Silesia ; and though he is considered as its founder, the rational part of the doctrine was understood and maintained by the eminent Dr. Sydenham, before 1689. Priessnitz died Nov. 26, 1851. *Brande*.

the emperor Sigismund sending him a safe-conduct. He presented himself accordingly, but was thrown into prison, and after some months' confinement was adjudged to be burned alive, which he endured with resignation, July 6, 1415. Jerome of Prague, his intimate friend, who came to this council to support and second him, also suffered death by fire, May 30, 1416, although he also had a safe-conduct.

HYGROMETER, an instrument for measuring the moisture in the atmosphere. That by Saussure (who died in 1799) is most employed. It consists of a human hair boiled in caustic lye, and acts on the principle of absorption. *Brande*. Daniell's hygrometer (1820) is much esteemed.

HYMNS. The song of Moses is the most ancient, 1491 B.C. (*Erod.* xv.). The Psalms date from about 1060 B.C. to about 444 B.C. (from David to Ezra). The hymns of the Jews were frequently accompanied by instrumental music. Paul (A.D. 64) speaks of Christians admonishing one another "in psalms and hymns and spiritual songs" (*Col.* iii. 16). Hilary, the bishop of Arles, in France, is said to have been the first who composed hymns to be sung in Christian churches, about 431. The hymns of Dr. Watts (died 1748), and of John Wesley (died 1791), and his brother Charles, are much used by English dissenters.

HYPNOTISM (Greek *hypnos*, *sleep*) or nervous sleep, terms given by Mr. Braid (in 1843) to a sleep-like condition, produced in a person by steadily fixing his mind on one particular object. Minor surgical operations have, it is said, been performed without pain on persons in this state.

I.

IAMBIC VERSE. Iambe, an attendant of Metanira, wife of Celeus, king of Sparta, when trying to exhilarate Ceres, while the latter was travelling over Attica in quest of her daughter Proserpine, entertained her with jokes, stories, and poetical effusions; and from her, free and satirical verses have been called *Iambics*. *Apollodorus*. Iambic verses were first written about 700 B.C., by Archilochus, who had courted Neobulë, the daughter of Lycambes; but after a promise of marriage the father preferred another suitor, richer than the poet; whereupon Archilochus wrote so bitter a satire on the old man's avarice, that he hanged himself. *Herodotus*.

IBERIA. See *Georgia*.

ICE. Galileo was the first to observe ice to be lighter than the water which composed it, and therefore to float: about 1597.* See *Congelation*, where is noticed the ice-making machines of Harrison and of Siebe. In 1841 there were sixteen companies in Boston, U.S., engaged in exporting ice, brought from Wenham, Fresh, and Spy Ponds, about 18 miles from that city. The trade was begun by Mr. Tudor in 1806. 156,540 tons were sent from Boston alone in 1854. In New York, in 1855, 305,000 tons were stored up, of which 20,000 were for exportation.

ICELAND (North Sea), discovered by Norwegian chiefs, about 861; according to some accounts, it had been previously visited by a Scandinavian pirate. It was peopled by the Norwegians in 874, and has belonged to Denmark since 1397. Christianity was introduced about 996; and protestantism about 1551.†

"**ICH DIEN**," I serve, the motto under the plume of ostrich feathers found in the helmet of the king of Bohemia after he was slain at the battle of Cressy, at which he served as a volunteer in the French army, Aug. 26, 1346. Edward the Black Prince, in veneration of his father, Edward III., who commanded that day, though the prince won the battle, adopted this motto, which has ever since been borne with the feathers, by the heirs to the crown of England; but not as prince of Wales, which many have erroneously maintained.

* *Regelation* and other properties, exhibited by professor Faraday, in 1850, are still the subject of investigation by eminent physicists of the present day, especially Tyndall, J. D. Forbes, and Wm. Thomson.

† In 1784-5, there occurred here the most tremendous volcanic eruption on record; it was accompanied by violent wind and rain, and a darkness of the heavens; and it was feared that the island would fall to pieces. Three fire-spouts broke out on Mount Skapta, which, after rising to a considerable height in the air, formed a torrent of red-hot lava that flowed for six weeks, and ran a distance of 60 miles to the sea, in a broken breadth of nearly 12 miles; 12 rivers were dried up; 21 villages totally overwhelmed by fire or water; and 34 others were materially injured. See *Hecla*.

ICHOLOGY, the science of footprints, treats of the impressions made in mud or sand by the animals of former ages. Dr. Duncan first discovered the footprints of a tortoise in the sandstone of Annandale, in 1828; since then numerous discoveries have been made by Owen, Lyell, Huxley, and others.

ICHTHYOLOGY, the science of fish. Eminent writers are Willoughby, Ray, Valenciennes, Cuvier, Owen, Agassiz, &c. Yarrell's "British Fishes" (1836-59) is a classical work. See *Fish*.

ICONIUM (Syria). Here Paul and Barnabas preached, 38. Soliman the Seljuk founded a kingdom here in 1074, which lasted till 1307, when it was conquered by the Turks. It had been subdued by the Crusaders in 1097 and 1190. See *Konieh*.

ICONOCLASTS (image-breakers). The controversy respecting images (which had been introduced into churches for popular instruction about 300) was begun about 726, and occasioned many insurrections in the Eastern Empire. Leo Isauricus published two edicts for demolishing images in churches in that year, and enforced them with great rigour in 736. The defenders of images were again persecuted in 752 and 761, when Constantine forbade his subjects becoming monks. The worship of images was restored by Irene in 780. This schism was the occasion of the second council of Nice, 787. Theophilus banished all the painters and statuarics from the Eastern Empire, 832. The Iconoclasts were finally excommunicated in 869. This controversy led to the separation of the Greek and Latin churches. In the contests between the Iconoclasts and their opponents thousands perished.—Many images in churches were destroyed in England and Scotland during the Reformation and the Civil war, 1641-8.

IDAHO, a northern "territory" of the United States of North America, was organised as such on March 3, 1863.

IDES, in the Roman calendar, the thirteenth day of each month, except in March, May, July, and October, in which it was the fifteenth day; in these four it was six days before the nones, and in the other months four days. The Ides of March was the day on which Julius Cæsar was assassinated in the senate house by Brutus, Cassius, Casca, and other conspirators, 44 B.C.

IDIOTS. About 1855 there were in England, exclusively of lunatics, pauper idiots, or idiots protected in national institutions, males, 3372; females, 3893; total, 7265. For laws relating to idiots, see *Lunacy*. The Idiot Asylum at Earlswood, near Reigate, Surrey, began in 1847.

IDOLS. The public worship of idols was introduced by Ninus, king of Assyria, 2059 B.C. *Tossius*. Images are mentioned in *Gen.* xxxi. 19, 30, 1739 B.C. The Jews frequently deserted the worship of God for idols till their captivity, 588 B.C. Constantine, emperor of Rome, ordered all the heathen temples to be destroyed, and all sacrifices to cease, A.D. 330. *Dufresnoy*. The Saxons re-established idolatry in 473. It gave way in Britain, after the coming of Augustin, 599. See *Iconoclasts*, *Week*.

IDSTEDT (N. Germany). Here the insurgent army of Holstein and Schleswig was defeated by the Danes, July 25, 1850.

They revolt against Abaziah, 892; and are severely defeated by Amaziah 827	Herod the Great, son of Antipater an Idumæan, king of Judæa 40

ILIUM (Asia Minor). A city was built here by Dardanus, and called Dardania, 1480 B.C. Troy (*which see*), another city, was founded by Troas, about 1341 B.C.; and Ilus, his successor, called the country *Ilium*.

ILLINOIS, a western state of North America, was settled in 1749, and admitted into the Union Dec. 3, 1818. Capital, Springfield.

ILLUMINATED BOOKS. The practice of adopting ornaments, drawings, and emblematical figures, and even portraits, to enrich MSS., is of great antiquity. Varro wrote the

lives of 700 illustrious Romans, which he embellished with their likenesses, about 70 B.C. *Plin. Nat. Hist.* Some beautiful missals and other works were printed in the 15th and 16th centuries, *et seq.*; and fine imitations have lately appeared.

ILLUMINATI, heretics who sprang up in Spain, where they were called Alumbrados, about 1575. After their suppression in Spain, they appeared in France. One of their leaders was friar Anthony Buchet. Their chief doctrine was that they obtained grace and perfection by their sublime manner of prayer. A secret society bearing this name, opposed to tyranny and priestcraft, was founded at Ingoldstadt, Bavaria, by Dr. Adam Weishaupt, in May, 1776, and was suppressed in 1784-5.

ILLUSTRATED LONDON NEWS, the earliest publication of the kind, established by Mr. Herbert Ingram, M.P., first appeared on May 14, 1842. Mr. Ingram was drowned in Lake Michigan Sept. 8, 1860.

ILLYRIA (now Dalmatia, Croatia, and Bosnia), after several wars (from 230 B.C.) was made a Roman province, 167 B.C. In 1809 Napoleon I. gave the name of Illyrian provinces to Carniola, Dalmatia, and other provinces, then part of the French empire, now Carinthia, Carniola, &c.

IMMORTALS (Greek, *athanatoi*), the flower of the Persian army, limited to 10,000 in number, and recruited from the nobility alone, about 500 B.C. The name was also given to the body-guard of the emperors at Constantinople in the 4th and 5th centuries.

IMPEACHMENT. The first impeachment by the commons house of parliament, and the first of a lord chancellor, Michael de la Pole, earl of Suffolk, was in 1386. By statute 12 & 13 Will. & Mary it was enacted that no pardon under the great seal shall be pleaded to an impeachment by the commons in parliament, 1700.

Trial of Caroline, queen of George IV., by bill of pains and penalties, before the house of lords, commenced Aug. 16; Mr. Brougham entered on her majesty's defence, Oct. 3; and the last debate on the bill took place Nov. 10, 1820. See *Queen Caroline*.

IMPERIAL GUARD of France, was created by Napoleon from the Guard of the Convention, the Directory, and the Consulate, when he became emperor in 1804. It consisted at first of 9775 men, but was afterwards enlarged. It was subdivided in 1809 into the old and young guard. In Jan. 1814, it numbered 102,706. It was dissolved by Louis XVIII. in 1815, but revived by Napoleon III. in 1854. It took part in the Crimean war in 1855.

IMPOSTORS. The names and pretensions of religious, political, and other impostors would fill a volume; they have been of every country, of every age. The following are among the most extraordinary:—

Aldebert, a Gaul, who, in 743, pretended he had a letter from the Redeemer, which fell from heaven at Jerusalem; he seduced multitudes to follow him into woods and forests, and to live in imitation of John the Baptist. He was condemned by a council at Rome in 745.

Mahomet promulgated his creed, 604. See *Mahometanism*.

Gonzalvo Martin, a Spaniard, pretended to be the angel Michael in 1359; he was burnt by the inquisition in Spain in 1360.

George David, son of a waterman at Ghent, styled himself the son of God, sent into the world to adopt children worthy of heaven: he denied the resurrection, preached against marriage, in favour of a community of women, and taught that the body only could be defiled by sin; he had many followers; died at Basle, 1556, promising to rise again in three years.

Otfref, a monk, pretended to be Demetrius the son of Ivan, czar of Muscovy, whom the usurper Boris had put to death; he maintained that another

child had been substituted in his place: he was supported by the arms of Poland; his success astonished the Russians, who invited him to the throne, and delivered into his hands, Feodor, the reigning czar, and all his family: his imposture being discovered, he was assassinated in his palace, 1666.

Sabbata Levi, a Jew of Smyrna, amused the Turks and Jews a long time at Constantinople and other places, by personating our Saviour, 1666.

IMPOSTORS EXTRAORDINARY IN BRITISH HISTORY.

A man pretending to be the Messiah, and a woman assuming to be the Virgin Mary, were burnt, 1222.

In 1487, Lambert Simmel, tutored by Richard Simon, a priest, supported by the duke of Burgundy, personated the earl of Warwick. Simmel's army was defeated by Henry VII., and he was made a scullion in the king's kitchen.

For Perkin Warbeck's imposture in 1492, see *Warbeck*.

Elizabeth Barton, styled the Holy Maid of Kent, spirited up to hinder the Reformation, by pretending to inspirations from heaven, foretelling that the king would have an early and violent death if he divorced Catherine of Spain, and married Anne Boleyn. She and her confederates were hanged at Tyburn, 1534.

In 1553 (first year of Mary's reign, after her marriage with Philip of Spain), Elizabeth Croft, a girl 18 years of age, was secreted in a wall, and with a whistle, made for the purpose, uttered many

seditious speeches against the queen and the prince, and also against the mass and confession, for which she did penance.

William Haeket, a fanatic, personated our Saviour, and was executed for blasphemy, 1591.

Valentine Greatrix, an Irish impostor, who pretended to cure all diseases by stroking the patient: his imposture deceived the credulous, and occasioned very warm disputes in Ireland and England about 1666. Boyle and Flamsteed believed in him.

Dr. Titus Oates. See *Oates*.

Robert Young, a prisoner in Newgate, forged the hands of the earls of Marlborough, Salisbury, and other nobility, to a pretended association for restoring king James: the lords were imprisoned, but the imposture being detected, Young was fined 100*l.*, and put in the pillory, 1692. He was afterwards hanged for coining.

Three French refugees pretend to be prophets, and raise tumults; convicted as impostors, Nov. 1707. Mary Tofts of Godalming, by pretending she bred rabbits within her, so imposed upon many persons (among others, Mr. St. Andre, surgeon to the king), that they espoused her cause, 1726.

The Cock-lane ghost imposture by William Parsons, his wife, and daughter, 1762. See *Cock-lane Ghost*.

Johanna Southcote, who proclaimed her conception of the Messiah, and had a multitude of followers; she died, Dec. 27, 1814.

W. Thom. See *Thomites*.

Joseph Smith. See *Mormonites*.

IMPRESSMENT OF SEAMEN, affirmed by sir M. Foster to be of ancient practice. The statute 2 Rich. II. speaks of impressment as a matter well known, 1378. The first commision for it was issued 29 Edw. III. 1355. Pressing, either for the sea or land service, declared to be illegal by the British parliament, Dec. 1641. Impressment was not resorted to in the Russian war, 1854-5.

IMPRISONMENT FOR DEBT. See *Arrests*, *Debtors*, and *Ferrars' Arrest*.

IMPROPRIATION (applying ecclesiastical property to lay purposes). On the suppression of abbays in 1539, their incomes from the great tithes were distributed among his courtiers by Henry VIII.; and their successors constitute 7597 lay impropiators.

INCENDIARIES. The punishment for arson was death by the Saxon laws and Gothic constitutions. In the reign of Edward I. incendiaries were burnt to death. This crime was made high treason by statute 8 Hen. VI. 1429; and it was denied benefit of clergy, 21 Hen. VIII. 1528. Great incendiary fires commenced in and about Kent, in August, 1830; and in Suffolk and other counties since. The punishment of death was remitted, except in special cases, in 1827. The acts relating to arson were amended in 1837 and 1844.

INCH. See *Standard*. The length was defined in 1824 by the declaration by act of parliament, that 39.13929 inches is the length of a seconds pendulum in the latitude of London, vibrating in vacuo at the sea level, at the temperature of 62° Fahrenheit.

INCOME TAX. In 1512, parliament granted a subsidy of two-fifteenths from the commons, and two-tenths from the clergy, to enable the king to enter on a war with France. *Repin.* In 1798, Mr. Pitt proposed and carried, amid great opposition, increased taxes "as an aid for the prosecution of the war" with France. On Jan. 9, 1799, this act was repealed, and graduated duties on income imposed, beginning with 6*o*l. per annum. On Aug. 11, 1803, was passed the "property tax," which levied a rate of 5 per cent. on all incomes above 150*l.* and lower rates on smaller incomes. In 1805, it was increased to 6½ per cent.; and in 1806, was raised to 10 per cent., embracing the dividends at the bank. It produced—

rate of 7*d.* in the pound (2*l.* 18*s.* 4*d.* per cent.) per ann. to subsist for three years, passed June 22, 1842.
 It produced about 5,350,000*l.* a-year; and enabled sir Robert Peel to repeal about 12,000,000*l.* of indirect taxes.
 Renewed for three years in March, 1845: and March, 1848.*
 Continued for one year in 1851 and 1852.
 The tax of 7*d.* limited to seven years (till 1860); to be gradually reduced in amount; but all incomes from 100*l.* to 150*l.* made liable to 5*d.* in the pound for all that period: the tax also extended to Ireland, June, 1853.
 In consequence of the Crimean war, the rate was doubled, 1854, 14*d.*
 2*d.* more added to the tax on incomes above 150*l.*, and 1*d.* on those between 100*l.* and 150*l.*: the former being 18*d.*, the latter 11*d.* in the pound, 1855.
 The former assessment reduced to 7*d.*, the latter to 5*d.*, 1857.
 Both become 5*d.*, 1858.
 The former raised to 9*d.*, the latter to 6*d.*; and the

tax on incomes, derived from lands, tenements, &c., raised from 3½*d.* to 5½*d.* for England, and from 2½*d.* to 4*d.* for Scotland and Ireland, July, 1859.
 The assessment on incomes raised—to those above 100*l.* to 7*d.*; to those above 150*l.* to 10*d.*
 [The object of the increase was to provide for a deficiency occasioned by extra expenditure for defending the country, April, 1860.]
 A committee to inquire into the working of the income tax appointed, Feb. 14, 1861.
 Reduction of the last assessment from 7*d.* to 6*d.*, and from 10*d.* to 9*d.* for three-quarters of the financial year 1861-2.
 The rates of 6*d.* and 9*d.* to continue, April 1862.
 The rate of 7*d.* on all chargeable incomes; 3½*d.* on farms, &c., in England; and 2½*d.* in Scotland and Ireland. Incomes under 100*l.* a-year exempted; those above 100*l.* and under 200*l.* allowed an abatement on 60*l.*, June 8, 1863.
 The rate of 6*d.* on chargeable incomes, with some exemptions and abatement, May 13, 1864.
 The rate of 4*d.* on chargeable incomes, with same exemptions and abatement, May, 1865.

INCURABLES. The Royal Hospital for incurables, founded by Dr. Andrew Reed, at Carshalton in Surrey, in 1850, has since been removed to Putney.

INDEMNITY BILL, by which the minister of the crown or the government generally, is relieved from the responsibility of measures adopted in extreme and urgent cases, without the previous sanction of parliament. One was passed April 19, 1801; another to indemnify ministers against their acts during the suspension of the *Habeas Corpus* act, was carried in the commons (principal divisions, 190 to 64); and in the lords (93 to 27); March 10, 1818. In 1848 and 1857, bills of indemnity were passed for the suspension of the Bank Charter act by the ministry. See *Oblivion*. An indemnity bill is passed at the end of every session of parliament for persons who transgress through ignorance of the law. The practice began in 1715.

INDEPENDENTS, or CONGREGATIONALISTS, hold that each church or congregation is independent of all others, and may govern itself in religious matters. They say there is no absolute occasion for synods or councils, whose resolutions may be taken to be wise and prudent advice, but not as decisions to be peremptorily obeyed; they affirm that one church may advise or reprove another, but has no authority to excommunicate or censure. Robert Brown preached these views in 1585, but, after 32 imprisonments, he eventually conformed to the Established Church. A church was formed in London in 1593, when there were 20,000 Independents. They were driven by persecution to Holland, where they formed several churches; that at Leyden was under Mr. Robinson, often regarded as the author of Independency. In 1616 Henry Jacobs returned to England and founded a meeting-house. Cromwell, who was himself of their views, obtained them toleration, in opposition to the Presbyterians. The Independents published an epitome of their faith, drawn up at a conference at the Savoy, in 1658; and the Congregational Union of England and Wales, formed in 1831, published their "Declaration of Faith, Order, and Discipline," in 1833. In 1851, they had 3244 chapels for 1,067,760 persons in England and Wales. See *Worship*. The first Independents in Scotland were the Glasites, *which see*. The first Independent church in America was founded by John Robinson, at Plymouth, New England, in 1620.

of heretical books, by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity, was confirmed by a bull of pope Clement VIII. in 1595. Most of the celebrated works of France, Spain, Germany, and England, are prohibited. On June 25, 1864, Hugo's "*Les Misérables*" and many other books were added to the number.

INDIA or HINDOSTAN. The Hindoo histories ascribe their origin to a period ages before the ordinary chronologies. A race of kings is mentioned as reigning 2300 B.C., and Buddhism is said to have been introduced 956 B.C. Many ancient nations, particularly the Tyrians and Egyptians, carried on much commerce with India. It was conquered by Darius Hystaspes, who formed an Indian satrapy, in 512 B.C., and by Alexander, 327 B.C., and subsequently the intercourse between India and the Roman empire was much increased. The authentic history of Hindostan is reckoned to commence with the conquests of Mahmud Ghazni, A.D. 1004. *Rennell.* See *Bengal, Bombay, Calcutta, Madras, and Oude*, for further details.* For the new route to India, see *Waghorn*.

 [The Mogul empire now became merely nominal, distinct and independent sovereignties being formed by numerous petty princes. The emperors were of no political consequence from this period. In 1761, Shah Alum II. attacking the English was defeated at Patna. In 1764, after the battle of Buxar, he was thrown upon the protection of the English, who established him at Allahabad. After the victory at Delhi in 1803, gen. Lake restored the aged monarch to a nominal sovereignty, which descended at his death to his son, Akbar Shah. Akbar

died in 1837, and was succeeded by the last king of Delhi (his son), who received a pension of about 125,000. per annum. He joined the mutiny in 1857; was tried in 1858, and transported to Rangoon; died there, Nov. 11, 1862.]

* On the introduction of the improved (Enfield) musket in the Indian army, greased cartridges had been brought from England. These were objected to by the native soldiers, and the issue of them was immediately discontinued by orders in Jan. 1857. A mutinous spirit however gradually arose in the Bengal native army. In March several regiments were disbanded, followed by others, till in June the army had lost by disbandment and desertion, about 30,000 men. On April 5, a sepoy, and on April 20, a jemadar, or native lieutenant, were executed. At the end of May 14 regiments were lost. In April, 85 of the 3rd Bengal native cavalry at Meerut refused to use their cartridges. On May 9, they were committed to gaol. On Sunday, the 10th, a mutiny in the native troops broke out; they fired on their officers, killing col. Finnis and others. They then released their comrades, massacred many Europeans, and fired the public buildings. The European troops rallied and drove them from their cantonments. The mutineers then fled to Delhi, *which see*.

† At the end of June the native troops at the following places were in open mutiny: Meerut, Delhi, Ferozepore, Allyghur, Roorkee, Mirdam, Lucknow, Cawnpore, Nussersabad, Narnah, Hansi, Hissar, Jhansi, Mehidpore, Jullundur, Aizinghur, Futtehghur, Jaunpore, Bareilly, Shahjehanpore, Allahabad. At the

INDIA COMPANY. The first commercial intercourse of the English with the East Indies, was a private adventure of three ships fitted out in 1591. Only one of them reached India; and, after a voyage of three years, the commander, captain Lancaster, was brought home in another ship, the sailors having seized on his own; but his information gave rise to a mercantile voyage and the company's first charter, in Dec. 1600, which was renewed in 1609, 1657, 1661, 1693, and 1744. Its stock in 1600 consisted of 72,000*l.*, when it fitted out four ships; meeting with success, it continued to trade. India stock sold at 500*l.* for a share of 100*l.* in 1683.

A new company (the "English") was chartered in 1698, and the old (the "London") suspended from trading for three years; the two were united in 1702
 Privileges of the company continued till 1783 1744
 Affairs of the company were brought before parliament, and a committee exposed a series of intrigues and crimes Aug. 1772
 As remedial measures, two acts passed (one authorised a loan of 1,000,000*l.* to the company; the other (celebrated as the *India bill*) effected most important changes in the constitution of the company and its relations to India. A governor-general was appointed to reside in Bengal, to which the other presidencies were now made subordinate; a supreme court of judicature was instituted at Calcutta: the salary of the governor was fixed at 25,000*l.* per year; that of the council at 10,000*l.* each; and of the chief judge at 8000*l.*: the affairs of the company were controlled; all the departments were re-organised, and all the territorial correspondence was henceforth to be laid before the British ministry) June, 1773

Mr. Pitt's bill appointing the Board of Control (*which see*), passed May 18, 1784
 The company's charter was renewed for 20 years in 1793; and in (the trade with India thrown open) 1813
 The trade to China opened and the Charter renewed till 1854 1833
 The government of India was continued in the hands of the company till parliament should otherwise provide 1853
 In consequence of the mutiny of 1857, and the disappearance of the company's army, the government of India was transferred to the crown, the Board of Control was abolished, and a Council of State for India instituted by the act 21 & 22 Vict. c. 106, which received the royal assent Aug. 2, 1858
 The company's political power ceased on Sept. 1: and the queen was proclaimed as Queen of Great Britain and the Colonies, &c., in the principal places in India, amid much enthusiasm Nov. 1, 1858
 The EAST INDIA-HOUSE built 1726; enlarged and a new front erected, 1799; sold with the furniture, 1861; pulled down in Sept. and Oct. 1862

INDIA, COUNCIL OF, established in 1858 in the place of the board of control (*which see*). It consists of 15 members (salary 1200*l.* a-year), eight of whom are appointed by the queen,

* Several of these appointments are those of governors-general provisionally, having been first in rank in the council, and holding office on the resignation of the governors-general, or pending their arrival and assumption of the government: as, for instance, sir Alured Clarke, sir George Hilario Barlow, hon. William Butterworth Bayley, William Wilberforce Bird, &c. The appointments of governors-general were, of course, of earlier date than their assumption of office.

† Lord Palmerston brought in a bill for the purpose on Feb. 12, which was accepted by the house on Feb. 18. He resigned on the following day, and the bill dropped. A similar bill was introduced by Mr. Disraeli on March 12; but many of its details being objected to, it was withdrawn. On lord John Russell's proposition, the house proceeded to consider the matter by way of resolutions: on June 17, lord Stanley brought in the above mentioned bill, being the third on the subject introduced during the session.

and seven elected by the directors of the East India company. The members may not sit in parliament. The council met first on Sept. 3, 1858, when lord Stanley, secretary of state for India, presided. In June, 1859, he resigned, and was succeeded by sir Charles Wood. The members of the *first* council are here recorded :—

J. Pollard Willoughby.
Sir John Lawrence.
Sir Henry Montgomery.
Sir Proby Cautley, and
Wm. Arbuthnot.

INDIAN MUSEUM, THE, was proposed by sir C. Wilkins and approved by the East India company in 1798. The valuable collections were removed from Leadenhall-street to Fife House, behind the chapel royal, Whitehall, and opened July 24, 1861.

INDIANA, a western state of North America, was settled in 1730, and admitted into the Union Dec. 11, 1816.

INDIANS occupying the south-western parts of the United States, in direct connexion with the government in 1861, were numbered at 239,506. The larger tribes are the Cherokees (22,000), the Choctaws (18,000), the Creeks (13,550), and the Chickasaws (5000). A large proportion are in comfortable circumstances, and have schools and churches; other tribes are the Delawares, Saes, Foxes, Shawnees, Sioux, and Ioways. With regard to the North American civil war in 1861, the Choctaws joined the Confederates, who permitted two Choctaw delegates to sit in congress; the first being Sampson Folsom and Eastman Loman; but the principal chief of the Cherokees, on May 4, 1861, issued a proclamation of neutrality, which was maintained with great difficulty.

INDIA RUBBER. See *Caoutchouc*.

INDICTION, a cycle of tributes orderly disposed for fifteen years, not known before the time of Constantine. The first examples in the Theodosian code are of the reign of Constantius, who died 361.—In memory of the great victory obtained by Constantine over Mezentius, 8 Cal. Oct. 312, the council of Nice ordained that the accounts of years should be no longer kept by the Olympiads, but by the Indiction, which has its epocha 313, Jan. 1. It was first used by the Latin church in 342.

INDIGO. Its real nature was so little known in Europe, that it was classed among minerals, as appears by letters-patent for erecting works to obtain it from mines in the principality of Halberstadt, dated Dec. 23, 1705; yet what Vitruvius and Pliny called *indicum* is supposed to have been our indigo. *Beckmann*. The first mention of indigo occurs in English statutes in 1581. Its cultivation was begun in Carolina in 1747. The quantity imported into Great Britain in 1840 was 5,831,269 lbs.; in 1845, 10,127,488 lbs.; in 1850, 70,482 cwt.; in 1859, 63,237 cwt.; in 1861, 83,109 cwt.; in 1864, 76,214 cwt. The use of coal-tar dyes will no doubt lessen the consumption of indigo. See *Aniline*.

INDIUM, a metal discovered in the arsenical-pyrites of Freiberg by F. Reich and T. Richter in 1863. Its name is due to its giving an indigo blue ray in its spectrum.

INDUCTION of Electric currents, discovered by Faraday, and announced in his "Experimental Researches," published in 1831-2. Ruhmkorff's magneto-electric induction coil was constructed in 1850.

INDULGENCES for the pardon of sin, commenced by Leo III. about 800, were granted in the 11th century by Gregory VII., and by Urban II., and others, in the 12th century as rewards to the crusaders. Clement V. was the first pope who made public sale of indulgences, 1313. In 1517, Leo X. published general indulgences throughout Europe, and the resistance to them led to the Reformation.

INDUSTRIAL SCHOOLS ACT, 21 & 22 Vict. c. 48 (1857) was enacted to make better provision for the care and education of vagrant, destitute, and disorderly children. Another act was passed, 1861. Forty-seven of these schools had been certified under these acts, up to Sept. 29, 1864.

INFANTICIDE, FEMALE, was very prevalent in barbarous countries. Lord Macartney stated that 20,000 infants were killed annually; it is now gradually decreasing in India. On Nov. 12, 1851, Mr. Raikes induced the Chohan chiefs to agree to resolutions against it, and a great meeting in the Punjab was held for the same purpose, Nov. 14, 1853.

INFANTRY, the modern term for foot soldiers, much improved during the wars of

Charles V. and Francis I. in the 16th century. The British army comprised 99 regiments of regular infantry in 1858, when the Canadians raised a regiment which is termed the 100th. The number, now 109, includes the Indian army.

INFANT SCHOOLS began in London in 1818.

INFERNAL MACHINE. See *France*, 1800—1835; and *Baltic*, note.

INFIRMARIES. Ancient Rome had no houses for the cure of the sick. Diseased persons were carried to the temple of Æsculapius for cure, as Christians were taken to churches. Institutions for the accommodation of travellers, the indigent, and sick, and the first infirmaries or hospitals were built close to cathedrals and monasteries. The emperor Louis II. caused infirmaries situated on mountains to be visited, 855. In Jerusalem the knights and brothers attended on the sick. There were hospitals for the sick at Constantinople, in the 11th century. The oldest mention of physicians and surgeons established in infirmaries occurs in 1437. *Beckmann*. See *Hospitals*.

INFUSORIA. See *Animalcules*.

INGOUR, a river rising in the Caucasus and falling into the Black Sea. Omer Pasha, marching to the relief of Kars, crossed this river on Nov. 6, 1855, with 10,000 men, and attacked the Russians 12,000 strong, who, after a struggle, retreated with the loss of 400 men. The Turks had 68 killed and 242 wounded. Kars, however, was not saved.

INK. The ancient black inks were composed of soot and ivory black, and Vitruvius and Pliny mention lamp-black; but they had ink of various colours, as red, gold, silver, and purple. Red ink was made of vermilion and gum. INDIAN INK was brought from China, and must have been in use by the people of the east from the earliest ages, most of the artificial Chinese productions being of very great antiquity. It is usually brought to Europe in small quadrangular cakes, and is composed of a fine black and animal glue. *Beckmann*. INVISIBLE OR SYMPATHETIC INKS, fluids which, when written with, will remain invisible until after a certain operation, were known at early periods. Ovid (A.D. 2) teaches young women to deceive their guardians by writing to their lovers with new milk, and afterwards making the writing legible with ashes or soot. Receipts for preparing invisible ink were given by Peter Borel, in 1653, and by Le Mort, in 1669. *Beckmann*.

INKERMANN (Crimea). The Russian army (about 40,000) having received reinforcements, and being encouraged by the presence of the granddukes Michael and Nicholas, attacked the British (8000) near the old fort of Inkermann, before daybreak, Nov. 5, 1854. The latter kept their opponents at bay for six hours till the arrival of 6000 French. The Russians were then driven back, leaving behind 9000 killed and wounded. The loss of the allies was 462 killed, 1952 wounded, and 191 missing. Sir George Cathcart, and generals Strangways, Goldie and Torrens, were among the slain. On Nov. 15, 1855, an explosion of about 100,000 lbs. of gunpowder occurred near Inkermann, and caused great loss of life.

INLAND REVENUE OFFICE was constituted in Feb. 1849. It comprises the excise, stamps, and taxes.

INNS OF COURT, London, were established at different periods, in some degree as colleges for teaching the law. The Temple was founded, and the church built by the Knights Templars, 32 Hen. II. 1185. The Inner and Middle Temple were made inns of law in the reign of Edw. III. about 1340; the Outer not until the reign of Elizabeth, about 1560. *Stow's Survey*. The following inns were founded, viz. :—

Barnard's Inn, an inn of Chancery	1445	Lyon's Inn	1420
Clement's Inn, 18 Edw. IV.	1478	New Inn, 1 Hen. VII.	1485
Clifford's Inn, 20 Edw. III.	1345	Serjeants' Inn, Fleet street	1429
Furnival's Inn, 5 Eliz.	1563	Serjeants' Inn, Chancery-lane	1666
Gray's Inn, 32 Edw. III.	1357	Staples Inn, 4 Hen. V.	1415
Lincoln's Inn, 4 Edw. II.	1310 or 1312	Thavies' Inn, 10 Hen. VIII.	1519

INOCULATION. See *Small Pox*. Lady Mary Wortley Montagu introduced inoculation from small pox to England from Turkey. In 1718 she had her own son inoculated at Adrianople, with perfect success; and she was allowed to have it tried, for the first time in England, on seven condemned criminals, 7 Geo. I. 1721. In 1722 two of the royal family were inoculated. The practice was preached against by many of the bishops and other clergy, from that period until 1760. Dr. Mead practised inoculation very successfully up to 1754, and Dr. Dimsdale, of London, inoculated Catherine II., empress of Russia, in 1768. Of 5964 who were inoculated in 1797-99, only three died. Inoculation was forbidden by

law in 1840. *Vaccine* inoculation was introduced by Dr. Jenner, Jan. 21, 1799; he had discovered its virtue in 1796, and had been making experiments during the intermediate three years. An hospital for inoculation was erected in 1746. See *Sheep*.
